Looking to the year 2000

Over the years Lansing Community College has made a significant impact on the lives of those it serves. The College is a reflection of the community, evolving and changing with flexibility and innovation in response to the needs of business, industry, government, labor and education. This is evidenced in the wide variety of education and training available at LCC today. In keeping with its mission to provide the community with relevant, quality and timely education and training at a reasonable price, the College has embarked on some exciting times—looking to the future through the development of plans that will upgrade facilities and services to better meet instructional needs in the years ahead.

Please keep this catalog for future reference to the lifelong learning opportunities that are available at Lansing Community College. Education is a life-long process, and LCC continues to be a resource for its students throughout the nation and the world. Futures begin at LCC, and they can be enriched—over and over again, for a lifetime.

COMMITMENTS

Lansing Community College has evolved from a partnership of the community, students, faculty and staff. The College is committed to the idea that education today is a lifelong process. With their diverse personal and career needs, students demand from the educational marketplace relevant instruction, flexible scheduling, and individualized services. The College believes it must respond to these students with instruction that has quality, timeliness and relatively low cost. To meet this commitment the College works with business, industry, labor, government, community agencies and educational institutions. The College measures its vitality by how well it responds to the students and community.

The College recognizes that in this world of economic and technological change there is a growing interdependence of this metropolitan community with other communities throughout the world. The challenge is to be effective in that larger community, enhancing understanding and cooperation through international education and networking resources.

The College is committed to career training programs, college transfer programs, basic skills programs, personal and professional seminars, business and industry support programs, and community service programs. The College is also committed to the idea that the individual and the community are best served when the programs and courses assist students to integrate learning with experience. Programs and courses are designed to help students achieve career, societal, and personal competencies through the mastery of skills and the study of contemporary and historical human values.

The College has committed itself by purpose, structure and resources to a learning environment that is both traditional and non-traditional. This environment is supported by an experienced faculty and staff of professional educators and specialists from business, industry, labor and government. Because the urban campus is complemented by a network of learning centers cooperating with schools and business throughout the service area, the programs and services are more accessible to students. Through its open admissions policy, the College pledges equal educational opportunity to all in its service area.

MAJOR GOALS

The College concludes that it can best meet its commitments by accepting the following as its major goals:

1. To maintain continuous review and evaluation of the essential of an effective learning environment—instruction, resources, and facilities—so that the learning programs have quality and relevance to the individual and the community.

2. To support an educational environment that permits a person not only to acquire a mastery of skills of career goals but also to enhance self identity and clarify personal values.

3. To develop and support faculty and staff committed to academic excellence and professional competence in instructional development and delivery.

4. To provide student services including counseling, employment placement, financial assistance, informational services, tutorial assistance, and college entry services according to the student's academic, vocational, and personal needs.

5. To provide opportunities for students to develop leadership and social interaction skills through formal and informal student activities.

6. To make available a general education program to students.

7. To provide developmental programs for students to achieve basic competencies in reading, writing and mathematics and to update those skills necessary to function in this highly technical world.

8. To provide career-oriented courses and programs for students now employed or contemplating employment.

9. To provide courses and curricula in the arts, sciences, business, and other preprofessional programs that will articulate with degree programs at other colleges.

10. To confer certificates and associate degrees.

11. To develop and offer specialized training through consultative relationships with business, labor, industry and government.

12. To provide learning and instructional support services that meet the diverse information needs of students, staff and community.

13. To provide programs and activities that enhance the community's cultural life and economic well being.
STRATEGIC GOALS FOR LANSING COMMUNITY COLLEGE

1. Maintain and develop the highest standards of academic and curricular excellence in order to promote student success, recruitment and retention.

2. In recognition and awareness of the value of the College's human resources, continue to provide professional development activities as a commitment to faculty, staff, students and community.

3. Recruit faculty and staff to promote academic excellence while continuing to emphasize affirmative action and equal opportunity.

4. Emphasize critical/analytical thinking skills across the College's curricula.

5. Emphasize writing, reading, speaking, and listening skills across the College's curricula.

6. Develop sufficient technology skills in students, faculty and staff to enable them to function in a modern technological environment.

7. Continue to be sensitive to the issues of governance and statewide coordination and planning.

8. Continue to strengthen the College's internal and external communications.

9. Enhance the College's resource base in order to maintain the quality of its education, training, and support services.

10. Develop additional partnerships with business, industry, government, labor, public agencies, health service organizations, K-12 school districts and colleges and universities.

11. Increase the internationalization of the College's curricula and services in recognition of the competitive international marketplace and world interdependence.

12. Provide for continuous development, review, and evaluation of the College's total learning environment, using, among other analytical tools, integrated information and decision-support systems.

13. In order to protect the community's investment, provide and maintain adequate and up-to-date equipment and facilities.

14. Increase educational opportunities for students through greater emphasis on the use of learning/extension and state-of-the-art telecommunication systems.
CENTRAL ADMINISTRATION DIVISION

The Central Administration Division provides leadership and support to the College through the services of the President’s Office, and Offices of College Services, Personnel, College and Community Relations, Research and Special Projects, Equal Opportunity/Affirmative Action, Professional Development, Continuing Education, and the College Foundation. Planning, management, internal and external relations and review of College instruction and services as well as maintaining a balanced institutional budget are part of the overall functions of Central Administration.

The President’s Council serves as executive staff to the President and is comprised of the following people:

Philip J. Gannon, President
Dale M. Herder, Vice President for Administration
Bruce G. Newman, Vice President for Business and Finance
Jacqueline D. Taylor, Vice President for College and Community Relations
Ilse H. Burke, Director, Professional Development and Affirmative Action
Ronald A. Dove, Director of Personnel
Charles H. Bettinson, Executive Director, Business and Industry Institute
William R. Darr, Dean, Division of Technology and Applied Sciences
James E. Person, Dean, Division of Business
James P. Plate, Dean, Division of Telecommunication and the Arts
Neal A. Reisman, Dean, Division of Arts and Sciences
William G. Schaar, Dean, Division of Student Personnel Services

COLLEGE SERVICES DIVISION

Bruce Newman, Vice President for Business and Finance

The College Services Division provides support to the College through the services of the Business Office, Resource Development, and the departments of Information and Computer Services, Public Safety, Business Services, Accounting and Payroll, Purchasing and Physical Plant.

The objectives of the College Services Division are as follows:
- Maintain general accounting, property accounting, internal audit, timekeeping, payroll and record management.
- Develop and administer the College-wide budget.
- Purchase all supplies, materials and furnishing.
- Assist the President and the various divisions in the development of the College’s information systems and computer services, including all applications of electronics data processing equipment.
- Plan, develop and maintain all physical facilities in support of academic programs and support service programs.
- Provide dependable services for U.S. mail, courier mail, furniture moving, warehousing and inventory procedures.
- Develop and operate the public safety program to provide a safe and secure campus.
- Develop State and Federal grant applications in support of the College’s academic and supportive service programs.
- Coordinate with Marriott Corporation to provide food services for students and staff in the Arts & Sciences Building and Gannon Vocational Technical Center.
- Provide other business related services such as College insurance packages and the preparation and execution of contracts with vendors, other institutions and agencies, and consultants.

LANSDING COMMUNITY COLLEGE FOUNDATION

The Lansing Community College Foundation is a nonprofit, tax-exempt corporation, administered by an independent board of community volunteers, all concerned and dedicated to the continuing excellence of Lansing Community College. The Foundation is autonomous and exists to help the College achieve its educational purposes through building additional financial base.

The Officers and Directors are:

Horntise G. Canady, Chairperson
Judith J. Corr, Vice Chairperson
Willard E. Maldonado, Secretary
Dale R. Martin, DDS, Treasurer
Lucille E. Belen
Stephen H. Dart
Philip J. Gannon
George L. Goodell

Lansing Community College Staff
Bruce Newman
Jacqueline D. Taylor
Dear Student:

Welcome to Lansing Community College. The College first opened its doors in 1957 to a fall term class of 224 students with six classrooms in our Old Central Building. Since then, several hundred thousand students have attended LCC in their lifelong learning process. As a participant in education and training at LCC, you are special to your College.

We are partners in an adventure that we have not totally planned, with a variety of responsibilities to ourselves and others. This is my last year as President of Lansing Community College, and during these thirty-two years I have found my role has been a constant mix of administrator, student, teacher and community worker. They have been enjoyable years and I thank the College, the community and the people who made it possible.

We live in an international marketplace, making economic choices regarding materials produced across the world by workers who compete for our jobs as we compete with them. In this fast changing world, social and technological choices involve all of us in education and training throughout our lives. This is necessary from the standpoint of employment as well as a rich avocational environment...to work without music is to miss the song of life.

Your College is a part of the fabric of this Nation, State and, in particular, your Community, and you as a partner in the institution make up Lansing Community College. We are proud that more than 40,000 citizens throughout our metropolitan area attend the College each year and that most of the people who live and work in our community have at one time or another been partners with the College.

During the 1989-90 academic year, you will be using a number of new facilities on campus that will significantly help to improve our institution. Enjoy these facilities and help us take good care of them.

Learning, like life, is a joy if it has purpose and direction. When we combine this with an institution that is open and friendly, it becomes a wonderful place to learn, to become a partner and to find some answers in a very complex society. It is a time of great excitement with unlimited opportunities that call for new rigor and discipline.

Sincerely,

Philip J. Gannon
President
ACADEMIC YEAR 1989-90

FALL TERM, 1989
Preparation & Faculty/ Administration Days September 14, 20
Registration Days September 15, 18, 19
Classes Begin September 21

Graduation Day June 10
Last Class Day June 15

SUMMER TERM, 1990
Registration Day June 22
Classes Begin June 23
Independence Day July 4
Last Class Day August 17
GENERAL INFORMATION

ADMISSIONS

Lansing Community College is an "open door" community college designed to extend service to applicants possessing appropriate preparation to benefit from programs and courses offered at the College. The Admissions Department's main objective is the smooth, uncomplicated processing of qualified applicants into these courses and programs. Determination and judgment of an individual's preparation and readiness to benefit from a course or program at Lansing Community College is the responsibility of College professional personnel.

Persons who are 18 years of age or older who have graduated from high school are eligible to attend Lansing Community College. Those who do not meet these requirements may still attend LCC in special circumstances. High school students may be admitted to LCC under the dual enrollment or special admissions programs explained later in this section.

Directions for completing the admission application are:
1. Complete all items requested in the application for admission.
2. Attach a $10 application fee (check or money order made payable to Lansing Community College) to the application. This is a non-refundable fee. Once paid, the fee does not have to be paid again.
3. Lansing Community College applicants in high school or those who graduated from high school in the last year, should forward the application and fee to their high school. Your counselor or principal will complete the lower portion of the application and mail it and your high school records to Lansing Community College.
4. Other applicants may forward the application and fee to the Admissions Office, Lansing Community College, P.O. Box 40010, Lansing, MI 48901.
5. Lansing Community College provides placement assessment testing and recommendations for students in courses requiring proficiency in reading, writing, mathematics and science. Information relating to placement testing may be obtained by contacting:

Reading and Writing—Academic Enrichment Center located in Room 309 (third floor) of the Arts & Sciences Building (Phone: 483-1060). A reading placement test is given to all new students enrolling in courses in the Arts & Sciences Division.
Math—Mathematics Laboratory located in Room 309 (third floor) of the Arts & Sciences Building (Phone: 483-1900).
Science—Science Department located in Room 408 (fourth floor) of the Arts & Sciences Building (Phone: 483-1032).

Students participating in the S.T.A.R.T. Orientation Program must take the placement tests prior to attendance. Placement testing is also given in English as a second language, vocabulary and spelling for designated students.

Admission decisions that require evaluations of special circumstances, including the ability to benefit from attendance, will be considered on an individual basis for the following categories:

<table>

Applicants for admission to Lansing Community College, international students should:
1. Request an International Admissions Application from the Admissions Office at the following address:
   Admissions Office
   Lansing Community College
   P.O. Box 40010
   Lansing, MI 48901

2. Submit the completed application along with a $10 non-refundable application fee to the Admissions Office. Also submit official academic records which have been translated into English (includes high school and any college work).
3. Provide evidence of English competency by submitting official test results from one of the following:
   A. The Test of English as a Foreign Language with a score of 500 or above (TOEFL).
   B. The English Language Center test administered by Michigan State University with a score of 75 or above.

4. Submit a financial guarantee indicating the ability to cover all expenses for the entire stay in the United States. Evidence must also be provided of at least $2000 on deposit in a local bank or with the College to cover tuition and fees and living expenses for initial entry into LCC.

5. Students whose tuition and fees will be paid by a sponsoring agency must submit a letter of authorization for billing from the agency.

6. When all required information has been received, an admissions decision will be made. If the applicant is accepted, an approved I-20 form will be issued and sent along with a letter of acceptance. All admission material must be received by the college no later than six weeks prior to the first day of the term of attendance.

7. Upon acceptance, our office will assist each student with the necessary U.S. immigration guidelines and academic counseling.

8. The academic status of international students will be determined in accordance with the table reflecting standards of progress printed in this publication. In addition, requirements of the United States Immigration Service will be upheld. All international students on an F-1 or M-1 visa must successfully maintain full-time student status, twelve or more credits completed each term for three consecutive terms.

9. Admitted international students are subject to English evaluation upon arrival on campus. If evaluation indicates a need for improved English language skills, appropriate language course placement will be required. Program course work may be taken along with English improvement classes based on recommendations of College officials.

10. Lansing Community College charges an administrative fee for international students admitted under Federal, State or local government, private agency, or group contracts. This fee covers the costs of special services to the international students such as accounting services, agency reports, emergency funding, personal assistance, and contract implementation. This administrative fee is currently $125 per student per academic term.

These procedures are subject to review by the International Student Services Committee. Any changes made will be brought to the attention of the students. Admissions Office, International Student Counselor, faculty, and administrative staff.

The International Student Services Committee has been established in the Division of Student Personnel Services with the following membership:

1. Director of Admissions
2. Representative from Communication Department
3. Advisor to International Students
4. An appointed faculty member who has shown interest in foreign students
5. Dean of Student Personnel Services

The function of this Committee will be:

1. To serve as a body to review guidelines of required English proficiency for international student admission.
2. To serve as a body to review and evaluate the program of services to international students, such as sponsor documentation, transcript evaluation and academic advising.
3. To serve as an appeal and review body for granting admission to international students.
4. To serve as an appeal and review body for withdrawal of the College based on noncompliance with the College's and immigration regulations.

International students who would like copies of documents submitted to Lansing Community College for admission purposes must request these copies no later than one year after the last term of attendance with the College. Lansing Community College does not keep such documents beyond legally required time limits.

ADMISSION TO HEALTH CAREER PROGRAMS

Applicants to any Health Career Program at Lansing Community College should contact the Admissions Office for specific information concerning the process and prerequisites. You may call (517) 483-1252 or write: Admissions Office, Lansing Community College, P.O. Box 40010, Lansing, MI 48901.

QUEST APPLICATIONS

Guest applications must submit a guest application form supplied by the registrar's office of the college they are attending. The guest applicant must also complete the LCC application form. Transcripts are not necessary. A non-refundable, one time only, application fee of $10.00 is required. A guest application must be submitted each term if the applicant wishes to continue in that category of admission. It is recommended that any student planning to attend LCC more than one term seek regular student admission.

OUAL ENROLLMENT AND SPECIAL ADMISSIONS

This program is designed to provide an opportunity for qualified high school students to earn college credit commensurate with their high school study. This college credit will count toward a degree program at Lansing Community College. High school credit may or may not be granted according to the discretion of the participating high school. Dual enrollment affords students...
1. Student is under 18 years of age
   a. Student's parents or legal guardians have resided within the LCC District for at least six months immediately prior to the first day of classes.
   b. Student is married and has resided within the LCC District at least six months immediately prior to the first day of classes.
   c. Student is unmarried and is recognized as "emancipated" (receives no financial support from parent or legal guardian) and has resided within the LCC District for at least six months immediately prior to the first day of classes.
   e. The student is an employee of a business or industrial firm within the LCC District, and the employer, by written agreement, agrees to pay directly to the College all tuition and fees of the sponsored student for employer-approved classes.

2. Student is over 18 years of age
   a. Student has resided within the LCC District at least six months immediately prior to the first day of classes.
   b. The student is an employee of a business or industrial firm within the LCC District, and the employer, by written agreement, agrees to pay directly to the College all tuition and fees of the sponsored student for employer-approved classes.

II. Proof of Residency
   All students must provide proof of residency at the time of registration (Michigan House Bill No. 4166, 1985). Lansing Community College reserves the right to make the final decision on residency eligibility. An updated Michigan driver's license or a dated voter's registration card plus one of the documents listed below are acceptable as proof of residency. To be classified as a resident, a student must have lived within the LCC District for six months immediately prior to the first day of class.
   A. Property tax receipts
   B. Rental or lease agreement
   C. Cancelled rent checks (for each month of residency)
   D. The purchase of property within the LCC College District eliminates the waiting period for the establishment of residency. The student or the student's guardian must reside on the property. Acceptable proof of ownership includes:
      1. Deed
      2. Current Tax Statement

III. Petitioning for a Change in Residency Status
   A. Upon registering for classes, a student shall be notified of his/her residency status. If he/she can substantiate that he/she has been mistakenly identified as a non-resident, he/she may offer proof, and residency status shall be changed.
   B. After acceptance into the College and attendance by the student under a non-resident code, the student can change his/her residency if he/she meets one of the qualifications above.
      1. Student must fill out appropriate form available in Registrar's Office.
      2. Student must submit proof of residency claim.

IV. Adjustments in Tuition
   A. The student shall be refunded the difference of resident and non-resident tuition for the term enrolled in, if a Residency Petition is submitted by the deadline date.
   B. Any adjustments in tuition due to a change in residency are not retroactive.

V. Non-resident owning property in LCC District will receive credit for property taxes paid in support of the College by himself/herself or his/her guardian. The taxes paid must be in support of the current academic year and the credit cannot exceed the difference between resident and non-resident tuition rates for the current academic year. To obtain this credit the student must provide the Registrar's Office with the property tax paid receipt.

HOUSING
Lansing Community College maintains no housing units for students, nor does it enter into third party contracts or supervise off-campus housing.

ACADEMIC STANDING POLICIES AND GRADING SYSTEM
The following numerical system is used at Lansing Community College to evaluate academic work:

RESIDENCY

1. Eligibility for Paying Resident Tuition
   A. A student must be an American citizen or permanent resident and meet one of the following qualifications before being eligible to pay resident tuition. International students are not eligible to pay resident tuition.

   B. Check the Department of Student Services, Chairperson, Dean of the Division of the applicant's curricular choice, and the Chairperson of the Department of Student Development Services. The Board of Appeals, may upon reviewing the merits of the case, render a decision or schedule a hearing with the applicant prior to rendering a decision. The decision by the Board of Appeals will be conducted in an expeditious manner and a decision will be rendered within seven calendar days of the date of the applicant's appeal. The decision of the Board of Appeals is final.

   C. The decisions of the Admissions Board of Review and the Board of Appeals will be recorded by simple majority vote, and a record will be maintained (in the student's cumulative record) regarding the decision(s) of these Boards. The applicant will be notified in writing of the decision(s) of the Board.

EDUCATIONAL ENRICHMENT IN SPECIFIC AREAS WHERE UNUSUAL ABILITY AND INTEREST ARE DISPLAYED IN HIGH SCHOOL.

FOR ELIGIBILITY IN THE DUAL ENROLLMENT PROGRAM:

1. Applicant must be working toward high school graduation requirements.
2. Applicant must have attained junior or senior high school standing prior to applying for the program.
3. Applicant must have written recommendation from his/her high school principal or representative.
4. The final decision for acceptance rests with Lansing Community College.

APPLICANT PROCEDURES FOR DUAL ENROLLMENT:

1. Applicant must complete a college application.
2. Applicant must obtain written approval from his/her high school principal or representative.
3. Applicant then submits application to the high school records office with an accompanying $10.00 application fee.
4. The application is completed by the high school records office and sent to the Admissions Office at Lansing Community College.

PLEASE NOTE: A letter of recommendation from the high school counselor or representative must be submitted for each term of attendance.

APPLICANT ELIGIBILITY IN THE SPECIAL ADMISSIONS PROGRAM:

1. Applicant must be working toward high school graduation requirements.
2. Applicant must have attained freshman or sophomore high school standing prior to applying for the program.
3. Applicant must have written approval from his/her parent or guardian, high school counselor or representative, and LCC departmental approval.
4. The final decision for acceptance rests with Lansing Community College.

APPLICANT PROCEDURES FOR SPECIAL ADMISSIONS:

1. Applicant must complete an Admissions Application and a Special Admissions Supplemental Application.
2. Applicant must obtain written approvals as stated on the Special Admissions Supplemental Application.
3. Applicant then submits the Admissions Application, Special Admissions Supplemental Application, high school transcript, and $10 application fee to the Admissions Office.

PLEASE NOTE: A Special Admissions Supplemental Application must be submitted for each term of attendance.

Applicants who are accepted will receive notification and information concerning registration procedures. Those applicants denied admission will also be notified.

APPEAL OF COLLEGE ADMISSION

Any applicant denied admission to the College may appeal this decision to the Director of Admissions. The decision to admit or uphold denial of admission will be based on the individual merits of each appeal. The decision shall be given to the applicant, in writing, within seven calendar days of the date of appeal.

In the event that the Director of Admissions does not admit an appealing applicant, that applicant may carry his/her appeal to the Admissions Board of Review. This petition must be made in writing within seven calendar days, but not later than through the fourth day of the term of application. The board will be convened in an expeditious manner, and a decision will be rendered within seven calendar days of the date of the applicant's written appeal. Members of the Admissions Board of Review are: Director of Admissions, Chairperson, Administrative Assistant to the Dean of Student Personnel Services, a counselor to be named by the Dean of Student Personnel Services.

If the applicant is not satisfied with the decision of the Admissions Board of Review, an appeal may be made to the Board of Appeals. This appeal must be submitted in writing to the Chairperson of the Board of Appeals within seven calendar days of the applicant's receiving the decision of the Admissions Board of Review, but not later than through the fifth day of the term of application. Members of the Board of Appeals are: Dean of Student Personnel Services, Chairperson, Dean of the Division of the applicant's curricular choice, and the Chairperson of the Department of Student Development Services. The Board of Appeals, may upon reviewing the merits of the case, render a decision or schedule a hearing with the applicant prior to rendering a decision. The decision by the Board of Appeals will be conducted in an expeditious manner and a decision will be rendered within seven calendar days of the date of the applicant's appeal. The decision of the Board of Appeals is final.

The decisions of the Admissions Board of Review and the Board of Appeals will be recorded by simple majority vote, and a record will be maintained (in the student's cumulative record) regarding the decision(s) of these Boards. The applicant will be notified in writing of the decision(s) of the Boards.
Instead of a numerical grade, students may receive an alphabetical letter for their coursework if they have audited a course (X), withdrawn from a course (W), did not complete coursework (R) or were returning to the course (R). Specific regulations regarding these alphabetical letters are as follows:

An "I" (incomplete) designation is temporary. It is not a grade. An instructor may approve a student-initiated request for an incomplete if 80 percent of the coursework has been completed and if, in the instructor's judgment, there was good reason why the student could not complete the balance of the required work during the time of enrollment. The student must complete the requirements of the course no later than the closing date of the next term of attendance or by an earlier deadline set by the instructor. "I" grades will not be counted toward the establishment of an earned grade point average (G.P.A.) or toward graduation from Lansing Community College. If the request for an incomplete is not approved, the grade earned consistent with the course requirements will be assigned when the final grades are submitted.

A "W" grade indicates a withdrawal from a course with achievement in the course above the failure level at the time of withdrawal. If a request for withdrawal is received by the Registrar any time before the end of the fourth week of the term, no grade will be recorded on the student's academic record. Approved requests for withdrawal received by the Registrar after the last day of the fourth week of the term will result in the student's record reflecting a "W." If the request for withdrawal is not approved, a grade earned consistent with the course requirement will be assigned by the instructor when final grades are submitted.

An "X" grade is given when a student chooses to audit. No credit is granted, but enrollment is reflected on the student's academic record.

An "R" grade indicates that a student will be returning to a course later. No credit is granted for such designations. They are used for "open lab" courses only.

COMPUTING GRADE POINT AVERAGE

A student's grade point average is determined on the following basis:

<table>
<thead>
<tr>
<th>Numerical Grade</th>

"W," "X" and "R" grades are not included in figuring grade point averages. Thus, a student who receives 5 credit-hours of 4.0, 5 credit-hours of 3.0 and 5 credit-hours of 2.0 would have a total of 45 honor points. To compute the grade point average (G.P.A.), the number of honor points earned is divided by the number of credit-hours taken during the term.

ACADEMIC DEFINITIONS

The following are definitions of academic terms commonly used at Lansing Community College with which the reader may not be familiar.

COURSE: A course is a sequence of planned learning experiences leading to a set of expected learning outcomes. Such a series of planned learning experiences and outcomes are normally scheduled over an academic term. Successful completion of a course results in the student earning academic credit based on contact hours in class or laboratories. It also results in the awarding of an academic grade which evaluates the student's success in achieving the expected outcomes. A course also routinely includes tests, quizzes, a final examination, and regular out-of-class assignments. A course is publicized in the College Catalog and Class Term Schedule, and at Lansing Community College there is a standard College-wide course syllabus created for each course.

At Lansing Community College a course is not to be confused with a seminar, workshop, or fee-for-service learning/training unit.

CURRICULUM: A structured program of study leading to an Associate Degree or Certificate. Each curriculum is assigned a number (certain transfer curricula do not lead to an Associate Degree).

MAJOR: The predominant subject area within a curriculum.

PROGRAM: The organizational structures of the College which provide or deliver instruction and/or services.

CERTIFICATE OF ACHIEVEMENT: The Certificate of Achievement consists of a minimum of 45 term credits in designated courses. It is earned with a minimum of a 2.00 cumulative GPA and is not recorded on the official academic record.

CERTIFICATE OF COMPLETION: The Certificate of Completion consists of fewer than 45 term credits in designated courses. It is earned with a minimum of a 2.00 cumulative GPA, a specified course in government, and is recorded on the official academic record.

CREDITS FOR COURSE WORK COMPLETED

A full-time student schedule is 12 or more credit hours per term. In general, a class meets one hour each week for each credit earned. However, more time may be required for courses with laboratory work. A full-time student taking laboratory work should plan on approximately 20 hours of class attendance each week. The credit hour value of each course is included in this catalog and each term's class schedule booklet.

GRADE REPORTS

An official academic grade report will be mailed to the student approximately one week after the close of each term. The grade report will be withheld if the student has a financial obligation to the College that has not been fulfilled.

GRADE CHANGES

Students may petition an instructor for a grade change of a final grade in a course. The line of appeal for grade change petitions can be found in the College's "Process" statement. A student's final grade in a course may be changed by the course instructor. Grade changes made by instructors are done by submitting signed grade change forms to the department or program office for review and approval by the chairperson or program director. The completed grade change form is then forwarded to the Registrar's Office by the department chairperson or program director for posting on the student's permanent academic record. Completed grade change forms are to be carried by the petitioning student to the Registrar's Office and will not be processed. Students will be officially notified in writing by the Registrar's Office after a grade change has been completed.

STUDENT OFFICIAL ACADEMIC RECORD

The Office of the Registrar maintains the official permanent academic record of every student who attends the College. Each student's record is updated at the close of each term. The student's academic record includes courses waived, courses attempted and completed, courses and credit transferred, credit hours, honor points and Lansing Community College grade point averages.

REPEAT COURSES

When repeating a course, the highest grade earned will be used in computing the LCC cumulative grade point average. Both the repeated and repeating courses will appear on the academic record and be appropriately identified. An updated copy of the student's academic record will be mailed to the student when the repeat grade has been processed.

AUDITING

A student who desires to attend a class regularly, but does not wish to take final examinations or receive an achievement grade and credit may register as an auditor. Credit for auditing a class cannot be established beyond the last day of 100% refund for classes. Beyond the last day for 100% refund, auditors cannot change their status to that of a credit student. Students who are non-auditors cannot change their status to an auditor after last day of 100% refund. Status as an auditor must be requested by the student through the Registrar.

CREDIT BY EXAMINATION (COMP. EXAMS)

A student may obtain credit for certain courses at the discretion of an instructor and department chairperson by passing comprehensive examinations only during the term in which the student is regularly enrolled. The procedure a student uses to obtain comprehensive examination credit is:

1. The student picks up an application for credit by examination at the Office of the Registrar.
2. The student completes the required information on the application and takes the application to the department for instructor and chairperson signatures of approval.
3. After obtaining the required signatures, the signed application is returned to the Cashier's Office in the Student Personnel Services building for payment of tuition.
4. The student will complete an examination for each course in which he/she is to receive credit.

1989 Catalog Lansing Community College www.lcc.edu
5. An examination will not be given by the instructor until the student presents the appropriate payment receipt. No more than one examination will be given for a single statement.

6. The examination, evaluated by the instructor, will be maintained on file in the department chairperson’s office.

7. The office of the Registrar will contact the department and request the grade which was earned upon completion of the examination. A grade will be recorded for each comprehensive examination given.

8. The student will receive an official notice of the grade earned at the end of the term in which the examination was taken or when processing has been completed.

TRANSFER OF CREDITS

Official transcripts of a student’s record at Lansing Community College will be mailed to another institution at the written request of the student. An “official transcript” is one which is signed by an authorized school official and bears the school seal with the signature and indicates the date of graduation if a degree has been granted.

A fee of $2 is charged for each transcript. All transcript requests require 48 hours processing. A student expecting to transfer to a four-year institution is advised to examine the current catalog of the college he/she expects to enter and to follow as closely as possible the recommendations for particular programs of study. More specific information about transferring credits may be obtained from any counselor.

ACCEPTANCE AND EVALUATION OF TRANSFER CREDITS FROM OTHER INSTITUTIONS

Credit will be given for courses transferred from accredited institutions. The credit evaluation of each of these courses will be determined by Lansing Community College. Credits only, not grades, are transferred for “C” or better courses. When the over-all Grade Point Average of a transferring student is at or above a 2.00 on a 4.00 scale, the 1.0-1.5 or “D” credits will be accepted. When the transferring overall Grade Point Average is below a 2.00 on a 4.00 scale, the student may petition the chairperson or program director of his/her academic department to waive a requirement(s) in which he/she has previously earned a 1.0-1.5 or “D.” Waiver of a course requirement does not provide credit for a course. The chairperson or program director of the department concerned will notify the Registrar and a notation of the course waiver will be indicated on the student’s permanent record.

Upon receipt of a transcript from a non-accredited institution, the Office of the Registrar will forward the transcript in question to the chairperson or program director of the department in which the student has enrolled. The department chairperson or program director has the following prerequisites available to evaluating transcripts issued by non-accredited institutions and granting credits toward graduation from Lansing Community College:

1. Credit may be granted with demonstration by the student of skills commensurate with the performance required for satisfactory completion of existing courses.
2. Credit may be granted upon review of the content, goals and objectives of a particular course with determination of whether the course is on a par with existing courses of the College. It is the responsibility of the student to provide requested materials to enable proper evaluation.
3. Credit may be granted upon demonstration of proficiency in a particular existing course by written examination or special testing.
4. Credit may not be granted.

The department chairperson or program director will return the transcript to the Office of the Registrar and indicate in writing the credits granted and the course equivalency at Lansing Community College. The final transcript evaluation will have the signature of the appropriate divisional dean.

When two or more instructional departments are involved, the chairperson or program director of the department in which the student is enrolled will be responsible for consulting with the additional departmental chairpersons or program directors. When two or more departments are involved, the written reply to the Office of the Registrar will include the signatures of each respective departmental chairperson or program director and the respective deans.

CREDIT EVALUATIONS FOR TRANSFER STUDENTS

1. Freshman and sophomore level courses are accepted in transfer. Higher level credits are accepted if they correspond to a specific course at LCC.

2. Creditively, not grades, are transferred for “C” (2.0) or better courses. When the overall Grade Point Average of a transferring student is at or above a 2.00 on a 4.00 scale, the 1.0-1.5 or “D” credits will be accepted. When the transferring overall Grade Point Average is below a 2.00 on a 4.00 scale, the student may petition the chairperson or program director of his/her academic department to waive a requirement(s) in which he/she has previously earned a 1.0-1.5 or “D.” Waiver of a course requirement does not provide credit for a course. The chairperson or program director of the department concerned will notify the Registrar and a notation of the course waiver will be recorded on the student’s permanent academic record.

3. No evaluation is made when a student has received a 2 or 4-year degree from another institution. This may be done upon request, but it is ordinarily assumed that the student is pursuing an entirely different curriculum and will not need previous course work.

4. Credits from non-accredited institutions are evaluated by the department chairperson or program director of the area in which the student enrolled.

If the student changes his/her curriculum, he/she should notify the Office of the Registrar, as there may be a difference in the evaluation made.

5. A student may request an re-evaluation, if his/her statement is that a course description differs from the way in which it was evaluated. Verification of the change will be made with the department chairperson or program director concerned.

6. Any course in which the student received a “C” (2.0) or better will be considered for evaluation. In most cases the course will be accepted for a corresponding LCC course or an elective credit. In cases where LCC has no department or area similar to the course an incoming transcript, no credit will be given.

7. Only official transcripts will be evaluated. Lansing Community College will accept as official transcripts only incoming student transcripts that have appropriate signatures and seals mailed directly to the College from an issuing institution. Transcripts or copies of transcripts carried by individuals may be used for academic advising or counseling but no transfer credits will be posted to the Lansing Community College academic record from transcripts that have not been identified as official. It will be the function of the Office of the Registrar to the College to verify the official status of all incoming student transcripts prior to the evaluation and posting of transfer credit.

8. Transfer credits granted will be shown on the student’s academic record.

CREDIT FOR PREVIOUSLY ACQUIRED KNOWLEDGE AND LEARNING EXPERIENCE

Lansing Community College has an agreement that learning outside of the classroom is valid. Therefore, it is the College’s function to assess extra-institutional learning as part of its credentialing process.

To obtain credit for work experience and/or training, a student may make application at the Office of the Registrar by using the following procedure:

1. Application Procedures

- Relevant aspects of personal and professional experience gained through employment (job-related activities) and special training experiences, may be applied to an academic program. These experiences may be translated into academic credit provided they are directly related to the program (curriculum) or degree being pursued at Lansing Community College.

- These experiences must be authenticated from a non-academic source or not otherwise be available for academic credit through the transfer process outlined earlier.

- Any student who is currently enrolled at Lansing Community College may apply for experiential learning credit by obtaining an Experiential Learning Processing Form from the Office of the Registrar, Student Personnel Services Building, G17 483-1266. Prior to payment of the processing fee and submitting the portfolio of supporting documents, the student is required to consult with the chairperson or program director of the academic department in which credit is being sought to verify the accuracy and validity of the information submitted. The student must then submit the completed Experiential Learning Processing Form to the Registrar, including but not limited to the form and portfolio. The student must also attest by his or her signature that the information submitted is true, to the best of their knowledge.

- The processing fee is non-refundable. A fee of the resident tuition per credit hour will be charged for those credits which are determined awardable and which apply to the student’s program (curriculum). Fees are subject to change by the Board of Trustees without prior notice.

2. Division Assessment Committee

- The completed Experiential Learning Processing Form and portfolio of supporting documents will be forwarded by the Registrar to the chairperson of the respective Divisional Experiential Learning Assessment Committee. The chairperson will assign the portfolio to an appropriate and impartial assessor for review and credit assessment. Assessors, composed of a cross section of faculty and administrators, have the responsibility for evaluation and assignment of credit for experiential learning. In the evaluation process the assessor will verify the accuracy and validity of the information stated on the Experiential Learning Processing Form and the accompanying supporting documents by contacting various references and former employers whose names have been provided. If all information and supporting data verify that the student’s experiential learning fits into appropriate competency and subject areas within the student’s educational program (curriculum) at Lansing Community College. The assignment of credit must be stated in terms of equivalent courses which are offered by the respective divisions of Lansing Community College.

3. Documentation

- All experiential learning must be documented by the student. “Documentation” may be defined as (but not limited to) complete job descriptions, copies of course materials and outlines, certificates, training reports,
signed supervisory verifications and evaluations on letterhead, and any other descriptive information that may provide a clear understanding of a student's background and competencies. Lansing Community College requires certification that the work or training experience is the student's own. The portfolio containing the Experiential Learning Processing Form and all supporting documents will be retained by the College. A maximum of 60 term hours of experiential learning may be applied towards an LCC Associate Degree (Thirty credits must be earned at Lansing Community College to comply with the College's residency requirements.)

NOTE: Lansing Community College's decision to award credit for experiential learning does not obligate any other institution to accept such credits in transfer. Receiving institutions reserve the right to assess transcripts of incoming students, and award credit as they see fit.

Credits received by student based on experiential learning may not be used for financial aid or veteran's benefits eligibility.

Lansing Community College does not accept the transfer of credit for experiential learning awarded at other institutions.

### 4. Applicability of Credit

The Divisional Assessment Committee, alone, will determine what credit granted can be applied to the student's program on an LCC course equivalency basis. In determining whether it is appropriate to accept a student's experiential learning for credit, the major considerations should be the student's educational objective and extra-curricular learning achievement. Credit for experiential learning will be recorded on a student's official transcript on the basis of a course-by-course equivalency, and shall be prominently identified as credit for experiential learning.

### 5. Student Appeal Procedures

Students who believe their evaluation of experiential learning is incorrect may file a written appeal to the Dean of the division in which the experiential learning credit is being sought. Appeals must be received within six months from the date the credit authorization was approved. In such instances the dean will conduct a formal review to ensure that the student has been treated in a fair and non-discriminatory manner. The decision of the dean shall be final.

### CREDIT/NO-CREDIT GRADING

The credit (P)/no credit (Z) grading system has been established as a divisional option. This system is reserved for special course offerings where a credit/no-credit grading system is most appropriate for the goals and objectives of the course.

1. Course prerequisites and other criteria for enrolling in courses offered on the P-Z grading system shall be determined by each department or division offering the course.
2. Courses offered on the P-Z grading system will be published as being graded only on the P-Z grading system and the course syllabus will be explicit regarding this fact.
3. Course grades on the P-Z system may be counted toward an associate degree or certificate based on approval of the appropriate Dean. A maximum of 10 percent of the total credits required for a degree or certificate may be acquired on the P-Z system.

Grading procedure of the credit/no-credit system:

1. Grades on the P-Z system are not included in computing the term or cumulative grade average.
2. The grades granted on the P-Z system are determined with definition of P and Z as follows:
   a. (P) credit—represents a level of performance equivalent to a regular number grade of 2.00 or above on a 4.00 system.
   b. (Z) no credit—represents a level of performance less than a 2.00 on a 4.00 system; no credit is granted.
3. All courses attempted on the P-Z grading system will appear on the student's academic record.

### TABLE FOR DETERMINING ACADEMIC STATUS

Following is the table for determining your academic standing at Lansing Community College. To use this table: 1) locate on your grade report or academic transcript your cumulative grade point average and the total number of credits completed, 2) find your position in the left-hand column of the table, 3) read across the page to your right until you locate the column which includes your current cumulative grade point average. This column heading indicates whether you are in the "Good Standing Range," the "Warning Range" or the "Withdrawal Range." Immediately following the table are the definitions of the various academic ranges at Lansing Community College. Please refer to these definitions for an exact explanation of your academic status. A detailed explanation of the academic appeal process is also printed in the section immediately following the table.

</table>
SATISFACTORY PROGRESS

GOOD STANDING

A student whose cumulative Grade Point Average is in the "Good Standing Range" is considered to be making satisfactory academic progress.

WARNING RANGE

A student whose cumulative Grade Point Average is in the "Warning Range" will be considered by the College as making minimum satisfactory academic progress. A student who falls in this range is strongly encouraged to make use of the academic support services that are available at the College. These services include consultation with an instructor or department head, Testing and Counseling, Tutorial Services, and the Communication Lab and Math Lab (Arts and Sciences building).

UNSATISFACTORY PROGRESS

WITHDRAWAL RANGE

A student whose cumulative Grade Point Average is in the "Withdrawal Range" is considered to be making unsatisfactory academic progress. This student will be withdrawn from the College because of unsatisfactory academic progress.

However, if a student's cumulative Grade Point Average falls in the "Withdrawal Range" during the student's first term of attendance or prior to essential academic warning range (probation) for a second consecutive term or any term thereafter, the student may be academically withdrawn from the College because of unsatisfactory academic progress.

SATISFACTORY PROGRESS FOR VETERANS BENEFITS ELIGIBILITY

In compliance with Veterans Administration statutory requirements of subparagraph 56, section 1775 of chapter 36, Title 38 U.S. Code, Lansing Community College student veterans benefits recipients will not be certified as eligible for benefits when their academic progress (cumulative grade point average) is in the academic warning range (probation) for a second consecutive term or any term thereafter. The student will be academically withdrawn from the College because of unsatisfactory academic progress.

COMPLETION OF CREDITS ATTEMPTED FOR FINANCIAL AID ELIGIBILITY

In addition to the above, and beginning with the second term of attendance, a student financial aid recipient who does not complete 50 percent of the credits attempted on a cumulative basis, will be considered as making unsatisfactory academic progress and may therefore be withdrawn from the College. Grades of completion include: A, 4.0; B, 3.5; C, 3.0; D, 2.0; F, 1.5; W, 1.0, and X. Grades such as I and W are credits or attempts of non-completion.

APPEAL OF ACADEMIC WITHDRAWAL

Any student who has been academically withdrawn from the College may appeal the withdrawal to an academic hearing officer in the Registrar's Office. The decision to reinstate or not to reinstate a student will be based on the individual merits of each appeal.

In the event that the academic hearing officer does not reinstate a student, that student may appeal within seven calendar days, but not later than the fourth day of classes, in writing to the Matriculation Board of Review on a form provided by the Office of the Registrar. The Board will be convened in an expedient manner and a decision will be rendered within seven calendar days of the student's written appeal. Members of the Matriculation Board of Review are: Registrar (Chairperson), Assistant to the Dean of Student Personnel Services, and a counselor appointed by the Dean of Student Personnel Services. In the event that the student is not in agreement with the decision of the Matriculation Board of Review, the student may appeal the decision to the Board of Appeals. This appeal must be submitted in writing to the Chairperson of the Board of Appeals within seven calendar days of the student receiving the decision of the Matriculation Board of Review. Members of the Board of Appeals are: Dean of Student Personnel Services (chairperson), the dean of the division of the student's curricular choice, and the Chairperson of the Department of Student Development Services. The Board of Appeals may, upon reviewing the merits of the case, render a decision or schedule a hearing with the student prior to rendering a decision. The review by the Board of Appeals will be conducted in an expedient manner and a decision will be rendered within seven calendar days of the date of the student's appeal. The decision of the Board of Appeals is final.

The decisions of the Matriculation Board of Review and the Board of Appeals will be written and signed by the respective officers. A copy of the decision will be mailed to the student in the student's cumulative records regarding the decisions of these Boards. The student will be notified in writing of the decisions of these Boards.

STUDENT ACCESS TO RECORDS

A student and/or parent of a student, if the student is less than 18 years of age, shall have the right, upon proper identification, to inspect and review any and all official records, files and data directly related to the student. These records include all materials that are incorporated in the student's cumulative folder, including, but not limited to, identifying data, academic work completed, standardized test scores, attendance data, inventory results, health data, family background data, and instructor or counselor ratings and observations. Requests to inspect and review student files shall be in writing to the Registrar and shall be responded to within a reasonable period of time, but in no case more than 45 days after the request is made.

The student shall have an opportunity for a hearing before a College official designated by the President, to challenge the contents of the student's records, before it is released or transferred or released in violation of the privacy or other rights of the student, and to provide the opportunity for the correction of deletion of any such inaccurate, misleading, or otherwise inappropriate data contained therein.

