CURRICULUM GUIDE

Automotive Technology, Engine and Transmission Overhaul Specialist
Certificate of Achievement

Curriculum Code: 1762 (Effective Fall 2015 – Summer 2020)

This program prepares individuals to work as an automotive engine, automatic transmission, manual transmission, and driveline systems overhaul specialist. Students will build upon the ASE Maintenance and Light Repair (MLR) skills to specialize in repair, maintenance, and overhaul of engine, automatic transmission, manual transmission, and driveline systems of the automobile. This prepares the student for ASE testing and certification in these specialty areas. Certification in all eight (8) areas leads to an ASE Master Technician certification that is recognized nationally. ASE Certified technicians are more desirable to employers. All credits in this program apply toward the Automotive Technologies Associate degrees. The Automotive Technology Program is a National Automotive Technicians Education Foundation (NATEF) Certified Training Program, evaluated by the National Institute for Automotive Service Excellence (ASE).
