

Computing Grade Point Average

A student's grade point average (GPA) is determined on the following basis:

| Numerical Grade | GPA Points |
|-----------------|------------|
| 4.0 | 4.0 |
| 3.5 | 3.5 |
| 3.0 | 3.0 |
| 2.5 | 2.5 |
| 2.0 | 2.0 |
| 1.5 | 1.5 |
| 1.0 | 1.0 |
| 0.0F | 0.0 |
| 0.0U | 0.0 |

"00A," "0.0FA," "0.0UA," "FA," "I," "NR," "NS," "P," "TR," "TRL," "TRP," "W," "X," "ZF," and "ZU" grades are not included in calculating grade point averages.

To compute the grade point average (GPA), the number of GPA points is divided by GPA hours (credits) taken during the semester.

- For example, a student who receives 5 credit hours of 4.0, 5 credit hours of 3.0, and 5 credit hours of 2.0 would have a total of 45 GPA points. The student in this example would have a 3.0 GPA (45 GPA points/15 credits).