Written approval by the student or parent concerned is required before release will be given of personally identifiable information from the student's records or files. Exceptions to this statement include releasing information to:

1. Academic and Administrative Officials of Lansing Community College.
2. Academic and Administrative Officials are those members of the College who act in the student's educational interest within the limitations of the official's need to know. Officials may include faculty, administration, clerical, and professional employees and other persons who manage student record information.
3. High schools, colleges, and other educational institutions in which the student is enrolled or intends to enroll. Students will be notified as to the information released if the request does not emanate from the student.
4. Individuals and organizations who provide financial aids or scholarships to students.
5. Authorized representatives of the Comptroller General of the United States, the Secretary of the Department of Health, Education and Welfare, and administrative heads of state and federal educational agencies authorized by law.
6. Appropriate authorities in compliance with judicial orders and pursuant to lawfully issued subpoenas.
7. Students in a medical emergency, if the knowledge of the information in fact is necessary to protect the health or safety of students or other persons.
8. Parents of a student who have established that student's status as a dependent according to Internal Revenue Code of 1954, Section 152.

Those individuals, agencies or organizations, external to the College, who desire access to student records and files and who fail in the exclusions above, shall sign a written form indicating specifically the legitimate interest for seeking the information. The forms shall include the names and addresses of the individual and/or agency requesting the information. These forms shall be maintained in the student's file.

Records of request and student file disclosures need not be maintained for those requests made by academic and administrative officials of the College.

Prior to a student's graduation or withdrawal, the academic and administrative official of the College is subject to the requirements of the Family Educational Rights and Privacy Act of 1974, as amended, which prohibits the release of personally identifiable information from student files without the student's written consent. A form may be provided to a student to release such information. A transcript or other information requested from the academic records of a student who has an overdue indebtedness to the College, except that the student shall have personal access to such records.

Students may request that their academic records be given to any person or group by asking the Registrar in writing. Student lists shall not be distributed to non-College agencies.

GRADUATION REQUIREMENTS AND DEGREES

Associate Degrees and Certificates are granted to all who meet graduation requirements. A minimum of 90 credit hours is required for an Associate Degree and 45 credit hours for a Certificate. A student completing the requirements should apply for graduation during the term prior to that in which the work is completed. Those students who maintain a 3.75 grade point average will...
be graduated Summa Cum Laude; those who maintain a 3.50 grade point average will be graduated Magna Cum Laude; those with a 3.25, Cum Laude. Students must complete 60 credit hours of work at Lansing Community College to qualify for honors.

To graduate from Lansing Community College a student must:

1. Complete a course of study adapted to individual needs, interests, and capacities, and conform to a plan acceptable to the College. The course of study should: (a) be suitable for transfer to admit the student to the level of upper-division work in a four-year college of personal choice, or (b) form a program of study to be completed at Lansing Community College.

2. Maintain a minimum grade point average of 2.0.

3. Earn toward graduation at least 30 credits in attendance at Lansing Community College.

4. File with the Office of the Registrar an application for graduation one term preceding the term of graduation.

5. Have completed a course in Political Science, required by LCC (Social Science 103, Political Science, 104 American Government and 105 State and Local Government will satisfy this requirement).

6. Satisfy all general and specific requirements of Lansing Community College including the fulfillment of all financial obligations.

7. Have the approval of the administration and the Board of Trustees.

HOW TO APPLY FOR THE ASSOCIATE DEGREE OR CERTIFICATE OF COMPLETION

The student submits his/her application for diploma/certificate to the Office of the Registrar. It is important that the student attach copies of any authorized course substitutions or waivers to the application. It is also beneficial to the Registrar’s Office if the student will attach a copy of the curricular guide she/he has been following.

Copies of the student’s academic record, current term schedule and curricular guide (if not submitted by the student) are attached to the application. The information is reviewed in the Office of the Registrar.

1. If any requirements remain after this initial review, the student will be sent a Degree Audit Report along with an unofficial copy of his/her transcript. Any exceptions to the courses listed on the audit report must be noted on the form by the student’s program director or authorized representative, stamped by the departmental office, and be returned to the Registrar’s Office. A copy will be attached to the Application for Diploma. The student will be responsible for completing the remaining courses unless a revised form is submitted to the Office of the Registrar.

2. If no requirements remain after the initial review, the application will be sent to the appropriate departmental program director and divisional dean for approval. When the application is returned to the Registrar’s Office, the student is sent a letter indicating they must successfully complete the current term.

The application is held on file until the current term grades are recorded and successful completion of the term verified. Applications for students who do not successfully complete the term are recycled and are held on file until all requirements are met or up to one year. It is important that a student make application for his/her degree at least one term in advance of graduation. Changes are outlined above may take a full term to complete.

Soon after the end of the term, an official copy of the student’s LCC transcript, noting the degree and date of completion, will be sent to the student. This transcript is official notification that all course requirements have been met. Diplomas are mailed within two months after the last day of the term.

CRITERIA FOR THE ASSOCIATE DEGREES IN ARTS AND IN SCIENCE, DIVISION OF ARTS AND SCIENCES

I. REQUIREMENTS Effective Fall Term, 1985.

A. 90 credits

B. G.P.A. of 2.0 or higher

C. 30 credits in attendance at LCC

D. Completion of SS 103, 104, or 105

E. The student is required to take a core of at least 12 credits in each of the following areas: Composition in English, Humanities, Science and Social Science.

1. It is recommended that the requirement of 12 credits in Humanities be fulfilled by the sequence in World Civilizations: HUM 211, 212, 213. Students may substitute other courses in the curriculum of the Humanities Department for any of the above, provided that these are distributed in at least two of the following five areas:

   a. Art and Music History (HUM 101, 150, 151, 152)
   b. History (HST 104-295)
   c. Literature (ENG 201-296 and HUM 102)
   d. Philosophy and Religion (PHL 101-296; REL 150-296; and HUM 104)
   e. Interdisciplinary Humanities (HUM 121-123) may be substituted as a whole or in part for HUM 211-213.

   Please note that World Civilizations courses (HUM 211, 212, 213) are counted as History courses when only one or two of them are taken to fulfill general education requirements.

2. The Composition/English requirement can be fulfilled by courses in writing and freshman English. The following are possible alternatives:

A. WR 121

B. WR 121

C. WR 121

D. WR 121

Those students permitted to waive WR 121 must elect a second course from 200-level offerings in Communication, Writing and English.

3. The 12 required credits in Social Science must include either SS 103, or 104 or 105. The remaining eight credits may be selected from the following:

   a. SS 101, 102, Psychology 200, or Geography 201.
   b. PSY 200 and GEO 201 cannot be used as core general education courses for psychology or geography majors respectively.

4. The twelve (12) credits in Science can be fulfilled by a combination of science and math courses or only science courses.

   a. Only one math course, selected from College Algebra & Trigonometry, Calculus, or Statistics, can be used for partial fulfillment of this requirement.

   b. Science courses selected must be those that provide laboratory experience. Students must select at least four credits in a biological science and at least four credits in a physical science.

   c. Students intending to transfer to four-year colleges and universities should follow a curriculum of the suggested courses developed for transfer to the institution of their choice. Consultation with faculty and/or counselor is recommended.

   d. In choosing electives, no more than eight credit hours may be selected from the 100-level Arts and Sciences Survey courses; beginning with the designation, "Introductory Seminar," mentioned in Section 3.

   e. In addition, traditional liberal arts courses offered in other divisions, such as Studio Art, Music, Economics and History, may be accepted towards the degree up to a maximum of eight credits.

   f. Acceptable list of elective courses in other divisions are available from Counseling or the Dean's Office, Division of Arts and Sciences.

3. Courses coded beginning with “0” will not be included in the 90-credit total.

J. Effective date of implementation: Academic year 1985-86.

II. A student may appeal a decision not to grant an Associate Degree in Arts or Sciences for lack of fulfillment of the above criteria. Students may appeal such a decision to the General Council of the Arts and Sciences Division, which shall serve as a review committee and recommend to the Dean of Arts and Sciences appropriate action. Voting members shall be department chairpersons, faculty representatives and a student representative.

CRITERIA FOR THE ASSOCIATE DEGREES IN APPLIED ARTS AND IN APPLIED SCIENCE, DIVISION OF TELECOMMUNICATION AND THE ARTS

These requirements pertain to the following degrees:

Associate—Applied Arts

Associate—Applied Sciences

To receive one of the associate degrees listed above, a student must meet the following requirements:

1. Completion of course requirements of specific programs for specialized study areas outlined in the curriculum guides of each department.

2. Completion of minimum of 90 credits.

3. G.P.A. of 2.0 or better.

4. 30 credits in attendance at LCC.

5. Completion of four credits of American Government or State and Local Government (SS 103, SS 104 or SS 105).

Universities and colleges throughout the United States differ widely in courses they accept for transfer from 2-year colleges. Students planning to transfer to other universities or colleges should consult with the LCC Office of Transfer Applications in the Department of Student Development Services (517-483-1191) in order to achieve maximum transferability.

CRITERIA FOR THE ASSOCIATE DEGREES IN APPLIED SCIENCES, DIVISION OF TECHNOLOGY AND APPLIED SCIENCES

These requirements pertain to the following degrees:

Associate—Applied Sciences

Associate—Applied Science, General Technology

To receive one of the associate degrees listed above, a student must meet the following requirements:
REGULATION FOR GRANTING AN ASSOCIATE DEGREE WHEN THE STUDENT HAS AN EARNED BACHELORS DEGREE

A student who has earned a Bachelors Degree from a regionally accredited American college or university which has a general education requirement may be awarded an Associate Degree at Lansing Community College, subject to the following requirements:

1. For each Associate Degree, a minimum of 15 credit hours must be completed at Lansing Community College in the division in which the Associate Degree is sought. The Lansing Community College cumulative grade point average must be at or above a 2.0 level.

2. All requirements for an Associate Degree in either Arts, Applied Arts, Business, Science, or Applied Science must be met.

3. The College’s requirement of completing a Political Science course is waived.

4. The Associate Degree must be within a specific program or curriculum.

5. Exception to the above should be appealed to the office of the Dean of the division in which the Associate Degree is sought.

EXAMINATIONS

Students are required to take examinations at the appointed time and place in order to receive credit for a course. Generally, examinations are given during a regularly scheduled class period during the last week of the term.

REGISTRATION PROCEDURES

Registration periods are indicated in the school calendar. Students will register for classes according to instructions which are published each term in the Class Schedule.

DROPS AND ADDS

Dropping and adding courses involves procedures which must be completely carried out by the student to the office of the Registrar may keep an accurate account of records. During the first week of the term a student may make changes in his/her schedule beginning with the first day of on-campus registration. A student may withdraw from a course before the end of the fourth week without academic penalty. No drops will be processed after the last day of the term.

The student is entirely responsible for carrying out the following procedure:

1. Pick up drop-add form at Registrar’s Office.

2. Fill out the form completely with information requested. Departmental signatures are required, so students should plan to enroll early in the term.

3. Return form to Registrar’s Office for proper recording. Do not leave until processing is completed and a copy has been received.

WEEKEND AND EVENING CLASSES

In addition to the regular day course offerings, Lansing Community College offers a highly diversified program of evening, Saturday, and Sunday courses for those who choose for personal or occupational reasons to attend college outside of regular daytime sessions both on-campus and off-campus learning centers. Students may elect late afternoon and evening courses as integral parts of a technical or liberal arts and science curriculum, as individual selections in areas of particular interest or as remedial sections in English, reading and mathematics. Counseling and testing services are available to evening students to assist them in the selection of the best possible educational and vocational program. Lansing Community College weekend and evening programs provide educational opportunities to many who are now finding the time to improve their academic or vocational background.

TERM CLASS SCHEDULES

Each term Lansing Community College publishes a class schedule booklet which identifies all courses offered for that term. This booklet includes general information on the dates, time and location of registration. There is no charge for the schedule booklet.

PAYMENT OF TUITION AND FEES

All students attending Lansing Community College must pay tuition and fees at the time of registration. Tuition and fees are as follows:

Tuition, Resident Students
per credit hour $21.00

Tuition, Non-Resident Students
per credit hour $29.00

Tuition, Out of State Students
per credit hour $40.00

Tuition, International Students
per credit hour $41.00

Tuition for apprenticeship students varies according to the program of study.
When a classroom instructor interprets that it would be in the best interest of the student and/or the College community to initiate an “administrative withdrawal,” the following steps are taken:

A. In the case where a student consistently fails to meet the attendance requirements of the class the instructor may initiate an “administrative withdrawal” through a referral to the Office of the Registrar.

1. Upon receipt of a recommendation for an “administrative withdrawal,” the Registrar will notify the student in writing that the student is being administratively withdrawn and the basis for the “administrative withdrawal” decision. The first level of appeal is to the departmental chairperson or to the dean of the division in which the class is being taught. All appeals must be in writing and signed by the student requesting the appeal hearing.

2. If a student decides to appeal an “administrative withdrawal” to the dean of the appropriate division, the student will receive a written notification of the time and place of the appeal. If the student decides not to attend the appeal conference, the dean will review the appeal in the student’s absence. The dean will notify the student in writing of the recommendation of the review and of the reasons for the recommendation. The dean will forward a copy of the student’s written notification to the Office of the Registrar.

3. A student who desires to appeal the decision to the dean may appeal in writing to the Chairperson of the Judicial Board. The processes employed in this appeal are listed under the heading of “Due Process” in the Student Guidebook.

B. In the case where a student does not have the prerequisites for a particular course, the classroom instructor consults with the student regarding the potential of “administrative withdrawal.” In this case the “withdrawal” action is normally limited to the first two weeks of the term.

1. The instructor may recommend that the student withdraw from the particular course. If the student chooses not to withdraw, the instructor may initiate an “administrative withdrawal” through the Office of the Registrar.

2. Upon receipt of the recommendation for an “administrative withdrawal,” the Registrar will notify the student in writing that the student is being administratively withdrawn and the basis for the “administrative withdrawal” decision. The first level of appeal is to the departmental chairperson or to the dean of the division in which the class is being taught.

3. If a student decides to appeal an “administrative withdrawal” to the dean of the appropriate division, the student will receive a written notification of the time and place of the appeal. If the student decides not to attend the appeal conference, the dean will review the appeal in the student’s absence. The dean will notify the student in writing of the recommendation of the review and of the reasons for the recommendation. The dean will forward a copy of the student’s written notification to the Office of the Registrar.

4. A student who desires to appeal the decision of the dean may appeal in writing to the Chairperson of the Judicial Board. The processes employed in this appeal are listed under the heading of “Due Process” in the Student Guidebook.

5. In the case where a student does not pass the prerequisites for a particular course, the classroom instructor will consult with the student regarding the potential of “administrative withdrawal.” In this case the “withdrawal” action is normally limited to the first two weeks of the term.

1. The instructor may recommend that the student withdraw from the particular course. If the student chooses not to withdraw, the instructor may initiate an “administrative withdrawal” through the Office of the Registrar.

2. Upon receipt of the recommendation for an “administrative withdrawal,” the Registrar will notify the student in writing that the student is being administratively withdrawn and the basis for the “administrative withdrawal” decision. The first level of appeal is to the departmental chairperson or to the dean of the division in which the class is being taught.

3. If a student decides to appeal an “administrative withdrawal” to the dean of the appropriate division, the student will receive a written notification of the time and place of the appeal. If the student decides not to attend the appeal conference, the dean will review the appeal in the student’s absence. The dean will notify the student in writing of the recommendation of the review and of the reasons for the recommendation. The dean will forward a copy of the student’s written notification to the Office of the Registrar.

4. A student who desires to appeal the decision of the dean may appeal in writing to the Chairperson of the Judicial Board. The processes employed in this appeal are listed under the heading of “Due Process” in the Student Guidebook.
IV. Procedure for Resolving Health-Related Student Problems

In a situation in which a serious (physical or emotional) health-related problem is evident, the College’s responsibility is to offer to assist the student in the removal of the behaviors that interfere with the student’s performance and involvement while at Lansing Community College. In such event, the following procedures shall be followed:

A. Call the Department of Public Safety and the Assistant to the Dean of Student Personnel Services if:
   1. Emergency health services are required, or
   2. It appears that there has been a violation of the law.

B. Call only the Assistant to the Dean of Student Personnel Services if it appears that there has been a violation of a College regulation that is not also a violation of the law.

C. If there is no apparent violation of the law or College regulation, and no emergency exists, the student should be encouraged to seek help from an appropriate office or agency, on or off campus. The assistance of the Office of the Dean of Student Personnel Services and/or the counselors is available, if desired.

D. If there appears to be a violation of the law or a College regulation, the Assistant to the Dean of Student Personnel Services shall contact the Chairperson of the Student Development Services Department. Counseling staff will meet with the student and recommend:
   1. Continued counseling if the problem is within the ability of the department to handle.
   2. Referral back to the Assistant to the Dean where no health-related problem is evident or it is determined that the department can be of no further service.
   3. Referral to other appropriate professional assistance if the problem is beyond the department to handle. If professional assistance is not sought and the previous behavior significantly compromises the rights or safety of other persons, or if a professional recommendation of withdrawal is made, the Assistant to the Dean of Student Personnel Services may make administrative withdrawal of the student from the College until evidence of the ability to function constructively in the College setting is available. The student may appeal this decision to the Board of Appeals.
   4. Whenever possible, the counseling staff working with the student’s physician or relatives shall make a recommendation to the student as to his future course of action.

VETERANS’ AFFAIRS

Veterans’ Affairs helps the veterans file applications for education, counseling, loans, tutorial assistance and/or any other entitlements allowed through the Veterans Administration.

Lansing Community College is approved as a school for veterans of military service under provisions of Chapters 31, 32, 34, and 35 of the U.S. Code.

Lansing Community College cautions veterans matriculating under this program to be prepared to pay their expenses for at least two months after the beginning of the academic year. (ALL TUITION AND FEES MUST BE PAID AT THE TIME OF REGISTRATION.) Once the veteran’s application is approved and the award processed, monthly checks will be issued if the veteran is prompt in maintaining satisfactory academic progress and following a chosen curriculum.

ADVANCE PAYMENT FOR VETERANS

New student veterans, and veterans wishing advance payment, should apply at the Veterans’ Affairs Office at least five (5) weeks prior to the beginning of a term.

Monetary allowances provided for by the G.I. Bill vary according to the level at which the veteran is pursuing an academic program as indicated by the following schedule.

<table>
<thead>
<tr>

After enrollment, veterans should direct their inquiries concerning eligibility to the Office of Veteran Affairs in the Student Personnel Services Building. Lansing Community College, in recognition of the special problems of active-duty service people in having access to, and completing College programs, has been designated as a ServiceMember’s Opportunity College.

In addition, the College participates in the Army College Fund, Michigan National Guard Co-op, Air Force ROTC program, Army ROTC program, and USMC open admissions program.

STUDENT RIGHTS

The most basic necessity for the achievement of the College’s goals is freedom of expression and communication. Since knowledge is as broad and diverse as life itself, the need for freedom is equally broad. Yet, absolute freedom in all aspect of life means anarchy, just as absolute order means tyranny. Both are contrary to the opportunity and ethical to the purposes and necessities of the College. By providing an environment most conducive to teaching and learning, the College strives to strike a balance between maximum freedom and necessary order.

Each right of an individual places a reciprocal duty upon others: the duty to permit the individual to exercise the right. The student, as a member of the academic community, has both rights and duties. Within that community, the student’s most essential right is the right to learn. The College has a duty to provide for the student those protections, opportunities and environment which best promote the learning process in all its aspects. The student, in turn, has duties to his fellow members of the College—the most important of which is to refrain from interference with those rights that promote the essential purposes and processes of the College.

The student is not only a member of the academic community; he/she is also a citizen of the larger society. As a citizen, he/she retains those rights, protections and guarantees of fair treatment which are held by all citizens, and neither the academic community nor the College may deny them to him/her. The enforcement of the student’s duties to the larger society is the responsibility of the authorities duly established for that purpose and not that of the academic community or the College. But as is always the case if the student’s conduct is such as to detrimentally affect the College, the College reserves the right to take action that seems appropriate.

More specifically, Lansing Community College operates within the framework of a basic philosophy, stated purposes, laws and regulations of the city and state and the expectations of the community in which we are located. The College assumes that students, while attending this College, will conduct themselves as responsible citizens of the community in which we live.

We must understand our rights if we are to use them properly. They include personal rights and a range of significant liberties such as freedom of speech and the press. They include economic rights of property and contract and political rights. Each person’s freedom is assured that there will be no interference with his/her freedom of worship according to his/her conscience. In addition, there are rights of counsel, jury trial and other safeguards to protect individuals with “due process of law.”

Only those duties and responsibilities which every student citizen should study, understand and fulfill. One is to obey the laws and help in law enforcement. These responsibilities are basic to our principle of living together in a democratic society. Another duty is that of performing military service and other basically ordered work in defense of the country and our liberties. A third is the duty of meeting squarely one’s share in the cost of government. A fourth is that of taking a responsible and active part in community affairs, including, of course, the activities of our College. As part of the privilege attendant upon academic freedom, students are expected to act with a high-mindedness which integrates self into the well-being of the total community.

Members of the College community, like membership in any community, means more than privileges. It means responsibilities, too. In the matter of your responsibilities in these areas, some things are expected of you in your behavior and conduct.

STUDENT EVALUATION OF INSTRUCTIONAL QUALITY

Because students expect quality in their learning experiences, Lansing Community College provides opportunities for students to participate in the evaluation and improvement of courses taken. Detroit is based on the idea that individuals do provide valuable insights as students. These opportunities include:

1. Students are asked to complete Student Evaluation Forms at the completion of each course. The forms are distributed by a person other than the instructor, and the instructor is not present at the time the students complete the forms.

2. Students are invited to present suggestions regarding instructional quality to their instructors, their instructor’s department head or the instructor’s division dean. These written or verbal suggestions are also reviewed by the College to improve instruction and assess instructional effectiveness.

3. Students are invited to serve on various councils, boards and committees of the College in order to provide input into the College’s development and evaluation of both instructional and support-service programs. These councils, boards and committees are located in the various divisions of the College. Those students who have interests in serving on or contacting members of these bodies may contact the Office of Student Government or the office of the dean in the appropriate divisions. Examples of these councils, boards and committees can be found in other sections of this catalog.

Specific questions regarding student participation in the evaluation of instruction may be directed to the Office of the Dean of Student Personnel Services for clarification or appropriate referral.

STUDENT RESPONSIBILITIES

ATTENDANCE

Students are expected to attend all sessions of each course in which they are enrolled. Failure to do so may result in academic penalty or withdrawal from the class.
SEXUAL HARASSMENT

Sexual harassment is not acceptable behavior on the College campus or at College-sponsored events off the campus. Violation of this regulation by students or College employees can result in disciplinary action.

DEFINITION OF SEXUAL HARASSMENT

Sexual harassment is defined in the Michigan Civil Rights Act as follows:

"...Unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct or communications of a sexual nature when:

1. Submission to such conduct or communication is made either explicitly or implicitly to obtain employment, public accommodations, or public services, education or housing.
2. Submission to or rejection of such conduct or communication by an individual is used as a factor in decisions affecting such individual's employment, public accommodations, or public services, education or housing.
3. Such conduct or communication has the purpose or effect of substantially interfering with an individual's employment, public accommodations, public services, education or housing, or creating an intimidating, hostile, or offensive employment, public accommodations, public services, education, or housing environment."

For the purpose of the above regulation the College interprets unwelcome to mean:

1. Conduct or communication which a reasonable person in a similar circumstance would consider unwelcome.
2. Conduct or communication which continues after notice is given that the conduct or communication is unwelcome.

DISCRIMINATION

Lansing Community College affirms its commitment to the practice of no discrimination on the basis of race, color, religion, sex, national origin, age, height, weight, marital status or handicap.

The above commitment has evolved from efforts to comply with several laws and public acts that pertain to the area of non-discrimination. Notable of these acts and laws are the following:

1. Title VI of the Civil Rights Act of 1964 prohibits discrimination on the basis of race, color, or national origin.
2. Title IX of the Educational Amendment of 1972 prohibits discrimination on the basis of sex.

HOW STUDENTS CAN FILE A COMPLAINT OR A FORMAL GRIEVANCE FOR DISCRIMINATION OR SEXUAL HARASSMENT:

The difference between a complaint and a formal grievance is the method of processing; a complaint will be handled informally while a formal grievance will involve investigation and may result in a formal hearing.

Complaints and grievances should be made promptly while facts are still fresh. Most formal grievance procedures have time limits published as part of the procedure and these time limits are an important consideration. If a student files a complaint, the student may later file a grievance provided applicable time limits are met.

Students who feel aggrieved because of any form of discrimination, including sexual harassment, have several ways to make their concerns known. Normally, a student would be expected to directly inform the person engaging in discrimination or sexually harassing behavior by telling that person that the behavior is offensive and requesting that the offensive behavior stop.

A student who feels aggrieved because of discrimination or sexual harassment is also advised to seek out one of the College's counselors to assist in the interpretation of this procedure and the alternatives available to the student in solving the student's concern.

INFORMAL COMPLAINT

If the student who feels aggrieved feels it is inappropriate to communicate directly with the person whose conduct is offensive or if direct communication has not solved the student's concern, the student may contact Ms. Ilse Burke in the College Affirmative Action Office located in the 526 Office Building (483-1856) or the Office of the Dean of Student Personnel Services located in the Student Personnel Services Building (483-1162) to deal informally with the student's concern. The informal complaint process may call for an informal investigation of the issues or the concerns by the appropriate official within the Affirmative Action Office or the Office of the Dean of Student Personnel Services (depending on the student's choice of referral).
FORMAL GRIEVANCE

If the student is not satisfied with the results of the informal complaint or if the student wishes to bypass the informal process, there are two places available for the student to process formal grievances.

1. The student may request a formal hearing before the Judicial Board of the College. The procedures and guidelines for the functioning of the Judicial Board are listed in the catalog. This request should be made to the Office of the Dean of Student Personnel Services located in the Student Personnel Services Building (483-1162).

2. The student may appeal a formal grievance through the College’s Affirmative Action Office utilizing the appropriate formal grievance procedure for the alleged discrimination or sexual harassment. The College’s Affirmative Action Office is located in the 528 Office Building (483-1858).

Students who feel aggrieved by discrimination or sexual harassment should not feel deterred in making a complaint if the student does not wish to testify. The informal process listed earlier may solve the student’s concern. Where discipline, discharge of employees, or suspension or dismissal of students is possible and where evidence is not available from other sources, the College will request the cooperation of the aggrieved student to testify. The cooperation of the aggrieved student to provide evidence is a key factor in upholding the “due process” to which the person complained of is entitled.

OBSUCRATING AND JOSTLING

The following acts are prohibited on College property.

Obliteration of or threatening to obliterate, without express permission from an administrative official of the College, any street, sidewalk, hallway, stairway, classroom, elevator, doorway, vestibule, entry, building, annex, wing, patio, balcony, or any other College property by imposing or threatening to impose the free and uninterrupted passage of vehicles or individuals, or interfering in any way with the free and uninterrupted use of College property.

Jostling or roughly crowding persons in or on any of the above-mentioned locations.

ASSAULTS

Assault and/or battery on College property is prohibited. For the purpose of this regulation, assault is defined as an attempt or offer, with force and violence, to do corporal harm to another, with apparent present means of carrying out the attempt. Battery is an injury which results from an assault. Battery is an injury, regardless of intent, actually done to a person by another in an angry, revengful, rude or insolent manner.

RECORDS

It is the responsibility to give honest and complete replies to all questions included in application forms and other documents required by the College.

FINANCIAL RESPONSIBILITY

Students owing money to the College in respect to such matters as fees, loans, library fines, bookstore accounts, driving or parking penalties, etc., will be subject to disciplinary action if such accounts are not paid when due. In particular, it should be noted that if any accounts are outstanding at the end of an academic quarter, the publication of the student’s grade report and/or official transcripts will be delayed and the student will not be permitted to register for a succeeding quarter until such accounts are paid.

IDENTIFICATION CARDS

All Lansing Community College students are issued an identification card. Students are expected to show their I.D. card whenever they check out books at the library, cash checks on campus, vote in student elections, etc., or when they are requested by a member of the faculty or staff of the College. Misuse of College identification to obtain privileges to which the student or to which others are not entitled under existing regulations is a College offense.

CHEATING

Each student is expected to be honest in his/her work. Dishonesty in assignments, examinations or other academic work is considered an extremely serious offense by the faculty and students and the student is subject to disciplinary action.

PLAGIARISM

A student is guilty of plagiarism who fails to give credit for any ideas or material taken from another for either written or oral presentation. The offering of materials assembled or collected by others in the form of projects or collections without acknowledgement also is considered plagiarism. Plagiarism is considered by the faculty and students as an extremely serious offense for which the student may be subject to disciplinary action.

SMOKING

In the interest of providing a safe and healthy environment for the College’s students, employees, and visitors and in accordance with the Michigan Clean Indoor Air Act, P.A. 198 of 1985, the following regulation took effect January 1, 1987.

Smoking is prohibited throughout all Lansing Community College facilities except in designated smoking areas identified by “Smoking Permitted” signs.

WEAPONS AND EXPLOSIVES

Explosives, firecrackers, firearms and devices intended to be used as weapons are not permitted on College property. Provided, however, that the foregoing shall not prohibit fencing foils and other athletic equipment intended for such use, nor shall it apply to persons holding concealed weapons permits and duly constituted police officers who are authorized by law to carry weapons.

ALCOHOLIC BEVERAGES

Drinking, being under the influence of, or possessing intoxicating beverages on College property is prohibited.

DRUG USAGE AND DISTRIBUTION OF DRUGS

Using, possessing or distributing illegal drugs (such as narcotics, hallucinogens, stimulants, depressants, etc.) on campus or at College-sponsored events is prohibited. Lack of a legal conviction of the drug laws is not a defense in a charged violation of this rule.

DRESS

Students are expected to dress in an appropriate fashion, having in mind the activity in which they are engaged, while on College property and when attending College-sponsored events. Specific attire not limited to but including appropriate footwear, safety glasses, safety hats, shields and aprons may be required when the health and safety of the individual student or other members of the College community are to be protected.

GAMES AND RECREATIONAL ACTIVITIES

Gambling in any form is prohibited at all times on College property. Games of any kind may only be played in the recreational or athletic facilities which have been designated to be used for such games. Applications for permission to play any game other than in an area designated for that purpose must be obtained from the Director of Student Activities.

PETS

In order to protect the health and safety of the members of the College community and preserve order on the campus, no pets, including but not limited to, dogs, cats, birds, and rodents, shall be permitted within the buildings of Lansing Community College. This is not intended to exclude seeing eye dogs used by the visually handicapped or animals designated for laboratory experimentation purposes.

GUEST SPEAKERS

College regulations with respect to participation of guest speakers are outlined in the Policy for Guest Speakers. The College requires orderly conduct, non-interference with College functions or activities, and identification of the sponsoring groups or individuals. Under no circumstances are members of the College community to be forced to be involuntary audiences.

ORGANIZATIONS

No student or student organization may use campus facilities, solicit funds, business, or support on the College campus unless such a student or student organization has been authorized by the administrative officials of the College. (See Establishment of Student Organizations at Lansing Community College.) Approval of College clubs and organizations must be in accordance with the Student Government Bylaws and Constitution.

FIELD TRIPS

Field trips must be planned, organized and approved according to the Student Activities Policies and Procedures for Student Organizations, and where applicable the parking and transportation services unit of the Public Safety Department.

VIDEO CASSETTES

The Federal Copyright Law, Title 17 of the United States Code, provides copyright protection of "original works of authorship," including "motion pictures and other audio visual works." Thus, the use of video cassettes and films is restricted to private showings, and public showings are prohibited without the copyright owner's consent. Under the "fair use" limitation, copyrighted cassettes, motion pictures, and other audio visual works may be used for purposes such as "teaching (including multiple copies for classroom use), scholarship, or research" without violation, and audio visual materials purchased or rented by the College have the written consent of the copyright owners and, therefore, are legally appropriate for classroom use.
DISCIPLINARY CASES

A student violating the rules and regulations of the College other than those involving academic performance and achievement (See Academic Policies) shall be subject to the following disciplinary action which is appropriate to the nature of the offense and that may take into account the student’s previous conduct record:
1. Reprimand
2. Restrictions on activities or privileges
3. Requirements of restitution
4. Loss of course credit or reduction in grade points (for academic offenses)
5. Denial or revocation of a College honor or degree
6. Suspension
7. Dismissal

DISCIPLINARY ACTIONS

In situations involving minor offenses, disciplinary action may be taken by an appropriate officer of the College. A complaint that a student committed an academic offense shall be made in accordance with the procedures set forth in the College Policy on “Due Process.” As a minimum, all actions for an offense that includes:
1. Notice to the student of the nature of the offense and his/her rights, including the right to an attorney, and a statement that the student is subject to sanctions.
2. A hearing by a duly constituted body at which the student has an opportunity to present evidence or be heard by the student against him/her and be allowed an opportunity to defend against this evidence.
3. Notification of the Judicial Board’s decision.
4. Notification of the right to appeal to a higher body.

USE OF STUDENT LITERATURE TABLE

The following statements are designed to facilitate student distribution of literature within the College facilities, while providing students and College personnel and property reasonable protection from commercial exploitation and legal actions. Court rulings have determined that College buildings while considered a “public trust” are not considered “public property” subject to unregulated use by any and all individuals. The following procedural regulations shall be followed:

1. The distribution of literature within College buildings by students shall be limited to student literature tables made available for such distribution. Student literature tables will be made available in the following areas within the College buildings:
   a. In the entry lobby of the second floor of the Arts and Sciences Building.
   b. In the Washington Avenue Mall lobby between the Health Education Building and the Applied Arts and Sciences Building.
   c. In the second floor of the Old Central Building.

2. At least two single tables will be available in each of these areas. The maximum number of tables will be determined in a reasonable manner based on the use of the area and regulations regarding fire and student welfare.

3. Registered students and College-recognized student clubs and organizations shall have access to the student literature tables. (As in the past, non-students who wish to use College facilities must gain permission by following procedures established for this purpose through the appropriate institutional Offices or the Office of the Vice President of the College.)

4. The student literature tables will be available Mondays through Thursdays from 8 a.m. to 10 p.m. and Fridays 8 a.m. to 5 p.m. during the days of regular schedule terms.

5. While no prior College approval of the materials to be distributed is required, registered students and College-recognized clubs and organizations are required to register for the use of the student literature tables with the Student Activities Office at least 24 hours prior to the time of desired use. Registration will be accepted on a first request-first serve basis. Individual students and recognized student clubs or organizations may register for the use of a table for three consecutive days. If there are no pending requests, a registration may be renewed at the end of a previous registration. If there are no pending requests, a recognized student club or organization may register the use of more than one table or more than one location. If the use of multiple tables or locations, additional students or recognized student groups request the use of a table or location, and additional tables or locations are not available, the multiple user or users will be required to give up the multiple use of tables and locations to provide for the new request.

6. A copy of the completed registration form obtained from the Student Activities Office must be available at the student literature table while distribution is taking place.

7. In order to determine accountability, a sample of the material to be distributed must be placed on file with the Student Activities Office at the time of the registration for use. In addition, a recognized student club or organization must have a copy of the material to be distributed on file with the club’s advisor.

8. The student literature table will be staffed at all times by an individual, student, or members of the recognized student club or organization registered for the use of the tables while the distribution of materials is taking place. The registered student or recognized club or organization will have the responsibility to ensure that the distribution process is orderly at all times and that the general area surrounding the student literature tables is not littered.

9. Individuals shall have the option to pick literature from the tables or receive a copy from the individuals sitting at the tables. No literature shall be forced upon any individual nor shall there be any obstructions created in the path of the general flow of traffic.

10. Individuals or recognized student clubs and organizations may collect funds for worthy causes, such as Muscular Dystrophy, blood drives or College-sponsored activities. There shall be no commercial solicitations of funds or business, nor shall individual students solicit funds for personal gain.

11. Failure to comply with the above procedural regulations may lead to the denial of the use of the student literature tables and/or may lead to disciplinary action.

LITERATURE TABLE USE REQUEST FLOW CHART

**Student Activities Office**

1. Register for reservation by time limit
2. Place on file in Student Activities Office copies of literature
3. Have a copy of registration form at table while distributing literature
4. Table staffed at all times by individual student

**Student Organization**

1. Register for reservation by time limit
2. Place on file in Student Activities Office and with organization advisor copies of literature
3. Have copy of registration form at table while distributing literature
4. Table staffed at all times by members of organization

FLOW CHART FOR APPEAL OF DENIAL OF USE OF LITERATURE TABLE

**Student Activities Office**

1. Register for reservation by time limit
2. Place on file in Student Activities Office copies of literature
3. Have a copy of registration form at table while distributing literature
4. Table staffed at all times by individual student

**Dean of Student Personnel**

1. Deny Use

**Student Activities Office**

1. If denied, appeal to Dean of Student Personnel

Any individual, registered student or recognized student club or organization which has been denied access to the student literature tables, or was required to halt distribution based on procedure 10 above may appeal the denial or requirement to halt distribution. The appeal shall be in writing and shall be directed to the Dean of Student Personnel Services within 10 calendar days of the denial or requirement to halt distribution. The Office of the Dean of Student Personnel Services shall make a prompt investigation of the appeal, contacting the parties involved, and shall, within 10 calendar days from the date of appeal make a decision to reinstate the distribution rights denied or halted or to uphold the original decision. If the decision of the Dean of Student Personnel Services is appealed, the case shall be heard by an impartial hearing officer and the appeal shall be referred to the Student Conduct Committee.
Personnel Services is not satisfactory, the individual student or recognized student club or organization may appeal the Dean's decision to the Student Activities Board of the College. This second appeal must be in writing and presented to the Chairperson of the Student Activities Board within 10 calendar days of the decision of the Dean of Student Personnel Services. The Student Activities Board shall make a prompt investigation of the appeal, contacting parties involved, and shall within 10 calendar days from the date of the appeal, make a decision to reinstate the distribution rights or uphold the denial or required halt of distribution. The decision of the Student Activities Board shall be final.

Where it is contemplated that a violation of the student literature distribution procedural regulation warrants the imposition of disciplinary action upon an individual student, disciplinary action shall be taken in accordance with "Due Process" as outlined in this Lansing Community College Student Catalog.

OTHER REGULATIONS

Lansing Community College reserves the right to change or add to the rules and regulations at any time.

DUE PROCESS

Lansing Community College holds firm to the philosophy that matriculation in college does not deny any rights of citizenship to a student. At the same time, matriculation in college does not make a student of the basic responsibilities of citizenship. Thus, the College is constantly aware of the joint responsibilities shared by the student body and the College, to uphold the principles of "due process" in all disciplinary action taken by the College or on behalf of the individual students.

The following principles shall be employed for the guidance and direction of all persons or bodies hearing students accused of violating regulations of the College, except those involving academic performance and achievement:

1. The student shall be notified by certified letter that an alleged violation has occurred. The student will be directed, in the letter, to make an appointment with the appropriate College official to review the facts concerning the alleged violation and to determine if formal charges should be prepared. A "hold" may be placed on the student's record which will result in the student's reenrollment being delayed.

2. The student shall be notified by an appropriate College official that he/she is accused of violating a regulation.

3. The student shall be notified that he/she may elect one of three courses of action:
   a. The student may admit the alleged violation and request, in writing, that the administrative officer take whatever action seems appropriate.
   b. The student may admit the alleged violation and request a hearing before the Judicial Board;
   c. The student may deny the alleged violation, in which case the administrative officer shall refer him/her to the Judicial Board.

4. Prior to the hearing, the student shall be entitled to the following:
   a. Written notice of the time and place of the hearing;
   b. A written statement of the charges of sufficient particularity so that the student may prepare his/her defense;
   c. Written notification of the names of the witnesses who are directly responsible for having reported the violation or, if there are no such witnesses, written notification of how the alleged violation came to the Board's attention.

5. The student shall be entitled to appear in person and present his/her defense to the Judicial Board, and may call witnesses in his/her behalf.

The student may also elect not to appear before the Judicial Board. Should he/she elect not to appear, the hearing shall be held in his/her absence.

6. The student shall be entitled to be accompanied by counsel;

7. The student or his/her counsel shall be entitled to ask questions of the Judicial Board or of any witnesses;

8. The student shall not be required to testify against himself/herself;

9. The student shall be entitled to an unembarrassed hearing of his/her case;

10. The student shall be entitled to an explanation of the reasons for any decision rendered against him/her;

11. Decisions rendered by the Judicial Board will be final. A student who wishes to contest the decision of the Judicial Board has recourse to civil action.

The Judicial Board will hear cases referred to it by individual students through the established lines of appeal, or by administrative officers of the College. Decisions rendered by the Judicial Board will be made by a simple majority vote of the total membership of the Judicial Board. The Judicial Board shall be empowered to make recommendations to appropriate parties for appropriate action, based on decisions rendered by its collective membership. The membership of the Judicial Board will consist of the following members:

1. The Dean of Student Personnel Services Division (Chairperson);
2. The Chairperson of the Student Development Services Department;
3. Two students appointed by the President of the Student Government from the student body with consent of the Student Government, with one alternate appointed in the same way, to serve in the absence of any student member;
4. Two faculty members appointed by the dean of the division in which the student is enrolled or matriculating, with one alternate faculty member appointed in the same way, to serve in the absence of any faculty member.

The line of appeal to the Judicial Board of the College and the instructional division membership of the Judicial Board shall be explicit, depending on the type of case being presented:

1. When the case involves a disciplinary action based on an alleged violation of the general rules and regulations of the College (for example: explosives, alcoholic beverages, treatment of College property), the line of appeal shall be:
   a. The Office of the Dean of Student Personnel Services Division;
   b. The Judicial Board of the College

The instructional division membership of the Judicial Board shall be two faculty members of the division in which the student is matriculating, when hearing a case involving a disciplinary action based on an alleged violation of the general rules and regulations of the College. When the Judicial Board is hearing an appeal based on a disciplinary decision of the Office of the Dean of Student Personnel Services Division, the Dean of Student Personnel Services Division will relinquish the chair of the Judicial Board. A temporary chairperson will be elected by the remaining members of the Judicial Board from the remaining members of the Judicial Board.

2. When the case involves an academic imposition, based on alleged violation of the academic rules and regulations (for example: plagiarism and cheating) or alleged mistreatment of students by faculty, the line of appeal shall be:
   a. The faculty member involved;
   b. The chairperson of the instructional department involved;
   c. The dean of the division involved;
   d. The Judicial Board of the College

The instructional division membership of the Judicial Board will be the two faculty members of the division in which the class is offered where the academic imposition or alleged mistreatment is being appealed.

3. Decisions rendered by the Judicial Board will be final. A student who wishes to contest the decision of the Judicial Board has recourse to civil action in the courts.

GRAPHIC EXPLANATION OF LINE OF APPEAL

POSTER REGULATIONS

Lansing Community College is continually sensitive to the fact that there is a need for our students, staff, and offices to communicate regarding various activities, events, and services. The College is also sensitive to the right of freedom of expression, particularly as provided for in the First Amendment of the Constitution of the United States. At the same time, the College is responsible for providing reasonable procedures and regulations to protect public and private property, provide for the general safety and welfare of all members of the College community, and which preclude disruption of the normal functions of the College.

The following guidelines are designed to regulate the use of posters within the College facilities and to provide students, College personnel and College properties reasonable protection from commercial exploitation and court suits. While the courts have said that College property is considered a "public trust," these same courts have ruled that College property is not "public property" subject to unregulated use by any and all individuals. This regulation is designed to facilitate communication through the use of posters while complying with state and federal instructional mission of the College.
DEFINITION: A poster is any written communication designed to apply to a wall or other surface for the purpose of relating information about an event, service, idea or activity. A poster may be in the format of, but not limited to, a sign, a brochure, an announcement, or banner.

