CURRICULUM GUIDE

HVAC/R–Energy Management Engineering Technology
Associate in Applied Science Degree

Curriculum Code: 1257 (Effective Fall 2009 – Summer 2014)

This curriculum will teach students current methods of identifying and performing efficiency evaluations on different types of heating, ventilation and air conditioning systems found in commercial and industrial buildings and methods of adjusting and balancing equipment for maximum performance. This curriculum also addresses designing, retrofitting, testing and balancing on a problem–solving level to prepare technologists to fill the wide technological gap between service technicians and engineers. Graduates will be able to seek employment in manufacturing, contracting, building operations, and in the engineering of commercial, institutional and industrial building systems. **Not all courses in this program transfer to all colleges.** Students planning to transfer should see an academic advisor or counselor before enrolling in any course.
