## CURRICULUM GUIDE

Computer Auditor  
Associate in Business Degree

Curriculum Code: 0253 (Effective Fall 2014 – Summer 2019)

Computer auditors plan and conduct audits of data processing systems and applications to safeguard assets, ensure accuracy of data, and promote operational efficiency. They may interview workers and examine records to gather data by following an audit plan and using the computer. They analyze data gathered to evaluate effectiveness of controls and determine accuracy of reports and efficiency and security of operations. They devise, write, and test computer programs necessary to obtain information needed for audit. They devise controls for new or modified computer applications to prevent inaccurate calculations and data loss, and to ensure discovery of errors. This degree program has been created in response to a request from the Michigan Auditor General's office. It is recommended for use by those who are currently auditors.