GENERAL POSTER REGULATIONS

1. Within the College community, the use of a poster is restricted to approved bulletin boards.
2. All posters should be in English, or, when in another language, a literal English translation should be supplied with each poster copy. When a foreign language poster is used, its complete English translation should be:
   a. Clearly printed on the same poster and in the same size letters as the letters used in the original foreign language poster, or
   b. Attached to each copy of the foreign language poster, clearly printed, and in the same size letters as the letters of the original foreign language poster. The English translation must remain with the poster for the duration of its posting.
3. Each poster is required to have in the lower left-hand corner, its posting date (month, day, and year) and in the lower right-hand corner, its date (month, day, and year) to be removed. Each poster should be up for a reasonable length of time depending upon the activity.
4. Designated bulletin boards are available in each building for the posting of student and staff personal notices. All student and staff personal notices will be confined to these designated bulletin boards.
5. A poster shall not exceed 18 inches by 24 inches except when given special permission by the appropriate office of approval.
6. No poster shall be placed in such a way that it covers all or part of a previously posted approved poster whose take-down date has not expired.
7. The removal of posters at or prior to the take-down date shall be the responsibility of the sponsoring organization or individual. No posters shall be removed prior to the take-down date by unauthorized individuals.
8. Each poster must identify the sponsoring organization, department or individual. Each poster must display a telephone number or an office location where more complete information can be obtained.

POSTERS: Offices of Approval

a. Students and student organizations wanting to post posters must gain approval in the office of the Dean of Student Activities.
   b. College staff and faculty must gain approval in their departmental office or from the office of their administrative supervisor.
   c. All College staff and faculty personal notices placed in designated bulletin boards within the College buildings do not need approval. Examples of personal notices are selling used books, sharing a ride, sharing an apartment, and selling personal articles. Profit-making commercial notices are not considered personal and will be removed.

STUDENT OR STUDENT ORGANIZATION APPEAL
OF POSTER DENIAL OR REMOVAL

If a student or student organization feels that a denial of posting or removal of a poster infringes upon their First Amendment rights or is in violation of this policy, an appeal may be made by the poster sponsor to the Director of Student Activities. A meeting will be held between the appealing poster sponsor or sponsors and the Director of Student Activities to discuss the appeal. If the appeal is not resolved, a formal appeal may be presented to the Dean of Student Activities. This appeal must be in writing, must indicate the reason(s) for the appeal, and must be dated and signed by the appealing party. The Director of Student Activities will gather information and respond to the appealing party within five (5) days of receipt of the appeal. If the student or student organization is not satisfied with the response of the Director of Student Activities, a second written appeal may be made to the Dean of Student Personnel Services. This second appeal must contain the reason(s) for the appeal, and a copy of the poster must be made available to the Dean of Student Personnel Services for review. The appeal to the Dean of Student Personnel Services must be dated and signed by the appealing party. The Dean of Student Personnel Services will gather information and respond to the appealing party within five (5) days of receipt of the appeal, giving the decision rendered and reason(s) therefore. The decision of the Dean of Student Personnel Services shall be final.

Failure to comply with the above regulations may lead to the denial of approval, the removal of posters or disciplinary action. In order to protect the student body, individual members of the College community and the resources of the College, the College reserves the right and accepts the responsibility to deny approval or remove any poster or posters which it believes to cause significant disruption of the normal function and operation of the College.

POSTER REGULATIONS FOR OFF-CAMPUS
ORGANIZATIONS AND INDIVIDUALS

Lansing Community College is sensitive to the fact that there is a need for some off-campus organizations and individuals involved in non-commercial enterprises to communicate with Lansing Community College students and staff members concerning various activities, events, and services. The College is also sensitive to the right of expression, particularly as provided for in the First Amendment of the Constitution of the United States. At the same time, the College is responsible for providing reasonable procedures and regulations to protect public property and for providing for the general safety, welfare, and positive learning environment for all members of the College community.

Therefore, the College has provided a kiosk, centrally located on the downtown campus, for the use of non-commercial groups and individuals who are not affiliated with the College. Such groups and individuals may place their posters on the kiosk without seeking prior approval from any College office, and the College disclaims any and all responsibility for items posted.

FACULTY RESPONSIBILITIES

The primary responsibility of instructional staff is teaching effectively. Such effective teaching may occur in the classroom, laboratory, office, or in any other instructional setting. This responsibility is reflected by an instructor who:

A. Is articulate and enthusiastic about his/her field and established a positive, stimulating, learning atmosphere.
B. Prepares for each class, organizes course concepts and presents them clearly, exhibits comprehensive knowledge of the subject, applies skills appropriate to course content; makes appropriate and timely use of student and instructional support services.
C. Respects students as individuals, recognizes student learning styles and manages student learning accordingly, adapts course material to student learning mode and rate.
D. Leads discussions when appropriate and provides presentations which represent various sides of a given issue.
E. Informs students early in the class as to what is expected of them through a departmentally approved syllabus, course outlines, grading standards, tests, and other materials; provides appropriate classroom materials and assists students in mastering them; provides students with scheduled instructional hours.
F. Evaluates students fairly and objectively; constructs and administers examinations that are valid and reliable indicators of student learning; maintains clear and thorough records of student progress and keeps students informed throughout the course.
G. Encourages intelligent, independent thought by students, where appropriate.
H. Uses instructional media, learning materials, and equipment effectively.

The complementary responsibilities of instructional staff are to assist students through scheduled office hours and on other occasions, including being an informed advisor on academic and career planning.

A. Providing assistance to students on an individual basis.
B. Being available to consult with students during regularly scheduled office hours and informing students about the availability of these hours.
C. Knowing curriculum/program requirements and career opportunities in one's field of expertise or making appropriate referrals for academic advising, being able to advise students in one's own program area; where appropriate making referrals for counseling, placement, and for information regarding educational alternatives with the College and other institutions.

Recommendations of the College-Wide Faculty Evaluation Committee: current agreement between the Board of Trustees and the Lansing Community College Chapter of the Michigan Association for Higher Education.

COURSE DESCRIPTION

Each course description has seven (7) categories of information as follows:
1. Course Code and number
2. Course title
3. Number of credit hours
4. Number of lecture/discussion hours per week
5. Number of laboratory hours per week
6. Prerequisite: WRI 121, Continuation of WRI 121 and an alternative to ENG 122 in many programs.
7. Course description

For example:

DIVISION OF STUDENT PERSONNEL SERVICES

Dean: Dr. William Schaar
217 Student Personnel Services Building

The College offers student support services through the Division of Student Personnel Services. These include counseling, pre-enrollment advising, registration, orientation, testing, college and high school articulation, academic advising, educational and vocational information, financial aid, placement, and College-student activities.

Student personnel services are designed to support the College goals listed earlier in this catalog. Some services provide direct support for several of the College goals while all of the services provide indirect support for all goals listed.

Program and Service Objectives

The function of Student Personnel Services is to provide support services for the student as a learner in an institutional environment. The program and service objectives of the Division are:

1. To assist the student in gaining access to the instructional program of the College through admissions processing, counseling and advising, informational services, registration, and orientation.
2. To assist the student in maintaining a status of academic good standing in the College by providing course maintenance, counseling services, financial aid, career exploration, individual assessment, academic advising, achievement monitoring, tutorial services, and student employment placement.
3. To assist various student populations in meeting their special needs. Some of these student populations are veterans, the older adult student, the returning mature woman student, the economic high-need student, and students involved in agency-sponsored programs.
4. To assist students with learning experiences outside of the formal classroom, such as student government, student interest clubs, travel, intramural athletics, intercollegiate athletics, student publications, and cultural involvement with the service community.
5. To offer courses designed to help students acquire adjustments, activity and informational skills such as physical education, student development, college survival, military science, and aging and retirement education.
6. To help students to enter a field of work or career, or to continue their career development by providing employment placement assistance, job market information, college transfer articulation, and student follow-up studies.

Organization of Resources

In order to carry out the functions above, the Division of Student Personnel Services employs both trained professional and support staff in each service area. The service functions are designed to meet the special needs of students. Staffing and housing of these services are designed to have maximum impact on “Student Success.”

It should be noted that the Division of Student Personnel Services provides both support and instructional programs for students. The facilities for the division are placed in various buildings on campus, with a concentration of several services in the Student Personnel Services Building.

Major Programs and Services

The major service areas are:

1. The Office of Admissions
2. The Registrar, Student Records, and Cashier
3. The Office of Veteran Services
4. The Office of Student Financial Services
5. The Office of Student Activities
6. The Employment Placement Services
7. The Student Development Department
   a. The Women’s Resource Center
   b. The Career Exploration and Assessment Center
   c. The Center for Student Support
8. The Center for Aging Education
9. The Physical Education and Athletics Department
10. Michigan Occupational Training Program

EMPLOYMENT PLACEMENT SERVICES

Program Director: Stephen A. McEnaney
211 Gannon Vocational Technical Building

A file of educational and occupational source material is available to all students. Directories, career descriptions, job briefs and educational listings are included to assist the student in making appropriate educational and occupational plans, particularly when used in conjunction with career planning courses. Books, pamphlets, brochures and outlines are available in counseling service areas and in several library locations.

Employment Placement

Placement services are available to all students for either part-time or full-time positions. Part-time positions at the College and within the service area of Lansing Community College are posted. Information on on-campus and off-campus College Work Study jobs is available in the placement office. Applications for College Work Study eligibility must be processed through the Student Financial Services Office. The job board is located outside the Employment Placement Center, Room 211, Gannon Vocational-Technical Building.

Student Employment Guidelines

Student employment is temporary on-campus employment. To be eligible to work as a student employee, the following conditions must be met:

- The student must be enrolled for at least six credits during Fall, Winter and Spring terms and one credit Summer term. (The Michigan College Work Study program requires that you also enroll for at least six credits Summer term.)
- Federal College Work Study students need not enroll Summer term if they sign an Intent to Enroll form in the Placement Office.
- The student should be pursuing an academic course of study and be making reasonable progress through that program.
- Students may work no more than an average of 20 hours a week (40 hours total per pay period, never exceeding 30 hours a week).
- Incoming students who have been assigned a student number may begin work during the term break preceding their enrollment in classes at LCC.

Interviews

Employers may interview on campus. Students in their last term and LCC graduates may sign up for interviews with these organizations. Interview dates will be publicized throughout the campus, listing required job qualifications. Qualified persons may sign up for interviews in the Employment Placement Center.

Services Offered

Employment Placement Services offers assistance with job placement. Services include:

- Credential file system for graduates and alumni
- Computerized Placement System (job applicant matching)
- Resume and interview preparation assistance
- Employment assistance for both full and part-time positions
- Summer Camp Job Fair Day (February) for summer job opportunities
- Part-Time Placement File (for currently enrolled and incoming students)
- Health Care Employer Day (Fall and Spring terms)

CENTER FOR AGING EDUCATION

Program Director: Ellen N. Sullivan
207 Old Central Building

Gerontology Program

The Center for Aging Education provides aging education, training, and consultation to individuals, community organizations, and agencies. Its emphasis is on developing programs and educational services that are responsive to the needs of the community. Programs and services of the Center include:

- Career training in gerontology for individuals who provide direct services to older persons (Certificate Program or Associate Degree)
- Short-term workshops/seminars on special topics in aging
- Retirement preparation seminars
- Programs for those already retired
- Customized training and in-house seminar development
- Consultation on aging education issues
- Audio-visual programs on interest topics

The Center offers both a Certificate in Gerontology and a Gerontology Specialty Option within the Human Services Associate Degree Program. Three terms of field placement are included in both programs. During field placement the student works at an agency or organization serving older adults. Gerontology courses and the field placement experience are taught and supervised by Center for Aging Education faculty.

Academic advising is available to persons interested in pursuing careers in gerontology, as well as to those who wish to upgrade their skills in their present jobs. Center staff also advise older adults seeking information on educational opportunities. Gerontology advising supplements the regular general advising program of the College.

Workshops, seminars, and other gerontology training programs are offered in response to identified community needs and interests. Center staff design seminars for older adults and others interested in education for and about aging.
COURSE DESCRIPTIONS

Gerontology (GER)

Division of Student Personnel Services

GER 100 Introduction to Human Aging  (3-0)
A basic orientation to the field of gerontology, with emphasis on social aspects: demography, physiology, psychology, sociology, economics, environment, death and dying, and community and government programs.

GER 101 Programs and Services for the Aging  (3-0)
Prerequisite: GER 100 recommended. Focus is on the organization and functions of the aging system, its relationship to the broader human services system, and how the services workers can use or develop community resources for the benefit of older adults.

GER 102 Mental Health and Aging  (3-0)
Prerequisites: GER 100. Covers psychological and social adaptations necessary for maintenance of good mental health: influences of physical health, social and family aspects, depression and loss, institutions, policies, positive approaches to mental health, and life-cycle perspective. Emphasis is on responses to aging and environmental factors that have an impact on mental health.

GER 104 Aging and Health  (3-0)
Prerequisite: GER 100. Examines patterns of physical health and illness among the aged, changing physiology of body systems, current theories of aging process, chronic illnesses, and mechanisms for health and medical care. Emphasis is on practical implications for the human service provider.

GER 105 Planning for Retirement  (2-0)
Covers financial matters, legal affairs, physical and mental health, being alone, housing choices, employment and volunteer opportunities, community resources, and meaning of time. Includes discussion of planning and decision-making skills and development of a personalized plan for retirement.

GER 110 Self-Renewal  (1-0)
Mature adult students clarify personal values, identify accomplishments and interests, and develop communication skills. Topics include myths about aging, using individual personal resources (emotional, physical, mental, and social), and an exploration of meaningful roles for older adults.

GER 111 Senior Adult Issues  (1-0)
An examination of critical retirement issues. Topics include sources and use of local community resources in housing, physical health, mental health, and finances. Students look at changes resulting from legislation, the influence of organizations, and alterations in lifestyles.

GER 112 Organizations Serving Seniors  (1-0)
Survey of various agencies providing programs, services, and group services for mature adults. Agencies include those assisting in legal matters, housing concerns, financial issues, legislative matters, and nursing home assistance.

GER 113 Investments and Financial Management in Retirement  (5-0)
An overview of money management strategies and investments, especially applied to fixed incomes in retirement. Topics include determining net worth, types of investments, yield, stocks, bonds, mutual funds, and money management tips and legalities.

GER 114 Estate Planning for Retirement  (5-0)
Provides practical information on estate planning and the alternatives available for a family of varying situations. Includes techniques used to plan an estate, preserve and transfer property during lifetime and at death, avoid probate and minimize death taxes and legal expenses.

GER 115 Memory Improvement Techniques  (5-0)
Designed for older adults who seek to improve their ability to remember. Examines myths and facts about memory and aging, reviews factors which influence memory and introduces specific techniques for improving recall.

GER 121 Senior Adult Program Planning  (5-0)
Overview for those planning senior adult programs: basic principles of programs and leadership, ideas and resources for activities for older adults; motivating older adults to participate; and scheduling activities.

GER 122 Working with Older Adults: The Aging Process  (5-0)
Overview of issues and skills critical to work with older adults in a service capacity. Includes an introduction to the field of aging; myths and realities of aging; age-related sensory loss; effects of stress on the mental health of older adults; special communication skills; an introduction to the aging service network; and information about local community resources.

GER 123 Counseling Outreach Skills: Aging Populations  (3-0)
Prerequisite: GER 100 required & GER 102 recommended. Basic communication and counseling skills are presented and practiced, including special considerations in dealing with older adults. Topics include empathy, death and dying, loss, grief, and depression.

GER 124 As Parents Age: A Seminar for Families  (5-0)
An examination of aging in the family context, with emphasis on information useful to the individual's own family situation. Topics include the normal aging process, sensory changes, improving communications, understanding "senility," common mental health problems, alternative living arrangements (community-based vs. institutional), community services and resources, roles of adult children, shared decision-making, and the dynamics of guilt.

GER 125 Volunteers—The Three Rs: Recruiting, Retaining, Rewarding  (1-0)
Designed to assist supervisors and administrators as they recruit and work with volunteers. The focus is on the process of volunteer management. Included are techniques for assessing current and future volunteer utilization; innovative methods for recruitment, retention and recognition of volunteers.

GER 130 Respite Care Training for Volunteers  (1-0)
Designed for volunteers who wish to provide respite care. Prepares participants to serve as companions and substitute care providers for functionally impaired older adults.

GER 160 Aging Through the Ages  (1-0)
Looks at how the elderly have been treated by families and society over the past century, primarily in the United States. There is a brief overview of other societies. Past and present differences are discussed as well as future trends.

GER 161 Issues of Aging: Sexuality  (5-0)
Issues relating to sexuality and older persons: societal attitudes, sexual behavior patterns, physiological changes, psychological responses, and special situations such as institutional settings.

GER 164 Medication and Alcohol Use Among Older Adults  (1-0)
Examination of medication and alcohol use among older adults: prescription and non-prescription medicines, side effects, drug interactions, and strategies for using medicines wisely. Students learn to identify a substance abuse situation and make appropriate referrals.

GER 165 Dementia I: Concepts and Causes  (1-0)
An introduction to current concepts of confusion ("senility," dementia, Alzheimer's Disease) in older persons. Provides an overview of social, physical, psychological and environmental factors resulting in confusion. Relationship to depression, techniques for communicating with confused older persons, family dynamics and community resources are discussed.
GER 166 Legal Rights: Housing Options and Issues for Older Adults 5.0-5

Presents the pros and cons of various housing options for older adults with the legal implications of each.

GER 167 Issues of Aging/Nursing Homes: The Choices, Realities and Alternatives 5.0-5

The role of nursing homes in the continuum of care, issues and concerns relating to care, funding of care, review of residents' rights, guidelines for choosing a home, guidelines for visiting nursing home residents.

GER 168 Legal Rights of Older People Variable

Introduction to legal issues affecting older adults: nursing home residents' rights, wills and estate planning, health insurance, age discrimination, guardianship, and other related legal topics.

GER 169 Legal Rights of Older People—Disability and Consent 5.0-5

Procedures such as guardianship, conservatorship, power of attorney, the living will, joint tenancy, nursing home residency and civil commitment will be addressed. Explores the actual and perceived choices an individual has as aging and illness occur, the legal procedures through which a person gains the right to make decisions over another's life, and the role the state has in protecting a person against him or herself.

GER 170 Depression: Recognition and Treatment 1.0-9

An examination of depression in later life. Symptoms, causes, "masks," diagnosis and assessment of depression are introduced, including information on distinctions between depression and dementia. Basic techniques and guidelines for working with depressed older persons are presented.

GER 171 Dementia II: Techniques for Intervention 1.0-9

Prerequisite: GER 165 or equivalent. An introduction to techniques for working with older adults with Alzheimer's disease and related disorders. The psychosocial needs of individuals and their families is a primary focus. Communication techniques, programming approaches, handling problem behaviors, a task breakdown approach, environmental adaptations and role of the family are discussed.

GER 172 Increasing Communication Through Sign Language Phrases 5.0-5

Expressive and receptive manual skills are presented and practiced. Assistive devices designed for the hearing impaired are demonstrated and used.

GER 173 Understanding and Managing the Problem of Urinary Incontinence 5.0-5

An introductory seminar designed to assist those with the problem of incontinence management in older adults. Topics include attitudes, normal age effects on urine control, prevalence, common responses to loss of control, possible causes, complex incontinence, treatment and techniques of management.

GER 174 Working with Older Adults: Minority Aging 1.0-9

Focuses on the special needs of Black, Native American and Hispanic elderly. Includes demographic aspects of minority aging, special conditions of physical health, psychological aspects, social problems, and federal policies concerning minority aging.

GER 175 Working with Older Adults: Chronic Illness in Later Life 5.0-5

Overview of signs of physical and mental changes in older persons and of resources available in the community to help. Topics include vision and hearing, heart problems, arthritis, osteoporosis, cancer, respiratory problems, Alzheimer's disease and other chronic conditions.

GER 176 Hearing Loss and Aging: Maintaining Communication 5.0-5

An overview of causes, effects and practical methods of compensation for hearing loss in older adults. Topics include: description of the ear and how it functions, the effects of normal and abnormal changes on hearing ability as one ages, the implications for hearing impaired individuals and their families, ways of maintaining communication flow with one who has a hearing loss.

GER 177 Vision Adaptation in Middle/Later Years 5.0-5

An overview of vision changes in middle/later years and ways to assist older persons experiencing these changes. Includes normal changes of aging, common diseases and conditions of the eye, treatment approaches, and adaptations to maintain independence. Community resources to assist those with visual adaptation needs is included.

GER 178 Adapting Your Surroundings: Easier Living in Later Life 5.0-5

Overview of changes one can make in home surroundings to accommodate gradual or sudden physical or mental, normal or illness related changes in later years. Includes special emphasis on room and cabinet arrangement, hearing and visual aids, building access through entrance/exit and community resources to assist those in need of making adaptations.

GER 179 Legal Rights: Medicare, Medicaid and Supplements 5.0-5

Provides information on rules and regulations of Medicare, Medicaid and supplemental health insurance programs for older persons. Reviews recent and proposed changes in federal and state programs as well as existing and proposed alternatives to meeting catastrophic health care needs. Includes chronic vs. acute care issues, effects of Diagnostic Related Groupings (DRG's), and ways for service providers to assist older persons in dealing with public and private health insurance matters.

GER 197 Advanced Grief and Loss Counseling: Strategies for Practitioners 5.0-5

Overview of specific counseling techniques and their application by practitioners when helping older persons deal with grief and loss. Topics include the professional "Helpers" and their attitudes on grief and loss, the effect of the practitioners' attitude on the process of helping the grieving person, specific counseling techniques, identification of community resources.

GER 198 Working with Older Adults: Grief and Loss 5.0-5

Focuses on how to help the grieving older adult. Topics include attitudes toward death and dying; stages and symptoms of grief; abnormal grief reactions; multiple issues of older persons; and community resources.

GER 199 Working with Older Adults: Dying and Death 5.0-5

An overview of issues and skills critical to caregivers working with terminally ill older adults. Included are an examination of attitudes toward dying, death, and attitudes toward understanding the behavior of the dying person; understanding personal feelings; techniques for communicating with the terminally ill; working through personal grief; and exploring alternatives to institutionalized death.

GER 201 Field Placement I 4.0-10

Prerequisite: GER 100 & department approval. On the job experience in serving older persons through placement at a local community agency. Students assess their motivation and career skills in the field of aging services, explore community resources, demonstrate appropriate work habits, assess their attitudes toward older persons, and relate current research in the field of aging to actual practice. An accompanying seminar integrates experience with concepts and principles of gerontology.

GER 202 Field Placement II 4.0-10

Prerequisite: GER 201. 12 program credits & department approval. Second in the series of field experience courses. A continuation of Gerontology 201 providing additional practical experience and training in gerontology. Includes practice and demonstration of group work techniques.

GER 203 Field Placement III 4.0-10

Prerequisite: GER 202. 20 program credits & department approval. Third in the series of field placement courses. A continuation of Gerontology 202. Includes a focus on current research, job search techniques, and preparation of a resume.

GER 213 Family Caregivers Series: Evaluating Yourself as Caregiver 5.0-5

Designed for those caring for a chronically ill family member or friend in the home. Topics include: development of the family; family systems; the caregiver role; your family responsibility tree; communication skills; assessment for decision making; assessing the caregiver; and filling the gaps with community resources. An interdepartmental course with the Health Careers Department.

MILITARY SCIENCE
Division of Student Personnel Services
217 Student Personnel Services Building
U.S. Army ROTC Program

Lansing Community College, through Michigan State University, offers undergraduate and graduate students an opportunity to qualify as commissioned officers in the United States Army, serving in the Active Army, the Army Reserve, or the Army National Guard. The program provides an education in leadership and military skills through courses offered by the MSU Military Science Department. Also included are courses in Written Communication,
Human Behavior, Management, Military History, and National Security offered by other LCC and MSU departments. While not an academic major, the Army ROTC Program provides excellent preparation for leadership in any profession, military or civilian.

Scholarships

The ROTC Program offers four-year, three-year, and two-year scholarships to outstanding students. Tuition, fees, and an allowance for textbooks are provided. Scholarship students also receive a $100 per month allowance for up to ten months per year during the scholarship. Scholarship students must meet college/university admissions criteria.

Basic Course

The Basic Course, normally completed in the freshman and sophomore years, provides the student a general knowledge of the military's role in our society and the missions of the U.S. Army. Subjects include Leadership, Land Navigation, Marksmanship, Military History, Physical Fitness, and basic Military Skills. Students enroll in one Military Science class each term. It is possible for a Sophomore to complete the Basic Course in one year through proper arrangement with the department. No military obligation is incurred for non-scholarship students participating in, or completing, the Basic Course. (Note: LCC students register for Military Science courses through LCC, but actually take them at MSU. All students should contact the Department of Military Science, 115 Demonstration Hall, phone 355-1913, before enrolling.)

Advanced Course

The Advanced Course is the professional phase of the ROTC Program. NOTE: LCC students must transfer to a four-year college or university that offers Army ROTC, such as Michigan State University, in order to enroll in the Advanced Course. Upon satisfactory completion of required ROTC courses and the awarding of a bachelor's degree, the student is eligible for a commission as a Second Lieutenant in the U.S. Army Reserve. Distinguished military students and Army ROTC Scholarship cadets are eligible to apply for a commission in the Regular Army.

The professional phase includes courses in Leadership Skills, Training and Personnel Management, Ethics, Military Justice, and Military Tactics. During the two years of the Advanced Course, students enroll in one Military Science course per term. Additionally, they must complete one course in national security studies from a list of approved courses available at the department. Furthermore, it is recommended that all cadets complete a management course from a list of approved courses available at the department. Two scheduled field trips are required each year, and all students must meet physical fitness standards. A six-week leadership camp for advanced training is normally attended in the summer between the junior and senior years.

Eligibility Requirements

To be accepted for the Advanced Course, the applicant must:
1. Be enrolled as a full-time student at a four-year institution in a program leading to a degree.
2. Have completed or received credit for the Basic Course.
3. Meet medical and age standards.
4. Have at least a 2.00 grade point average.
5. Pass such survey and screening tests as may be prescribed.
6. Agree to accept appointment as a regular or reserve officer of the Army and to serve on active duty or with a Reserve or National Guard component as a commissioned officer for such time as directed by the Secretary of the Army.
7. Be physically qualified for appointment as a commissioned officer of the Army under regulations in effect at the time of graduation.
8. Enlist in the U.S. Army Reserve until commissioned.
9. Agree to attend Summer Camp between the junior and senior years (or third and fourth MS years unless deferred by the Professor of Military Science).

Uniforms and Textbooks

Regulation uniforms are furnished to students on a loan basis beginning their second term. Textbooks are furnished during participation in the ROTC program but must be returned when the student completes association with the Department.

Special Opportunities

In conjunction with Summer training, students are selected to attend Airborne, Air Assault, Ranger, or Northern Warfare training in locations from Florida to Alaska. Students may compete for Summer Flight Training at Fort Rucker, Alabama. Additionally, outstanding students are offered the opportunity to participate in Troop Leadership Training and spend three weeks performing the duties of an officer at a military installation. All of these experiences are voluntary and competitive, but they will enrich the leadership development.

Credit for Previous Military Training

Students with previous military training will be granted constructive credit as follows:
1. By transfer, constructive credit will be granted at the time of entrance to LCC for corresponding ROTC courses completed satisfactorily in a senior division ROTC unit at a college or university.
2. Other training or service. Constructive credit will be granted at the time the student enters the ROTC Program at LCC. If for any reason the student does not complete the ROTC Program which he or she began, constructive credit will be withdrawn.
   a. Service academy education: Students who have satisfactorily completed work at a service academy may receive constructive credit for up to three years of Military Science. The Department will make a credit determination at the time that the student enrolls.
   b. Active service or active duty for training in the U.S. Army, Navy, Air Force, Marine Corps or Coast Guard. The Professor of Military Science may grant constructive credit for up to two years of the basic course, depending upon service duties.
   c. Junior ROTC or Military School training. Students who have had Junior ROTC or Military School training should contact the Professor of Military Science for credit determinations. Maximum allowable constructive credit will be the two-year basic course.

Advanced Course

(Refer to applicable four-year college catalog)

Military Science (MS)

U.S. Army ROTC Program

Division of Student Personnel Services

MS 101 Intro to the Military Profession

1(1-1)

Fall, Winter, Spring. Prerequisite: Approval of Department. Analysis of the military profession from several academic perspectives and exploration of the technical, ethical, and personal ramifications of service as an officer in the U.S. Army. Lab introduces military skills.

MS 102 Military Leadership

1(1-1)

Winter. Prerequisite: MS-101 or approval of Department. Introduction to military leadership. Draws upon examples from military history to illustrate what a military leader must be, know, and do to lead soldiers in battle. Lab includes both military skills and leadership applications.

MS 103 Army Physical Fitness Training

1(0-3)

Spring. Prerequisite: MS-102 or approval of Department. The leader's role in implementing the Army Physical Fitness Program to provide for the physical well-being of subordinates. Individual and group fitness programs are introduced. Includes rappelling and small bore rifle marksmanship.

MS 104 Intro to Camp Challenge

1(1-1)

Spring. Prerequisite: Approval of Department. Preparation for a six-week officer training camp which is conducted at Fort Knox, Kentucky. (Students will be paid approximately $640 plus room and board while at camp.) Successful completion qualifies entry into the advanced Reserve Officers' Training Corps. Lab includes rifle marksmanship, land navigation, rappelling and application of military leadership skills.

MS 201 Military First Aid

1(1-1)

Fall. Prerequisite: MS-103 or approval of Department. Emergency first aid techniques, including casualty evaluation, lifesaving measures, CPR, and environmental injury prevention. Lab includes military skills and first aid applications.

MS 202 Military Leadership-II

1(1-1)

Winter. Prerequisite: MS-201 or approval of Department. Descriptive model of small unit leadership. Provides cadets with a realistic preview of the small unit leader's role in the Army. Lab includes small unit drill and ceremonies.

MS 203 Land Navigation

1(1-2)

Spring. Prerequisite: MS-202 or approval of Department. Use of military topographic and special maps to include intersection, resection, modified resection, and polar coordinates. Development of overlays for tactical operations. Lab includes actual land navigation in the field using the lenticular compass.
Air Force ROTC Program
Aerospace Studies

The Air Force ROTC Program is divided into a basic course (General Military Course or "GMC") of two years and an advanced course (Professional Officers Course or "POC"), also two years. Successful completion of the GMC and a four-year Baccalaureate Degree leads to a commission and active duty service commitment as an officer in the U.S. Air Force. A student may complete the GMC portion of the AFROTC program while enrolled at Lansing Community College. The Aerospace Studies credits earned may then be transferred to any of approximately 150 four-year colleges and universities offering AFROTC, including Michigan State University, to meet prerequisites for enrollment in the POC.

Students enrolling in LCC's Aerospace Studies courses incur no military obligation; so men and women may earn academic credit, learn about Air Force career opportunities, and then decide if they wish to apply for the POC. Selection for the POC at a four-year institution is open to any student who meets officer candidate qualification standards. Students who wish to take only the POC at a four-year institution should inquire about the "AFROTC two-year program" at the college or university of their choice. All applicants for the POC two-year program should contact the AFROTC office at Michigan State University in October prior to their expected fall term enrollment.

Scholarships

The AFROTC program offers qualified students four-year, three-year, and two-year scholarships. These scholarships pay tuition and fees, and a subsistence allowance of $100 for each month of the academic year. Students must apply for a four-year scholarship by December 1st of their Senior year in high school. Three-year and two-year scholarship applications should be made by the end of the Winter Term preceding the school year the scholarship will become effective.

General Military Course (GMC)

The General Military Course in Aerospace Studies examines the role of U.S. military forces in the contemporary world with particular attention to the U.S. Air Force's organization and mission. Functions of strategic and defensive forces, general purposes forces, and aerospace support forces are reviewed. The roles of these forces are related to national defense policy. The courses are described under Aerospace Studies in the Description of Courses section of this catalog.

Uniforms and Textbooks

Air Force blue uniforms and necessary texts are furnished on loan basis by the Department of the Air Force. A $10.00 uniform deposit is required. The deposit is returnable.

Aerospace Studies (AS)
U.S. Air Force ROTC Program
Division of Student Personnel Services

Following are the courses required to complete the Air Force ROTC General Military Course. Satisfactory completion of these courses is a prerequisite for entry into the Professional Officers Course. Students must complete all the courses in the Air Force ROTC Program. Students must apply for all courses at Lansing Community College and attend classes on the Michigan State University campus.

AS 110 Organization of the U.S. Air Force 1(1-1)

The doctrine and mission of the U.S. Air Force includes its history, organization, and how it is structured for mission accomplishment. Comparison of armed services mission relationships.

AS 111 U.S. Strategic Offensive and Defense Forces 1(1-1)

Comparison of the missions and functions of specific Air Force commands, including employment of contemporary aerospace equipment and system.

AS 112 U.S. General Purposes Forces 1(1-1)

Tactical air forces. The mission, organization, and function of the Air Force support commands and separate operating agencies as well as forces of other military services.

AS 210 Development and Employment of Aerospace Forces I 1(1-1)

Development of flight from the first efforts to the present, and the employment of aerospace forces in war and peace.

AS 211 Development and Employment of Aerospace Forces II 1(1-1)

Development of flight from the first efforts to the present, and the employment of aerospace forces in war and peace.

AS 212 Development and Employment of Aerospace Forces III 1(1-1)

Development of flight from the first efforts to the present, and the employment of aerospace forces in war and peace.

PHYSICAL EDUCATION & ATHLETICS DEPARTMENT

Chairperson: Dr. Walter Lingo
354 Gannon Health Careers/Physical Education Building

The Physical Education Program at Lansing Community College offers students an opportunity to develop physical skills. The attainment of these skills will enable individuals to pursue and/or maintain a sound state of physical fitness.

Physical education courses are transferable and all physical education grades are transferable in determining student grade point averages.

Students wishing to transfer with a Physical Education major should come to the Office of Physical Education and Athletics to receive personal counseling.

Physical Education courses are offered in the following areas:

- Professional (PEA)
- Aquatics (PEF)
- Fitness (PEB)
- Combatives/Weight Training (PEG)
- Individual Sports (PEC)
- Gymnastics/Dance (PEH)
- Individual/Dual (PED)
- Indoor Activities (PEI)
- Team Sports (PEE)
- Outdoor Activities (PEJ)

COURSE DESCRIPTIONS

Professional Physical Education & Athletics (PEA)
Department of Physical Education and Athletics
Division of Student Personnel Services

PEA 100 Professional Orientation 1(1-1)

Overview of Physical Education field for prospective Physical Education majors.

PEA 102 Athletic Training 3(3-0)

Athletic injury prevention and care techniques; duties and responsibilities of athletic trainers.

PEA 104 IM Athletics 3(3-0)

Offers an introduction to IM athletic administration and competitive event supervision.

PEA 109 Officiating Basketball 2(2-0)

Instruction and testing to provide opportunity for official certification.

PEA 110 Officiating Volleyball 2(2-0)

Instruction and testing in preparation for officiating at the high school level. College officiating will also be discussed.

PEA 115 Coaching Basketball 2(2-0)

Designed to develop coaching skills. Focuses on defensive and offensive strategies as well as teaching fundamental skills.

PEA 116 Coaching Volleyball 2(2-0)

This course is designed to develop coaching skills in the areas of basic through advanced individual skills and team strategies. Teaching progression and practice planning will be covered.

PEA 201 Independent Study 1(0-2)

PEA 202 Independent Study 2(0-4)

PEA 203 Independent Study 3(0-6)

PEA 204 Independent Study 4(0-8)

Individual study on a prescribed topic in coordination with an assigned faculty member.

PEA 205 Professional Perspectives 1(1-0)

This course is designed to provide student-athletes with a professional perspective of the problems confronting community college student athletes.

LANSING COMMUNITY COLLEGE

1989 Catalog Lansing Community College www.lcc.edu
Fitness (PEB)
Department of Physical Education & Athletics
Division of Student Personnel Services

PEB 100 Adopted Lifetime Personal Health Activities (ALPHA) 1(0-2)
The nature of health, physical education and recreation and their place in
general education.

PEB 101, 102, 103, 104 Individual Fitness-A-B-C-D 2(1-2)
Four sequential courses to acquaint students with the principles of training.
Provides individual conditioning programs.

PEB 105 Jogging 1(0-2)
Introduces jogging as physical fitness and covers footcare, equipment, clothing,
and safety.

PEB 107 Jogging-Advanced 2(0-4)
Developing an individual training regimen for competitive runners.

PEB 108 Aerobic Walking 1(0-2)
Improving one's fitness level through vigorous walking outdoors. Students will
also develop a personalized healthy lifestyle plan which integrates exercise,
diet, and stress management.

PEB 109 Triathlon Training 3(0-6)
Designed to teach proper techniques in swimming, cycling, and running. A
vigorous training program is designed to challenge the student.

PEB 120 ABC's of Physical Fitness 2(1-2)
Aerobics, body building, and calisthenics are building blocks for this fitness
program. A progressive regimen toward better health.

PEB 121 Lit-up Workout 1(0-2)
An aerobic exercise program with emphasis on increasing aerobic capacity
through walking, jogging, stretching, and light weight training.

PEB 125 Body Flexibility 1(0-2)
Learning proper stretching techniques to increase body flexibility and applying
these techniques to increase muscle and joint flexibility.

PEB 130 Tone & Stretch 1(0-2)
This class combines isometric, partner calisthenics, stretching, and light
(½ lb.) weight exercises.

PEB 200-207 Tempest-Intro/A-B-C-D-E-F-G 1(0-2)
A series of sequential courses designed for EMS students. Designed for specific
concerns of EMS.

PEB 220 ABC's of Physical Fitness II 2(1-2)
Emphasis on maintenance and continued improvements on physical changes
made in the prerequisite; ABC of Physical Fitness I class. Exercise sessions
with increased difficulty to be aimed at the cardio-respiratory system, skeletal
muscles and figure shaping. Use of light ankle-wrist weights recommended.

Individual Sports (PEC)
Department of Physical Education & Athletics
Division of Student Personnel Services

PEC 106 Pool 1(0-2)
History, rules, and fundamentals, practice drill, positioning of cue ball, and
variations of the game of pocket billiards.

PEC 107 Pool-Intermediate 1(0-2)
Refinement and improvement of skills.

PEC 108 Pool-Advanced 2(2-0)
Further refinement and improvement of skills.

PEC 109 Racquetball-Beginning 1(0-2)
History, terminology, rules, fundamentals, etiquette, strategy, and basic shots.

PEC 110 Racquetball-Intermediate 1(0-2)
Refinement and improvement of skills.

PEC 111 Racquetball-Advanced 2(2-0)
Court strategy and tournament play.

PEC 112 Table Tennis-Beginning 1(0-2)
Basic skills, including the serve, forehand and backhand strokes.

PEC 113 Table Tennis-Intermediate 1(0-2)
Continuation of skills.

PEC 114 Competitive Table Tennis 2(2-0)
Refinement of skills and introduction of game strategy.

PEC 115 Tennis-Beginning 1(0-2)
Basic skills of tennis: serve, forehand, and backhand strokes, rules and strategy
of the game.

PEC 116 Tennis-Intermediate 1(0-2)
Continuation of skills.

PEC 117 Tennis-Advanced 2(2-0)
Refines skills of service, forehand and backhand strokes and game strategy.

PEC 127 Bowling-Beginning 1(0-2)
Basic skills and scoring of bowling.

PEC 128 Bowling-Intermediate 1(0-2)
Refines skills.

PEC 129 Bowling-Advanced 2(2-0)
Class competition involved.

PEC 209 Racquetball/Semi-private Instruction 1(0-2)
A basic presentation of racquetball skills will be discussed and demonstrated
so the students with varying degrees of skill and ability may further improve
their level of play.

Individual/Dual (PED)
Department of Physical Education & Athletics
Division of Student Personnel Services

PED 104 Bicycling/Touring 1(0-2)
Minor bicycle repair, maintenance, cold weather riding, and increased cycling
distances. Short tours and planned longer rides on some weekends.

PED 105 Bicycling-Camping/Touring 2(0-4)
Combines camping and touring: outfitting the camping cyclist, long distance
riding, planning for long bike camping trips.

PED 106 Cross Country-Beginning 1(0-2)
Instruction in jogging or running, dependent upon the physical fitness of the
individual.

PED 108 Cross Country-Advanced 2(2-0)
Emphasis on competition.

PED 109 Cross Country Skiing-Beginning 1(0-2)
Basic skills of cross country skiing: flat, uphill and downhill techniques,
equipment, waxing, touring, and basic safety.

PED 110 Cross Country Skiing-Intermediate 1(0-2)
Refinement and improvement of skills.

PED 111 Cross Country Skiing-Advanced 2(2-0)
Advanced skills plus overnight camping trip.

</tbody>
</table>
Combatives/Weight Training (PEG)
Department of Physical Education & Athletics
Division of Student Personnel Services

PEG 103 Fencing-Beginning
1(0-2)
Instruction in fundamental techniques. Care of equipment.

PEG 104 Fencing-Intermediate
1(0-2)
Emphasis on rules and competitive preparation.

PEG 105 Fencing-Advanced
2(2-0)
Individual competition.

PEG 106 Judo-Beginning
1(0-2)
Rules, theory and application of judo both for sport and self-defense.

PEG 108 Judo-Advanced
2(2-0)
Competition on an intraclass level.

PEG 109 Karate-Beginning
1(0-2)
Develops skills in punching with fists and hands, kicking (with feet and knees), and essential body movement in combat.

PEG 110 Karate-Intermediate
2(2-0)
Develops skills in punching with fist and hand, kicking (with feet and knees), and essential body movement in combat.

PEG 111 Karate-Advanced
2(2-0)
Designed for the highly skilled.

PEG 112 Self Defense-Beginning
1(0-2)
Designed to develop confidence and skills in the art of self-defense.

PEG 115 Weight Training-Beginning
1(0-2)
Various training methods, principles, and program designs.

PEG 116 Weight Training-Intermediate
1(0-2)
Emphasis on progressive lifting in training regimen.

PEG 117 Weight Training-Advanced
2(2-0)
Refinement and improvement of skills.

PEG 120 Tai Chi
2(1-2)
Tai Chi is designed to help students understand Chinese traditional cultural heritages. It is designed to introduce fundamental movements and compulsory forms of simplified Tai Chi and muscular art along with traditional art.

PEG 126 Aikido-Beginning
1(0-2)
Aikido—"The Way of Harmony"—focuses on physical discipline and harmony with self, partner, and potential combatants.

PEG 127 Aikido-Intermediate
1(0-2)
Further development toward harmony. Focuses on new defensive strategies and movements.

PEG 128 Body Building-Introduction
1(0-1)
This course is designed to introduce body building and proper lifting techniques. Primary emphasis will be on isolation of muscle groups through the use of machines and free weights.

PEG 129 Body Building-Beginning
1(0-2)
Focuses on proper lifting techniques to isolate and strengthen muscle groups.

PEG 130 Body Building-Intermediate
2(1-2)
Continuation of PEG 129 with more rigorous lifting regimens included.

Gymnastics/Dance (PEH)
Department of Physical Education & Athletics
Division of Student Personnel Services

PEH 103 Parent/Child Gymnastic Tumbling
1(0-2)
Development of motor skills with child and parent participating. Basic tumbling skills and elementary gymnastic movements.

PEH 104 Parent/Child Gymnastic Tumbling-II
1(0-2)
Continuation of PEH 103 to increase and further develop motor skills, gymnastic movement and parent bonding are stressed.

PEH 105 Aerobic Exercise-Beginning
1(0-2)
A progressive fitness course using dance as a vehicle toward fitness. Some weight training included.

PEH 107 Aerobic Exercise-Advanced
2(0-2)
Continuation of PEH 105 using more aerobic dance time as a vehicle toward fitness to improve cardiovascular conditioning.

Outdoor Activities (PEJ)
Department of Physical Education & Athletics
Division of Student Personnel Services

PEJ 100 Angling-Beginning
1(0-2)
Covers fish structure, habitats and habitats, tackle and techniques for fly, bait, spin, and ice fishing.

PEJ 101 Angling-Intermediate
1(0-2)
A lab class with emphasis on different types of baiting procedures.

PEJ 102 Angling-Advanced
2(0-4)
Fishing trips with emphasis on special castings and recognizing different fishing habits.

