## CURRICULUM GUIDE

Automotive Technology, Drivability and Electrical Diagnostic Specialist  
Certificate of Achievement

Curriculum Code: 1760 (Effective Fall 2015 – Summer 2020)

### Program Description

This program prepares individuals to work as an automotive drivability diagnostic technician. Students will build upon the ASE Maintenance and Light Repair (MLR) skills to further their education in the engine drivability diagnosis field of study. Students will specialize in gasoline and light duty diesel drivability diagnostic strategies and the maintenance and repair of these systems. This prepares the student for ASE testing and certification in these specialty areas. Certification in all eight (8) areas leads to an ASE Master Technician certification that is recognized nationally. ASE Certified technicians are more desirable to employers. All credits in this program apply toward the Automotive Technologies Associate degrees. The Automotive Technology Program is a National Automotive Technicians Education.

### PREREQUISITES

Students should see [Course Descriptions](#) for course prerequisite information. See [Academic Assessment and Placement Testing for Student Success](#) for skills assessment and advising information.
