

LANSING COMMUNITY COLLEGE

CURRICULUM GUIDE

Electrical Apprenticeship
Certificate of Achievement

Curriculum Code: 1570 (Effective Fall 2016 – Summer 2021)

This curriculum must be taken while working for an electrical contractor or other licensed employer as a registered apprentice. It is designed to provide electrical apprentices with a background in applied electrical theory and the basic skills necessary to a practicing electrician. This certificate fulfills all related trade instruction required for a United States Department of Labor, Office of Apprenticeship registered apprenticeship program in compliance with State of Michigan requirements for apprentice electricians.

PREREQUISITES

Students should see [Course Descriptions](#) for course prerequisite information. See [Academic Assessment and Placement Testing for Student Success](#) for skills assessment and advising information.

MINIMUM TOTAL	33.5

NOTES:

1. Students who have already completed DCTM 102, HVAC 102, METS 102 or WELD 102 with a grade of 2.0 or higher may substitute one of these courses for ELTE 102. Any of these courses may also be used to fulfill the prerequisite for ELTE 108, ELTE 109, and ELTE 121.
2. Current State of Michigan rules limit the number of hours individuals can count towards their required education as an apprentice electrician outside the time they are registered with a company as an apprentice in the state. Students should see a program advisor before pursuing this curriculum.
3. Lansing Community College provides related trade instruction for apprenticeships but does not sponsor apprentices directly. Apprenticeships must be pursued with individual electrical contractors or businesses.
4. To receive a certificate of achievement from Lansing Community College, a student must maintain a grade point average of 2.0 or above in the courses required for the certificate. Apprenticeship sponsors may have additional grade point average requirements.
5. Students who start the curriculum in a spring semester and/or select ELTE courses in “CHOICES 2, 3 or 4” should contact a faculty member in the Utility & Energy Systems Program for advising on sequencing their courses.

SUGGESTED COURSE SEQUENCE

Students should see course descriptions to find out when departments plan to offer courses. Students who for any reason are unable to follow the course sequence suggested below (for example, those who are part-time, have transferred in courses from another school, or have prerequisites to fulfill) should contact an academic advisor for help with adjustments.