PEJ 109 Canoeing-Beginning
1(1-0)
Prerequisite: Students must know how to swim. Fundamentals of recreational canoeing and handling, care of equipment, safety strokes, and canoe towing.

PEJ 111 Canoeing-Advanced
2(2-0)
Class trips are planned and taken.

PEJ 124 Sailing-Beginning
2(1-2)
Introduction to sailing theory, terminology, and rigging.

PEJ 138 Windsurfing-Beginning
2(1-2)
Introduction to sailing theory, rigging procedure, maintenance and selection of equipment, and sailboarding techniques.

PEJ 143 Basic Sailing/Cruising
3(0-3)
Students will gain first hand experience in the art of sailing and seamanship. They will attain the confidence necessary to handle a cruising sailing vessel under various conditions which present themselves on the Great Lakes.

PEJ 144 Advanced Cruising
3(0-3)
Student will experience a major voyage on the Great Lakes applying the terms covered in PEJ 143. Major emphasis will be placed on advanced piloting and seamanship.

STUDENT ACTIVITIES

Director: William Zuhl
201 Student Personnel Services Building

Student activities at Lansing Community College are widely varied, providing social, cultural and recreational programs to help students enrich their free time, and to complement academic pursuits. Student activities reflect a total college involvement for faculty, staff, administrators, and members of the community as well as for students. Programs offered by the Student Activities Office are constantly expanded and diversified according to student interest and enthusiasm.

Fine Arts Cultural Program

Students at Lansing Community College are encouraged to participate in and attend programs of community fine arts groups: the Lansing Civic Players, the Lansing Symphony, the BoarsHead Theater, and others. Many students and faculty members perform in community theater productions and assist behind the scenes.

A number of trips are sponsored by Student Activities, including theater trips to the Shakespearean Festivals in Stratford, Canada. Trips have been sponsored to New York City on an annual basis, giving students an opportunity to see not only the theater, but many of the other cultural aspects of the big city. Shorter trips are planned to such points of interest as Frankenmuth, Cedar Point, and Greenfield Village.
STUDENT DEVELOPMENT SERVICES (SD)
Chairperson: Dr. John H. Cansfield
228 Student Personnel Services Building
The Department develops and maintains programs aimed at the personal and academic growth of students. Departmental services include counseling, academic advising, testing, tutoring, community outreach, student orientation, and support for special needs students including women, the handicapped, and those for whom English is not their native language. A number of student development classes and seminars are offered through the Department.

Academic Advising
The departmental advising centers and counseling offices on campus provide students with academic advising opportunities. Assistance and coordination is also offered to academic departments with academic advising programs.

Counseling Services
A staff of professionally qualified counselors assists students in educational, vocational and personal development. Specifically, counselors assist students with curriculum choice, academic problems, and with those social and personal problems which may interfere with academic progress. Both group and individual counseling are offered. A special counseling and support program called Project STAFF serves students having academic problems. A close relationship is maintained between the department and community agencies, and referrals are made to such agencies when appropriate.

College Transfer Articulation
Close contact is maintained with colleges and universities to which LCC students often transfer. Curricular guides are available for students who wish to learn about the transfer requirements for their chosen curricula. Representatives of colleges and universities visit the Lansing Community College campus for the purposes of discussing transfer requirements with students.

Student Orientation
Through the Student Testing, Advising and Registration Time (START), incoming students become better integrated into the college community. Academic placement testing, College information, and career development concepts are included. START operates prior to and during College registration periods. Individual College departments offer special student orientations which supplement the START experience.

CENTER FOR STUDENT SUPPORT
Program Director: Velena Lohmann
218 Student Personnel Services Building
The Center provides academic support services for special needs students. These services include tutorial assistance, academic advising, vocational planning, personal/social counseling, academic monitoring, community outreach, study skills laboratory, and adaptations for handicappeds.

CAREER EXPLORATION AND ASSESSMENT CENTER
Director: James C. Osborn
450 Gannon Vocational Technical Building
The Center offers extensive career interest testing and personalized one to one career counseling to aid individuals in decision-making. These services are provided to both students of LCC and people from the community. A consultation and testing fee is charged non-LCC students. LCC students are charged a small fee for the program.

Testing Services
A testing service is provided as part of the Career Exploration and Assessment Center. Career testing, CLEP, DANTES, and other testing instruments are available including the Tests of Educational Development (GED). A testing fee is required of all students using the service.

WOMEN'S RESOURCE CENTER
Program Director: Mary D. Laning
212 Student Personnel Services Building
The Women's Resource Center is a service center for people at Lansing Community College and in the community who may be exploring career options, considering returning to school, needing support in life-transition periods, looking for new directions, or developing personal and professional growth skills.

The Center offers a variety of classes and seminars for career exploration, personal growth and awareness, skill training, and dealing with changes in one's life.

The Women's Resource Center provides an opportunity for individuals to discuss concerns with our staff; a community outreach program including a speaker's bureau and ongoing scholarship and child care financial aid programs. Special referral services and scholarships are available through the Center.

PROGRAM DESCRIPTIONS
Student Development (SD)
Student Development Services Department
Division of Student Personnel Services

SD 103 Preventing Parent Burnout
This course is designed to facilitate an understanding of parent burnout and its impact on mental and physical function. The class will address causes, stages and symptoms, family and relationship dynamics, and problem solving. The course will provide multiple skills and mechanisms to cope with stress and prevent parent burnout.

SD 106 College Survival Skills
Designed to provide an orientation to the services available at Lansing Community College to assist students in identifying personal and academic requirements for success in higher education. This course will identify those personal factors which can help individuals to succeed academically and acquaint them with services available to assist them.
SD 117 Life Planning Workshop 1(0-0)
Life Planning is a three phase process: self-exploration, career exploration, and decision making. The intent of this workshop is to take an in-depth look at oneself. Specifically, interests, values and skills are identified in order to determine the uniqueness of each participant.

SD 118 Stretching Your Dollars 2(2-0)
Assistance is given in very basic money management, budget procedures, record-keeping, wise shopping practices, low-cost entertainment and recreation, effective debt payment methods, and financial goal-setting and planning.

SD 119 Mid-Career Planning 2(2-0)
Designed for people who wish to evaluate their present career situation in terms of their personal development. The class will enable students to identify present skills, interests, values, motivations, and plan some next step goals designed to promote career development. The course is equally appropriate for those considering a career change as well as those who would like to plan for continued growth and development within their present job situation.

SD 121 Exploring Your Potential 2(2-0)
Designed to help each person identify past and present achievements which suggest the presence of strengths and potentials. The goal of the class is greater realization of one's potential through self-determination.

SD 124 Techniques of Study 2(2-0)
Develops effective study habits by examining behaviors that interfere with successful classroom performance. A valuable aid for beginning and advanced students. Weekly discussions focus on: how to take examinations, note-taking, writing papers, reading improvement, and use of the library.

SD 125 Career Planning 2(2-0)
A course to help students relate their values, life goals, interests, and skills to job areas. Students investigate potential careers through self-assessment, career assessment, decision-making, and next-step planning.

SD 126 Elimination of Self-Defeating Behaviors 2(2-0)
This course is designed to help people change their behavior, learn how self-defeating behaviors are started, maintained, and how they can be eliminated. The behavior change is aimed at teaching people how to live life more fully and happily. Teaching methods include short lectures, feedback, discussions, and written homework. Class participants work independently on their own personal insights.

SD 127 Job Search Readiness 2(2-0)
This course aids students in the job search process. Course content covers filling out applications, writing resumes and cover letters, interviews, and other techniques used in seeking employment. Group discussions focus on personal attitudes toward job hunting.

SD 128 Interpersonal Communication 2(2-0)
This course is designed to help the student improve interpersonal skills including observation, listening, disclosure, and behavior change skills, through lecture/discussion and readings. The focus will be on understanding and constructive use of interpersonal communication skills.

SD 131 Weight Reduction II 2(2-0)
Prerequisite: SD 132. Weight Reduction II is designed to reinforce the self-management techniques taught in the prerequisite class. Solutions to both specific and long-range problems of weight loss and maintenance will be covered. (Any weight reduction program should be undertaken only after consultation with one's physician.)

SD 132 Weight Reduction Seminar 2(2-0)
The assumption for this course is that poor eating habits are learned and may be replaced by more appropriate behavior conducive to weight reduction and control. Beginning with a structured diet and exercise plan, students will focus their attention on environmental, personal and emotional factors which interfere with weight control. (Any weight reduction program should be undertaken only after consultation with one's physician.)

SD 137 Financial Management 2(2-0)
Management. Emphasis will be placed on total financial planning with a view toward attaining financial security and independence. Included will be budgeting, savings, taxes, estate planning, Social Security benefits, insurance and investments. (See SD 118 if interested in a more basic course)

SD 142 Assertiveness Training I 2(2-0)
Assertive behavior is interpersonal behavior in which a person expresses his/her opinions, feelings, beliefs, wants and personal rights and values in such a way that the rights of others are not violated. Techniques covered teach students to identify and accept basic interpersonal rights and develop assertive skills.

SD 143 Assertiveness II 2(2-0)
Prerequisite: SD 141 or SD 161. An expansion of concepts taught in the introductory Assertiveness Training classes is the focus of this class. Students will work on further development of vocabulary, ideas and behavior related to being assertive. Practice will be through role play and other means.

SD 145 Organizing Time 2(2-0)
This course is designed to assist individuals in making the most effective use of their time. It will be structured with discussions, films, written exercises, and readings dealing with procrastination, goal setting, time charting, and efficient measures of time management.

SD 147 Men's Lives/Men's Needs* 2(2-0)
This discussion and experiential format course is designed with men in mind. It will be a supportive setting where communication skills, assertiveness training skills, self-confidence, self-care, and a positive approach to problem solving and decision making will be utilized.

SD 150 Divorce Adjustment 2(2-0)
Designed for those who are experiencing or who have recently completed a divorce, the student-centered atmosphere is supportive and geared toward coping and finding constructive alternatives to the emotional crisis of divorce. A supportive, informed atmosphere will allow participants to discuss openly their feelings and experiences in working toward the goal of increased self-awareness.

SD 157 Single Parenting 2(2-0)
This course is designed for those who are raising children in a single-parent family structure. Topics will include communication, discipline, time-structuring, and the unique concerns of adults faced with the responsibilities of single parenthood. Group discussions, lectures, and readings will be used to benefit both men and women in their desire to become more effective parents.

SD 158 Anger Awareness 2(2-0)
This course is designed to define and explore anger, and to identify feelings, attitudes, and methods of expressing anger. This will be accomplished through readings, exercises, sharing and discussion. Participants will be expected to develop a guide to greater awareness of anger and how to deal with anger more effectively.

SD 161 Women and Assertiveness* 2(2-0)
Assertive behavior is interpersonal behavior in which a person expresses her/his opinions, feelings, beliefs, wants, and personal rights and values in such a way that the rights of others are not violated. This course emphasizes the way women deal with assertiveness situations.

SD 162 Start Living Rationally 1(1-0)
This course is designed to help individuals become more effective and productive. A variety of approaches and techniques will be used to provide students with insight into the sources of problems as well as specific approaches to problem solving. Practical techniques are offered to avoid frustration when the world is not the way it "should" be; for overcoming difficult situations at school, home, and on the job resulting in more of what one wants in life.

SD 165 Brown Bag Films 1(1-0)
An educational, contemporary film, videotape, or speaker is presented at each session, followed by a discussion of the issues presented in class. Topics deal with social issues facing society today.

SD 167 Management Skills and Women* 2(2-0)
Information and practice exercises related to the skills needed for management level jobs, with emphasis on the unique situations common to women who are being promoted or seeking promotion are covered. Included are: values clarification, leadership styles, communication, time management, decision making, supervision, and other skills.

SD 169 Women As Winners* 2(2-0)
This course is designed to offer participants new tools for insight, self-awareness and understanding. Participants learn to set their own goals, emancipate themselves from the boundaries they have set for themselves, and become more authentic and self-actualizing.

SD 176 Widow(er)hood 2(2-0)
The means of meeting change and crisis in a positive way, including possible new directions in life and the exploration of ways to make crisis work for the widowed, are shared through this class.
SD 184 Job Search/Reentry Women*  
This class is designed to assist in the job search by presenting job search skills that can be used now and in the future. Content will include setting realistic job goals, developing an effective resume, identifying job skills, good interviewing and effective follow-up. Emphasis will be given to the special job search concerns of women reentering the job market.

SD 188 Rape Education  
This course will present research and statistics encompassing the various areas of sexual assault prevention and treatment. Included will be medical examination, medical evidence gathering, victim’s medical rights, counseling strategies, phases of crisis/stages of coping with rape trauma, social service networking, statutory and legislative responses to need. Psychological profiles of victims and assailants, demographics of sexual assault, and behavioral aspects (method of operation) of the crime will be covered.

SD 192 Self-Defense and the Visually Impaired  
This class is designed to increase the self-defense and confrontation skills of the visually impaired through lecture/discussions and through the practice of a variety of exercises and drills. (Wear loose-fitting clothing to allow freedom of movement. If a cane is used, bring it to class.)

SD 195 Relationships: Friendship, Intimacy and Love  
Designed for those who wish to explore attitudes, values and beliefs about their own relationships. Learn ways to build and maintain friendship, intimacy and love relationships using techniques of open communication.

SD 204 Self-Defense and Women*  
This seminar is a combination of consciousness-raising and skill-building experiences intended to increase students' understanding, resources and skills in sexual assault prevention and self-defense.

SD 205 Self-Defense and Women II*  
Prerequisite: SD 204. This seminar is both a review and expansion of the techniques and skills taught in "Women and Self-Defense I" (SD 204). Self-defense techniques taught in this course will focus on responses to armed attacks, multiple attackers and special assaultive situations.

SD 220 Parent-Child Communication  
This course is designed for anyone interested in the development of parenting communication skills. Skills will include active listening, problem solving, and resolution of family conflict. Application of skills involves infants, pre-schoolers, school-age, and older children.

SD 226 Career Planning and Women*  
In a small group setting, this class will emphasize self-exploration and methods of increasing knowledge about career opportunities. Included will be identification of personal interests, life values, present skills and relating these to career options, goal-setting, decision-making, and developing a plan for future action.

SD 234 Overcoming Shyness  
Shyness is very common and most of the difficulties associated with shyness can be changed. Social awkwardness, difficulty meeting new people, fear of rejection, poor conversational skills and many hurtful thoughts about failure and inability to succeed or change are some of the characteristics with which this course will deal.

SD 236 Self Defense and Women*  
Develop self-defense techniques; develop a sense of confidence in determining when to use self-defense; and examine the politics of sexual assault as well as legal, medical and psychological aspects of this and other violent crimes against women.

SD 240 Empathy Training: Listening Skills  
This course will teach the student how to use empathy as a technique to deal with emotions, values and attitudes in the communication process. The skills will be taught in a small group emphasizing a supportive, experiential atmosphere. The interested student can acquire beginning skills for short-term peer counseling and improve interpersonal relationships between spouse, children, parents, friends, co-workers, etc.

SD 241 Math Anxiety  
Many people find themselves excluded from certain career choices because they are afraid to take math classes. This course will explore the origins of "math anxiety," investigate the sex differences in performance and understanding of mathematics and give practical help in reducing anxiety and changing attitudes toward math. The highly anxious math student will benefit from this class before taking a math class.

SD 242 Dealing With Stress  
This course is designed to facilitate an understanding of stress and how it affects health and behavior. The goal is to aid students in identifying lifetime skills which promote good mental and physical health. Topics include symptoms, personality, dietary influences, communication, balancing roles, goal setting and wellness.

SD 243 Advanced Empathy: Facilitating Decisions  
Prerequisite: SD 240 or Concurrently. This course will teach the student how to expand the use of empathy as a technique to deal with emotions, values and attitudes and decision-making in the communication process. The skills will be taught in a small group emphasizing a supportive experiential atmosphere. Concentration will be on values clarification and decision-making.

SD 244 Widow(e)red II  
Prerequisite: SD 176. This course is a natural extension of Widow(e)red I and will explore many relationship issues that should be an extension of coping with loss. Concerns such as learning to be single again, raising a child alone, caring for the home alone, as well as the emotional adjustment involved in such changes will be covered in this class. A supportive environment which enhances the individual potential of each class member will continue to be maintained as in the prerequisite course.

SD 245 Remarriage: Repetition or Renewal  
A course focusing on relationship building, self-assessment and understanding, understanding of behavior of others, acknowledging expectations of others, communication of need, identification of potential problems, and problem-solving techniques. Individual participants will engage in structured self-exploration through personal inventories and group participation.

SD 246 Substance Abuse Awareness  
The purpose of this course is to enlighten individuals regarding issues of health, addiction and treatment aid to assist students in determining their responses to society's substance abuse problems.

SD 248 Women's Reentry Seminar*  
For individuals in transition primarily from a homemakers role to that of student and/or wage earner, including displaced homemakers and homemakers who wish to work outside the home or begin an educational program. Confidence building, awareness of conflicts and issues, adjusting to change, setting personal and career goals and support in making the transition are emphasized.

SD 256 I'm OK, You're OK  
This course shows the basic concepts related to transactional analysis and how these concepts can enrich one's life. Within each of us is a child, an adult, and a parent reacting to the world around us. Increased personal awareness about oneself can help one to become more effective.

SD 271 Living Alone Creatively  
This course is designed for both single men and single women and will focus on creative and positive aspects of living alone (or with children). Information will be shared to increase self-awareness, develop skills, and create a support system to further the goal of "Living Alone Creatively."

SD 274 Black Women's Awareness*  
Explore concerns and issues confronting the Black woman in America today through course discussion, lectures, and group activities. Share viewpoints and life experiences in response to such questions as, "Who is the Black woman?" "What are her needs?" "How can those needs be met?" "How can class participants grow together?"

SD 281 Assertive Couples Communication  
Communicating assertively in a primary relationship is emphasized through assertiveness training and the theories of communication and self-esteem building in specific issues in relationships. (Class is designed to meet the needs of couples.)

SD 289 Burnout Prevention  
Employees, particularly those working in the area of providing service to others, are increasingly experiencing problems of job dissatisfaction and feelings of helplessness. As a result, they experience "burnout" with respect to their work. This course will deal with why burnout occurs, how to recognize the signs, and how to deal with feelings associated with burnout. (Designed for individuals involved in a work setting.)

SD 293 Advanced Elimination of Self-Defeating Behavior  
Prerequisite: SD 126. Advanced Elimination of Self-Defeating Behavior is designed to help people reinforce life-giving choices learned in the prerequisite course. Learning why life-giving choices work according to how they are carried
out is the goal of the course. The work in this course is aimed at enhancing
life-giving behaviors through review of concepts and discussion of participants' expe-
riences at placing the concepts into action during daily living.

Courses starred (*), as well as all others listed, are open to all students
who feel they might benefit from these courses.

**STUDENT FINANCIAL SERVICES**

**Director:** Neil G. Shriver
**112 Student Personnel Services Building**

The Student Financial Services Program at Lansing Community College assists
students who demonstrate need in meeting some of the college costs
that can not be met by personal or family resources. An objective method
of need determination approved by the Federal government is used to evaluate
students' and family's financial circumstances. Some scholarships are available
through the respective divisions of the college that are based on academic
achievement or talent.

Students are eligible to apply for financial assistance if they have graduated
from high school, have completed a G.F.D. or they have ability to benefit by
testing or counseling. They must be enrolled in collegiate programs of study
leading to a certificate or degree and must be citizens or permanent residents
of the United States.

**Sources of Financial Assistance**

Financial assistance programs are funded from federal, state, college and
private sources. Four sources of financial aid are scholarships, grants,
loans, and jobs. Most students receive a combination of these forms known as
a "package."

**Scholarships:** non-repayable money, usually awarded for academic achieve-
ment or talent may or may not be based on need:

- Board of Trustees Scholarships are awarded to outstanding district
  high school graduates.
- Divisional Scholarships are awarded to outstanding students who apply
directly to the College division or department of their area of study.
- Athletic Scholarships are awarded through the Athletic Department.
  Talented athletes contact coaches of their respective sport.
- Michigan Competitive Scholarships are based upon a qualifying exam-
  ination given during the junior and senior year in high school. Students
  may receive an "honorary" award not based on need or monetary award
  based upon need.
- Private Scholarships are available through the College or private
  organizations. A Scholarship and Financial Aid Booklet is available in the
  Office of Student Financial Services giving information about private
  scholarships, grants, loans, employment and college transfer scholarships available
to LCC students.

**Grants:** non-repayable money usually based upon need.

- Federal Pell Grants are based on need by filing an LCC Admissions and
  Financial Aid Form and an Application for Federal Student Aid, (or) Financial
  Aid Form to College Scholarship Service, (or) Family Financial Statement
to the American College Testing Service. Students must submit the Federal
  Pell Grant Student Aid Report, received through the mail, to LCC Office
  of Student Financial Services to receive the grant.
- Supplemental Educational Opportunity Grants are awarded to "high" need
  students by submitting the same application forms as for Pell Grants.
- Michigan Educational Opportunity Grants are awarded to needy students
  who have been Michigan residents at least 12 consecutive months.
- Michigan Adult Part-Time Grants are awarded to self-supporting, part time
  (3-11 credits), needy students who have been out of a high school program
  for at least 2 years, who have been Michigan residents for the past 12
  months.
- Tuition Incentive Program (TIP) pays community college tuition and fees
  for students from lower-income families. Eligible students must be under
  20 years of age when they graduate from high school or obtained a GED
  (General Educational Development Certificate) and must have graduated
  or completed GED after April 1998 and who are from lower income families.
- Women's Resource Center Grants are available for tuition, child care,
  displaced homemakers, and special populations. Students apply through the
  Women's Resource Center, Student Personnel Services Building, 2nd Floor.
- Center for Aging Education Tuition Assistance is available to persons
  60 years of age or older for up to four (4) credits per term. Students
  must meet moderate income guidelines. Students apply through the Center
  in 203 O.C. Bldg. or call 483-1179.

**Loans:** money that must be repaid beginning six to nine months after graduation
or enrollment of less than six (6) credits, with the exception of the SLS/PLUS
loans which must be repaid immediately.

- Perkins Loans, formerly the National Direct Student Loans are low interest
  loans determined based on the basis of need. Students apply by filling out an LCC
  Admissions and Financial Aid Application and an Application for Federal
  Student Aid, (or) Financial Aid Form to College Scholarship Service, (or) Family
  Financial Statement to the American College Testing Service.
- Stafford Guaranteed Student Loans (SSL) are for students that have need
  which cannot be met with other types of Financial Aid. Students apply
  following the same procedure outlined for the Perkins loans plus they
  complete a SSL application which is available from their bank savings
  and loan association or credit union. Students must apply two (2) months
  or more before funds are needed.
- State Direct Loan applications may be obtained at the College's Student
  Financial Services Office if students are unable to obtain a guaranteed
  loan from their lender. Lender of Last Resort application are also available
  at the school for students who have been refused a loan. At least two
  (2) months is required to process the State Direct Loan.
- Supplemental Loans for Students (SLS) are higher interest loans for self
  supporting adult students who do not qualify for other types of financial
  aid, or need additional aid. The applications are available from banks,
  savings and loan associations or credit unions. The application procedure
  is the same for the GSL, SLS, and PLUS.
- Parent Loans for Undergraduate Students (PLUS) are loans for parents
  to help their dependents pay college costs. Applications are available
  at the bank, credit union or savings and loan association. If the parent is
  refused an application or loan, PLUS forms are available at the Student
  Financial Services Office.
- Short-Term Loans are available on a limited basis through the Student
  Financial Services Office for tuition, books and emergency expenses.

**Jobs:** employment opportunities to assist students in earning money to meet
part of their educational expenses.

- Federal College Work Study is based upon need. Students submit an LCC
  Admissions and Financial Aid Application Form and an Application for Federal
  Student Aid, (or) Financial Aid Form to College Scholarship Service, (or) Family
  Financial Statement to the American College Testing Service.
- Michigan Work Study is awarded to needy students to help meet expenses
  while attending college. Students may be employed by the College, public
  non-profit organizations, private business and industry.
- Student Aide jobs are available to students at the College based upon
  skills and abilities and not necessarily upon need.
- College Placement Office at LCC posts Federal Work Study Jobs, Student
  Aide Jobs, Part-time Jobs and Full-time Jobs Off-Campus. Students obtain
  information at the Employment Placement Center and must interview at the
department's or employer's office.

**Special Situation Funds:** are available for certain students. The College's Student
Financial Services Office has information regarding application procedures for
the following programs:

- Armed Services
- Bureau of Indian Affairs
- Children of Disabled or Deceased Veterans
- Clubs, Organizations & Business Scholarships
- LCC Emergency Fund
- Michigan Commission on Indian Affairs
- Private Donor Scholarships
- Veterans' Benefits
- Vocational Rehabilitation Services

**How and When to Apply**

Financial Assistance Forms are available to students and their parents through
high school counselors or at the College Student Financial Services Office
located in the Student Personnel Services Building, 1st floor.

To make application for financial assistance at the College two (2) forms
must be submitted:

1. An LCC Application for Admissions and Financial Assistance Form
   must be completed and returned to Lansing Community College, Admissions
   Office, 530 North Capitol, Box 40010, Lansing, Michigan 48901.
   - Application for Federal Student Aid (Free Form) OR
   - Financial Aid Form to College Scholarship Service (Fee Required) OR
   - Family Financial Statement to American College Testing Service (Fee
     Required)

   Stafford Student Loans, Supplemental Loans, and Parent Loans for Under-
   graduate Students are available by completing the above forms and the loan
   application. Loan applications are available at banks, savings and loan
   associations and credit unions. Also, a loan information sheet must be completed.
   This form is available at the Student Financial Services Office.

   LCC Board of Trustees Scholarships are available through districts high school's
counseling office.

   Divisional Scholarships are available by applying directly to the respective
   College Division or Department of the student's major area of studies.
Financial Aid Funds are limited; therefore it is to the student's advantage to make early application for financial assistance. It is recommended that students apply by the month of April prior to the year for which attendance is planned. Applications will be accepted after April, but awards will be made only if funds are available.

Students transferring from other colleges must submit a Financial Aid Transcript from their previous colleges when they apply for financial assistance at LCC. Once the student has submitted the LCC Application for Admissions and Financial Assistance to the Admissions Office and the Federal Pell Grant Student Aid Report (SAR), which the student receives through the mail, and a Financial Aid Transcript to the Office of Student Financial Services, processing of the student's application for financial assistance will be completed and the student will be notified.

The amount of the student's award will be based on a standardized cost of attending LCC, less the expected student's and family's contribution. The College will attempt to meet students' need based upon available funds.

All financial assistance applications are confidential.

Rights and Responsibilities of Students Receiving Financial Assistance

As a recipient of financial assistance, a student enters into an agreement with Lansing Community College which affects the receipt and continuation of assistance. Therefore, students should be sure to read this information carefully.

Need and Financial Assistance Package

Financial need is determined by subtracting the expected family contribution and other financial resources from the appropriate College budget. The College will attempt to meet the student's need within the limitations of available resources. Also, if any errors are made by the College in determining eligibility for assistance or awarding of assistance, they will necessarily be corrected. Finally, any major changes occur in the student's financial circumstances or other aid be provided to the student, the student will report these changes to the Office of Student Financial Services.

Expected Family Contribution

If a student is a dependent student, the College assumes that parents have the first obligation to provide for the student's cost of education to the extent that they are able, based on a standardized method of determining parental contribution. If the second obligation falls upon the student to contribute to his/her own education from personal assets and earnings, which may include the need to borrow against future earnings.

If a student is a self-supporting or independent student, the College assumes that since a student is the prime beneficiary of education, the student has a primary obligation to provide for the cost of education to the extent the student is able, based on a standardized method of determining student contribution. The student's expected contribution will come from personal earnings, spouse's earnings if applicable, savings, and assets, which may also include the need to borrow against future earnings.

Falsification of Information

Falsification of information submitted by the student or parents for the purpose of receiving financial assistance may result in cancellation of assistance, bill-back for assistance received and referral to the appropriate federal authorities.

The Office of Student Financial Services may be required to validate information provided on the Financial Assistance Form by requiring income tax statements or other documentation of financial status.

Credit Hour Load

Financial assistance offered to a student is based on enrollment as a full-time student, i.e., 12 credit hours or more per term. A student who enrolls for less than 12 credit hours in a term will receive only a portion of the financial assistance package. For example, if a student's enrollment is for 9-11 credit hours per term, the student will receive approximately three-quarters (3/4) of the full-time financial aid package. If a student enrolls for 6-8 credit hours per term, the student will receive approximately one-half (1/2) of the full-time financial assistance package. If a student enrolls for less than six credit hours per term, the student will not be eligible for federal financial assistance.

Students with 3-11 credits may be eligible for a Michigan Adult Part-time Grant. Audited courses for non-credit do not count when determining your financial aid and can not be billed to financial aid.

Please note: While a reduction in credit hours below a full-time level will result in a reduction of the total financial assistance package, it will not necessarily represent a proportional reduction in the Pell Grant. Where the Pell Grant is involved, all reductions are based on standardized tables provided by the U.S. Department of Education which do not result in simple proportional reductions. In fact, situations may occur where students having a high Pell "eligibility index" enroll for less than 12 credit hours and are no longer eligible to receive Pell funds.

Budgeting Financial Aid Package

The student is responsible for properly budgeting all financial aid offered for each term. The financial aid package will be distributed to the student in the following manner: (1) Tuition and fees will be deducted from the financial aid during registration if sufficient funds are available and if tuition and fees are not paid by the student or other sources; (2) the student will receive an advanced financial assistance check during the first week of classes, if the student is eligible; and (3) the student will receive the balance of grants, loans, or scholarships approximately one week after the end of the College's 50% refund period. The student must be prepared to meet his/her living expenses during the period prior to check distribution.

Financial Assistance Advance Check

Students may receive an advance financial assistance check if enrolled by the last day of on-campus registration and if, as resident students, they have award totals of at least $300 per term or if, as non-residents, they have award totals of at least $424 per term. The financial assistance advance check will be calculated by subtracting the actual amount of the student's tuition and fees from the total award and advancing 10% of the remainder for 6-8 credit hours; 30% for 9-11 credit hours; or 50% for 12 or more credit hours, if the resulting total is $15.00 or more. Any other money due will be distributed after to 50% drop and add period. Advance checks are rounded to the nearest $10.00 multiple and range from $20-$150.00.

College Work Study

If a student has been offered College work student eligibility, the student must secure employment through the Employment Placement Office (Room 211, Vocational Technical Building) prior to receiving these funds which will be disbursed on a regular hourly salary payment schedule.

Tuition Refunds

If the student paid tuition and/or fees entirely out of personal funds, any refunds will go directly to the student. If tuition and fees are paid from financial aid funds, refunds will be allocated to the programs from which the student received aid. The amount refunded to any program may not exceed the amount the student actually received from that program.

Tuition Refunds for financial aid students are returned to accounts in the following order: Tuition waiver awards, Scholarships, Perkins Loan (formerly NSL), SEOG, MEGG, PELL, GRL.

Funds may be released to students only if repayment is not required.

Repayment of Grants

If a student withdraws from Lansing Community College or is withdrawn by the College because of not attending classes, a portion of any grants awarded to the student may be repaid and grades received may affect continuation of aid.

Satisfactory Academic Progress Requirements

To continue on financial assistance, students must maintain "Satisfactory Academic Progress" each term. Satisfactory Academic Progress for students receiving federal financial assistance is defined as:

1. Maintaining a grade point average (G.P.A.) above the Withdrawal Range as defined elsewhere in the Catalog.
2. Completing 50% or more of the credits attempted each term. Students, who do not complete 50% or more credits for two terms during the academic year, will be cancelled from financial assistance with the right of written appeal to the Director of Student Financial Services.

If a student is withdrawn because of unsatisfactory progress, the student may be readmitted and allowed to reenroll under a learning contract in such programs as "Project Stay" or "Project 60" and be considered as making satisfactory academic progress for financial assistance programs as long as the student adheres to the terms of the educational agreement or until the student has raised his or her cumulative grade point average above the withdrawal range, and completes 50% or more of the credits attempted each term.

Students who do not successfully complete the terms of their educational contract with "Project Stay" or other support programs will be cancelled from financial assistance.

Renewal of Financial Assistance

Financial assistance is not automatically renewed. Awards are granted for one year only. A student must reapply for assistance for the following year by completing all required application forms by stated deadlines on the application. For renewal a student must be enrolled in a certificate or degree program.

To be continued on financial assistance, the student must not be in default on any past educational loans at LCC or another college. Also, the student must not owe any repayments for educational grants, due to withdrawing from college or being withdrawn from college because of not attending classes.
A student will not be awarded Federal financial assistance at Lansing Community College beyond 180 credits. A transfer student will not be awarded Federal financial assistance beyond 180 credits, including transfer credits accepted by LCC.

Exceptions are:
1. Students who have one term to complete a degree or certificate program.
2. Students who have 180 credits or a Bachelor's Degree may be recommended for a Federally Guaranteed Student Loan to complete a degree or certificate program for the purpose of obtaining employment.

Rights of Information
It is the student's right to obtain information pertaining to financial aid programs available through the College and to discuss with a financial aid advisor, information pertinent to the student's assistance application, file folder (records) and assistance package.

Appeals
It is the student's right to appeal any decisions made regarding the assistance application or package. The student may meet with a financial assistance advisor to discuss his/her package. The student may meet with a financial assistance advisor to discuss extenuating circumstances to the above policies or any other policies affecting the student as an assistance recipient. A financial assistance review committee will meet periodically to consider appeals.

Student Financial Services Committee
A College-wide committee on student financial assistance has been established at Lansing Community College. The membership of this committee is as follows:
1. The Director of Student Financial Services (Chairperson).
2. One faculty member from each of the three instructional divisions—Business, Arts and Sciences, Division of Technology and Applied Sciences—to be appointed by the appropriate deans.
3. Two students to be appointed by the President of Student Government with the consent of Student Government.
4. The Director of Student Activities.
5. The Business Manager or his Representative.
6. The Dean of Student Personnel Services.

The functions of this committee are:
1. To assist in the development of programming and procedure with the Office of Student Financial Services of the College.
2. To assist in the evaluation of existing procedures and programming within the Office of Student Financial Services of the College.
3. To assist in the area of communications about the student financial assistance program and to provide input from the various sub-populations of the College.

MICHIGAN OCCUPATIONAL TRAINING PROGRAM

Program Director: Jennifer Brander
211 Gannon Vocational Technical Building

The Michigan Occupational Training Program provides scholarship assistance to retrain displaced workers through MJOB Retrain funds from the State of Michigan.

Recruitment
The program solicits applications to its program from people who are unemployed or underemployed due to layoff or plant or business closing. Applicants must exhibit a good work history (preferably have been employed in the same business or industry for three years or more). They must also be residents of Michigan, and citizens or nationals of the United States.

Assessment
Applicants to the program complete a written application and take appropriate placement testing. Placement testing is provided to the applicants through various other departments on campus: Communication, Mathematics, Office Standards. Some applicants are referred to the Career Exploration and Assessment Center for career counseling and testing. Qualified applicants are interviewed and selected to participate in this program of retraining.

Training
Short training programs (no longer than 3-4 academic terms) are provided for participants to train them for new careers where labor market need exists. Students are provided academic advising and monitoring as they go through the program. They are encouraged to utilize existing student support services, and other support services are designed to fit the special needs of given groups.

Placement
The goal of the Michigan Occupational Training Program is to place participants in jobs. The program establishes direct contact with employers and also has the assistance of Employment Placement Services. Participants receive editing and clerical assistance for their resumes and other job search correspondence.
Lansing Community College

Dean Neal A. Raisman

DIVISION OF ARTS & SCIENCES

Department of Academic Enrichment Services
Department of Communication
Department of Humanities
Department of Mathematics & Computer Science
Department of Science
Department of Social Science
DIVISION OF ARTS AND SCIENCES

Dean: Dr. Neal A. Raisman
111 Arts and Sciences Building

The Division of Arts and Sciences offers developmental, transfer and general education in support of the College's mission and goals for learning. The Division helps the Colleges meet its fourteen goals by:
1. Providing academic enrichment studies and programs to help students develop an awareness of self and build a foundation for the choice of a major.
2. Helping students to pursue knowledge in the humanities of all civilizations to become aware of the depth and range of human achievement.
3. Providing support courses for other divisions of the College.
4. Offering seminars in specific subjects as part of a lifelong learning program for the community.
5. Offering career programs providing training for entry level positions in human service agencies in the fields of Social Welfare, Mental Health, Hearing Impaired, Child Development and Education.

Divisional Objectives

To facilitate the attainment of these goals, the Division of Arts and Sciences has the following objectives:
1. To provide students with a variety of instructional environments: independent study, computer-assisted instruction, off-campus courses in the field and community, individualized self-paced learning courses, audiovisual and audio-visual support.
2. To provide support courses for other divisions of the College.
3. To recognize that understanding the issues of concern in the closing decades of the twentieth century will require of each individual the ability to read, write, and speak with clarity and organized purpose. To accomplish this, the Division provides for all student courses that will assist them to read with comprehension and to write and speak effectively.
4. To establish honors courses, special workshops, seminars for academic skills to succeed at the college level through remedial, developmental courses in reading, writing, and mathematics, and placement and testing services for diagnostic purposes.

Students are encouraged to select those courses and programs which help them acquire that broad base of understanding and range of abilities which lead to the development of analytical reasoning and informed judgement. Such individuals will be more versatile in dealing with the complexities of change in a modern technological society and be better prepared for positions of leadership and responsibility.

Completing distribution requirements in communication, humanities, science and social science will fulfill general education requirements for the Associate Degree in Arts or Sciences. It is to the advantage of students to complete their general education at Lansing Community College before transferring because many Michigan colleges and universities will then not require additional basic course work.

Organization of Resources

The six departments of the Division of Arts and Sciences are staffed by faculty who have attained at least the Master's degree within an academic discipline and many hold the Doctorate. The faculty and staff of the Departments strongly support the Division's dedication to the College's Open Access Commitment. Students work with faculty who have been educated and trained to help students with diverse abilities and goals meet their learning objectives. The Division also has a wide range of computer-assisted instruction to assist faculty in the delivery of educational programs and time availability. The Division's use of Computer-Managed Learning plus Computer-Assisted Instruction helps the College to be recognized as a leader in computer-based education. Computer-based education used as an adjunct to classroom learning permits students to progress at their own pace, increases their rate of comprehension and achievement and assures Open Access is a continuous path to educational and career horizons and goals. The Division is proud of offering instruction in small classes to assure individual interaction between student and teacher with maximum opportunities for recognition of individual needs and abilities. The Division also provides for ability assessment and counseling in basic skill areas to direct students toward meeting their full learning goals and potential without prejudice to placing them with the College.

Dual Enrollment

High school students who have demonstrated academic ability may, upon recommendation of their high school principal, be admitted during their junior year in high school to the dual enrollment program of the College. Students are accepted prior to graduation from high school and may earn a number of hours of credit toward their pre-professional or Associate Degree while they complete their high school program. Students usually attend afternoon or evening classes. They enroll in regular sections of the courses for which they are registered and their credits are fully transferable to other colleges and universities.

Seminar Series

Special seminars are drawn from areas within departments in the Division of Arts and Sciences. The courses are designed and offered by faculty on topics that reflect the forefront of knowledge, current trends and others. Seminars are designed to help us acquire new skills or insights. Credits are variable from one to four. Prerequisites are listed individually for each offering.

Honor Program

The Division of Arts Sciences offers an Honor Program for students of outstanding academic ability. This program offers the advantages of independent study as well as regular scheduled honors courses, and provides these students with the opportunity to explore their academic interests in depth.

Awards covering full tuition and fees are offered each year to new students of superior academic ability who intend to study in this Division. These awards are available on request from the Honors Program Coordinator, Division of Arts and Sciences, Room 309, A&S Building.

DEPARTMENT OF ACADEMIC ENRICHMENT SERVICES

Chairperson: Dr. Thomas L. Franke
309F Arts and Sciences Building

The Department of Academic Enrichment Services offers instruction in the following areas, under the codes indicated:

- ESL: English as a Second Language
- ENR: Enrichment
- PHN: Phonics
- REG: Reading
- SPL: Spelling
- VCB: Vocabulary
- WRT: Writing*

*Courses with this code are also offered by the Department of Communication.

The Department of Academic Enrichment Services (DAES) is student-centered. Emphasis is on identification of student needs and development of an instructional continuum that will encourage success. The department offers courses in such areas as reading improvement, basic writing, and English as a second language.

Special Services

The Department of Academic Enrichment Services (DAES) provides a variety of student services, including reading and writing assessment and placement advising. The department offers testing services to help students select appropriate courses in reading, writing, spelling, and English as a Second Language. Students are urged to inquire in the Academic Enrollment Center (309 Arts & Sciences) about a writing or spelling placement test. Reading and spelling testing and advising are offered during regular registration before each term. Additional reading and advising can be arranged in the Academic Enrollment Center.

The DAES administers the Honor Program for the Division of Arts and Sciences, and it coordinates divisional dual enrollment, advanced placement, and special enrollment programs.

COURSE DESCRIPTIONS

Enrichment (ENR)
Department of Academic Enrichment Services
Division of Arts and Sciences

ENR 133 Individualized English

3(0-6)

Individualized instruction in one or several of these areas: writing sentences, paragraphs, or essays, reading, spelling, or vocabulary. Students choose their own study materials, set their own schedules, work at their own pace, and receive professional tutorial assistance whenever they are working in the laboratory. (P-E grading system)
Division of Arts and Sciences

ENR 150 Success Seminar 5(0-0)
A mini-workshop intended to introduce and/or review reading-related techniques for academic survival. Covers time management, establishing a frame of reference, scientific skimming, main idea identification, organizational study procedures, enhancing comprehension, note-taking through "mapping," and keys to improving objective test scores. Includes much practical, "hands-on" activity. (P-Z grading system)

ENR 152 College Reading Survival Skills 2(2-0)
Designed for beginning college students, whether recent high school graduates or returning adults. Develops college survival skills. Includes work on reading speed and flexibility, study techniques, concentration and memory, note-taking, test-taking, and vocabulary expansion. (P-Z grading system)

ENR 162 Orientation Workshop in College Writing Skills 2(2-0)
Designed for new and returning students, as well as others from the community. Develops writing skills, including study of writing for various disciplines, the writing process, and the basics of grammar, sentence style, and punctuation. Helps prepare students for college composition. (P-Z grading system)

English as a Second Language (ESL)
Department of Academic Enrichment Services
Division of Arts and Sciences

ESL 116 English as a Second Language I 5(5-0)
For advanced beginners who have been introduced to some basic English structures but have not yet mastered them. Class sessions focus on the spoken form and homework on the written form. Tapes provide supplementary aural-oral experience.

ESL 117 English as a Second Language II 5(5-0)
Reinforces the instruction of ESL 116, introduces new verb forms and complex sentence patterns, and gives increased attention to writing. Tapes provide supplementary aural-oral experience.

ESL 118 English as a Second Language III 5(5-0)
Emphasizes advanced grammatical structures with some preparation for taking college classes. Tapes provide supplementary aural-oral experience.

ESL 119 English as a Second Language IV 5(5-0)
Prerequisite: ESL 118 or department approval. Fourth of a four-term sequence in American English as a second language. Emphasizes oral-aural skills, college-level writing and reading skills.

ESL 120 English as a Second Language V 5(5-0)
Prerequisite: ESL 119 or department approval. An advanced course in English as a second language. Emphasizes reading, writing, and oral communication. Students will write and revise weekly compositions, keep weekly journals, participate in a variety of speaking and listening activities, and read selected literary articles weekly.

Phonics (PHN)
Department of Academic Enrichment Services
Division of Arts and Sciences

PHN 110 Introduction to Phonics 4(4-0)
Familiarizes students with the relationship of English language sounds to their corresponding printed alphabetical letters and letter combinations. Examines rules governing variations in these sounds; the process of sylabification, accent, the dictionary pronunciation system, structural analysis of words, and the relationship of phonics to reading and spelling.

Reading (RDG)
Department of Academic Enrichment Services
Division of Arts and Sciences

For additional reading-related courses, see SPL 150, 151, VCB 131, 132.

RDG 006 Reading Laboratory No credit
RDG 006 arranges the days and times when students will attend Reading Clinic courses. Students must register for both a Reading Clinic course, such as RDG 136, and a section of RDG 006.

RDG 110 Reading Skills I 4(0-8)
Intended for industrial workers who wish to develop basic reading skills. An individual program will be developed for each student. (P-Z grading system)

RDG 111 Reading Skills II 4(0-8)
Continuation of RDG 110. (P-Z grading system)

RDG 112 Reading Skills III 4(0-8)
Continuation of RDG 111. (P-Z grading system)

RDG 113 Reading Skills IV 4(0-8)
Continuation of RDG 112. (P-Z grading system)

RDG 121 Personal Reading I 1(0-2)
Prerequisite: Department approval. Some content and approach as RDG 136, 137, and 138. May be taken concurrently with RDG 136, 137, or 138 to provide extra instruction and practice.

RDG 122 Personal Reading II 2(0-4)
Prerequisite: Department approval. Some content and approach as RDG 136, 137, and 138. May be taken concurrently with RDG 136, 137, or 138 to provide extra instruction and practice.

RDG 123 Personal Reading III 3(0-6)
Prerequisite: Department approval. Some content and approach as RDG 136, 137, and 138. May be taken concurrently with RDG 136, 137, or 138 to provide extra instruction and practice.

RDG 136 Reading Clinic I 4(0-8)
Teaches basic reading skills and improves confidence. Provides a personal reading program which combines private tutoring with directed practice in the reading lab. At the time of registration, a student must register for both a specific course—such as RDG 136—and a RDG 006 section. The RDG 006 section arranges the times for the student's attendance in the Academic Enrichment Center.

RDG 137 Reading Clinic II 4(0-8)
Continuation of RDG 136.

RDG 138 Reading Clinic III 4(0-8)
Continuation of RDG 137.

RDG 143 Individualized Reading 3(0-6)
A program for average readers, especially adults in the working community, who wish to improve their reading skills in a laboratory environment. Skill building is totally personalized through private consultation, tutorial conferences, and specialized programmed materials.

RDG 144 Individualized Reading Alternate 4(0-8)
Same as RDG 143, but offers 4 credits for a more intensive program.

RDG 150 Reading Comprehension I 4(4-0)
Deals with strategies for understanding the printed word. Special attention is given to comprehension, vocabulary building, and study techniques as preparation for college level reading assignments.

RDG 161 Seminar: Speed Reading 1(1-0)
Designed for the average or better-than-average reader. Emphasis is on improving rate of reading through practicing good reading habits and developing flexibility in reading various kinds of materials. (P-Z grading system)

RDG 162 Concentrated Speed Reading 2(2-0)
Designed for the average or better-than-average reader. Emphasis is on improving rate of reading through practicing good reading habits, developing flexibility in reading various kinds of materials, and studying vocabulary. Students should experience improvement in their reading rate, comprehension, and vocabulary. (P-Z grading system)

RDG 164 Speed Reading 4(4-0)
Designed for the student of average or better-than-average reading ability. Increases reading rate and comprehension for greater efficiency in studying and in general reading. Special attention is given to vocabulary improvement, the multiple purposes of reading, the importance of flexibility in reading, and increased concentration. (P-Z grading system)

RDG 174 Critical Reading 4(4-0)
Improves the student's ability to read critically. Enables the student to perceive reading not merely as a mechanical process but as one of absorbing and interpreting ideas. Emphasis is placed on analyzing the message and its implications.
Spelling (SPL)
Department of Academic Enrichment Services
Division of Arts and Sciences

SPL 150 Spelling Improvement I 2(2-0)
Focuses on basic spelling problems and principles, progressing from elementary
three-letter words through words frequently used but commonly misspelled. Emphasizes use of dic
tionaries for finding correct spelling. Prepares students for Spelling Improvement II.

SPL 151 Spelling Improvement II 2(2-0)
Advances from intermediate to college level. Covers words frequently misspelled
and missused in business, general college work and practical adult life situations.
Includes prefixes, suffixes, meaning, pronunciation and the most useful spelling
principles plus their exceptions.

Vocabulary (VCB)
Department of Academic Enrichment Services
Division of Arts and Sciences

VCB 131 Vocabulary Improvement I 2(2-0)
Uses knowledge of and extensive practice with word parts (roots, prefixes,
and suffixes) to expand vocabulary. Pronunciation, correct usage, and dictionary
skills are also emphasized.

VCB 132 Vocabulary Improvement II 2(2-0)
Builds on the work of Vocabulary Improvement I, offering activities for expanding
the student's ability to recognize and use words in various contexts.

Writing (WRI)
Department of Academic Enrichment Services
Division of Arts and Sciences

For additional writing-related courses, see Department of Communication.

Placement testing is conducted during the first week of each term for all
students in WRI 112 and WRI 119. Some students are advised to drop the
course for which they have registered and to add a more appropriate course,
either more basic or more advanced.

WRI 006 Writing Laboratory No credit
WRI 006 arranges the days and times when students will attend writing lab
courses. Students must register for both a writing lab course, such as WRI
112, and a section of WRI 006.

WRI 110 Confidence in Writing 4(4-0)
Designed to help students understand the writing process, reduce writing
anxiety, and develop basic writing skills. Emphasizes planning, composing,
and revising strategies for experiential writing. Provides frequent writing practice
in a supportive workshop environment.

WRI 112 Fundamentals of Writing 4(2-4)
An individualized course to help prepare the student for freshman writing.
Teaches students to write well-organized paragraphs and essays. Develops skill
in choosing words and writing sentences. Includes laboratory activities with
professional tutorial assistance. Requires enrollment in WRI 006 to schedule
lab attendance.

WRI 116 Grammar and Mechanics in Writing 4(4-0)
Designed to help students master, in their own writing, the basic grammatical
and mechanical skills (except spelling) that are expected upon entry to WRI
121. Students will learn about and apply knowledge of basic grammar,
mechanics, and sentence punctuation.

WRI 119 Business Writing: Grammar and Mechanics 4(1-6)
Designed to meet the demands of business writing. Course components include
study of grammar, punctuation, and style of business prose. Revision and
proofreading skills necessary for appropriate business correspondence are
emphasized through practice and testing. Requires enrollment in WRI 006 to
schedule lab attendance.

DEPARTMENT OF COMMUNICATION
Chairperson: Dr. George R. Bramer
201 Arts and Sciences Building

The Department of Communication offers instruction in the following areas,
under the codes indicated:

COM: Communication
FRN: French
GRM: German
JRN: Journalism
SGN: Sign Language
SPN: Spanish
SPH: Speech
WRI: Writing

*Courses with this code are also offered by the Department of Academic
Enrichment Services.

The goal of the Department of Communication is to develop students' communication skills. The department serves a diverse student population.
It provides general education service courses for the Arts and Sciences Division
and the College, transfer-level courses, career preparation and training courses,
and life-long learning seminars for the college and community. The department
attempts to offer instruction appropriate for each student's personal needs,
instructional level, and educational goals.

The department has four distinct programs: Writing, Speech, Foreign Lan-
guage, and Sign Language/Interpreter Training. The Writing Program offers
transfer-level general education courses and specialized instruction in creative
and practical writing, including journalism. The Speech Program has a range of
offerings in general and specialized speech communication, and offers a
pre-major curriculum. The Foreign Language Program provides transfer-level
instruction and conversation courses in Spanish, French, German and Japanese;
special-purpose seminars; and a pre-major curriculum. The Sign Language/
Interpreter Training Program offers certificate and degree curricula in manual
communication and in interpreting, as well as more limited instruction for
personal enrichment.

All of the four programs can arrange special instruction and related services
for business, industry, government and other organizations.

Seminars
The Department of Communication offers seminars in creative and functional
writing, speech, conversational foreign languages, and sign language. These
courses, generally open to all, are of special interest to adults who are continuing
their education, and also to certificate or degree students whose curricul
require electives. They may be taken on an audit basis or for a grade and
credit.

Degree credit varies according to seminar content; transfer credit depends on
the institution to which the student transfers. Information about degree
credit and level of instruction will be provided at the first class meeting or
in advance at the department office. In general, seminar course numbers at
the 200 level and above indicate increased challenge.

Independent Study
Prerequisite: Department approval. Individual projects in communication,
writing, journalism, and speech. Students will spend at least two hours a week
for each credit in Independent Study.

COURSE DESCRIPTIONS
Communication (COM)
Department of Communication
Division of Arts and Sciences

COM 161 Seminar: The Land of the Maya 2(2-0)
Prerequisite: Department approval. Spanish component: Students learn pro-
cunciation of Spanish sounds, basic Spanish phrases for survival in an Hispanic
environment, and knowledge of essential information about daily Hispanic
culture. Mayan Component: Students learn to identify the unique components
of pre-Colombian Mayan civilization, including pre-classic, classic, and post-
classic architectural styles, glyph writing, astronomy, mathematics, religion,
history, and features of daily life.

COM 162 The Land of the Maya: Seminar and Field Trip 3(2-1)
Prerequisite: Department approval. Spanish component: Students learn pro-
cunciation of Spanish sounds, basic Spanish phrases for survival in an Hispanic
environment, and knowledge of essential information about daily Hispanic
culture. Mayan Component: Students learn to identify the unique components
of pre-Colombian Mayan civilization, including pre-classic, classic, and post-
classic architectural styles, glyph writing, astronomy, mathematics, religion,
history, and features of daily life. Field Trip Component: seven-day field trip
to Yucatan, Mexico.
Division of Arts and Sciences

COM 163 Seminar: Mayan Culture Field Trip 1(0-2)
Prerequisite: Department approval. Seven-day field trip to Yucatan, Mexico. Students learn to identify the unique components of pre-Colombian Mayan civilization, including pre-classic, classic, and post-classic architectural styles, glyphs, writing, astronomy, mathematics, religion, history, and features of Mayan daily life through direct observation on the field trip.

COM 209 Mass Communication 4(4-0)
Introductory course acquainting students with the major mass media and their impact on American society. Students investigate current communication theory and research on a broad range of topics related to the mass media, including values the media portray, the effects of televised violence on viewers, news, advertising, and media stereotypes.

COM 230 Introduction to English Linguistics 4(4-0)
Examines the English language from the perspective of contemporary American linguistics: generative syntax, phonology, regional and social variation. Considers implications for teachers.

COM 260 Intercultural Communication 4(4-0)
Provides students with an understanding of the intercultural communication process. Students learn about the value system of their own culture and develop a sensitivity for and an appreciation of other cultures in a developing world. Lectures, readings, simulations, games, class discussions, and multi-media presentations are employed.

COM 280 Seminar: The Story of English 3(3-0)
A telecourse that traces the growth and development of English from its Germanic tribal origins to its present status as an international language.

French (FRN)
Department of Communication
Division of Arts and Sciences

Advanced placement in French study may be arranged for students who have satisfactorily completed two or more years of French in high school, and those who have established French proficiency by other means.

FRN 101 Elementary French I 5(5-0)
Explores topics of current interest in French-speaking cultures as well as elementary language patterns. Workbook accompanies the text, provides students with additional structured exercises, and expands the student's ability to communicate in writing. Cassette recordings help students enhance their pronunciation and listening comprehension, provide an opportunity to practice oral skills outside of class.

FRN 102 Elementary French II 5(5-0)
Prerequisite: FRN 101 or department approval. Continuation of FRN 101. Designed for students with basic prior knowledge of French who wish to enhance their language skills and acquire a greater ability to master the structure of the grammar and the verb tenses. Emphasis is on drilling exercises, vocabulary, reading, and comprehending elementary texts. Includes class discussions once a week on preassigned subjects as well as five written compositions. Poems presented, as well as films and slides for students to learn about French culture and society.

FRN 103 Elementary French III 5(5-0)
Prerequisite: FRN 102 or department approval. Continuation of FRN 102. Final course of a three-term sequence in elementary contemporary French. Designed to offer further knowledge of French grammar and wider exposure to French expressions and vocabulary that will allow the students to understand a French-speaking person in a normal conversation. Emphasis is on grammar exercises, speaking, and comprehending the French language without recourse to a dictionary. Includes the writing compositions, memorization of poems, and weekly discussions.

FRN 185 Seminar: Intensive Conversational French I 4(4-0)
Designed for people with little or no knowledge of French who wish to acquire conversational skills. Students learn how to communicate orally in everyday life situations and in travel abroad. Emphasis is on the development of ability to understand spoken French as well as to speak it in order to convey one's thoughts to French-speaking people. Pronunciation and vocabulary are developed through class discussions. French culture is explored.

FRN 186 Seminar: Intensive Conversational French II 4(4-0)
Continuation of Intensive Conversational French I. Designed for slightly advanced beginners who are familiar with elementary sentence patterns, basic pronunciation and vocabulary, and who wish to improve their ability to speak French in the context of daily living.

FRN 201 Intermediate French I 5(5-0)
Prerequisite: FRN 103 or department approval. Offers students advanced training and practice in French speaking, reading and writing. First course of a three-term sequence in intermediate contemporary French. Includes a review of basic French grammar, intensive vocabulary with a variety of reading selections, group discussions on assigned topics, guided compositions and student presentations of short contemporary stories.

FRN 202 Intermediate French II 5(5-0)
Prerequisite: FRN 201 or department approval. Second course of a three-term sequence in intermediate contemporary French. Offers students the opportunity to enrich their language skills (speaking, listening, comprehension, reading and writing) with grammar review and intensive vocabulary. Students read and discuss short stories and poetry, write compositions, make oral presentations and participate in small group discussions.

FRN 203 Intermediate French III 5(5-0)
Prerequisite: FRN 202 or department approval. Third course of a three-term sequence in intermediate contemporary French. Includes a general review of important grammar points through specific readings. Students acquire an advanced level of vocabulary and idiomatic expressions that they will use in compositions and oral presentations. Also includes group discussions on contemporary subjects and analyses of literary texts.

German (GRM)
Department of Communication
Division of Arts and Sciences

Advanced placement in German study may be arranged for students who have satisfactorily completed two or more years of German in high school, and those who have established German proficiency by other means.

GRM 101 Elementary German I 5(5-0)
The first course of a three-term sequence in contemporary German. Students explore topics of current interest concerning German-speaking cultures as a vehicle for learning basic communication skills. Conversation and class participation are emphasized. Tape recordings accompanying the text provide additional exercise in pronunciation and comprehension.

GRM 102 Elementary German II 5(5-0)
Prerequisite: GRM 101 or department approval. Second course of a three-term sequence in contemporary German. Students explore topics of current interest concerning German-speaking cultures as a vehicle for learning basic communication skills. Conversation and class participation are emphasized. Tape recordings accompanying the text provide additional exercise in pronunciation and comprehension.

GRM 103 Elementary German III 5(5-0)
Prerequisite: GRM 102 or department approval. Third course of a three-term sequence in contemporary German. Students explore topics of current interest concerning German-speaking cultures as a vehicle for learning basic communication skills. Conversation and class participation are emphasized. Tape recordings accompanying the text provide additional exercise in pronunciation and comprehension.

GRM 161 Seminar: Elementary Business German I 2(2-0)
Designed for Americans doing business in German-speaking countries. Provides the practical information necessary for beginning a business venture or extending existing operations. Offers useful vocabulary and phrases for American and other English-speaking business people in Germany.

GRM 185 Conversational German I 4(4-0)
The first course in a two-term sequence for persons with little or no knowledge of German who wish to develop some conversational skills. Students learn correct pronunciation, essential language structures, and a practical vocabulary which is applied in conversational exchanges. Selected aspects of German culture are introduced through multimedia presentations.

GRM 186 Conversational German II 4(4-0)
The second course in a two-term sequence for persons with little knowledge of German who wish to develop some conversational skills. Students learn correct pronunciation, essential language structures, and a practical vocabulary which is applied in conversational exchanges. Selected aspects of German culture are introduced through multimedia presentations.

GRM 201 Intermediate German I 5(5-0)
Prerequisite: GRM 103 or department approval. First course of a three-term sequence in intermediate contemporary German. Students receive advanced training and practice in the four basic skills—speaking, listening comprehen-
1989 Catalog Lansing Community College

### Division of Arts and Sciences

#### JournAlm (JRN)
**Department of Communication**

Division of Arts and Sciences

For additional journalism-related courses, see VCB 131, 132; SPL 150, 151; COM 209 and 230.

- **JRN 150 Press In A Free Society**
  3(3-0)
  An examination of the role and impact of journalism, print and electronic, in a democratic society. Major focus is on an understanding of the concepts of "freedom" and "responsibility" and on development of the student's ability to evaluate press performance intelligently.

- **JRN 151 Newswriting**
  4(4-0)
  Considers what is of news interest and how to turn news facts into a publishable news story. Students learn news terminology, the importance of news style, objectivity, attribution, and accuracy.

- **JRN 152 Reporting**
  4(4-0)
  Prerequisite: JRN 151 or department approval. Shows how, when and where to gather facts, how to conduct interviews, and how to cover speeches, meetings and news conferences. Students develop a sense for digging out information and using facts for a clear, readable, balanced news story.

- **JRN 254 Editorial Writing**
  4(4-0)
  Prerequisite: JRN 151 or department approval. A course in how to write effective editorials and concentrated study of editorial concept, structure, and style. Student analyzes editorial models, learns methods of research, and writes at least six editorials.

- **JRN 256 Newsletter Writing and Production**
  4(4-0)
  Provides the student with a working knowledge of writing and editing in journalistic style, and the techniques necessary for producing a newsletter or house organ.

#### Sign Language (SGN)
**Department of Communication**

Division of Arts and Sciences

Students who apply for the Sign Language Interpreting Program, in which the courses are numbered at the 200 level, must pass a screening test before being admitted. The Interpreting program can be entered only in the Fall Term.

- **SGN 160 Orientation to Deafness**
  2(2-0)
  Introduces the student to deafness and its effects. Lectures and audio-visual presentations cover areas of interest to those working professionally with deaf persons, parents, and families of deaf individuals, and those desiring greater awareness of the "world of the deaf." Class experience includes guest lectures to further acquaint students with the deaf community.

- **SGN 161 Sign Language I**
  4(3-2)
  Prerequisite: SGN 160 or concurrent enrollment. Provides students with a basic understanding of American Sign Language (ASL). Students learn grammar, syntax and vocabulary. Weekly laboratory sessions develop elementary receptive and expressive skills.

- **SGN 162 Sign Language II**
  4(3-2)
  Prerequisite: SGN 161 or department approval. Provides students with an intermediate understanding of American Sign Language (ASL). Students are introduced to the principles of ASL syntax and vocabulary and are presented with more complex grammar and vocabulary. Weekly laboratory sessions are continued and elementary conversational skills are developed.

- **SGN 163 Sign Language III**
  4(3-2)
  Prerequisite: SGN 162 or department approval. Provides students with more advanced understanding of American Sign Language (ASL) including additional vocabulary and ASL idioms. Expressive and receptive conversational skills are emphasized in both class and laboratory sessions.

- **SGN 164 Fingerspelling**
  2(1.5-1)
  Prerequisite: SGN 162 or concurrent enrollment. Provides concentrated instruction and practice in fingerspelling, emphasizing the development of receptive and expressive skills.

- **SGN 165 Receptive Manual Communication**
  4(3-2)
  Prerequisite: SGN 163 or department approval. Designed to increase the student's skill in conversational sign language. Focuses on the reception, analysis and comprehension of the various manual communication systems utilized by the hearing impaired in conversational situations. Skills in American Sign Language (ASL) are emphasized.

- **SGN 166 Advanced Fingerspelling**
  2(1.5-1)
  Prerequisite: SGN 164 and SGN 163 or concurrent. Provides the student with concentrated instruction and practice in both expressive and receptive fingerspelling.

- **SGN 200 Sign Language IV**
  4(3-1)
  Prerequisite: SGN 163 or department approval. This course contains key components for this advanced level in sign language. The students will develop the vocabulary, phrases, stories, and paragraphs while increasing their skills in signing. They will further increase their knowledge of communication in the deaf community.

- **SGN 250 Deaf Culture**
  3(3-0)
  Prerequisite: SGN 165 or department approval. Builds on SGN 160, looking more closely at the unique experiences of those in the deaf community. Examines the history of the deaf community in America, the sociology of the hearing impaired (both deaf and the hard-of-hearing), and the psychological ramifications of deafness.

- **SGN 251 Psychosocial Aspects of Hearing Loss**
  3(3-0)
  Prerequisite: SGN 160 or department approval. Provides the student with a more advanced understanding of the effects of hearing impairment on the development of individuals and families. Several different models of human development are explored as they relate to hearing impaired children and adults as well as their families and social systems.

- **SGN 260 Linguistic Principles of American Sign Language**
  3(3-0)
  Prerequisite: SGN 163 or department approval. An overview of the linguistic organization of ASL, including a linguistic perspective on how ASL is learned and how it is (and is not) influenced by English. Topics relevant to interpreting, such as language variation and translation, will be emphasized.

- **SGN 261 Principles of Interpreting I**
  5(4-2)
  Prerequisite: Successful completion of screening test, SGN 260 or concurrent. Surveys basic interpreting through lecture, role playing, and classroom discussion. Introduces the ethics of the interpreter and responsible interpretation. Examines the role and necessary skills of the interpreter in various settings: education, medical, legal, human services, etc. Provides sign language vocabulary acquisition through laboratory experiences.
SGN 262 Principles of Interpreting II 5(4-2)
Prerequisite: SGN 263 or department approval. Designed to provide in-depth understanding of various interpreter settings and to develop proficiency in interpreting. Increases awareness of oral and deaf-blind interpreting and interpreting for individuals with minimal language skills. Provides sign language acquisition with emphasis upon specific vocabularies through laboratory experiences.

SGN 263 Sign to Voice Interpreting 3(3-0)
Prerequisite: SGN 261 or department approval. Designed to provide an understanding of the principles and problems of interpreting the manual, oral and written communication of deaf persons into their spoken or written standard English equivalents. Develops skill and fluency in receiving and expressing all levels of communication of deaf individuals.

SGN 267 Practicum I 4(2-4)
Prerequisite: SGN 261 or department approval. Combines lecture and supervised placement in various interpreter settings to allow directed observation and application of practical interpreting skills.

SGN 268 Advanced Practicum I 4(2-4)
Prerequisite: SGN 261 or department approval. Designed to provide interpreting experience through placement in various settings. Includes weekly lectures and individual conferences between interpreter trainee and practicum supervisor. Students spend four hours each week in their placement setting.

SGN 269 Advanced Practicum II 5(2-6)
Prerequisite: SGN 263 or department approval. Designed to provide interpreting experience through placement in various settings. Includes weekly seminars and bi-weekly individual conferences between interpreter trainee and practicum supervisor. Students spend six hours each week in their placement setting.

SGN 270 Advanced Practicum III 6(2-8)
Prerequisite: SGN 261 or department approval. Designed to provide interpreting experience through placement in various settings. Includes weekly seminars and individual bi-weekly conferences between interpreter trainee and practicum supervisor. Students spend eight hours each week in their placement setting.

Spanish (SPN)
Department of Communication
Division of Arts and Sciences

Advanced placement in Spanish study may be arranged for students who have satisfactorily completed two or more years of Spanish in high school, and those who have established Spanish proficiency by other means.

SPN 101 Elementary Spanish I 5(5-0)
First course of a three-term sequence in elementary Spanish. Designed for persons who want a solid foundation in the essentials of the Spanish language and Hispanic culture. Provides practice in listening comprehension, speaking, reading comprehension, and writing, and provides useful information about Hispanic culture. Emphasizes pronunciation of Spanish sounds, practical vocabulary, and essential grammar for expressing oneself in Spanish and for understanding native speakers of the language. Students become familiar with many aspects of Hispanic culture through readings, informal lectures, and audio-visual presentations. Class is taught entirely in Spanish.

SPN 102 Elementary Spanish II 5(5-0)
Prerequisite: SPN 101 or department approval. Second course of a three-term sequence in elementary Spanish. Designed for persons who want a solid foundation in the essentials of the Spanish language and Hispanic culture. Provides practice in listening comprehension, speaking, reading comprehension, and writing, and provides useful information about Hispanic culture. Emphasizes pronunciation of Spanish sounds, practical vocabulary, and essential grammar for expressing oneself in Spanish and for understanding native speakers of the language. Students become familiar with many aspects of Hispanic culture through readings, informal lectures, and audio-visual presentations. Class is taught entirely in Spanish.

SPN 103 Elementary Spanish III 5(5-0)
Prerequisite: SPN 102 or department approval. Third course of a three-term sequence in elementary Spanish. Designed for persons who want a solid foundation in the essentials of the Spanish language and Hispanic culture. Provides practice in listening comprehension, speaking, reading comprehension, and writing, and provides useful information about Hispanic culture. Emphasizes pronunciation of Spanish sounds, practical vocabulary, and essential grammar for expressing oneself in Spanish and for understanding native speakers of the language. Students become familiar with many aspects of Hispanic culture through readings, informal lectures, and audio-visual presentations. Class is taught entirely in Spanish.

SPN 185 Seminar: Intensive Conversational Spanish I 4(4-0)
First course of a three-term sequence in intensive conversational Spanish. Designed for persons who have no knowledge of Spanish, and who wish to develop very basic conversational skills in the language. Students learn pronunciation of some Spanish sounds, practical vocabulary, and essential grammar for expressing themselves in simple Spanish. They become familiar with different aspects of Hispanic culture through readings in English, informal lectures, and audio-visual presentations.

SPN 186 Seminar: Intensive Conversational Spanish II 4(4-0)
Second course of a three-term sequence in intensive conversational Spanish. Designed for persons who have no knowledge of Spanish, and who wish to develop very basic conversational skills in the language. Students learn pronunciation of some Spanish sounds, practical vocabulary, and essential grammar for expressing themselves in simple Spanish. They become familiar with different aspects of Hispanic culture through readings in English, informal lectures, and audio-visual presentations.

SPN 187 Seminar: Intensive Conversational Spanish III 4(4-0)
Third course of a three-term sequence in intensive conversational Spanish. Designed for persons who have some knowledge of Spanish, and who wish to continue developing basic conversational skills in the language. Students learn practical vocabulary, and essential grammar for expressing themselves in simple Spanish. They become familiar with different aspects of Hispanic culture through readings in English, informal lectures, and audio-visual presentations.

SPN 196 Seminar: Spanish for Medical Personnel 4(4-0)
Develops skills for using Spanish in common medical practitioner-patient relationships. Students learn correct pronunciation of Spanish sounds, common medical terms and phrases, and essential grammar. Students practice Spanish extensively in pairs and small groups in situations simulating those commonly encountered by health care professionals.

SPN 201 Intermediate Spanish I 5(5-0)
Prerequisite: SPN 103 or department approval. First course of a three-term sequence in intermediate Spanish. Sequence provides a thorough review of grammar presented in the elementary Spanish sequence, intensive vocabulary building, extensive small-group discussion, writing composition, and lectures on Hispanic culture. Classwork emphasizes practice in listening comprehension, explanations and discussions of Spanish grammar, and abundant conversation in Spanish. Homework assignments focus on developing reading and writing skills. Class is taught entirely in Spanish.

SPN 202 Intermediate Spanish II 5(5-0)
Prerequisite: SPN 201 or department approval. Second course of a three-term sequence in intermediate Spanish. Sequence provides a thorough review of grammar presented in the elementary Spanish sequence, intensive vocabulary building, extensive small-group discussion, writing composition, and lectures on Hispanic culture. Classwork emphasizes practice in listening comprehension, explanations and discussions of Spanish grammar, and abundant conversation in Spanish. Homework assignments focus on developing reading and writing skills. Class is taught entirely in Spanish.

SPN 203 Intermediate Spanish III 5(5-0)
Prerequisite: SPN 202 or department approval. Third course of a three-term sequence in intermediate Spanish. Sequence provides a thorough review of grammar presented in the elementary Spanish sequence, intensive vocabulary building, extensive small-group discussion, writing composition, and lectures on Hispanic culture. Classwork emphasizes practice in listening comprehension, explanations and discussions of Spanish grammar, and abundant conversation in Spanish. Homework assignments focus on developing reading and writing skills. Class is taught entirely in Spanish.
SPH 101 WRI 281

Speech (SPH)
Department of Communication
Division of Arts and Sciences

For additional speech-related courses, see VCB 131, 132; COM 209 and 230.

SPH 101 Human Communication 4(4-0)
Introductory course examining the communication process in its three major settings: interpersonal interaction, small group discussion, and public speaking. The learning approach utilizes readings, lectures, discussions, participative classroom exercises, and oral and written assignments to help students increase their understanding of human communication while improving their communication skills.

SPH 102 Interpersonal Communication 4(4-0)
Introductory course providing students with an understanding of interpersonal communication theories and their application in everyday interactions with family, friends, and co-workers. Through in-class activities, students' interpersonal communication skills will be increased in areas including openness, empathy, supportiveness, descriptiveness, conflict resolution, and behavioral flexibility in interaction.

SPH 104 Fundamentals of Public Speaking 4(4-0)
Helps beginning speakers develop the skills and confidence needed to speak effectively to audiances in public situations. Through a carefully planned series of speaking assignments, students learn the proper techniques for researching, developing, organizing, outlining, and delivering effective informative and persuasive speeches.

SPH 105 Voice and Articulation 3(3-0)
Theory and practice of effective voice production and pronunciation. Emphasis on understanding the speech organs and their operation and on applying successful techniques to the best use of the instruments of speech.

SPH 195 Seminar: Listening Skills 2(2-0)
Helps students develop the skills needed to listen effectively in the home, workplace, and classroom. Topics include the nature of listening, types of listening, verbal and nonverbal dimensions of listening, and barriers to effective listening. Diagnostic tests, exercises, and assignments help students improve their abilities to comprehend, judge, and empathize while listening.

SPH 204 Public Speaking in Business 4(4-0)
Helps students gain the theoretical knowledge, skills, and experience necessary to speak effectively to small, technically knowledgeable audiences in business settings. Through readings, lectures, videotaped oral presentations, impromptu speeches, and critiques of their speaking, students learn effective techniques of preparing and delivering informative and persuasive speeches.

SPH 206 Nonverbal Communication 4(4-0)
Provides the student with an understanding of the many ways people communicate without words. Students learn what messages the face, the body, personal appearance, touch, time and space convey in American culture. The student's skills as a nonverbal communicator are increased through in-class activities.

Writing (WRI)
Department of Communication
Division of Arts and Sciences

For additional related courses, see VCB 131, 132; SPL 150, 151; COM 230; WRI 112, 116, and 119.
Placement testing is conducted during the first week of each term for all students in WRI 121. Some students are advised to drop the course and to add a more appropriate course, either more basic or more advanced. Waiver or credit for WRI 121-123 may be achieved through various national and local testing programs. Inquire about these possibilities in the Admissions Office or the Department of Communication.

The Composition/English requirement for the Associate Degree in Arts or Sciences (A.A. or A.S.) can be fulfilled in various ways. The first required course is WRI 121. The second required course can be either WRI 122 or ENG 122, and the third can be either WRI 123 or ENG 123. Students who receive permission to waive WRI 121 are required to select another four-credit course in Communication, Writing or English to fulfill the twelve-credit requirement for the Associate in Arts or Sciences Degree. Writing course requirements for curricula outside the Division of Arts and Sciences are specified in individual curriculum guides, which are available at counseling offices or department offices on campus.

WRI 121 Composition I 4(4-0)
Designed to help students develop writing ability. Emphasizes the organization and development of informational prose. Includes instruction in use of the dictionary and college reading skills.

WRI 122 Composition II 4(4-0)
Prerequisite: WRI 121. Builds upon the writing skills developed in WRI 121, but emphasis shifts from the expository essay to the argumentative or persuasive essay. Teaches students to write logically, with style appropriate for support of an argument or proposition.

WRI 123 Composition III 4(4-0)
Prerequisite: WRI 122 or ENG 122. Continuation of the composition sequence and an alternative to ENG 123 in many programs. Emphasizes investigative techniques, library resources, and writing the research paper with full documentation.

WRI 131 Honors Composition I 4(4-0)
Prerequisite: Department approval. Covers the same material as WRI 121, but with additional work to challenge the superior writer.

WRI 132 Honors Composition II 4(4-0)
Prerequisite: Department approval. Covers the same material as WRI 122, but with additional work to challenge the superior writer.

WRI 133 Honors Composition III 4(4-0)
Prerequisite: Department approval. Covers the same material as WRI 123, but with additional work to challenge the superior writer.

WRI 191 Seminar: Personal Writing 2(2-0)
Develops self-expression and sharpened awareness through writing about personal observations and life experiences. Emphasizes free choice in subject matter and sensitivity to the language and styles appropriate to description, storytelling, and memoir. (P-Z grading system)

WRI 195 Seminar: Writing User Documentation 3(3-0)
Designed for data processing students and professionals. Teaches students to write effective documentation for users of computer systems. Focuses on writing step-by-step procedures explaining the responsibilities and activities of users. Emphasizes the clarity, precision communication necessary for successful system operation and smooth work flow.

WRI 196 Seminar: Writing Software Instructions 3(3-0)
Designed for writers of software instructions. Improves the ability to write plainEnglish instructions for software users. Emphasizes the structure and sequence of sound directions. Focuses on avoiding irrelevant and confusing details. Students learn to write clear, direct sentences and to make jargon-free, accurate word choices.

WRI 261 Seminar: Media Literacy 3(3-0)
An analysis of form and content in film and television in order to identify, evaluate, and understand these media as unique art forms.

WRI 262 Seminar: Prose Style 3(3-0)
An advanced study of non-fictional prose styles. Directed writing practice helps students develop personal writing style and improve the effectiveness of their own writing. Workshop sessions include an examination of the relationship of purpose to audience and slant, and of grammar to punctuation and style. Writing is both assigned and self-chosen.

WRI 281 Writing For Publication 3(3-0)
Freelance writing and marketing; students review a variety of effective writing techniques; study marketing information in their particular fields, such as manuscript preparation, query letters, and potential publishers; and discuss their writing in a workshop setting.
WRI 282 Forum For Authors
An advanced course for freelance writers working on manuscripts. Students meet to discuss their writing and to solve problems in a workshop setting. The study of effective writing techniques and market information is continued from WRI 281.

WRI 293 Seminar: Creative Writing I
2(3-0)
Designed to help students develop expressive abilities in writing poetry and short stories. Emphasizes narrative modes of the short story; traditional meter and verse forms of poetry. Includes models from masters in both fiction and poetry.

WRI 294 Seminar: Creative Writing II
3(3-0)
Designed for students who have successfully completed a creative writing or a publications class. Emphasizes improving their ability to write effective poems, short stories, and novels. Students select their own subjects and receive immediate responses through group discussion.

WRI 295 Seminar: Writing Workshop
3(3-0)
Examines language and style as the most critical choices a creative writer makes in directing the reader's perception of and response to the work. Develops the writer's ability to control tone and style. Manuscripts are reproduced and discussed in a workshop setting.

WRI 296 Seminar: Persuasive Writing
3(3-0)
Designed to introduce students to the tools and techniques employed in written argument—discourse intended to convince others or to persuade them to a course of action. Students practice with the tools and techniques, and sharpen them, in written exercises.

DEPARTMENT OF HUMANKINDS

Chairperson: Dr. Deanna Hany
255 Arts and Sciences Building

The Department of Humanities has a strong emphasis on encouraging students to search for a knowledge of the heritages of civilizations and assisting students in developing an awareness of the self and building a foundation for choice of a value system. The Department of Humanities offers courses under the following codes:

- ENG: English
- HST: History
- HUM: Humanities
- PHL: Philosophy
- REL: Religion

All of the courses offered by this department require college level reading and writing skills. Analytical and critical papers and examinations are considered normal requirements for most courses.

The Composition/English requirement for the Associate Degree in Arts or Science can be fulfilled in a number of ways. A student who has completed or has been permitted to waive WRI 121 may elect ENG 122 and ENG 123 as alternatives to WRI 121 and WRI 122.

The Humanities requirement for the Associate Degree in Arts or Science can also be fulfilled in a number of ways: HUM 211, 212, 213: World Civilizations I, II, III is the recommended sequence of courses. Students may substitute other courses in the curriculum of the Humanities Department for any of the above, provided that these are distributed in at least two of the following four areas:

- Art and Music History (HUM 101, 150, 151, 152)
- History (HST 104-296)
- Literature (ENG 201-296 and HUM 102)
- Philosophy and Religion (PHL 101-296, REL 150-296 and HUM 104)

Please note that World Civilizations courses (HUM 211, 212, 213) are counted as History courses when only one or two of them are taken to fulfill general education requirements.

COURSE DESCRIPTIONS

ENGLISH (ENG)
Department of Humanities
Division of Arts and Sciences

ENG 122 Freshman English II
4(4-0)
Prerequisite: WRI 121. A continuation of WRI 121. An alternative to WRI 122. Emphasis is on the reading of short stories. Writing skills are also emphasized, plus a further development of literary and research skills.

ENG 123 Freshman English III
4(4-0)
Prerequisite: ENG 122 or WRI 122. A continuation of ENG 122 or WRI 122. An alternative to WRI 123. An introduction to the various literary forms, plus the development of analytical and writing skills and research techniques.

ENG 132 Freshman English II: Honors
4(4-0)
Prerequisite: Department approval. Same as ENG 122, but taught on an advanced level.

ENG 133 Freshman English III: Honors
4(4-0)
Prerequisite: Department approval. Same as ENG 123, but taught on an advanced level.

ENG 134 Honors Colloquy
4(4-0)
Prerequisite: Department approval. A forum for invited speakers and a vehicle for discussion among the students and faculty of the Honors Program in the division of Arts and Sciences. A central theme will be selected each time the Colloquy is offered.

ENG 201 The Poetic Imagination
4(4-0)
Prerequisite: WRI 121 (ENG 122 recommended). Designed to help students understand and appreciate various forms of the poetic imagination. Emphasizes the nature of poetic language and meaning, as well as literary techniques and conventions.

ENG 202 Introduction to Drama
4(4-0)
Prerequisite: WRI 121 (ENG 122 recommended). Introduces drama and its literary techniques and conventions. Attention is given to principles and theory, but understanding of the plays is emphasized. Representative plays from Greek, European, English, and American dramatists.

ENG 203 Introduction to Prose
4(4-0)
Prerequisite: WRI 121 (ENG 122 recommended). Designed to introduce students to the epic in prose translation, the romance, the novel, and satire. Students will read representative selections ranging from Homer's The Odyssey to Chaucer's Canterbury Tales to Sinclair Lewis' Babbitt.

ENG 205 World Literature
4(4-0)
Prerequisite: WRI 121 (ENG 122 recommended). Provides an overview of literature outside the Anglo-European community through a sampling of genres, e.g., narrative prose fiction, poetry, drama, and cinema. Explores the ethnic, aesthetic, and thematic dimensions of the cultures which originated them. Emphasizes the literature of the Orient, Near East, USSR, Africa, and Latin America.

ENG 210 The American Novel
4(4-0)
Prerequisite: ENG 122 or WRI 122. Study of the major 19th and 20th century American novels from James Fenimore Cooper to Jack London to Ernest Hemingway and John Steinbeck. Emphasis is on the historical development of the novel form in America and the novelist’s interpretation of the American scene.

ENG 220 Science Fiction
4(4-0)
Prerequisite: WRI 121 (ENG 122 recommended). Designed to acquaint students with this popular and modern literary form. Some history and definitions of science fiction, but emphasis is on short stories and novels and their unique view of the future. Also included are movies and audio-tapes.

ENG 225 The Popular Political Novel
4(4-0)
Prerequisite: WRI 121 (ENG 122 recommended). Inherently an interdisciplinary course concerned with popular culture, the novel form as used by popular and commercial writers, and politics. Although a non-American novel or two may be read, the emphasis is on recent American novels that deal with the American political scene.

ENG 240 The Film As Art
4(2-3)
Prerequisite: WRI 121 (ENG 122 recommended). An introduction to film as an art form capable of making a meaningful and perceptive comment on our civilization. Viewing and analysis of six to eight films, both foreign and American, of recognized merit.
ENG 245 Popular Culture and Mass Media  4(4-0)
Prerequisite: WRI 121 (ENG 122 recommended). A study of the popular culture distributed by mass media (including film, television, newspapers, magazines and radio) and how the media and popular culture reflect and shape our cultural beliefs. Extensive use of multi-media.

ENG 250 Masterpieces of American Literature  4(4-0)
Prerequisite: WRI 121 (ENG 122 recommended). Designed to acquaint the student with some of the masterpieces of great American writers. Emphasis on such works as the essays of Emerson and Thoreau, poetry of Whitman and Frost, prose of Hawthorne, Melville, and Hemingway, and plays of O’Neill. Required for most students in pre-elementary teaching.

ENG 255 Russian Literature in Translation: The "Golden Age" of Realism  4(4-0)
Prerequisite: WRI 121 (ENG 122 recommended). An in-depth study of representative works by acknowledged masters of Russian realistic fiction, emphasizing but not limited to Turgenev, Dostoevsky, Tolstoy, and Chekhov, and set against the background of Pushkin and Lermontov’s romanticism, and Gogol’s naturalism.

ENG 260 Black American Literature  4(4-0)
Prerequisite: WRI 121 (ENG 122 recommended). A survey of Black American literature from the seventeenth century to the twentieth century. Introduces the various genres in the literature of Black Americans.

ENG 270 Literature by Women  4(4-0)
Prerequisite: WRI 121 (ENG 122 recommended). A study of the works of nineteenth and twentieth century English and North American women. Designed to further understanding and appreciation of the themes, issues, and modes of expression of female writers.

ENG 275 The Philosophical Imagination in Literature  4(4-0)
Prerequisite: ENG 122 or WRI 122. This course presents an interdisciplinary approach to philosophy and literature through selected readings in the various literary genres and media: the literary essay, the novel, the drama, poetry, and the cinema. The course offers a general background of important philosophical ideas channeled into aesthetic and ethical problems.

ENG 290 Shakespeare  4(4-0)
Prerequisite: ENG 122 or WRI 122. Introductory course in the dramatic works of William Shakespeare. Students will read six to nine plays representative of the author’s comedies, histories, and tragedies.

HISTORY (HST) Department of Humanities
Division of Arts and Sciences

HST 105 The Twentieth Century World  4(4-0)
A survey of the most significant developments in twentieth century world history and politics with particular emphasis on the period since the end of World War II.

HST 111 United States History to 1865  4(4-0)
A history of the United States from the colonial beginnings through the Civil War.

HST 112 United States History: 1865 to the Present  4(4-0)
A history of the United States from the reconstruction of the nation after the Civil War to the present.

HST 150 American Black History  4(4-0)
Traces the developments which led to the African slave trade, the slave systems in North and South America, the cultural heritage of the black man in the Americas, and the problems of race in North American culture.

HST 160 Modern Mexico  4(4-0)
Political, social, economic and intellectual developments in Mexico since 1850. Particular emphasis on the Revolution of 1910 and relationships with the United States in the 20th Century.

HST 210 Studies in American History  4(4-0)
Prerequisite: HST 111 or HST 112 and approval of the instructor. Covers problems of research, writing, philosophy of history and interpretation, involving a detailed examination of a particular area of American history.

HST 215 Women in American History  4(4-0)
A survey of American history from colonial times to the present which examines women’s roles in the family, production, social and political life.

HST 220 Michigan History  4(4-0)
A survey of the political, economic and social development of Michigan from pre-colonial times to the present.

HST 225 Michigan Black History  4(4-0)
A study of the history of Black people in the state of Michigan. An effort will be made to relate local Black history to national trends.

HST 230 British History I (1066-1689)  4(4-0)
A survey of British history and culture from the Norman conquest (1066) to the Glorious Revolution (1688-89). Special emphasis will be placed on the interaction of political, constitutional, legal, social, and cultural forces and influences which shaped British history from the Middle Ages to the seventeenth century.

HST 231 British History II (1689-present)  4(4-0)
A survey of the political, economic and social forces which shaped the development of British history and society from the seventeenth century to the present with particular emphasis on the nineteenth and twentieth centuries.

HST 232 History of Modern Ireland  4(4-0)
Nineteenth and twentieth century Irish history and politics with special emphasis on the causes and nature of the conflict in Northern Ireland. Also relates Irish to United States and Michigan history.

HST 255 African History: An Introduction  4(4-0)
A general survey of the African continent with emphasis on special selected topics (and regions) as follows: Precolonial Africa, the scramble for Africa, the rise of African nationalism and independence, Africa’s internal and external relations.

HST 260 Conflict and Revolution in Southern Africa  4(4-0)
A study of representative institutions and value systems of southern Africa designed to acquaint students with the workings of European colonialism in southern Africa. Focus is on Zimbabwe as a case study of the triumph of African nationalism over competing European colonial interests.

HST 270 The Modern Middle East  4(4-0)
An historical survey of the region extending from the eastern Mediterranean to eastern Iran, with the main emphasis upon the contemporary Middle East. Ethnic, social, and political diversities of the states in the area will be traced as a background to the smoldering, even explosive, character of Middle Eastern rivalries and problems.

HST 275 Modern East Asia  4(4-0)
Traces the transformation of East Asia in the modern era, including an introduction to the cultural, religious, and political traditions of its peoples. Emphasis on the development of China and Japan, the impact of the West, and the differing responses of these two civilizations to the modern world.

HST 285 Seminar: Soviet Union Today  4(4-0)
A survey of the Soviet Union and its people with special emphasis on the ideological roots and origins of the Soviet regime and system from the Russian Revolutions of 1917 to present. Also examined and analyzed will be the multi-national character of the Soviet Union and the different forces that have shaped Soviet history, society, and politics from 1917 to the present, including U.S.-Soviet relations.

HST 290 Seminar: Vietnam—A Television History  4(4-0)
The purpose of VIETNAM: A TELEVISION HISTORY is to provide, through the medium of television and classroom discussion, a balanced, loosely chronological study of the war in Vietnam, beginning with events leading up to the August revolution of 1945, when the Vietminh first declared the independence
of Vietnam, and ending with the surrender of South Vietnam and the departure from Saigon of the American mission in April, 1975. By way of conclusion and summary, the course will go beyond the climactic events of 1975 to assess the long-term effects of the war, particularly on Vietnam and the United States.

HST 294 Seminar: The American Legal Tradition 4(4-0)
This course is a chronological and thematic approach to the history of American law, legal-constitutional institutions, and important personalities, who were instrumental in its development.

HUMANITIES (HUM) Department of Humanities Division of Arts and Sciences

HUM 101 Art and Music History in Western Civilization 4(4-0)
An introduction to the masterpieces of art and music history from pre-historic times to the present, and their importance in Western Civilization. Extensive use made of multi-media.

HUM 102 Mythology 4(4-0)
An introduction to mythic thinking and its importance in literature and culture as a way of self-understanding. Classical myths and their contemporary functioning will be emphasized.

HUM 104 Introduction to Humanities 4(4-0)
An interdisciplinary approach to culture through language. Emphasis will be placed on historical development of the English language, language change, and cultural aspects based on sociolinguistic considerations such as slang, sexist language, superstitions, customs, and habits.

HUM 150 History of Art I 4(4-0)
First of a series of three courses that introduce the student to the history of painting, sculpture, and architecture in world civilizations. The course focuses on art from the ancient world, Byzantium, Asia, and early Christianity. Visual materials are used to illustrate each lecture.

HUM 151 History of Art II 4(4-0)
Second of a series of three courses that introduce the student to the history of painting, sculpture, and architecture in world cultures. The course focuses on European, Islamic, and Asian art from the Early Middle Ages to the late Renaissance. Visual materials are used to illustrate each lecture.

HUM 152 History of Art III 4(4-0)
Third of a series of three courses that introduce the student to the history of painting, sculpture, and architecture in world cultures. The course focuses on Europe, Asia, and America from the Baroque period to the present. Visual materials are used to illustrate each lecture.

HUM 153 Seminar: War and Peace in a Nuclear Age 2(2-0)
This course will survey the history of war from ancient time to the present nuclear threat. It will be built around the Public Broadcasting System Telecourse, War. The instructor's lectures and assigned readings will supplement the television programs which will be viewed and discussed in class.

HUM 157 Seminar: Science and Human Values 2(2-0)
Students will explore the crisis of values that must be dealt with in today's scientific society. Discussion will include the dangers and opportunities offered by nuclear technology, medical technology, the environment, and appropriate technology. The role of literature and popular psychology in shaping human values will be studied. Presentations are designed to help students develop alternatives and values for contemporary living.

HUM 161 Seminar: The Land of the Maya 2(2-0)
Prerequisite: Department approval. Spanish language component: Students will learn pronunciation of Spanish sounds, basic Spanish phrases for survival in an Hispanic environment, and knowledge of essential information about daily Hispanic culture. Mayan component: Students will learn to identify the unique components of pre-Colombian Mayan civilization including pre-classic, classic, and post-classical architectural styles, glyph writing, astronomy, mathematics, religion, history, and features of daily life.

HUM 162 The Land of the Maya: Seminar and Field Trip 3(2-1)
Prerequisite: Department approval. Spanish language component: Students will learn pronunciation of Spanish sounds, basic Spanish phrases for survival in an Hispanic environment, and knowledge of essential information about daily Hispanic culture. Mayan component: Students will learn to identify the unique components of pre-Colombian Mayan civilization including pre-classic, classic, and post-classical architectural styles, glyph writing, astronomy, mathematics, religion, history, and features of daily life. Field trip component: Seven-day field trip to Yucatan, Mexico.

HUM 163 Seminar: Mayan Culture Field Trip 1(0-2)
Prerequisite: Department approval. Seven-day field trip to Yucatan, Mexico. Students will learn to identify the unique components of pre-Colombian Mayan civilization including pre-classic, classic, and post-classical architectural styles, glyph writing, astronomy, mathematics, religion, history, and features of Mayan daily life through direct observation on the field trip.

HUM 164 Seminar: Stratford Theater Trip 1(1-0)
A "cultural practicum" providing students with the opportunity to experience exemplary theatrical productions. Cultural breadth and historical perspective are achieved by attending performances, lectures, and interacting with professionals in the field. Skills of critical analysis are also exercised through exposure to some of the world's finest classical writing and assessment of both oral interpretation and text.

HUM 171 Seminar: Basic Judaism 2(0-0)
An introduction to the basic teachings of Judaism from a developmental point of view.

HUM 175 Seminar: Russian Study-Travel 4(3-1)
An eleven-week survey of Russian history, art, culture and politics; basic instruction in conversational Russian, and travel to the Soviet Union during the Russian Winter Festival.

HUM 178 Seminar: 20th Century Dictators 2(2-0)
This course will compare and contrast Mussolini, Hitler, and Stalin in their personalities, objectives and careers, and it will examine the general historical conditions surrounding these men.

HUM 179 Seminar: Introduction to Archaeology 2(2-0)
This course examines the history and methods of archaeology, especially that of the ancient Mediterranean region. The great discoveries and their discoverers will be highlighted, and the use of evidence such as coins, pottery, and inscriptions will be examined. Slide-tape presentations will provide colorful insights into Tutankhamun's tomb, the rescue of Abu Simbel, and the recovery of buried Pompeii. New areas, including underwater archaeology, and recent controversies, such as that surrounding the city of Ebla, will be probed, as well.

HUM 185 Seminar: Egypt Today 2(2-0)
Experience Egypt's magnificent past through a close inspection of its remaining monuments. This course will emphasize the culture of Pharaonic Egypt, but Islamic contributions and the relationships between modern and former Egyptian ways of life will also be considered. Color slides, artifacts, and the instructor's personal reminiscences are featured.

HUM 211 World Civilizations I 4(4-0)
First of a series of three courses in the cultural foundations of the major ancient world civilizations of Africa, Asia, Europe, and the Americas. Emphasizes the relationship of man's creative works to his needs, beliefs, and values showing how others have understood themselves and how this understanding has shaped our views and conditions today.

HUM 212 World Civilizations II 4(4-0)
Prerequisite: HUM 211 or 201. Second of a series of three courses in the cultural foundations of the major world civilizations of Africa, Asia, Europe, and the Americas from the seventh to the seventeenth centuries. Emphasizes the relationship of man's creative works to his needs, beliefs, and values showing how others have understood themselves and how this understanding has shaped our views and conditions today.

HUM 213 World Civilizations III 4(4-0)
Prerequisite: HUM 212 or 202. Third of a series of three courses in the cultural foundations of the major world civilizations of Africa, Asia, Europe, and the Americas in the modern era. Emphasizes the relationship of man's creative
HUM 215 Utopia: The Future Through The Past 4(4-0)
Prerequisite: WRI 121 (ENG 122 recommended). The study of representative utopian literature of the western world, plus a few anti-utopian works, for the dual purposes of reviewing and understanding the past but also, and more importantly, considering and evaluating social, political, economic, and moral issues of the near future.

HUM 220 Japanese Civilization 4(4-0)
This course traces and develops Japan's cultural tradition with strong emphasis on her history, religion, ritual, and arts. Further, this course will show that modern Japan can best be understood in the light of her distinctive cultural traditions.

HUM 260 Seminar: Ancient Egypt 4(4-0)
Explores the history and cultures of one of the earliest and most successful world civilizations. This course emphasizes Egyptian achievements in art, architecture and literature and will consider the roles played by religion, geography and climate in the Egyptian way of life. The great discoveries and discoveries of Egyptian archaeology will also be featured. Multi-media presentations.

HUM 265 Seminar: Ethical Issues in Medicine 3(3-0)
The purpose of this course is to present some of the ethical problems which arise in relation to health and health care, and to develop a framework for decision making with which to approach these and other related problems. Some of the topics that will be discussed are: nature of health counseling, withholding and withdrawing treatment, autonomy, confidentiality and informed consent. This course is open to all interested persons. Although ethical considerations will involve some philosophical principles, the necessary background will be provided in class so no prior philosophy is required.

HUM 294 Seminar: The Apostle Paul 4(4-0)
A study of the religious figure Paul, both as a product of his time and a shaper of those times as revealed in his writings.

PHILOSOPHY (PHL)
Department of Humanities
Division of Arts and Sciences

PHL 101 Introduction to Logic 4(4-0)
An introduction to the elements of reasoning with special attention given to the role of language in reasoning, the identification of fallacious arguments in both deductive and inductive reasoning, and the use of reason in everyday life.

PHL 102 Philosophy of Science 4(4-0)
A critical examination of some of the basic concepts and problems of the natural and social sciences. Particular consideration is given to the concept of "confirmation" and related problems of scientific concept formation. Theory construction and explanation are also considered.

PHL 103 Introduction to Ethics 4(4-0)
A course designed to explore essential requirements for moral reasoning. Basic moral principles will be examined and moral priorities discussed in the context of important social issues.

PHL 201 History of Philosophy I 4(4-0)
First in a series of three courses. Surveys major developments in western philosophy and their relation to the historical context in which they occur. From the early Greek nature philosophy to the thoughts of Socrates, Plato, and Aristotle.

PHL 202 History of Philosophy II 4(4-0)
Continuation of History of Philosophy I; medieval to early modern philosophy. From scholastic thought to the scientific revolution and Copernicus, Descartes, Newton, Locke, and Hume.

PHL 203 History of Philosophy III 4(4-0)
Continuation of History of Philosophy II; modern and contemporary philosophy. From Kant, and the structure of human thought to the meaning of belief and William James, Russell, and Whitehead.

REL 150 World Religions 4(4-0)
Survey of the thought and practice of five major religions: Hinduism, Buddhism, Judaism, Christianity, and Islam. Emphasis is upon deepening our understanding of ourselves and others through a new appreciation of the role of religion in the development of human culture and values.

REL 201 Religions of East Asia 4(4-0)
Survey of the traditional religions of China and Japan with primary emphasis on the contemporary role and influence of these religions in the modern world.

REL 203 Religion in American Life 4(4-0)
The changing role of religion in the history of the United States from colonial days to the present. Emphasis on contemporary institutional and theological trends in relation to American culture and society.

REL 211 Old Testament Literature 4(4-0)
The origin and development of Hebrew religion and Judaism as reflected in the canon of the Hebrew Bible (Old Testament).

REL 212 New Testament Literature 4(4-0)
A study of Christian origins and beliefs as reflected in the literature of the New Testament, viewed in its original historical setting.

SEMINARS

Each term seminars may be offered in any of the disciplines of art and music history, history, literature, philosophy, or religion. Each seminar has its own course code and a descriptive title which includes the designation "seminar." Course codes, credit value and applicability toward degrees depend on the seminar content.

Transferability is decided on an individual basis by the institution to which the student transfers. Information about degree credit and level of instruction will be provided at the first class meeting or in advance at the department office. In general, seminar course numbers above 200 indicate increased challenge.
INDEPENDENT STUDY

Prerequisite: Arrangement with an instructor and approval by the Department Chairperson before registration. Special research projects and/or individual readings in English, History, humanities, or Philosophy. Students will invest no less than 20 hours for each credit earned. Enrollment is usually restricted to Honors students who have grade-point averages of at least 3.0 in courses offered by this department.

DEPARTMENT OF MATHEMATICS AND COMPUTER SCIENCE

Chairperson: Dr. Gary Kneippenberg
165 Arts and Sciences Building

The Department of Mathematics and Computer Science offers courses under the following course codes:

CPS: Computer Science
MTH: Mathematics/Statistics

The Department of Mathematics and Computer Science offers courses in four different program areas. These include transfer level mathematics, statistics, computer science, and developmental mathematics. In each of these areas the curriculum is designed to provide students with the opportunity to start a program of study at a level which is appropriate for their experience and educational background, and then to proceed to any level of mastery which they need or desire.

The transfer level courses parallel freshman and sophomore levels of university work in mathematics, statistics, and computer science. They are taught using a traditional lecture format. Credits earned are transferable to other colleges and universities. Many of the transfer level mathematics and statistics courses require the use of computers. Computing facilities are readily available and instruction for use of these facilities is provided as a part of the curriculum.

Some computer science courses are designed for students who simply want a brief introduction to the discipline. Most of these courses are intended for students with the background in computer science necessary to continue a major in this discipline or in mathematics, science, or engineering at a four-year college or university.

The developmental mathematics curriculum includes courses in arithmetic, geometry, and algebra. Each course is offered using a variety of instructional methods. First, each developmental course is offered in the Mathematics Laboratory. This facility allows students to proceed through their course at a flexible pace. Most of these courses are taught available from Laboratory Instructors. Some sections of the Mathematics Laboratory courses also make use of weekly group lectures. In addition, two developmental courses, MTH 012 and MTH 102, are also offered using the traditional lecture method of presentation.

To determine the proper entry level course, students are encouraged to avail themselves of the Department's Math Placement Testing Service. This testing service is provided in the Mathematics Laboratory. Students are advised to make use of this service before registering for a math course.

Seminars

Each term seminars may be offered in any of the disciplines of computer science or mathematics. Each seminar has its own course code and a descriptive title which includes the designation "seminar."

Course codes, credit value, and availability are determined by degrees depend on the seminar content. Transferability is decided on an individual basis by the institution to which the student transfers. Information about degree credit and level of instruction will be provided at the first class meeting or in advance at the department office. In general, seminar course numbers above 200 indicate increased challenge.

COURSE DESCRIPTIONS

Computer Science (CPS)
Department of Mathematics and Computer Science
Division of Arts and Sciences

CPS 100 Introduction to Computers 4(4-0)

Prerequisite: None. This course is designed so that the computer becomes an understandable tool to the student. Introduction to and practice is provided in word processing, spread sheet applications, the programming language BASIC, and user networks. In addition, the student learns the application of computers to society at large by considering their social and economic implications, uses of large data banks and questions of privacy and security, and recent advances in computer technology.

CPS 110 BASIC for Arts and Sciences 4(4-0)

Prerequisite: MTH 012 or Placement Test and experience in BASIC. This course is intended to provide students with a background in programming using an extended version of the language BASIC. Primary focus is on learning the language and standard methods of structured programming by writing programs. Top-down design and stepwise refinement are emphasized in the algorithm development and problem solving.

CPS 150 FORTRAN 4(4-0)

Prerequisite: MTH 165. Structured programming techniques are applied in the design of algorithms and their implementation in FORTRAN. Topics include a Naiss-Schneiderman design, stepwise refinement outlines, control structures, functions and subroutines, input and output procedures, data types and their associated formatting, and arrays.

CPS 210 Advanced Programming in BASIC 4(4-0)

Prerequisite: CPS 110 and MTH 163. The primary emphasis of this course is to apply the language BASIC to engineering and scientific computation. It focuses on applications of science and mathematics. Emphasis is placed on programming techniques and style; the use of extensions of standard BASIC is encouraged. Topics include files, arrays, sorting and searching, linked lists and indexed files. Computer projects related to other courses will be encouraged.

CPS 220 Introduction to Graphics 4(4-0)

Prerequisite: MTH 165 and one language. This course is designed to develop concepts and skills in the use of computer graphics. The focus is on the elements of developing a graphics system for a hands-on approach to graphics applications. A review of currently available graphics systems is included.

CPS 240 Statistical Computing in SPSSX 3(3-0)

Prerequisite: MTH 170 or MTH 205 or equivalent. For anyone having completed at least one course in introductory statistics, this course introduces the novice user to the most commonly used features and procedures of the SPSSX statistical computing language. Topics include fundamental aspects of the SPSSX job and associated files, descriptive statistics, numerical measures of association for two-way tables, chi-square and normal distributions, tests for equality of means, and bivariate and multiple regression analysis.

CPS 250 Advanced Programming in FORTRAN 4(4-0)

Prerequisite: CPS 150. Advanced programming techniques are applied in a top-down fashion to problems involving common data structures (stacks, queues, trees and other linked data structures) and file handling. Additional topics included are internal representation of data, string processing, and algorithm efficiency.

CPS 255 Algorithms and PASCAL I 4(4-0)

Prerequisite: MTH 213. This course is designed to establish an understanding of fundamental computational procedures which form a basis for continuing study in computer science. Techniques of top-down design are applied in the design of algorithms and their implementation in PASCAL. Topics included are Naiss-Schneiderman designs, stepwise refinement outlines, control structures, functions, procedures, recursion, input and output operations, data types, arrays, and string processing.

CPS 256 Algorithms and PASCAL II 4(4-0)

Prerequisite: CPS 255. Topics included are internal representation of data, sets, records, files, dynamic variables, stacks, queues, trees and other linked data structures, and algorithm efficiency.

CPS 260 Introduction to Discrete Structures 5(5-0)

Prerequisite: MTH 213 and CPS 256 or CPS 250. An introduction to the logical and algebraic structures and techniques required for further study in computer science. Topics included are statement logic and proof techniques, relations, functions, directed and undirected graphs and their matrix representations, Boolean algebra and logic networks, Hamming codes, finite-state machines, recognizers and regular expressions.

CPS 265 Assembly Language, C, and Computer Organization 5(5-0)

Prerequisite: MTH 213 and CPS 250 or CPS 255. An introduction for computer science majors to machine structure, registers, and operations, as implemented on DEC/VAX minicomputers. Assembler, loader, and execution tasks are delineated; internal mathematical representation of data and related algorithms are discussed. The C language and its applications to computer science are studied to illustrate the principles behind machine-oriented language features. Macro facilities, especially for input-output operations, and subprogram linkage, particularly using C, are emphasized.
Division of Arts and Sciences

Mathematics (MTH)
Department of Mathematics and Computer Science
Division of Arts and Sciences

Developmental Courses

MTH 005 Mathematics Laboratory
No credit
At the time of registration in a Math Lab Course, a student must register for both a specific course (such as MTH 008 or MTH 009) and a MTH 005 section. The MTH 095 section determines the time for the student's attendance in the Mathematics Laboratory; it is not a course. The courses available in the Mathematics Laboratory include MTH 008, MTH 009, MTH 012, and MTH 102. MTH 012 and MTH 102 are also available in a lecture format which is conducted in a traditional classroom environment.

MTH 008 Basic Arithmetic
5(0-5)
Prerequisite: Placement Test. The course focuses on practical uses of arithmetic. Skills and practical applications with whole numbers, decimals, fractions, percents and proportions are emphasized. An introduction to measurement is presented. Work is done both with and without a calculator.

MTH 009 Pre-Algebra
5(0-5)
Prerequisite: MTH 008 or Placement Test. The emphasis is on those concepts and skills needed before a student begins an algebra course. Topics emphasized include operations on fractions, percents, proportions, measurement, statistical charts, and simple algebraic equations. An introduction to geometry and the Metric System is included. Word problems are emphasized with all topics. Use of a calculator is optional for checking calculations.

MTH 012 Beginning Algebra
5(0-5)
Prerequisite: MTH 009 or Placement Test. An introductory course in algebra covering the real number system, linear equations, polynomials, factoring, rational expressions, radicals, systems of equations, graphing and applications.

MTH 013 Basic Geometry
2(0-2)
Prerequisite: A grade of 2.0 or higher in MTH1002 or Placement Test. An intuitive course for students with little or no geometry background and who wish to review or experience an introduction to this area of mathematics. It provides the basic geometry needed for further study in mathematics. Topics from both plane and solid geometry are covered, including similar figures, congruent triangles and properties of the circle. Proofs and constructions are not considered.

MTH 102 Intermediate Algebra
5(0-5)
Prerequisite: A grade of 2.0 or higher in MTH 012 or Placement Test. An extension of Beginning Algebra with emphasis on functions, graphing, inequalities, polynomials, systems of equations, rational expressions, radicals, rational exponents, quadratic equations and applications.

Transfer Level Mathematics

MTH 164 College Algebra and Trigonometry I
5(5-0)
Prerequisite: A grade of 2.0 or higher in MTH 102 or Placement Test. Topics include exponents and radicals, linear equations and inequalities, quadratic equations and inequalities, use of calculator in solving numerical problems involving logarithmic and exponential functions, matrices, systems of linear equations, complex numbers, synthetic division and theory of equations.

MTH 165 College Algebra and Trigonometry II
5(0-5)
Prerequisite: A grade of 2.0 or higher in MTH 164 or Placement Test. A continuation of MTH 164. Topics included are trigonometric functions, trigonometric identities, applications, DeMoivre's Theorem, sequences, mathematical induction, combinatorics and linear programming.

MTH 166 Finite Mathematics
5(0-5)
Prerequisite: A grade of 2.0 or higher in MTH 164 or Placement Test. An alternate course to MTH 165 for students whose program does not require the study of trigonometry. It is an introduction to those topics in mathematics which have principal application in management, science, the Life Sciences, and the Social Sciences. These topics include linear systems of equations and matrices, linear inequalities and linear programming, probability and statistics, and decision theory.

MTH 200 Mathematical Foundations
5(5-0)
Prerequisite: MTH 102 proficiency. Required of all elementary pre-teachers. Included is a study of the real number system, numeration, measurement and intuitive geometry. An activity-oriented approach is emphasized using standard teaching aids.

MTH 213 Analytic Geometry and Calculus I
5(5-0)
Prerequisite: A grade of 2.0 or higher in MTH 165 or Placement Test. The concept of slope of a curve is used to motivate and introduce the derivative. Topics include: formulas for differentiation with applications to curve tracing, optimization, related rates and the solution of equations. Conic sections, the indefinite integral and the calculus of trigonometric functions are also introduced.

MTH 214 Analytic Geometry and Calculus II
5(5-0)
Prerequisite: Grade of 2.0 or higher in MTH 213. The concept of area under a curve is used to motivate and introduce the definite integral. The Fundamental Theorem of Calculus is proved with applications to problems involving area, volume, arc length, surface area, work, and center of mass. Methods of differentiation and integration of transcendental functions are studied.

MTH 215 Analytic Geometry and Calculus III
5(5-0)
Prerequisite: Grade of 2.0 or higher in MTH 214. Topics to be covered include: polar coordinates, infinite sequences, infinite series, power series, an introduction to vectors in 2 and 3-space, and an introduction to partial derivatives.

MTH 216 Analytic Geometry and Calculus IV
5(5-0)
Prerequisite: Grade of 2.0 or higher in MTH 215. Topics to be covered include: the calculus of vector functions, additional applications of partial derivatives, multiple integrals and ordinary differential equations.

MTH 234 Linear Algebra
5(5-0)
Prerequisite: A grade of 2.0 or higher in MTH 215. An introduction to Linear Algebra. Topics include systems of linear equations, matrices, determinants, vector spaces, linear transformations, eigenvalues, eigenvectors and quadratic forms.

MTH 239, 240 Honors Seminars in Mathematics
2(2-0)
Prerequisite: By Departmental Invitation. The student will maintain an individualized program in problem solving at a level higher than usually encountered in an introductory course.

MTH 251 Introductory Numerical Analysis
5(5-0)
Prerequisite: MTH 215 and CPS 150. An introduction to the use of computing algorithms and their FORTRAN implementations for solving the typical problems that arise in science, engineering and technology. Topics include: Approximations to roots of equations, polynomial interpolation, curve-fitting, numerical differentiation and integrations, and numerical solutions of ordinary differential equations.

Statistics
Department of Mathematics and Computer Science
Division of Arts and Sciences

MTH 170 Introduction to Statistics
5(5-0)
Prerequisite: MTH 164 or equivalent. Topics include descriptive statistics, elementary probability, estimation, confidence intervals and hypothesis testing. The course is especially designed for students in curricula such as social science, political science, medical technology or human ecology where only one term of statistics is required.

MTH 205 Statistics
5(5-0)
Prerequisite: MTH 165 or MTH 166 or equivalent. Topics include frequency distributions, measures of central tendency and dispersion, Chebyshev's Theorem, laws of probability, random variables, expectation, probability distributions, limit theorem, sampling distributions, estimation and confidence intervals. Computer applications using the statistical package SPSSX are included. The course is especially designed for students in curricula such as business or economics.
DEPARTMENT OF SCIENCE

Chairperson: Dr. Allen Saaf
408 Arts and Sciences Building

The Department of Science offers courses in a variety of disciplines, principally Biology, Physics, Chemistry, and Earth Science. The following course prefixes identify various subjects among the Science Department courses in order of their appearance in the subsequent text:

ANT: Anatomy
AST: Astronomy
BIO: Biology
CEM: Chemistry
GE: Geology
MET: Meteorology
MIC: Microbiology
NS: Natural Science
OCN: Oceanology
PHY: Physics
SC: Science Seminars and
INDEPENDENT STUDY

The mission of the Science Department is to provide educational programs which meet three basic curricular needs. These are to provide a full range of courses that fulfill general education science requirements for an Associate Degree; to develop and offer specialized courses in support of programs offered by other departments within the College; and to provide an opportunity for qualified students to select independent study. Honors options or seminars on science subjects.

General education is a central part of the Science Department's effort. Courses stress understanding of broad scientific principles and emphasize the importance of scientific reasoning, careful observation, and problem solving techniques.

Students who wish to acquaint themselves with a science subject, but have no need for a grade or credit in that course, may register to audit. The Science Department welcomes the opportunity to provide this option to interested students.

COURSE DESCRIPTIONS

Anatomy (ANT)
Department of Science
Division of Arts and Sciences

ANT 145 Introductory Anatomy and Physiology 4(3-2)
Prerequisite: None. A one-term course in human anatomy and physiology. Course combines 3 hours of lecture and 2 hours of laboratory to teach body systems and their functions. It is designed for non-science majors who would like a basic understanding of the parts of the human body and how they work.

ANT 151 Anatomy and Physiology I 4(3-2)
Prerequisite: None. Emphasizes the function of all systems in the human body. Study of cells, tissues, skeletal system, muscular system, nervous system and special sense organs. The first of a two-semester sequence in Human Anatomy and Physiology, designed for students pursuing certain vocational programs or for those who plan to enter medical schools as medical secretaries, psychology majors, dental assistants, and other programs requiring basic understanding of human systems.

ANT 152 Anatomy and Physiology II 4(3-2)
Prerequisite: ANT 151. This course covers the circulatory, respiratory, digestive, urinary, reproductive, and endocrine systems. The second of a two-semester sequence for students pursuing certain vocational programs such as medical secretaries, psychology majors, dental assistants and other programs requiring basic understanding of human systems.

ANT 211 Human Anatomy 5(3-3)
Prerequisite: BIO 101 or equivalent. A study of the anatomy of the human body that includes the structures of the skeletal, muscular, nervous, sensory, circulatory, respiratory, digestive, excretory, endocrine, and reproductive systems. It is designed to meet the needs of students in biology or related applied fields such as nursing, physical education and mortuary science.

Astronomy (AST)
Department of Science
Division of Arts and Sciences

AST 201 Introduction to Astronomy 4(4-1)
Prerequisite: None. A non-mathematical survey of astronomy with emphasis on recent discoveries. Topics include astronomical instruments and measurements, solar system, stellar evolution, quasars, black holes, cosmology, and the expanding universe. The LCC Planetarium will be used to simulate the night sky. Laboratory activities are designed to illustrate major astronomical concepts and may include astronomical observations.

Biology (BIO)
Department of Science
Division of Arts and Sciences

BIO 101 Biology 4(3-3)
Prerequisite: High school chemistry within past two years or CEM 110. A course that deals with basic chemical, physical and biological concepts which are essential to the understanding of further studies in biology, including physiology and microbiology. Topics include the metric system, basic atomic structure, chemical bonds, carbohydrates, lipids, proteins, nucleic acids, diffusion, osmosis, filtration, the light microscope, cell structure and function, mitosis and meiosis, and genetics.

BIO 107 Cell Biology I 4(3-3)
Prerequisite: CEM 110 or HS Chemistry. First course in a three-term biology sequence for science majors. Lecture topics include: atomic structure and bonding; chemistry of carbohydrates, lipids, and proteins; structure and functions of cellular and extracellular cell organelles; biochemistry of respiration and photosynthesis; mammalian nerve cells; and the human immune system. Laboratory emphasizes techniques used in cell and molecular biology.

BIO 108 Cell Biology II 4(3-3)
Prerequisite: BIO 107. Second course in the biology sequence. This course stresses the flow of genetic information in cells and in populations of living organisms. Lecture topics include: mitosis and meiosis, structure and function of DNA, RNA, and genes; chromosome function; general principles of heredity; recombinant DNA technology, cancer and oncogenes, regulation of gene expression; and the genetic basis of disease. Laboratory emphasizes techniques used in genetics and molecular biology.

BIO 109 Principles of Ecology 4(3-3)
Prerequisite: None. Third course in the biology sequence. Lectures stress the theories of ecology at the population, community, and ecosystem levels. Laboratory work includes population sampling, a class field project, computer and statistical analysis of data, and physical and chemical analysis of aquatic ecosystems. A day-long trip to Gull Lake is usually included.

BIO 140 Evolution 4(3-3)
Prerequisite: None. The evolution of life on Earth as it is presently understood is the content of this course. As a background to the study of organic evolution, the origin and evolution of the universe and the planet Earth are considered. The scientific method and scientific treatment of theories and evidence are emphasized.

BIO 201 Zoology I 4(3-3)
Prerequisite: None. First of two courses designed to survey the field of animal biology and serve as a foundation for advanced courses. Deals with the characteristics of life, cellular structures and their functions, cell division, chemical and physical aspects of life, an introduction to histology and a study of the integumentary, skeletal, muscular, digestive, respiratory, urinary, circulatory, nervous, endocrine, and reproductive systems. Emphasis is on the vertebrates, principally the mammals.

BIO 202 Zoology II 4(3-3)
Prerequisite: BIO 201 or department approval. Continuation of BIO 201. Begins with an introduction to heredity, population genetics and the theory of evolution. Dealing principally with the taxonomy and comparative anatomy of members found within the major animal phyla. A phylogenetic approach is used to study the various animal phyla from Protozoa through Chordata. An introduction to ecology and the ways in which various animals interact is included.

BIO 210 Issues in Conservation 4(3-3)
Prerequisite: None. Study of natural renewable resources and their utilization through management and conservation. Topics include history of conservation, soils, water, forests, wetlands, wildlife, and the impact of humans on such renewable resources of the earth. The laboratory consists of field investigations and projects for natural resource majors or others according to interest.

BIO 250 Entomology 4(3-3)
Prerequisite: None. An introduction to the study of insects that emphasizes their classification, evolution, life cycles, and behavior. External and internal structures and functions are included. The biology and control of economically and medically significant species is discussed, with emphasis on the various ecological roles of insects. Laboratory and field work stresses identification and collection of major insect groups found in Michigan.

BIO 260 Botany 4(3-3)
Prerequisite: One term of biology recommended. A morphological study of plants. The course deals with plant structures and life cycles, and consideration of ontological and evolutionary development.
BIO 270 Human Genetics 4(4-0)
Prerequisite: BIO 101 or general biology required. Presents general principles of genetics with specific application to the human species. Topics include: Mendelian genetics, mitosis and meiosis, chromosome structure, sex determination and X linkage, chromosome aberrations, molecular basis of inheritance, gene mutations, genetics of immune system, cancer genes, recombinant DNA technology, and genetic screening and counseling.

BIO 274 Principles of Molecular Biology 3(3-0)
Prerequisite: BIO 108 and departmental approval. This introductory lecture course summarizes the history of recombinant DNA research and surveys the principles of, and experiments in, molecular genetics. BIO 274 must be taken prior to BIO 275 and BIO 276.

BIO 275 Molecular Biology I 4(2-4)
Prerequisite: BIO 274 or departmental approval. As the first of two courses, the main objective will be to introduce students to the principles of molecular biology. Laboratory experiments will include growing bacterial colonies, using restriction enzymes, gel electrophoresis, DNA purification, and cloning and manipulating recombinant genes, with both plasmid and lambda bacteriophage DNA.

BIO 276 Molecular Biology II 4(2-4)
Prerequisite: BIO 275. The second course in the molecular biology series introduces students to more sophisticated aspects of molecular biology research. Experiments will include M 13 bacteriophage cloning, DNA sequence analysis, and Southern and Northern blotting techniques. Field trips to research labs will be arranged.

BIO 280 Histology 4(1-6)
Prerequisite: BIO 107 or equivalent and PHY 212 are desirable. Deals with cells and their arrangement in tissues. Composition, appearance, function, and interrelation of tissues are studied. While non-human tissues may be used occasionally for illustration, the emphasis is on non-pathological human tissue.

BIO 290 Principles of Embryology 3(3-0)
Prerequisite: ANT 211 recommended. Emphasis is on processes and mechanisms of development beginning at the molecular level and extending to the cellular and tissue levels. Cellular and tissue differentiation and interaction are examined in detail. Students should enroll in BIO 291 concurrently.

BIO 291 Embryology Laboratory 3(0-6)
Prerequisite: BIO 290 or concurrent. This course is the laboratory experience for BIO 290. It emphasizes observation of preserved embryos, and of pressure-dried slides of embryos, whole and sectioned. The student becomes familiar with developmental stages of chick and pig embryos with some comparison made to human embryos.

Chemistry (CEM)
Department of Science
Division of Arts and Sciences

CEM 110 Fundamentals of Chemistry I 5(5-0)
Prerequisite: MTH 009 or equivalent. First of three lecture courses designed to meet the needs of students requiring one year of chemistry or a one-term course in inorganic concepts. Introduces the principles of measurement, dimensional analysis, properties and structure of matter, nuclear chemistry, electronic structure, chemical bonding, nomenclature, chemical equations, stoichiometry, the gas laws, an introduction to solution chemistry, and acid-base equilibrium.

CEM 111 Fundamentals of Chemistry II 3(3-0)
Prerequisites: CEM 110 and MTH 102 or equivalent. Augments concepts of the quantum model; mechanical description of the atom, stoichiometry and solution chemistry, and introduces further concepts in molecular geometry, chemical kinetics, chemical equilibrium, oxidation-reduction, and thermodynamics. The student should take CEM 181 concurrently.

CEM 112 Fundamentals of Chemistry III 3(3-0)
Prerequisite: CEM 111. A survey of the principles of organic chemistry. Introduces the student to the structure, nomenclature, chemical and physical properties, selected characteristic preparations and reactions of the most common classes of organic compounds. Other topics include polymers, optical isomerism and selected reaction mechanisms. Students enrolled in this course should take CEM 122 concurrently.

CEM 122 Fundamentals of Organic Chemistry Laboratory 1(0-3)
Prerequisites: CEM 111 and CEM 181 or equivalent. An organic chemistry laboratory course that parallels the lecture course CEM 112. The class is designed to give the student experience with techniques, equipment, and chemicals commonly employed in organic laboratories. Particular attention is given to reinforcing principles through experiences which directly relate to the material presented in CEM 112.

CEM 165 Concepts in Biochemistry 5(4-2)
Prerequisites: High school chemistry within past two years or CEM 110. BIO 101 or equivalent also recommended. This course is designed to provide an understanding of the chemistry of life processes. Topics include: enzymes, carbohydrates, lipids, proteins, metabolic pathways, amino acids, nucleic acids, biochemical genetics, blood and respiratory chemistry, urine, electrolytes, acid-base balance, hormones, and vitamins. Physiological and pathological applications are incorporated into the topics. Required for students pursuing nursing, other Health Career programs, and the Biotechnology program.

CEM 170 Introduction to Chemistry 2(2-0)
Prerequisites: High school chemistry, concurrent enrollment or completion of MTH 102 or equivalent. CEM 170 is a "refresher course" for students who have had high school chemistry. Students whose curriculum lists the CEM 171 sequence may be advised, depending upon a placement test score, to take CEM 110 or CEM 170 before beginning CEM 171.

CEM 171 General Chemistry Lecture I 4(4-0)
Prerequisites: High school chemistry or CEM 110 and algebra or MTH 102. Students should enroll in CEM 181 concurrently. CEM 171 is the first of three lecture courses which form an introduction to general chemistry for students in the physical sciences, life sciences, and engineering. Covers atomic and molecular structure, chemical bonding, nomenclature, stoichiometry, gas laws, solutions, phase rule, the liquid and solid states, and colloids.

CEM 172 General Chemistry Lecture II 3(3-0)
Prerequisites: CEM 171 and MTH 164. Students should enroll in CEM 182 concurrently. CEM 172 is a continuation of CEM 171. Topics include acid-base theory, a brief introduction to ionic equilibria, oxidation-reduction, electrochemistry, chemical kinetics, chemical equilibria, basic thermodynamics, and descriptive chemistry of the nonmetals.

CEM 173 General Chemistry Lecture III 3(3-0)
Prerequisites: CEM 172. CEM 173 is the third course in the 170's lecture series. Topics include ionic equilibria, solubility product constants, and introduction to coordination chemistry, descriptive inorganic chemistry, nuclear chemistry, and fundamental particles.

CEM 181 General Chemistry Laboratory I 1(0-3)
Prerequisite: Credit or concurrent enrollment in CEM 111 or CEM 171. CEM 181 is the first in a series of three general chemistry laboratory courses which is designed to accompany the CEM 170's lecture sequence. It stresses techniques and includes a treatment of density determination, synthesis, gas laws, and freezing point depression.

CEM 182 General Chemistry Laboratory II 3(1-5)
Prerequisites: Credit or concurrent enrollment in CEM 172 and credit in CEM 181. CEM 182 is the second semester general chemistry laboratory with emphasis on quantitative analysis. Includes acid-base titrations, oxidation-reduction titrations, complexation titrations, spectrophotometric analysis, chemical kinetics, and gravimetric methods of analysis.

CEM 183 General Chemistry Laboratory III 2(0-6)
Prerequisites: Credit or concurrent enrollment in CEM 173 and credit in CEM 182. CEM 183 is the third term general chemistry laboratory. It is a systematic qualitative analysis lab which uses semi-micro techniques to determine the presence of common cations and anions.

CEM 241 Principles of Organic Chemistry I 4(4-0)
Prerequisites: CEM 172 and CEM 182 or equivalent. CEM 241 is the first lecture course of a sequence designed primarily to introduce the field of organic chemistry to those requiring only one year in this subject. Topics include the chemical and physical properties of aliphatic hydrocarbons with an emphasis on nomenclature, preparation, reactions, mechanisms, and spectroscopy.

CEM 242 Principles of Organic Chemistry II 4(4-0)
Prerequisite: Satisfactory completion of CEM 241. CEM 242 is a continuation of Chemistry 241. Topics include aromatic compounds, alkenes, carboxylic acids and their derivatives, carboxyl compounds, and amines. Nomenclature, preparations and reactions are stressed with emphasis on synthetic and analytical applications of the reactions studied.
CEM 243  Principles of Organic Chemistry III  3(3-0)
Prerequisite: Satisfactory completion of CEM 242. CEM 243 is a continuation of Chemistry 242. Topics include amino acids, carbohydrates, lipids including fats and oils, and nucleic acids.

CEM 244  Principles of Organic Chemistry Lab I  1(0-3)
Prerequisite: CEM 241. Laboratory exercises are selected to give students experience with the chemicals, techniques, and equipment commonly employed in organic laboratories, with particular attention given to compounds studied in CEM 242.

CEM 245  Principles of Organic Chemistry Lab II  1(0-3)
Prerequisites: CEM 242 and CEM 244. A continuation of CEM 244 with emphasis on multi-step synthesis and isolation of organic materials. Particular attention is given to compounds studied in CEM 242.

CEM 251  Organic Chemistry I  3(3-0)
Prerequisites: CEM 172 and CEM 182 or equivalent. CEM 251 is the first lecture course of a three-term sequence in Organic Chemistry designed primarily for chemistry majors and other students wishing rigorous preparation for advanced courses in chemistry, biochemistry, pharmacy, or other fields related to the physical sciences. Topics include structure and bonding, hybridization, nomenclature, stereochemistry, thermodynamics and kinetics of organic reactions, and functional groups, including many reactions and their mechanisms.

CEM 252  Organic Chemistry II  3(3-0)
Prerequisite: Satisfactory completion of CEM 251. Continuation of CEM 251. Topics include a study of conjugation and resonance, alcohols, ethers, epoxides, aldehydes, ketones, carboxylic acids, carboxylic acid derivatives, amines, phenols, lipids and carbohydrates. There is a continued emphasis on mechanism, stereochemistry and spectroscopy.

CEM 253  Organic Chemistry III  3(3-0)
Prerequisite: Satisfactory completion of CEM 252. Continuation of CEM 252. Topics include the aldehydes, ketones, carboxylic acids, carboxylic acid derivatives, amines, phenols, and lipids and carbohydrates. There is a continued emphasis on mechanism, stereochemistry and spectroscopy.

CEM 254  Organic Chemistry I Laboratory  2(0-6)
Prerequisite: CEM 251 concurrently. CEM 254 is the first course of a three-term organic laboratory sequence. Laboratory exercises are selected to give the student experience with the chemicals, techniques, and equipment commonly employed in organic laboratories. Particular attention is given to compounds studied in CEM 251.

CEM 255  Organic Chemistry II Laboratory  2(0-6)
Prerequisite: CEM 252 concurrently and CEM 254. CEM 255 is the second course of a three-term organic laboratory sequence. Laboratory exercises are synthetic experiments chosen to reinforce the reactions and mechanisms discussed in CEM 252.

CEM 256  Organic Chemistry III Laboratory  2(0-6)
Prerequisite: CEM 253 concurrently and CEM 256. CEM 256 is the third course of a three-term organic laboratory sequence. Laboratory exercises involve semisynthetic or qualitative organic analysis. Identities of unknowns are established using physical properties, chemical tests, derivatives, and spectroscopic information.

GE 221  Geology I  4(3-3)
Prerequisite: None. Minerals and rocks of the earth's crust; constructive and destructive forces, including: erosion by water, ice, gravity, wind and waves, and volcanism. Laboratory activities include study and identification of minerals and rocks and the introduction to topographic and geologic maps to illustrate geologic features and concepts. Field activities may be included as part of the laboratory.

GE 222  Geology II  4(3-3)
Prerequisite: None. Applies the principles of Historical Geology to the study of the development of the earth from its inception to the present. Topics include: absolute and relative age dating, correlation, uniformitarianism, actualism, fossils and their interpretation, chemical and organic evolution, environments of deposition, geologic time, and methods of dating geologic features. Laboratory activities include fossil study, physical stratigraphy, and interpretation of geologic maps and cross sections. Field activities may be included as part of the laboratory.

GE 223  Geology III  4(3-3)
Prerequisite: None. Applies the modern geological concepts developed over the past three decades to the interpretation of the earth's behavior. Topics include: sea floor spreading, plate tectonics, nature and role of volcanoes and earthquakes, mountain building, and solar system geology. Laboratory activities include: the interpretation and construction of several type of geological maps and other graphic representations that summarize geologic data.

GE 224  Michigan Geology  4(3-3)
Prerequisite: None. A general survey of the geology of Michigan and its immediate environs. Topics include: the Canadian Shield areas of the northern peninsula, development and nature of the Michigan Basin, the Pleistocene Epoch in Michigan. Emphasis is placed on economic, environmental and special interest aspects of the Michigan's geologic past. Laboratory includes: study of the minerals and rocks that are found in Michigan, economic resources, and the interpretation of maps or other geologic information representing areas of interest. Field activities may be included as part of the laboratory.

GE 250  Physical Geology and Economic Geography of Japan  6(4-2)
Prerequisite: Instructor's approval. A course to investigate the physical geology and physiography of the Japanese islands and how these features relate to the economic geography of that country. Basic geological concepts, geotectonics and volcanology are introduced to enhance understanding of the geological setting of the Japanese islands. Introductory geological lab activities, including minerals and rock familiarization, topographic map reading and common land forms may be supplemented by field investigations to appropriate geographical areas.

Geology (GE)
Department of Science
Division of Arts and Sciences

GE 201, 202, 203  Geology Field Studies  1 to 3 credits
Prerequisite: Geology or Geology concurrently. These courses emphasize techniques used to interpret geologic conditions in a field environment. Student must be concurrently enrolled in GE 221, 222, 223, 224, or have previously completed an equivalent Geology course. Numerous field trips required.

GE 210  Michigan Field Geology  2(0-2)
Prerequisite: None. This course explores the geologic agents which have shaped the face of the Southern Peninsula of mid-Michigan (glaciers, streams, wind and man) through field investigations. Each class period will consist of a visit to an area of geologic significance. Included will be the study of glacial landforms, stream valleys, shorelines, dunes, quarries, rocks and fossils. Appropriate for teachers, environmentalists, rock and fossil collectors, or anyone interested in the geological heritage of Michigan.

Microbiology (MIC)
Department of Science
Division of Arts and Sciences

MIC 203  Microbiology  4(3-3)
Prerequisite: BIO 101 or equivalent. An introductory study of the history of microbiology and classification of rickettsias, yeasts, molds, and protozoa. Emphasis is given to bacteria, viruses, immunology, genetics, selected diseases, culture media, isolation of pure culture, identification of unknown bacteria, staining methods, practical sterilization, and the collecting and handling of specimens.
Natural Science (NS)
Department of Science
Division of Arts and Sciences

NS 100 Science Discovery A Process 3(2-3)
Prerequisite: None. Course emphasis is on reducing anxiety and improving those reasoning skills necessary for participation in science courses. Specific methods to identify and reduce science anxiety associated with science topics will be presented. Science reasoning skills needed will be inventoried, including: observation, experimental techniques, critical thinking, and communication techniques. Students will gain experience designed to improve their competency in these areas. NS 100 will NOT satisfy general Natural Science requirements.

NS 121 The Physical World 4(3-3)
Prerequisite: Proficiency in MTH 009 or equivalent. Introduces the fundamental laws, theories, and principles of chemistry and physics with an emphasis on real world examples. The unifying theme of each unit is energy and matter. The course emphasizes scientific processes and associated reasoning skills.

NS 122 Rocks and Stars 4(3-3)
Prerequisite: None. Topics include an introduction to astronomy and the Solar System; minerals and rocks, geological processes, plate tectonics, and environmental geology.

NS 123 Living World 4(3-3)
Prerequisite: None. Provides students with a basic understanding of the structure and function of Earth's ecosystems, the importance of preserving them, and an awareness of how human activity and populations that depend on them. Through lab exercises, tape-slide modules, computer programs, textbook readings, films and lectures, students explore the beauty and diversity of life on Earth.

NS 211 Foundations in Science - Fall 4(2-4)
Prerequisite: NS 121, NS 122 and NS 123. Primarily for students seeking an elementary education certificate. Emphasis is on developing classroom activities, demonstrations, science discovery projects, and experimental equipment that would be useful in the participants' classroom. Laboratory and field experiences will involve students with natural phenomena including their relationships and the application of principles studied, as appropriate for the fall season.

NS 212 Foundations in Science - Winter 4(2-4)
Prerequisite: NS 121, NS 122 and NS 123. Primarily for students seeking an elementary education certificate. Emphasis is on developing classroom activities, demonstrations, science discovery projects, and experimental equipment that would be useful in the participants' classroom. Laboratory and field experiences will involve students with natural phenomena including their relationships and the application of principles studied, as appropriate for the winter season.

NS 213 Foundations in Science - Spring 4(2-4)
Prerequisite: NS 121, NS 122 and NS 123. Primarily for students seeking an elementary education certificate. Emphasis is on developing classroom activities, demonstrations, science discovery projects, and experimental equipment that would be useful in the participants' classroom. Laboratory and field experiences will involve students with natural phenomena including their relationships and the application of principles studied, as appropriate for the spring season.

Oceanography (OCN)
Department of Science
Division of Arts and Sciences

OCN 225 Basic Limnology and Oceanology 4(4-2)
Prerequisite: None. An introduction to the physical and chemical properties of natural waters, wave action, currents, geological structures and formations of the ocean and lake basins, marine and fresh water biology, and man's interactions with natural waters. Laboratory activities are designed to illustrate basic concepts of aquatic science. Field activities may be included as part of the laboratory.

Physiology (PGY)
Department of Science
Division of Arts and Sciences

PGY 212 Human Physiology 5(5-0)
Prerequisite: BIO 101 and ANT 211. The physiology of the muscular, nervous, sensory, circulatory, respiratory, digestive, urinary, endocrine, and reproductive systems is studied. Other topics may include metabolism, water and electrolyte balance, acid base balance, stress.

PGY 213 Human Physiology Laboratory 1(0-3)
Prerequisite: PGY 212 or concurrently. The course is designed to permit students to develop an understanding of basic principles in human physiology through experimentation in the laboratory. A series of laboratory exercises, chosen in sequence to complement PGY 212, will be performed by the students. Areas in which experiments are available include the physiology of sensory, motor, digestion, endocrinology, cardiovascular, renal, and respiratory systems.

Physics (PHY)
Department of Science
Division of Arts and Sciences

PHY 191 Physics for the Life Sciences 5(5-0)
Prerequisite: MTH 012 or equivalent required. A one-semester course in general physics designed to fulfill the physics requirement for certain Life Science and Health Career programs. Topics include vector quantities, force, motion, and energy; conservation laws, fluid pressures and flow, electricity and wave phenomena, including sound and light. This course may not be taken in place of a full year of physics, nor does it satisfy any other general physics requirement unless prior approval is obtained.

PHY 201 Physics (Mechanics and Heat) 4(4-2)
Prerequisite: MTH 165 or equivalent. First of a series of three courses designed to give the student an understanding of the fundamental principles of physics. Considers the principles of mechanics (the laws of translational motion and equilibrium and their relation to force, work, energy, and power) as they are applied to solid bodies. It includes the principles of heat and thermodynamics and their relationship to the operation of engines, rotational motion and equilibrium, heat, and thermodynamics.

PHY 202 Physics (Electricity, Magnetism and Wave Motion) 4(4-2)
Prerequisite: PHY 201 or equivalent. Designed to describe the electrical and magnetic nature of matter. Electrostatics, electricity, magnetism, DC and AC circuits are investigated.

PHY 203 Physics (Optics and Modern Physics) 4(4-2)
Prerequisite: PHY 201 or equivalent. A course in modern physics. Includes topics concerning wave phenomena, geometrical and physical optics, relativity, and atomic, molecular, and nuclear structure.

PHY 215 General Physics I Lecture (Mechanics) 4(5-0)
Prerequisite: MTH 213 or equivalent. Provides an introduction to the static and dynamic behavior of solids and fluids, using calculus extensively. The first in a series of three lecture courses designed for science and engineering majors. Students should enroll in PHY 225 (Physics I Lab) concurrently.

PHY 216 General Physics II Lecture (Electricity and Magnetism) 4(5-0)
Prerequisite: PHY 215 and MTH 214, or equivalents. Provides an introduction to the basic principles of electricity and magnetism, using calculus extensively. The second of three lecture courses designed for physical science and engineering majors. Students should enroll in PHY 226 (Physics II Lab) concurrently.

PHY 217 General Physics III Lecture (Optics and Modern Physics) 4(5-0)
Prerequisite: PHY 215 and MTH 215, or equivalents. The third of three lecture courses designed for science and engineering majors. Topics include geometric and physical optics and modern physics topics such as atomic and nuclear phenomena, relativity, solid state physics, and quantum physics. Students should enroll in PHY 227 (Physics III Lab) concurrently.

PHY 225 General Physics I Lab 1(0-2)
Prerequisite: PHY 215 concurrently. Laboratory topics in mechanics, which complement the lecture course PHY 215.

PHY 226 General Physics II Lab 1(0-2)
Prerequisite: PHY 216 concurrently. Laboratory topics in electricity and magnetism, which complement the lecture course PHY 216.

PHY 227 General Physics III Lab 1(0-2)
Prerequisite: PHY 217 concurrently. Laboratory topics in optics and modern physics, which complement the lecture course PHY 217.
Seminars Department of Science Division of Arts and Sciences

Seminars are developed from many areas within the natural science disciplines. Each seminar has its own course code and a descriptive title which includes the designation “seminar”. Course codes, credit value and applicability toward degrees depend on the seminar content. Transferability is decided on an individual basis by the institution to which the student transfers. Information about degree credit and level of instruction may be obtained at the first class meeting or in advance from the department office.

BIO 100 Seminar: Nutrition 2(2-0)
An introductory course in human nutrition. Topics include the energy nutrients—carbohydrates, lipids, and proteins; digestion, absorption, and metabolism of the nutrients; role of vitamins and minerals, and the introduction of current and controversial topics when relevant. Such current topics can include fast diets, obesity, relationship of nutrients to athletes, labeling of foods, effects of alcohol, the sugar controversy, and food additives.

GE 101 Seminar: Western National Parks 2(2-0)
This course will survey the major National Parks and National Monuments west of the Mississippi River. Since most of the western parks were established for their geologic setting, the significant geological features will be reviewed.

GE 115 Seminar: Volcanic Geology 2(2-0)
This course is an introductory discussion of those internal earth processes which are responsible for producing volcanic mountains, such as Mt. St. Helens’, and associated earth materials. Class discussions will emphasize details of these internal earth processes, their consequences observable at the earth’s surface, and the types of material produced by such eruptions.

GE 140 Seminar: Dinosaurs 2(2-0)
A survey of dinosaurs, their world and discoverers. Past, current and emerging controversies about their origin, evolution, behavior, habitats, and extinction. Their discovery, discoverers, and the history of exploration for dinosaurs.

GE 142 Seminar: Fossils of Michigan 2(2-1)
Prerequisite: None. However, the course is designed as a companion to the Geology of Michigan and current enrollment is possible (but not required). It is expected that the majority of students will be elementary and middle school teachers, members of local geologic/rock and mineral clubs and those with continuing interest in geology-biology. A survey of the ancient life of Michigan and the Great Lakes region during the Paleozoic and the Paleocene. The biology and ecology of marine invertebrates and Ice Age mammals. Fossil collecting, fossil identification and fossil collecting localities in Michigan. Companion course to Geology of Michigan. Lecture and laboratory.

GE 150 Seminar: The Meaning of Evolution 3(2-1)

HOR 101 Seminar: Yard and Garden Culture 2(2-0)
Basic principles of horticultural science related to fruits, flowers, vegetables, lawns, and landscape plants. Emphasis is on the selection of plant varieties, planting, soil management, fertilization, pruning, spraying, and grafting. Field trips.

HOR 102 Seminar: Introduction to Horticulture 3(3-0)
An introduction to the study of horticulture highlighting the four major fields of interest. The fields include floriculture, woody ornamentals, vegetables and fruits, and nuts. Job opportunities and the general role of horticulture will be discussed. Field trips and laboratory experiments will be included when appropriate.

HOR 103 Seminar: Indoor Plants 2(2-0)
Designed for students interested in floral shop art and other career opportunities in horticulture, as well as home-oriented use of plants. Topics include propagation and culture of plants- soil, light requirements, watering, fertilizer and pest control, fluorescent light gardening and other topical subjects will be discussed. Special projects will be hanging baskets, dish gardens, terrariums, holiday projects using plants propagated in class.

HOR 104 Seminar: Plants for Profit or Pleasure 2(2-0)
This course provides information helpful to small plant businesses, and those interested in more information and additional techniques. Topics include plant propagation and culture techniques, the gathering and preservation of plant materials to make decorative items and considerations of the home greenhouse. The course also provides useful information for workers in therapy and rehabilitation.

HOR 106 Seminar: Grow Your Own Vegetables 3(3-0)
An introduction to vegetable gardening covering the steps from seed harvest and storage. The design and use of planting plans and garden calendar will be included.

HOR 107 Seminar: Floral Arranging 2(2-0)
Principle methods of floral design are taught with the students creating various arrangements under the guidance of the instructor. This is a “hands-on” class with participants working with floral material each week. It is the responsibility of the students to supply these materials.

OER 102 Seminar: A Wilderness Survival 3(3-0)
A course designed to provide basic outdoor survival skills and techniques to campers, outdoorsmen and group leaders. Topics include shelter, fire, water, signaling and orienteering, food procurement, and hot/cold stress management.

OER 103 Seminar: Wild Food Plants 2(2-0)
This course introduces sixty-five genera of the edible wild plants of Michigan and adjoining North America and their toxic look-alikes. The students learn to distinguish these genera on the basis of observed taxonomic plant characterstics. The material is illustrated in slides and handouts. Several outdoor experiences in recognizing, collecting, and preparing wild food plants are provided. Conservation of endangered species and care of the environment is also stressed.

OER 104 Seminar: Wilderness Survival II 2(2-0)
Prerequisite: OER 102 or equivalent. Advanced survival techniques have a slightly more “world-wide” emphasis, but builds on topics from Wilderness Survival I. Topics include survival at sea, toxic bites, general rules for approaching a primitive culture, advanced orienteering, edible plants of the world, etc. Optional three day field trips.

OER 105 Seminar: Wild Food Plants II 2(2-0)
Prerequisite: OER 103 recommended. This course presents approximately 100 genera of common edible wild plants of Michigan and the Northeast United States, in addition to the ones covered within Wild Food Plants I. Additional herbs and food plants, their toxic look-alikes, and survival situation applications will be discussed. Recommended for youth group leaders, teachers, back-packers, survivors, and sportsmen.

SC 110 Seminar: North American Mammals 2(2-0)
This introductory course describes the important species, or groups of mammals found in the U.S. and Canada. In particular, it emphasizes identification of about 35 species of mammals, and describes the history, biology, ecology, habitat, and economic importance of each. Other topics include: behavior and territory, management (past and present), population ecology, hunting and trapping.

SC 111 Seminar: Michigan Wildflowers 2(2-0)
An introduction to botany that emphasizes identification of the common Michigan Wildflowers, and discusses their usefulness to mankind and their importance in the environment.

SC 112 Seminar: Michigan Fishes 2(2-0)
This introductory course will enable the student to identify many family’s and species of fish important in Michigan. It will cover, by species, the fishes’ biology, ecology, behavior, food habits, and economic importance. Some other topics will include field study methods, fishing techniques (sport and commercial) and power plant effects on fish.

SC 114 Seminar: Lake and Stream Ecology 2(2-0)
This course explores the interactions between stream organisms and their physical environment. Topics include the measurement of water quality parameters and some invertebrate identification.

SC 118 Seminar: Animal Behavior 3(3-0)
This course examines the basic principles of animal behavior, with examples from invertebrates, insects, fish, reptiles, birds, mammals, and man. The course emphasizes relationships between behavior and ecology. Topics include: instinct, learning, biological clocks, camouflage, mimetic coloration, social behavior, and human behavior.

SC 119 Seminar: Introduction to Wildlife Ecology for Michigan Outdoorsmen 2(1-2)
A course designed for students interested in the biology and management of Michigan Wildlife. This course covers the history and development of the ecological principles utilized in sound game management practices. Techniques used by wildlife biologists will be employed by students in the laboratory and in field trips.
DEPARTMENT OF SOCIAL SCIENCE

Chairperson: Dr. Manuel G. Diaz
353-D Arts and Sciences Building

The purpose of general education as perceived within Social Science is to prepare the individual for the responsibilities all persons have as citizens, and for creative and active participation in a wide range of interpersonal activities.

The Social Science Department has three basic thrusts: transfer of credits, certification and training, and cooperation with community agencies and governmental offices in the solution and prevention of problems. Social Science is a body of information which is gathered in an attempt to discover, understand, and explain behavior patterns of individuals and groups of people in a systematic manner. Social Science is based on the following five steps of the scientific method: (1) Asking the right question; (2) Collecting the data necessary to answer the question, (3) Analyzing the results, (4) Drawing a conclusion, (5) Reformulating the question.

The Department of Social Science offers courses under the following course codes:

- SS: Basic Social Science
- CD: Child Development
- ED: Education
- GEO: Geography
- HUS: Human Services
- PLS: Political Science
- PSY: Psychology
- PS: Public Service
- SA: Sociology/Anthropology
- SW: Social Work

Social Science includes the fields of education, geography, psychology, sociology, anthropology, economics, political science, government, and job training in human services. Students who envision careers in teaching, law, social work, guidance counseling, public administration, personnel work, clinical psychology, urban planning, child development, youth service, foreign service, social research or similar occupations might begin their preparation by majoring in this department. Several courses are designed to meet specific requirements of majors in other areas.

For Associate degrees in Arts and Sciences the student is required to take a core of at least 12 credits in Social Science. The 12 required credits in Social Science must include either SS 103, Politics in Society; SS 104, American Government; or SS 105, State-Local Government. Any of these will satisfy the requirement of one course in government.

The remaining eight credits may be selected from any two of the following: SS 101, SS 102, PSY 200 or GEO 201. PSY 200 and GEO 201 cannot be used as core general education courses for psychology or geography majors, respectively.

The three-term sequence of courses, Social Science 101, 102, and 103 form an integrated introduction to the social sciences which meets the general education requirements in this area. These courses may be taken in any order, though the numbered sequence is recommended.

The Social Science Department also includes the Human Services Program, a two-year curriculum which provides skills needed for certain human service careers and also basic requirements for transfer to four-year colleges. Courses may be taken separately by people who are interested in human services and want to upgrade their knowledge and skills. Courses with the following codes are career training courses which belong to the Human Services Program: CD, ED, HUS, PS, and SW.

SEMINARS

Each term seminars may be offered in any of the disciplines of political science, psychology, geography, sociology/anthropology, or human services. Each seminar has its own course code and a descriptive title which includes the designation "Seminar."

Course codes, credit value, and applicability toward degrees depend on the seminar content. Transferability is decided on an individual basis by the institution to which the student transfers. Information about degree credit and level of instruction will be provided at the first class meeting or in advance at the department office. In general, seminar course numbers above 200 indicate increased challenge.

INDEPENDENT STUDY

Credit for independent study is available for special projects involving research, reading, or field experiences in any subject area. Proposals for such projects must be approved by the department chairperson in advance of registration. To obtain approval the student must be currently enrolled for other courses and must have demonstrated competency through courses taken previously at LCC. The project must meet academic goals and must include enough supervised learning experiences to meet the course credits.

COURSE DESCRIPTIONS

Basic Social Science (SS)
Department of Social Science
Division of Arts and Sciences

- SS 101 Living In Societies (4-4-0)
  Survey of major concepts and methods of sociology and anthroplogy. Emphasis is given to the selective aspects of culture, socialization, stratification, groups, social organization, population ecology, societal and cultural history, and social change.

- SS 102 The Economic Condition (4-4-0)
  This course involves a study of the change in economic institutions from past to present, emphasizing structure, theory and problems of economy.

- SS 103 Politics In Society (4-4-0)
  Examines types of political organizations, comparing similarities and differences between governments. Introduces methods of policy making, and ways to become politically effective.

- SS 104 American Government (4-4-0)
  An analysis of the American political system. Gives emphasis to the Federal System, with special attention to American government at the national level.

- SS 105 State and Local Government (4-4-0)
  A study of state and local governmental activities, their structures, functions, and methods of organizing resources and making policy. Consideration is given to the relationship between governmental units and the problems they confront, including relations between federal, state and local government.

- SS 112 Honors Section of the Economic Condition (4-4-0)
  Involves the study of the change in economic institutions from past to present, emphasizing structure, theory and problems of economy. This course is the same as SS 102 except that it is taught on an advanced level in a seminar mode for honors students only. Outstanding students are notified of their eligibility before registration.

- SS 113 Honors Section of Politics in Society (4-4-0)
  Examines types of political organizations, comparing similarities and differences between governments. Introduces methods of policy making, and ways to become politically effective. This course is the same as SS 103 except that it is taught on an advanced level in a seminar mode for honors students only. Outstanding students are notified of their eligibility before registration.
Division of Arts and Sciences

CD 101 Infants and Toddlers, 0 to 2 1/2 Years 2(2-0)

Dills with the physiological and physical growth patterns, nutritional requirements, emotional, social, and cognitive skills of children, 0-2 1/2 years. Prepares individuals for caring for the child at home or in a child-care setting. Includes discussion of the relative influences of genetics and environment on growth, the relationship of the development of the body systems to the child’s nutritional status and the acquisition of skills in recognizing, recording, and interpreting child behavior.

Prerequisite: CD 101 concurrently. A supervised laboratory situation in which students have opportunity to work directly with infants/toddlers four hours per week. Emphasis is on application of development information and caregiving skills discussed in CD 101.

CD 102 Infant and Toddler Laboratory 2(0-4)

CD 103 Developing Programs for Infants and Toddlers 4(3-4)

CD 101 Recommended. Explores the components of the physical and emotional environment which are necessary for quality infant and toddler child care program development. The focus is on the development of nurturing skills, providing appropriate activities and materials, managing schedules and routines, and observation and record keeping. This course involves field experience in an infant and toddler setting.

CD 110 Introduction to CDA Credentials 4(2-8)

Prerequisite: Instructor approval. This course will examine the Child Development Associate (CDA) Credential, the Credential award system, and explore ways the student can meet the CDA competency standards, and provide assistance in beginning the credentialing process through course work and supervised field experience. Grading in this course is P/Z.

CD 121 The Preschool Child, 2 1/2-6 Years 4(4-0)

Examines the growth and development patterns of children 2 1/2-6 years of age, including physical, physiological, emotional, social and cognitive areas of development; additional topics include: play, nutrition, families, preschool experience and the acquisition of skills in recognizing, recording and interpreting child behavior.

CD 122 The School-Age Child 3(3-0)

Deals with the physiological and physical growth patterns, nutritional requirements, emotional, social, and cognitive skills of children, 5-12 years old. Focuses on learning activities that promote the growth and development of school-age children. Prepares the student for the school age child in child care or in child care settings. Emphasizes working cooperatively with parents and schools.

CD 130 Caring for Children in a Family Setting 3(3-0)

The role of the In-Home Caregiver as part of the family unit will be examined. An overview of families and their functioning as well as situations unique to child care in a family setting will be discussed. Other topics include: sibling relationships, health and safety in the home, and international families.

CD 182 Child Care as a Family Support System 2(2-0)

The focus is on child care as a family support system; topics will include: establishing and maintaining positive and productive relationships with families in child care centers and homes; providing professional support for parents; supporting the child’s relationship with his/her family; encouraging parental involvement; and communicating with parents.

CD 183 Health and Safety Issues in Child Care 2(2-0)

An in-depth look at health and safety issues in child care centers and homes; topics covered include: understanding and preventing communicable diseases, preventing and treating accidents, dental hygiene, nutrition, and health and safety education.

CD 214 Child Development Associate (CDA) Practicum I 4(1-12)

Prerequisite: CD 110 or Department approval. Provides supervised field experience and training to assist students working toward Child Development Associate (CDA) credentialing. Students receive on-site field supervision, develop individualized workplans, participate in group seminar discussions, and receive feedback on written portfolio assignments covering the 13 CDA functional areas. A continuation of CDA Practicum I.

CD 216 Child Development Associate (CDA) Practicum III 4(1-12)

Prerequisite: CD 215. Provides supervised field experience and training to assist students working toward Child Development Associate (CDA) credentialing. Students receive on-site field supervision, develop individualized workplans, participate in group seminar discussions, and receive feedback on written portfolio assignments covering the 13 CDA functional areas. A continuation of CDA Practicum II.

CD 230 Programming for In-Home Child Care Giving 4(3-4)

Prerequisite: CD 130. Focuses on preparing an environment in the home setting which provides opportunities for the children’s social, emotional, physical and cognitive growth. Topics include: caring for children’s personal, nutritional and educational needs; selecting materials and equipment; organizing the environment; safety; special events and community resources.

CD 280 Preschool Administration 3(3-0)

Analysis of the administrator’s role in directing an Early Childhood Center; application of philosophy, communication, and business techniques necessary to operate an early childhood education program; acquisition of knowledge about safety, licensing, health, and nutrition regulations.

CD 281 Preschoolers with Special Needs 4(4-0)

This course addresses the special needs of preschool children including various categories of exceptionality, mainstreaming, play/skill development and working with parents.

CD 282 Curriculum Development 4(3-4)

CD 121 recommended. The focus of this course is on developing a curriculum which will encourage physical, cognitive, creative, and language development in children in early childhood programs. Specific activity/skill areas focus on concrete developmental experiences and play.

CD 283 Guidance in the Learning Environment 4(3-4)

CD 121 recommended. Focuses on environments which foster social and emotional growth for children as well as the development of skills in positive guidance and effective communication with young children. A variety of ages (infants through school-age) and settings (family day care, child’s own home and center-based) will be incorporated. Topics include: group management skills, realistic expectations for children, structuring the environment, pro-social skill development and the prevention of aggressive behavior.

CD 284 Family Day Care Management 3(3-0)

Presents a systematic approach to managing a family day care home and creating a positive learning environment for young children in a home setting, including business aspects, program development, professionalism, communications skills, managing personnel and organizing the environment.

Education (ED)
Department of Social Science Division of Arts and Sciences

ED 101 Curriculum Reinforcement 3(3-0)

Role orientation of the para-professional or education student as a significant person in the reinforcement of the school curriculum. Includes introduction to instructional media, school records, safety, discipline, permissible first aid, dramatic play and story telling, and other instructional approaches.

ED 150 Introduction to Education 3(3-0)

An introduction to teaching as a profession and education as a career. Included is an overview of the foundations, philosophy, history and organization of education as a human endeavor. Current issues and trends in education are examined.

Geography (GEO)
Department of Social Science Division of Arts and Sciences

GEO 100 Introduction to Geography 4(4-0)

As an introductory course, Geography 100 is designed to provide contemporary geographic ideas and techniques to study the interaction between people and their physical environment.

1989 Catalog Lansing Community College www.lcc.edu
GEO 101 Principles of Geography 4(4-0)
Specific geographic principles course emphasizing landforms, gradational forces, weather and climatic elements, and soils, on a worldwide basis. Offers an extensive study of these forces, noting their ecological principles and their effects on human life. Includes mapping techniques, land site analysis, and air-photo interpretation. Field trips will be an integral part of the course.

GEO 201 World Regional Geography 4(4-0)
Describes and analyzes human and natural resources of countries and cultures of the world with major emphasis on their distribution over the surface of the earth.

GEO 202 Geography of North America 3(3-0)
A study of the human and physical resources of North America. This course will identify some of the factors that influence quality of life and give character to each of the various subregions.

GEO 203 Economic Geography 3(3-0)
Study of geographic distribution of agricultural commodities, raw materials for industry, and the location of industries throughout the world. Some emphasis is placed on trade of raw materials and finished products among nations.

GEO 205 Population Geography 4(4-0)
To provide an understanding of how the size, distribution, composition, and movement of populations are related to the spatial variations in the nature of places.

Human Services (HUS)
Department of Social Science
Division of Arts and Sciences

HUS 101 Human Services: Introduction and Interventions 4(4-0)
An overview for the basic programs and social institutions which provide human services. The course will also provide the student with methods and problem-solving skills used by human service workers in a variety of settings.

HUS 102 Introduction to Mental Health 3(3-0)
This course will provide the student with an overview of the field of Mental Health with an emphasis on a historical review, psycho-social stages of development; definition of mental illness, causes and treatment; prevention; current service delivery systems; and the role of the Mental Health Associate.

HUS 103 Introduction to Domestic Violence 3(3-0)
This course is designed to provide an overview of the historical, socio-economic, cultural, and psychological factors related to domestic violence.

HUS 104 Introduction to Child Advocacy 4(4-0)
Discussion of children’s rights, philosophy and definition of child advocacy, legislation affecting children, and an overview of advocacy skill and programs.

HUS 105 Introduction to Mental Retardation 4(4-0)
The purpose of this course is to obtain an overall understanding of the field of Mental Retardation with emphasis on historical trends; definition, causes and treatment; psycho-social development; current service delivery systems; and the role of the Mental Retardation Associate.

HUS 110 Introduction to Child Abuse/Neglect 3(3-0)
An overview of the history and scope of the problem; the dynamics of child abuse/neglect and the world of abnormal rearing; roles of community agencies and disciplines; approaches to treatment and coordination of cases and services; legal aspects and the law.

HUS 205 Personal Dimensions of Human Services 4(4-0)
An exploration of the nature and development of personal dimensions of human services to meet the needs of the people preparing to work in the “helping professions.”

HUS 207 Group Process Skills 4(4-0)
Prerequisite: HUS 101 or SW 101. Introduction to the concepts, principles, goals and skills of social group work as a method of human service. Emphasis is upon the introduction of basic practice skills and intervention techniques within a framework of beginning theoretical knowledge.

HUS 212 Family Treatment-Child Abuse/Neglect 3(3-0)
This course will address the special problems encountered working as a professional, paraprofessional or volunteer with abusive and neglectful families using individual, group, and family techniques. Legal, treatment, and value issues will be considered. A secondary focus of this course will be the issue of work attrition in the field of abuse and neglect, its cause, and some individual and agency solutions to the problem.

HUS 214 Practicum I 3(0-12)
Prerequisite: Department approval. Beginning practical experience and training in the field for individual students. The student is placed with a community-based social agency or institution. A concurrent seminar, HUS 217, serves to integrate field experience with theoretical concepts and principles of human service, except for education students who should enroll in ED 101.

HUS 215 Practicum II 3(0-12)
Prerequisite: HUS 214. A continuation of HUS 214. A concurrent seminar, HUS 218, serves to integrate field experience with theoretical concepts and principles.

HUS 216 Practicum III 3(0-12)
Prerequisite: HUS 215. A continuation of HUS 215. A concurrent seminar, HUS 219, serves to integrate field experience with theoretical concepts and principles.

HUS 217 Organizational Systems 2(2-0)
Prerequisite: HUS 214 concurrently. The course is designed to provide the student with knowledge of the community power structure, funding bases and the internal workings of human services organizations.

HUS 218 Service Delivery Skills 2(2-0)
Prerequisite: HUS 215 concurrently. The course is designed to help the human services student identify the systems and resources that link the systems with the people and learn how to mobilize the systems and the people.

HUS 219 Employment Readiness 2(2-0)
Prerequisite: HUS 216 concurrently. The course is designed to prepare students for the job market. They will learn how to complete applications, prepare resumes and apply for state certification.

HUS 240 Substance Abuse in Special Populations 3(3-0)
Prerequisite: SA 230. This course surveys substance abuse in various populations including the elderly, women, the hearing impaired, and as well as various ethnic groups including Blacks, American Indians, and Hispanics. Reasons for abuse and treatment consideration are explored with each special population.

HUS 241 Substance Abuse: Prevention and Intervention 4(4-0)
Prerequisite: SA 230. This course explores the individual as well as the environmental approaches to prevention. It establishes criteria for effective and ineffective prevention. Community, as well as school-based programs are investigated. The prevention programs include The Michigan Model for Comprehensive Health Education and Peer Listening. Secondary prevention in the form of intervention is also investigated and discussed.

HUS 242 The Chemically Dependent Family 4(4-0)
Prerequisite: SA 230. Designed to provide students with a conceptual framework and in which they can understand issues and effectively intervene/interact in a counseling fashion with the chemically dependent family (CDF). Specific sub-groups and issues within or resulting from the chemically dependent family are explored: 1) adult children of alcoholics, 2) co-dependents and para-dependents, 3) family addiction patterns, 4) acculturation of substance abuse, 5) sexual issues, 6) functional and disfunctional roles, and 7) a systems approach to treatment of the CDF.

HUS 243 Adolescent Addiction 4(4-0)
Prerequisite: SA 230 and PSY 222. The study of issues related to understanding, evaluating, and treating the adolescent substance abuse individual and within the context of the family system.

Political Science (PLS)
Department of Social Science
Division of Arts and Sciences

PLS 200 Introduction to Political Behavior 4(4-0)
Introduction to theories, concepts and methods of political science with emphasis on the functions of political institutions and behavior of political actors.
Division of Arts and Sciences

PLS 207 Government Internship 4(1-12)
Prerequisite: Department approval. This course offers the student a chance to observe the actual workings of the political process by participating in it. Participation will provide students an exposure to public policy making. The program covers all levels of government, from city and township through the federal level.

PLS 210 Contemporary Political Affairs 3(3-0)
Analysis of current domestic and international political problems utilizing theoretical background and current reading to understand the ideologies, forces and interests shaping today's politics.

PLS 250 American Political Parties, Elections and Interest Groups 4(4-0)
Deals with the origins, structure, and functions of political parties, examines the American political system in terms of citizen concern about the community and government, and serves as a guide to political action by the citizenry. Included is the role and function of interest groups in American politics.

PLS 260 Introduction to Comparative Government 4(4-0)
Introduction to the political institutions of modern government with emphasis given to the United Kingdom, France, Germany, USSR, and the European Economic Community. The course includes dynamics of political behavior in these and other societies as well as special problems of the newly emerging nations.

PLS 271 International Relations 4(4-0)
Course in contemporary relations, with emphasis upon politics. Concepts, theories and rudimentary methods are surveyed. Relationships between international politics, foreign policy, and domestic policy in the U.S. are explored.

PLS 280 Introduction to the Politics and Government of Japan 4(4-0)
Prerequisite: Department approval. An introduction to the Japanese governmental structures and political process, with emphasis on the unique characteristics of Japanese political culture, Japanese style of decision-making, and Japanese concepts of democracy.

PLS 290 Seminar: The Supreme Court and Landmark Decisions 4(4-0)
An analysis of the United States Supreme Court. Particular emphasis will be devoted to Supreme Court decision-making as the class will scrutinize constitutional cases established by the Court. A number of landmark Supreme Court decisions will be reviewed from historical, political, public policy, institutional and behavioral perspectives.

PLS 295 Seminar: Alternate Political Futures for Our Global Community 3(3-0)
An examination of problems the world faces in the next 25-100 years which require political solutions—problems of war, technology, resources, population, education, economics, human rights, space, etc. Focus is on whether present political institutions are adequate for the future, on alternative possibilities, and on methods of precasting political futures.

PLS 296 Seminar: Advanced Government Internship 4(1-12)
This course will provide those students who have completed the basic Government Internship Program an opportunity to use and apply the information and skills they have acquired in a new placement. The new placement will be based on an appraisal of the student's past experience and evaluation.

Psychology (PSY)
Department of Social Science
Division of Arts and Sciences

PSY 151 Business Psychology 3(3-0)
This course is a general, basic introduction to the field of psychology with special emphasis on aspects of the field which are particularly useful to students preparing for careers in business.

PSY 153 Psychology for Health Careers 3(3-0)
A course designed for students in the health careers who must use psychology in the areas of effective interpersonal communication, helping relationships, death and dying, and interacting with special populations such as children, the aged, and the physically and emotionally disabled.

PSY 200 Introductory Psychology: Social-Individual Behavior 4(4-0)
A basic orientation to the field of psychology with emphasis on social and individual behavior. Topics include interpersonal behavior, group process, personality, emotions, cognition, measurement and therapy. The course is designed both as a general survey and as a preparation for all advanced courses in psychology.

PSY 201 Introduction to Psychology: Principles and Methods 4(3-1)
Prerequisite: PSY 200. An introduction to the methods and principles of the science of psychology. Emphasis is on processes underlying human behavior. Content includes brain function, sensation, perception, motivation, conditioning, verbal learning, and motivation. Each student will design and conduct an experiment.

PSY 202 Psychology of Personality 4(4-0)
Prerequisite: PSY 200. Discussion of concepts of adjustment, conflict, mental hygiene and behavior modification. Survey of leading theories of personality, emphasizing their implications for assessing and modifying normal personality.

PSY 203 Introduction to Social Psychology 4(4-0)
Prerequisites: PSY 200 and SS 101, or approval. Designed to give the student an understanding of the influence of social interaction upon the development of personality. Interaction between the individual and society is stressed.

PSY 204 Educational Psychology 4(4-0)
Prerequisite: PSY 200. An investigation of the contribution of psychology to education. Emphasis upon aspects of child growth and development, learning, measurement, and group dynamics which affect the achievement of pupils in the classroom. The course includes experiences in which students are able to practice some of the tasks and interpersonal skills involved in teaching.

PSY 205 Human Growth and Development 4(4-0)
Prerequisite: PSY 200. A study of the human life cycle from conception to death. Designed to investigate, describe and explain changes in human behavior that are a result of the continuous interaction of maturation and experience.

PSY 221 Child Psychology 4(4-0)
Prerequisite: PSY 200. Explores theories and principles of child development from conception to puberty. The course covers psychological, sociological, and biological aspects of maturation and development.

PSY 222 Adolescent Psychology 4(4-0)
Prerequisite: PSY 200. Examines theoretical and empirical literature related to adolescence, emphasizing biological, psychological, and sociological aspects of maturation and development from puberty to young adulthood.

PSY 250 Abnormal Psychology 4(4-0)
Prerequisite: PSY 200. An exploration of the nature, development, diagnosis, and treatment of psychological disorders viewed from a general systems (i.e., psychological, social, and physiological) perspective. Significant research, major theories, diagnostic techniques, and therapeutic techniques are discussed with respect to various psychological disorders.

PSY 251 Psychology of Human Sexuality 4(4-0)
Prerequisite: PSY 200. An exploration of human sexuality, including the history of human sexuality; sexual research; the origins, development, and nature of sexual response systems; sexual roles and orientations; love and intimacy; reactions to sexual diseases and disorders; and future trends in sexuality.

PSY 275 Psychology of Death: A Preparation for Living 4(3-1)
Will examine psychological theories, concepts, and research that pertain to the study of death and personal death awareness. Topics include the dying process, suicide, death anxiety, children's concept of death, care of dying, ethical decisions, social issues and considerations, near death experiences, and the grieving process.

PSY 280 Cognitive Psychology 4(3-1)
Prerequisite: PSY 200. A survey of concepts, theories, and research findings regarding cognition. Includes attention, memory, thinking, and language; supplementary laboratory activities.

PSY 281 Seminar: Biofeedback 4(3-2)
Advanced study of the phenomenon of biofeedback as applied to conditioning and control of autonomic responses, gaining new understanding of the physiology of emotion and investigating the determinants of emotional change. Emphasis is on developing skills in recording observations and in relating observations to hypotheses with respect to autonomic activity.
PS 201 Fundamentals of Public Administration 4(4-0)
Deals with the development and application of the basic principles and concepts underlying the generic field of public administration in federal, state, and local government. The relevance of these principles and concepts to paraprofessional and mid-management public employees will be emphasized.

PS 231 Staff Roles and Relations in Substance Abuse 2(2-0)
Prerequisite: SA 230. Includes present funding sources and staffing patterns for substance abuse agencies. Points of conflict within and among agencies are addressed.

Sociology/Anthropology (SA)
Department of Social Science
Division of Arts and Sciences

SA 179 Introduction to Japan 2(2-0)
Prerequisite: Department approval. An overview of Japan’s physical, social, political and economic settings as they determine the way of life of Japanese people. The course includes a practical guidance in relating to Japanese customs.

SA 200 Principles of Sociology 4(4-0)
Introductory analysis and description of the structure of human society, with emphasis on social norms, groups, social stratification and institutions as they are analyzed by modern sociological methodology.

SA 210 Introduction to Research Methods in Social Science 4(4-0)
Prerequisite: SS 101. Fundamental principles basic to empirical social science research. Overview of various forms and approaches involved in planning and conducting scientific studies. Intended to develop ability to understand and evaluate social science research literature. Practicum and field experience included.

SA 220 Introduction to Substance Abuse 4(4-0)
An overview of substance abuse and use from a historical, sociological, and psychological perspective. Includes drug classifications, street terminology, and causes of abuse. Also examines present and past legislation regarding substance abuse and use.

SA 254 Men, Women and Change 4(4-0)
Prerequisite: SS 101 or PSY 200. A study of the changes in society over the past century in terms of their dramatic impact on sexual relationships, marriage, and family life. Course includes sex roles, sexual behavior, values, psychological needs, divorce, and parenting.

SA 255 Contemporary Social Problems 4(4-0)
Prerequisite: SS 101. Consideration of current social problems form a framework of sociological theory with special regard for current hypotheses and recent empirical studies relevant to particular problems, e.g., family stability, racism, urbanism, etc.

SA 260 Minority Groups 4(4-0)
An introduction to the culture and contemporary life styles of American minorities. Emphasis is placed on basic sociological and anthropological concepts with respect to selected minority groups, particularly the Black American, Mexican American, Native American and Asian American.

SA 270 Introduction to Cultural Anthropology 4(4-0)
Prerequisite: SS 101. Fields, methods, and findings of the science of man. Primary attention given to literature of culture. Historical development of anthropological theory and methodology will be surveyed. Students will research a cross-cultural study.

SA 275 Introduction to Physical Anthropology and Archeology 4(4-0)
Introduces human biological and cultural evolution; mechanisms of evolution; human origins, biological and cultural evidence from fossil record, behavior among other animals and development of human culture; culture as an adaptive mechanism; and modern human variation.

SA 280 Introduction to the Society and Economy of Japan 4(4-0)
Prerequisite: Department approval. An introduction to two main aspects of contemporary Japan: the Japanese way of life in its cultural context, and the Japanese economic system. Emphasis is on the unique features of the economic behavior of the people in terms of Japanese values, belief systems and cultural background.

SA 288 Introduction to the Third World 4(4-0)
An interdisciplinary introduction to the history, society, economy and politics of Third World nations in Asia, Africa, and Latin America, with emphasis on dilemmas of economic development, cultural and social dependency, and international sovereignty in an interdependent world. These will be explored through an analysis of specific case studies.

Social Work (SW)
Department of Social Science
Division of Arts and Sciences

(SW 101 Introduction to Social Work 4(4-0)
Introduction to the principles of social work practice. Emphasis on social work careers, description of methods, skills and standards of practice, definitions of the helping roles, survey of helping agencies and institutions, and overview of social issues and client needs relative to social work practice.

SW 203 Social Work Interviewing 4(4-0)
Prerequisite: HUS 101 or SW 101. An examination of the purposes and basic concepts of the interview relationship with emphasis on the helping interview. Instruction in the techniques of interviewing with an opportunity to engage in practice interviews including videotaping and feedback.

SW 205 Social Welfare 3(3-0)
Prerequisite: SW 101. Introduction to the definition and concept of social welfare, its history, programs, attitudes, values and philosophy. Emphasis is upon the development of private and public services, changing patterns of services, the evolving changes in the Social Security Act and community action, with attention to current issues in social welfare policy.

SW 209 Community Organization 3(3-0)
Prerequisite: SW 101 or HUS 101. Introduction to the principles, concepts, and methods of community organization techniques. Emphasis is on the introduction of basic practice skills and intervention techniques within a framework of beginning theoretical knowledge.

SW 230 Substance Abuse: Addiction and Treatment 3(3-0)
Prerequisite: SA 230. Covers the addiction cycle of alcoholics and drug abusers, personality and interactional patterns of addiction, and casework and group work techniques.

SW 231 Substance Abuse Agencies and Treatment Modalities 3(3-0)
Prerequisite: SA 230. A review and analysis of current models of treatment within programs. Includes review of inpatient, outpatient, Halfway Houses, and occupational programs.
Lansing Community College

Dean James Person

DIVISION OF BUSINESS

Accounting and Computer Academic Programs
Criminal Justice and Law Systems
Hospitality Systems
Management Systems
Office Systems
DIVISION OF BUSINESS

Dean: James E. Person
210 Old Central Building

The Business Division's programs support the major goals of the College in that the faculty seek to facilitate the growth of individuals as productive members of a business organization and of the society in which the organization is found. To achieve such growth, the Division offers instructional programs ranging from those providing instruction in the fundamentals of business operations to those providing means for acquiring more advanced business skills. Within this range, all courses offered will produce credit applicable either toward the requirements for a certificate or degree issued by the College or toward a baccalaureate degree issued by a four-year college when the credit is transferred to such an institution.

Business Division Program Objectives

To deliver quality education and training, the faculty are committed:

1. To provide pre-professional and career-oriented students with an innovative personalized process of instruction.
2. To maintain constant evaluation and assessment of themselves and their instructional methodologies in terms of student needs.
3. To structure and focus all educational subject matter around a career development theme so that such subject matter is meaningful and relevant to the student.
4. To guide all persons completing a program of the Division with the knowledge and skills necessary to (a) enter the labor market with a marketable skill, (b) be upgraded and updated in their chosen field of work, or (c) prepare them for pursuing further education.
5. To provide an instructional system which utilizes and coordinates its activities with the resources of the business, industrial, and governmental communities in the service area of the College.
6. To provide or assure the availability to all students the guidance, counseling, and instruction needed by them to develop self-direction, to expand occupational awareness and aspirations, and to develop an understanding of the personal and social significance of work.
7. To provide articulation services to each student so that he or she will know the next step toward personal development whether it be employment, further education, or re-entry into an educational program from the world of work.

Organization of Resources

To assure the relevancy of its programs, the Division of Business uses the services of a wide variety of advisory committees. The membership of these committees is comprised of leaders in occupational career fields. These advisory committees assist the Division in planning programs to meet the needs of business, industry, and government, as well as educational institutions, labor organizations, etc. for the development and training of their personnel. At the heart of the Business Division programs is the faculty who are committed to new perspectives in their teaching through active partnerships with government agencies, business, and industry. In the delivery of education and training, the Division uses efficient, up-to-date instructional methods, applications, and equipment.

Major Programs and Occupational/Career Fields in Business

The following list includes the names of representative occupational fields as well as some job positions. The Division of Business offers education and training for each of the listed fields and positions.

Accounting
Accounting/Data Processing
Administrative Assistant
Banking
Computer Applications Systems
Computer Operations
Computer Programming
Computer Software Systems
Computer Systems Analyst
Corrections
Court Administrator
Court Reporting
Credit Union Operations
Data Entry
Financial Planner
Food Specialist
General Clerical
Hotel/Motel Management
Insurance

Transfer Programs for Business

Transfer programs are available to students who expect to transfer to a four-year institution. Students are advised to consult the current catalog of that institution and to follow its recommendations as to courses. Specific transfer credit information may be obtained from Lansing Community College counselors.

Community Service Programs

As stated in the objectives previously listed, an important function of the Business Division is serving the educational and training needs of local business, industrial, labor, and governmental organizations. To fulfill this function, the Division provides a variety of courses and seminars to retrain employees or to upgrade their skills. Within reasonable limits, the Division stands ready to customize courses or programs to meet the needs of these organizations. Also, the courses or programs may be developed for single or multiple sessions, depending on the needs of the students to be served.

ACCOUNTING AND COMPUTER ACADEMIC PROGRAMS

Program Director: Charles F. Parker
137 Old Central Building

The Accounting and Computer Academic Programs strive to provide the student with an opportunity to develop marketable skills and knowledge. This is accomplished by maintaining relevance and high quality in all aspects of the program. The curricula and course content are continually evaluated by students, faculty, administrators, professional organizations, and industry advisory committees. Most of the faculty are from or are career professionals in the subject area they teach. This assures the student of access to an up-to-date and relevant orientation to the information and concepts under study.

The instructional methods of Accounting and Computer Academic Programs recognize the mixture of varying experience, commitment, and educational needs of students within the community. Both traditional and alternate delivery systems are available for the courses in most demand. Alternate delivery systems allow greater schedule flexibility and, they utilize techniques such as computer-assisted instruction (CAI), Audio-Visual-Tutorial (AVT), telecourse broadcasts, and self-study course materials.

Students desiring to enroll in courses offered by the Accounting and Computer Academic Programs area will find the courses identified as follows:

ACC: Accounting
CAB: Computer Applications Business
CAS: Computer Applications Systems
CFP: Certified Financial Planner
INS: Insurance

Curricular guides are available for each program offered by Accounting and Computer Academic Programs from the Counseling offices and the Program Director's office. Students are encouraged to discuss any of these programs with an advisor from the Accounting and Computer Academic Programs office.

Accounting

As society grows larger and more complex, the need for qualified people in the planning, creating, controlling, and financial management of organizations increases. There is a demand for individuals with business education in government, business, and industry. By entering the fields of accounting, students can prepare themselves for careers in such areas as public accounting, governmental employment, bookkeeping, insurance, clerical, tax administration, and personnel management.

The Accounting Program is designed to prepare students for entry-level positions in the field of accounting. It is also suited for students who desire to pursue further education in accounting, business administration, or related fields.

Computer Academic Programs

Experts predict that the demand for computer professionals in business will expand by 4.5 to 5 percent each year through 1995. That growth means new career opportunities both for those starting their first career and for those changing careers. This growth is in a profession that provides a comfortable work environment, competitive compensation, stimulating challenges, and the opportunity for varied experience and personal growth paced by changes in technology.

The computer information systems field encompasses a variety of occupations that center around the use of computers. The goal of professionals in this field is to electronically transform raw data into usable information. Computers can now be found in the home and car, as well as in business, industry, government, and education. Challenging positions are available for people who can write well, think logically, and solve problems.
Division of Business

Instructional Methods
Accounting and Computer Academic Programs have developed a system of instruction known as audio-visual/tutorial instruction, which provides the opportunity for learning on an individual basis with continuous assistance and supervision. The flexibility of this system allows enrollment in the course at any time during the year; 8:00 a.m. to 10:00 p.m. (and not necessarily the same hours each day); and the opportunity to complete courses as rapidly or as slowly as one's capabilities and/or time commitments will allow. It also provides academic advisors with the ability to construct individual courses to remedy specific deficiencies or to upgrade skills in special areas.

This audio-visual/tutorial system of instruction was designed to replace the traditional classroom by programmed instruction and demonstrations on audio-visual media such as slides and tapes and interactive video.

Courses include the same content as their classroom-type precessors and are indicated in the course description section by the designation "AVT."

Curricular Guides
General curricular guides for each curriculum offered by Accounting and Computer Academic Programs are available in the counseling offices and the Program Director's office; however, guides are frequently modified to accommodate an individual student's background, goals, and abilities. The student is encouraged to discuss unique situations with an academic advisor within Accounting and Computer Academic Programs.

Accounting Certificate
The curriculum for the accounting certificate is designed for students desiring to rapidly acquire those skills for entrance into paraprofessional levels of accounting employment such as those of account clerks, cashiers, and bookkeepers. (Curriculum Code 405)

Accounting Associate Degree
The two-year (90 credit) accounting program offers preparation in accounting and financial information to meet the needs of modern business and industry. Accounting is the language of business. It provides for the measurement and communication of financial data to those who will use the data, not only for its informational value, but also as a basis of decision and action. The curriculum of this program is designed to help the student develop habits of critical and logical thinking while learning to record, report, and interpret economic data. Completion of the two-year curriculum will provide the student with sufficient skill and knowledge to meet entrance requirements of business and to progress rapidly through many levels of accounting positions. (Curriculum Code 410)

Accounting/Data Processing
The accounting/data processing curriculum offers, in an Associate Degree, the opportunity to have two full majors, one in accounting and one in data processing. Completion of this curriculum will enable the student to seek a position in accounting or a position in data processing or a position which requires substantial knowledge in both areas. This provides the student with a great amount of flexibility in a rapidly changing business environment. (Curriculum Code 411)

Applications Programmer
An Associate Degree curriculum designed for people planning to work as applications programmers in a business environment. The student learns to program in BASIC, COBOL, RPG, and Assembly. Other courses include data base concepts, operating systems, data communications, and systems analysis. (Curriculum Code 450)

Certified Financial Planner
Dual enrollment is required; The College for Financial Planning as well as Lansing Community College. As the field of financial planning has gained prominence, so has the Certified Financial Planner (CFP) Professional Education Program offered by Lansing Community College in affiliation with the College for Financial Planning in Denver, Colorado. It is recognized standard among those seeking to acquire the knowledge and skills essential to the practice of comprehensive client-based personal financial planning. The CFP curriculum emphasizes an approach based on the integration of six subject areas pertinent to personal financial management, including: risk management, investments, tax planning and administration, employee benefits and estate planning. Admission to the CFP curriculum is open to all individuals currently working in the financial services industry, as well as those interested in a financial planning education to enhance their personal knowledge. To participate in affiliate classes at LCC, the candidate will be required to satisfy tuition and other costs at LCC in addition to the College for Financial Planning tuition, fees and requirements.

To qualify for certification by the IBCFP (International Board of Standards and Practices for Certified Financial Planners), individuals must fulfill certain requirements, including a written examination indicating completion of a financial planning education program that has been registered with the IBCFP, successful completion of the six national IBCFP certification examinations and verification of relevant work experience in the financial services industry. Relevant work experience is defined as full-time (or equivalent part-time) employment in the practice of personal financial planning, whereby financial planning is done personally and directly for clients for compensation. Candidates receive three CEUs (Continuing Education Units) credits for each of the six courses.

Examination sessions are scheduled for the third Saturday of January, May, and September. Currently, the IBCFP (International Board of Standards and Practices for Certified Financial Planners) national CFP examinations are divided into two sections. Section I consists of multiple-choice questions, worth 200 points on the first exam, decreasing to 100 points on the sixth exam. Section II consists of a case analysis, worth 100 points on the first exam, increasing to 200 points on the sixth exam.

Computer Operations Management
An Associate Degree curriculum designed for people who aspire to supervisory positions in the computer operations area. After earning the computer operator certificate (453), 45 additional credits are required for this associate degree. Ideally, a graduate from the certificate program should gain work experience as a computer operator while pursuing the associate degree. (Curriculum Code 486)

Computer Operator
Certificate curriculum intended for people planning to become computer operators. Included are basic data processing courses as well as some specialized topics relating specifically to computer operations. Can lead into Computer Operations Management (486) Associate Degree. (Curriculum Code 453)

Computer Sales Specialist
Associate Degree curriculum which trains persons in computer sales. The course work is divided among data processing, marketing, and business subjects. (Curriculum Code 477)

Computer Security and Controls
Associate Degree curriculum which covers fundamentals and techniques in both accounting and data processing. This curriculum is used by students already degreeed in one area to obtain credentials in the other area. (Curriculum Code 488)

Data Processing and Management Dual
Intended as a second Associate Degree following the 450 degree. Additional management and business concepts are studied. Requires 50 to 51 additional credit hours after completing the Applications Programmer Associate Degree (450). (Curriculum Code 452)

General Pre-Accounting
The pre-accounting transfer curriculum is designed for students preparing to transfer to four-year institutions. Since the requirements vary for different four-year institutions, students should check with the program area for specific course requirements at these institutions. (Curriculum Code 412)

Microcomputer Systems
Associate Degree curriculum designed for those who wish to specialize in microcomputer applications. Advanced BASIC, machine language, and data processing courses are required as well as two approved sequences of courses. Provides freedom to choose elective courses from throughout the College as a specialty area for microcomputer applications. (Curriculum Code 469)

Microcomputer Systems Certificate
This curriculum provides a certificate in microcomputer applications for someone developing specialization in that area for their employer. Computer programming provides training in logical thinking and good design techniques. Emphasis is placed on the development of applications using spreadsheet and database programs. The BASIC programming language is emphasized. Pascal, micro assembler, C language and additional data processing courses are also required. Can lead into Microcomputer Systems (489) Associate Degree. (Curriculum Code 454)

Programmer/Analyst
This Associate Degree curriculum combines skills in business application programming and systems analysis. In addition to the 4 to 5 business program work units, the student will learn additional skills necessary for advancement to higher level data processing positions. (Curriculum Code 408)

Systems Analysis
Set up as a second Associate Degree to follow the applications programmer degree (450). The student takes some advanced data processing courses as well as additional communications courses. (Curriculum Code 487)
ACC 100 Practical Accounting for Non-Majors 4(4-0)
Emphasis is on accounting terminology, journalizing, and posting economic information, trial balance preparation, payroll, preparation and posting accounts receivable and payable. Recommended for students who do not plan to transfer to a four-year institution or who do not plan to take additional accounting courses.

ACC 101 Accounting Information for Management 4(4-0)
This course is intended for general management students who do not plan to transfer to a four-year institution. Its emphasis is on accounting terminology, and the use of accounting information for decision making. Topics covered include, financial statement analysis, budgeting, and decision making.

ACC 140 Individual Income Tax 4(4-0)
This is a basic course designed to give the skills and knowledge necessary to complete and file all returns required of individual income tax taxpayers. Course covers the basic concepts and terminology required for working with the federal, state, and local tax regulations pertaining to individuals. The course includes practical experience in filling out all common individual tax forms and schedules.

ACC 210 Principles of Accounting I (AVT Available) 4(4-0)
This course is the first term in the one-year introduction to accounting course. Topics covered include the structure of the accounting cycle, development of financial statements and understanding how accounting principles control the particulars of assets, liabilities, equities, expenses, and revenues.

ACC 211 Principles of Accounting II (AVT Available) 4(4-0)
Prerequisite: GPA of 2.0 in ACC 210. This course is the middle term in the one-year introduction to accounting course. Topics covered include internal control, cash, payroll, partnerships, corporations, and long-term liabilities.

ACC 212 Principles of Accounting III 4(4-0)
Prerequisite: ACC 211. This course is the third term in the one-year introduction to accounting course. Topics covered include manufacturing costs, standard costs, break-even analysis, fixed and variable costs, short-term decision making, capital budgeting, cash flow analysis, and financial statement ratios.

ACC 220 Intermediate Accounting I 4(4-0)
Prerequisite: ACC 212. This course provides instruction in the balance sheet; income and retained earnings statements; in-depth review of the accounting cycle and theory; cash and temporary investments; receivables; current liabilities, and present value of assets.

ACC 221 Intermediate Accounting II 4(4-0)
Prerequisite: GPA of 2.0 in ACC 220. Topics to be covered in this course include inventory, operational assets, and stockholder's equity.

ACC 222 Intermediate Accounting III 4(4-0)
Prerequisite: ACC 221. This course is a continuation of ACC 221. Topics to be studied include long-term liabilities, long-term investments, leases, pensions, sources and applications of funds, and financial statement analysis.

ACC 230 Cost Accounting I 4(4-0)
Prerequisite: ACC 212. This course will provide an explanation of the cost accountant's role in a business organization. It will stress the objectives of planning and controlling routine operations, decision making, inventory valuation, and income determination. Other topics to be covered include defining costs, cost/volume/profit analysis, job order costing, process costing, standard costing and variance analysis, budgeting, and the use of accounting information for motivation and control.

ACC 231 Cost Accounting II 4(4-0)
Prerequisite: ACC 230. This course emphasizes long-range planning, goal setting, and non-routine decision making. Topics to be included are cost allocation, capital budgeting, inventory planning, internal control, decentralization and transfer pricing for performance measurement and motivation, decision models, and determination of sales and production mix.

ACC 240 Federal Taxes I 4(4-0)
Prerequisite: ACC 212. This course covers aspects of the federal income tax for individuals. Topics include gross income, adjustments from gross income, itemized deductions, tax credits, and other related topics.

ACC 241 Federal Taxes II 4(4-0)
Prerequisite: ACC 240. This course is an in-depth study of federal tax laws relating to business and professional organizations. Special topics include partnerships, subchapter S corporations, corporate liquidations, and dividend distributions.

ACC 245 Accounting Internship 3(3-0)
Prerequisite: Program Area approval. Approval for an Accounting internship is based on the successful completion of basic Accounting courses. Placement in an approved training station to earn credits for satisfactory work performance, and earn wages for hours of work. Occupational interests are considered with background or related classes to determine employment arrangements.

ACC 250 Advanced Accounting 4(4-0)
Prerequisite: ACC 222 or Program Area approval. Areas of emphasis to be included in this course are partnerships, governmental accounting, business combinations as a "pooling of interests" vs. a purchase, and preparation of consolidated statements.

ACC 260 Microcomputer Accounting Systems 4(4-0)
Prerequisite: ACC 211. Designed to prepare students to deal with problems and issues related to computer-based accounting information systems. Students will do bookkeeping and solve accounting problems using microcomputers. Previous familiarity with computers is not necessary.

ACC 261 Accounting with Lotus/DBase 4(4-0)
Prerequisite: ACC 212. This course is designed to teach the use of microcomputers as tools in solving accounting problems. Lotus 123 and dBase III will be the primary software taught. The IBM PC Network will be used for networking and with dBase III. In addition, a variety of other microcomputer software and hardware will be demonstrated. Familiarity with computers is not necessary but students are expected to be knowledgeable of the accounting topics taught in Principles III.

ACC 271 Principles of Finance 4(4-0)
Prerequisite: ACC 212. This course emphasizes the short- and long-term decisions a financial manager can be expected to face. Topics to be included are working capital management, risk, cost of capital, capital markets, long-term debt, stocks and dividend policy, as these topics relate to obtaining financing for a business.

ACC 275 Financial Decision Simulation Game 4(4-0)
Prerequisite: ACC 212. This course is a game in which participants make decisions which affect their simulated company. The instructor takes care of all computer involvement so the student needs no computer background. Lectures cover various financial topics, particularly those which help the student manage the finances of his imaginary company.

ACC 280 Governmental Accounting 4(4-0)
Prerequisite: ACC 212 or Program Area approval. This course covers principles of fund accounting, provides a discussion of the characteristics of the government function as distinguished from commerce and industry, and analyzes the differences in records, accounting and reports required because of these differences. The essentials of fund accounting, appropriations, allotments, allocations, and budgetary controls are other topics to be covered.

ACC 281 Governmental Budgeting and Institutional Accounting 4(4-0)
Prerequisite: ACC 212 or Program Area approval. This course is a continuation of Governmental Accounting (ACC 280) and it offers detailed accounting procedures and accepted practices in governmental and institutional accounting. Considerable instruction and work are devoted to program budgeting and performance measurement with emphasis on recent changes and current practices in different government units.

ACC 290 Auditing 4(4-0)
Prerequisite: ACC 222 or Program Area approval. Specific topics covered in this course are professional ethics, types of audits, need for auditing, legal liability of auditors, auditing of E.D.P systems, statistical sampling, audit working papers, financial statements and the attest function in audit reports.

C.P.A. Review Courses
Four C.P.A. review courses are offered beginning the end of August each year. These courses are designed to prepare candidates for the Uniform Certified Public Accounting Examination. Past candidates who participated in the LCC review courses have earned a passing percentage significantly higher than that earned by all candidates in Michigan.

Each section is taught with the specific intent of providing a background of information needed for the examination. Typical examination questions and problems are covered using current material. The single goal is to assist each applicant in efforts to meet the standards required by the C.P.A. Examination.

**Computer Applications for Business (CAB)**

**Division of Business**

**CAB 102 Using Personal Computers**

A first course in computers that surveys the concept and uses of software applications such as word processors, spreadsheets, and database managers through hands-on use. Terminology, problem-solving, and acquisition factors associated with personal computers also discussed. Pass/No Pass grading system is used.

**CAB 111 WordStar**

Beginner-level training for the popular, screen-oriented word processing program. Provides hands-on experience on how to perform most word processing commands.

**CAB 113 Multimate**

Beginner-level training on use of this Wang(R)-like word processing program. Provides hands-on experience on how to perform most word processing commands.

**CAB 114 WordPerfect**

Beginner-level training on use of one of the most versatile word processing programs. Provides hands-on experience on how to perform most word processing commands.

**CAB 115 DisplayWrite**

Beginner-level training on use of the microcomputer-based DisplayWrite 4 (R). Provides hands-on experience on how to perform most word processing commands.

**CAB 121 Lotus 1-2-3 Self Teaching**

An introduction to using the Lotus 1-2-3 spreadsheet, graphics, and database program. A self-teaching course providing hands-on experience to create and refine spreadsheets, produce graphs and reports, and search and sort databases. Uses the Arthur Young self-teaching video course. Pass/No Pass grading system used.

**CAB 123 Lotus 1-2-3**

Create worksheets and data bases, manipulate and generate reports, tables, and graphs. File handling, disk management, MACROS included. Beginner-level training.

**CAB 124 Advanced Lotus 1-2-3**

Prerequisite: CAB 123 or ACC 261. An extension of CAB 123. Provides reinforcement of Lotus 1-2-3 basic skills, plus expanded discussion and application in topic areas of Macros and data base.

**CAB 130 Using dBase III Plus for Non-Majors**

Teaches using dBase III plus interactively, create database files, enter and edit data, display records, choose and sort on various fields, search for specific records, prepare reports and use related files.

**CAB 133 dBase III**

Create database structure, enter database, display data on screen, sort data on various factors, prepare reports, add to and edit database. Includes a review of programming principles and explanations of file creation and indexing, screen I/O, file processing, reports, and menus.

**CAB 135 Rbase 5000: Database Processing on Micors**

This course used Rbase 5000 as a tool to develop and implement a database application program. Students learn both how to use Rbase 5000 and practice the process of effective data base design.

**CAB 136 4th Generation Language-SQL**

This course covers the relational database language SQL. Topics include table definition, queries, special operators, the join operation, views, security, administration, and reports.

**CAB 171 Symphony**

An introduction to an all-in-one software system. Hands-on training for its spreadsheet, business graphics, data base manager, and word processor. Communications is discussed. Knowledge of Lotus 1-2-3(R) is not assumed.

**CAB 181 Desktop Publishing**

This course is designed for those who want to put desktop publishing to use. It provides an overview of the types of hardware and software available for this application. The course develops competency in use of Aldus PageMaker: a full-featured microcomputer desktop software program.

**CAB 311 Educational Computer Applications I**

Overview of educational computer potential with an emphasis on K-12 applications. Topics include introduction to BASIC, Logo interaction, software evaluation and review, and exposure to media in computer education. Graded on a P/F basis only.

**Computer Applications Systems (CAS)**

**Accounting and Computer Academic Programs**

**Division of Business**

**CAS 100 Introduction to Data Processing**

Concepts of data processing: what a computer is, how it functions, and its influence on all facets of society.

**CAS 104 Personal Computing**

Teaches the fundamentals of effective microcomputer use, including computer concepts and equipment, with heaviest emphasis on microcomputer software applications. Hands-on activity. This course differs from CAB 102 in providing greater depth and broader coverage of business applications. It requires greater commitment from students than CAB 102.

**CAS 111 Forms Design and Control**

Initial phase of recognizing that a form is needed through utilization of the form. Includes layout of items by importance, design of margins and print spacing, grades of paper, reproduction and binding, and forms processing by users.

**CAS 121 Data Processing Math and Logic**

Prerequisite: MTH 012 or equivalent. Designed to be taken concurrently with CAS 151. Introduces basic logical forms. Includes flowcharting, set theory, truth tables, Warner diagrams, and non-decimal number systems.

**CAS 134 Documentation**

Prerequisite: CAS 121 and CAS 151. Fundamental documentation tools in use on both the systems and programming level.

**CAS 137 Introduction to Operations**

Prerequisite: CAS 100. Function and responsibilities of the computer operator; includes machine maintenance, console response, and malfunction recovery.

**CAS 141 Home Computer BASIC**

A brief programming course for the computer hobbyist or anyone interested in a rudimentary introduction to microcomputer programming. Write and debug simple programs in the BASIC language. Pass/No Pass grading system is used.

**CAS 151 Business BASIC I**

Prerequisite: MTH 012 or equivalent. Designed to be taken concurrently with CAS 121. A beginning course in computer programming for CAS majors and others wanting an intensive introduction to problem-solving techniques using the BASIC programming language.

**CAS 152 Business BASIC II**

Prerequisite: CAS 121 and CAS 151. Intermediate BASIC language. Special considerations for use on microcomputers. Includes sequential and random access files, interactive programming techniques, simulation programming and system development.

**CAS 153 Business BASIC III**

Prerequisite: CAS 152. Advanced BASIC language, writing a system of business application programs for a microcomputer. Disk file usage and data structures.

**CAS 161 Beginning RPGII**

Prerequisite: CAS 121 and CAS 151. Understanding RPGII and how to program with it. Includes problem definitions, card procedures, control levels, and multiple-record files.
A systems analysis life cycle is used to present detailed techniques of systems analysis and high level concepts of systems design. Verbal and written communication skills are needed by an analyst and will be stressed by a class project and other class activities.

**CAS 262 Systems Design and Implementation**
Pre requisite: CAS 261. This course continues the design concepts presented in CAS 261 by presenting design techniques at a detailed level. The course assumes a background of COBOL I (CAS 171) and CAS 261. Phase three (detailed design and implementation) of a five phase systems life cycle is emphasized. Phases four and five (installation and review) are summarized. Verbal and written communications will continue to be emphasized.

**CAS 263 Business Systems Design**
Pre requisite: CAS 172 and CAS 262. This course relies on the concepts and techniques learned in CAS 161 and CAS 262 to complete a simulated business application project. Techniques of project management are emphasized and applied to a student project team. The project team will complete the steps in the systems development life cycle in completing the course project. Continued emphasis will be placed on oral and written communications.

**CAS 275 Microcomputer Project**
Pre requisite: Program Area approval. Design, document, code, debug and implement microcomputer software system project. Must have successfully completed CAS 152 or CAS 221.

**CAS 276 Microcomputer Project Extension**
Pre requisite: Program Area approval. Extension of CAS 275 when the microcomputer project is more ambitious.

**CAS 281 Operations Internship I**
Pre requisite: Program Area approval. The first of a two-term internship designed exclusively for the Computer Operator Certificate of Achievement (curriculum installation).

**CAS 282 Operations Internship II**
Pre requisite: Program Area approval. Additional experience through 100 more hours of on-the-job experience at a different data processing site.

**CAS 291 Programming Internship**
Pre requisite: Program Area approval. For students who have completed all of the programming language requirements of the applications programmer degree. Two hundred hours of on-the-job programming experience.

**CAS 850 CDP—Mock Exam**
Overview of five topics covered in CDP (Certified Data Processor) exam: software, hardware, systems, management, and quantitative methods. Pass/No Pass grading system is used.

**CAS 851 CDP—Software**
Review session for CDP (Certified Data Processor) exam. Includes principles of programming, meta programming systems, and programming languages. Pass/No Pass grading system is used.

**CAS 852 CDP—Hardware**
Review session for CDP (Certified Data Processor) exam. Includes evolution of computers, computer components and functions, internal processing, and peripherals. Pass/No Pass grading system is used.

**CAS 853 CDP—Systems**
Review session for CDP (Certified Data Processor) exam. Includes project responsibility, data processing systems analysis, data processing systems design and implementation, and planning and controls. Pass/No Pass grading system is used.

**CAS 854 CDP—Management**
Review session for CDP (Certified Data Processor) exam. Includes principles of management and principles of data processing management. Pass/No Pass grading system is used.

**CAS 855 CDP—Quantitative Methods**
Review session for CDP (Certified Data Processor) exam. Includes study of the basic accounting process, cost accounting, computer auditing and control, mathematics and statistics. Pass/No Pass grading system is used.
Certified Financial Planner (CFP)
Accounting and Computer Academic Programs
Division of Business

CFP 201 Introduction to Financial Planning 3(3-0)
Prerequisite: Program Area approval. Designed to give an overview of the financial planning process and outline the six stages of the process: gathering data, analyzing information, formulating a comprehensive plan, monitoring and implementing the plan. As a further foundation for the financial planning process, includes a study of communications skills, the economic environment, and time value of money concepts. In addition, a basic preview of the subjects covered in the subsequent parts of the program.

CFP 202 Risk Management 3(3-0)
Prerequisite: Program Area approval. Covers the principles of risk management, how to identify a client's risk exposures, and how to select appropriate risk management techniques for clients. Includes the various forms of insurance, the characteristics of insurance programs and policies, and the public and private sector insurance benefits.

CFP 203 Investments 3(3-0)
Prerequisite: Program Area approval. Acquaints the student with a wide variety of investment vehicles, the environmental influences affecting investment vehicles, and the fundamentals of investing, including financial markets, sources of investment risks, tax considerations, and securities regulation.

CFP 204 Tax Planning and Management 3(3-0)
Prerequisite: Program Area approval. Provides the student with an understanding of the fundamental principles of individual income tax management. The student will learn about the potential income tax implications resulting from the selection of a particular form of business, intrafamily transfer method, and tax-preference investment. Students will also be introduced to various types of charitable contributions and the effect they have on a client's income taxes, tax planning alternatives, and tax traps.

CFP 205 Employee Benefits and Retirement Planning 3(3-0)
Prerequisite: Program Area approval. Designed to familiarize students with various pension and employer-sponsored retirement plans, examines IRAs, tax-sheltered arrangement (TSA's), and qualified retirement plans including group life and medical insurance, medical reimbursement plans, and self-insured health and welfare plans.

CFP 206 Estate Planning 3(3-0)
Prerequisite: Program Area approval. Acquaints students with the various components of the estate planning process. It will teach students about the fundamentals of federal estate and federal gift taxation, various estate planning techniques, including succession and valuation techniques, deeds, forms of ownership, charitable transfers, and postmortem planning techniques.

Insurance (INS)
Accounting and Computer Academic Programs
Division of Business

INS 255 Principles of Risk and Insurance 4(4-0)
This course presents the fundamental principles involved within the business environment for handling risk, with emphasis on those indicating insurance solutions. It covers property, casualty, life, accident and health insurance.

CRIMINAL JUSTICE AND LAW SYSTEMS
Program Director: Jane P. White
C. F. Yegge Center for Criminal Justice and Law
224 Old Central Building

In recognition of his substantial contribution in founding the Law Enforcement program and establishing the Mid-Michigan Police Academy at Lansing Community College, the Center was named in 1981 for Charles F. Yegge, Chief of Police, educator and leader in professionalism of law enforcement throughout Michigan.

Criminal justice education can be defined as an interdisciplinary study of the structure, functions, decision processes, and problems of various agencies that encompass the legal system. Agencies include the police, courts, and correctional organizations, security operations, or civil law system.

The Criminal Justice and Law Systems curriculum is designed to prepare students for entry into a variety of occupations such as law enforcement, corrections, juvenile work, parole and probation supervision, security operations, legal assistance, management, and administration. The curriculum is designed to provide the student with a general background concerning criminal justice or law prior to entering the specialized and practical aspects of a particular occupation.

Continuing education is offered for the practitioner in a variety of areas. The Criminal Justice and Law Center presents in-service training for departments and agencies on an ongoing basis. Specialized content can be designed for agencies.

Students desiring to enroll in courses offered by Criminal Justice and Law Systems will find the courses identified as follows:

CJ: Criminal Justice
LAW: Law

Curricular guides for each curriculum offered by Criminal Justice and Law Systems are available in the counseling offices and the Program Director's office; however, these guides may be modified to accommodate an individual student's background, goals, and abilities. The student is encouraged to discuss unique situations with an academic advisor in the Criminal Justice and Law Center.

Corrections Administration

An Associate Degree is offered in the area of Corrections Administration. A broad base of knowledge is afforded to corrections personnel as well as those anticipating entering this occupation. Many career paths are available including those of parole and probation officer, institutional corrections officer, half-way house supervisor/administrator, and various positions in juvenile correctional institutions. This is one of the fastest growing occupational fields in Michigan. (Curriculum Code 465)

Corrections Officer Certificate
The Corrections Officers Training Act of 1982 mandates that 23 term credits of specific courses must be obtained for entry into State and Local correctional officer positions. The Vocational Correctional Officers Training Certificate is issued by the Center for those who successfully achieve a 2.0 grade point in each class. (Curriculum Code 464)

Criminal Justice

Two different options are available for the student: Associate Degree or the Associate Degree for transfer to a four-year institution. These career degrees allow the student to focus on criminal justice with potential employment in a police agency. (Curriculum Code 460 and 461)

Criminal Justice—Natural Resources Officer Option
An Associate Degree for those students seeking employment in the Michigan Department of Natural Resources. Option to transfer to a four-year institution. (Curriculum Code 463)

Legal Assistant

An Associate Degree curriculum designed for those who choose a paraprofessional career assisting attorneys ranging from office management to preparing case materials. The majority of the graduates will seek employment with law firms. Opportunities also exist in banks, real estate offices, welfare offices, credit and collection agencies, insurance companies, title insurance companies, abstract offices, and government agencies. The program provides background in legal processes and procedures. Ample elective choices to attain individual goals are available. This curriculum has American Bar Association accreditation. (Curriculum Code 442)

Legal Assistant Post-Baccalaureate Certificate
A certificate for students who have already earned a Bachelor's Degree from an accredited four-year college or university. This allows the student to choose a shorter curriculum consisting of just law classes which can be completed in a minimum of nine months. This curriculum has American Bar Association accreditation. (Curriculum Code 443)

Mid-Michigan Police Academy
An Associate Degree curriculum which allows a student to apply to the Police Academy at Lansing Community College towards the end of this two-year program. Michigan Law Enforcement Officers Training Council mandates that a pre-service applicant must be eligible for a two-year Associate Degree upon completion of the Academy. A Spring and Fall Police Academy, 16 weeks long, and in excess of 40 hours per week, occurs each year. Physical and general education pre-testing as well as other selection criteria are utilized for selection and individualized by law in Michigan. Staff is comprised of training officers from Lansing and East Lansing Police Departments, Michigan State University Police Department of Public Safety, and the Ingham and Eaton County Sheriff's Department. (Curriculum Code 460)

Security Administration

An Associate Degree designed to provide graduates entry into many different occupations or to transfer to a four-year institution. Employment opportunities include business firms, bank/financial industry, wholesale/retail industry, hospital/medical facilities, institutional facilities and manufacturing compan-
COURSE DESCRIPTIONS

Criminal Justice (CJ)
Criminal Justice and Law Systems
Division of Business
(Note—former course codes are in parentheses after the descriptions)

CJ 101 Introduction to Criminal Justice (CJ 101)
Study of the process of criminal justice with emphasis on historical, constitutional and organizational systems. (LE 101)

CJ 102 Crime: Causes and Conditions (CJ 102)
Analysis of causes and control of crime, sociological and psychological theories; measurement of crime, perspectives on punishment. (LE 102)

CJ 103 Criminal Law (CJ 103)
Prerequisite: CJ 101. Study of criminal law, classification of crimes, the elements of crime and defenses against criminality. Also the application of concepts to specific offenses and how to research the law. (LE 103)

CJ 104 Basic Elements of Criminal Investigation (CJ 104)
Prerequisite: CJ 103. Fundamentals of crime scene investigation and collection and preservation of physical evidence. (LE 104)

CJ 105 Criminal Offense Investigation: Techniques and Procedures (CJ 105)
Prerequisite: CJ 104. Advanced criminal investigation dealing with specific crimes, including preparing cases for prosecution and courtroom testimony. (LE 105)

CJ 106 Juvenile Problems: Control and Prevention (CJ 106)
Legal basis for the criminal justice practitioner dealing with the juvenile offender and juvenile victim as defined by Michigan law. (LE 106)

CJ 107 Juvenile Problems: Control and Prevention Part II (CJ 107)
Prerequisite: CJ 106. Legal and procedural methods of the juvenile justice systems and agencies; specific behavioral patterns of juveniles identified. (LE 107)

CJ 113 Women and Men in Criminal Justice (CJ 113)
Prerequisite: CJ 101 or CJ 130. Explores the issues of men and women working together in the criminal justice work force; survey of self-awareness, career awareness, decision making processes. (LE 113)

CJ 130 Introduction to Corrections (CJ 130)
Introduction and analysis of agencies and processes within the criminal justice system. An examination of correctional officer behavior and correctional legislation, the courts, rehabilitation, and correctional institutions and their operation and administration. Includes overview of history, sentencing, probation and parole and community corrections. This course is part of the Correctional Officer Vocational Certificate. (COR 111)

CJ 131 Legal Issues in Corrections (CJ 131)
Prerequisite: CJ 130. Study of current constitutional, federal and state law as it pertains to penal institutions, inmates and correctional employees. Will acquaint the student with basic correctional law and inmate rights. The course will provide students with insights into policy considerations behind State and Federal law, legal process and court decisions. This course is part of the Correctional Officer Vocational Certificate. (COR 113)

CJ 133 Juveniles in Corrections (CJ 133)
Prerequisite: CJ 101 or CJ 130. Legal aspects of the juvenile court process, detention case supervision and juvenile institutions after care will be examined. Both public and private agencies will be discussed in the treatment of the juvenile offender. (COR 133)

CJ 134 Probation and Parole (CJ 134)
An introductory level course in probation and parole with strong emphasis on counseling and interviewing skills, the proper use of supervision techniques and the writing of reports such as pre-sentence reports, initial interview reports, quarterly follow-up reports, probation and parole violation reports, etc. The history and theory of probation and parole.

CJ 135 Correction Officer (CJ 135)
Designed to explain the role of a correctional officer. Covers the actual duties and responsibilities of an officer. It will help develop the essential skills in the correctional context to establish the base for a career in corrections. True depiction of the job of a correctional officer will be presented. This course is part of the Correctional Officer Vocational Certificate.

CJ 150 Introduction to Security (CJ 150)
An overview of the rapidly growing field of private security. Topics covered include development, philosophy, responsibility and functions. In addition, a perspective of the present state of private security, principles, legal authority and effect on society in general is presented. (SEC 111)

CJ 151 Legal Aspects of Private Security (CJ 151)
Presents the legal rights available to security officers, corporations, partnerships and individually owned businesses for the protection of assets from loss. Topics covered include powers of arrest, search and seizure, interrogation and interview and other laws applicable to private security officers and administrators. (SEC 113)

CJ 152 Loss Prevention (CJ 152)
Prerequisite: CJ 150. Addresses the "whip" of security as well as the problems of loss. The course adopts the concept of concealing loss control prevention is the primary effort needed. The course work will present a new perspective in looking at a persistent problem, loss of assets. (SEC 115)

CJ 201 Criminal Justice Organization and Administration (CJ 201)
Prerequisite: CJ 101. Principles of organization including setting policy and procedure, planning, budgeting and goal setting for criminal justice agencies. (LE 201)

CJ 202 Criminal Justice Management and Supervision (CJ 202)
Managerial functions including roles and responsibilities of supervisory employees in criminal justice agencies and implementing policy and procedures. (LE 207)

CJ 203 Criminal Procedure (CJ 203)
Prerequisite: CJ 201. Pre-trial procedures with emphasis on U.S. and Michigan Constitutions. Includes law of arrest, search and seizure, interrogation and confessions and rules of evidence. (LE 203)

CJ 204 Highway Traffic Administration (CJ 204)
Prerequisite: CJ 101. Study of Michigan Vehicle Code; effective traffic control procedures; elements of "selective" enforcement, parking and intersection control; procedures and policies for vehicle accident investigation; review of fatalities, causes, prevention and scope of accident investigation. (LE 204)

CJ 206 Interviewing and Interrogation (CJ 206)
Techniques and procedures utilized in successfully interviewing or interrogating; behavioral guidelines; constitutional and court decisions regulating appropriate guidelines. (LE 206)

CJ 208 Organized Criminal Activity (CJ 208)
Development and history of organized crime throughout the world. Shows evolution of crime as an economic entity in legitimate, as well as illegitimate, sources of the business world. (LE 208)

CJ 209 Patrol Procedures (CJ 209)
Study of basic patrol operation vital to police and security as a primary function; purposes, methods, types and means as well as deployment methods. (LE 209)

CJ 210 Substance Abuse in the Workplace (CJ 210)
An in-depth discussion of the substance abuse problem in the workplace. This course is designed to inform the students of the different drugs, their abuse and their effects. Also covered are topics of drug involvement and how it relates to labor relations, management/employee relations, investigative techniques and arbitration.

CJ 215 The Criminal Mind (CJ 215)
An introduction to the working of the criminal mind. Basic concepts of mental functioning will be addressed with emphasis on behavioral motivation in criminal conduct.
CJ 216 Psychology of Sex Offenders 3(3-0)
This course is designed to give students a better understanding relating to
the motivation of the sex offender's behavior and the meaning of the sexual
offender by personality and/or behavioral characteristics and to understand
the importance of team efforts regarding crime scene preservation and integrity
as well as profiling of the scene.

CJ 217 Psychology of Homicide 3(3-0)
An introduction to the student to the psychodynamics of homicide, establish
a basis for understanding the crime scene through the use of behavioral analysis.

CJ 235 Basic Firearms 4(4-0)
Prerequisite: Program Area approval and sophomore status. Provides basic
marksmanship, safety rules and regulations, range procedures, nomenclature
and function of the various types of weapons. (LE 235)

CJ 236 Basic Combat Firearms 4(4-0)
Prerequisite: Program Area approval and CJ 235. Intermediate instruction as
a transition from bull's-eye to field and combat shooting. (LE 236)

CJ 242 Unarmed Defense 4(4-0)
Correct and effective methods of disarming and applying techniques to subdue
subjects; search techniques and legal aspects of physical control. (LE 242)

CJ 243 Unarmed Defense II 4(4-0)
Prerequisite: Program Area approval or CJ 242. This course is designed to
provide the student who already has a working knowledge of the basic concepts
of police defensive tactics, with advanced training involving handcuffing,
powerful stress points and transition techniques.

CJ 245 Report Writing/Criminal Justice 2(2-0)
Prerequisite: CJ 101 or CJ 130 or CJ 150. Methods of precise writing techniques;
proper documentation of work effort, application of skills in writing exercises.

CJ 248 Physical Fitness for Criminal Justice 3(3-0)
This course is designed to assist the students in developing and enhancing
their level of health and physical fitness in order that they may successfully
complete certification and re-certification physical fitness criteria established
in law enforcement and corrections. The course includes aerobic, strength
building and stretching exercises along with nutrition information.

CJ 250 Correctional Institutions 4(4-0)
Examines the historical development of correctional institutions in the United
States, organizational structure, purpose, programs, custody and security
aspects and prisoner rights as well as the future projections of correctional institutions. This course is part of the Correctional Officer Vocational Certificate. (COR 210)

CJ 251 Correctional Clients 4(4-0)
Emphasis of this course is placed on the needs and identities and development
of the recipient of correctional services. The purpose of the course is to assist
the student in gaining insights into the development of sensitivity to the behavior
and motivations of correctional clients. Specific problems of prisoners and
intervention strategies are reviewed. This course is part of the Correctional Officer Vocational Certificate. (COR 212)

CJ 252 Community Based Corrections 4(4-0)
Designed to familiarize the student with the various agencies in the community
that are utilized in a corrections program which keep the offender in the
community and help to maintain the community ties. (COR 225)

CJ 255 Human Relations in Criminal Justice 4(4-0)
Prerequisite: CJ 101 or CJ 130. This course will emphasize the meaning and
functions of culture and discrimination. Minorities in Michigan, affirmitive
action and how attitudes are formed will be reviewed. Ethics, values and
professional responsibilities will be discussed. This course is part of the
Correctional Officer Vocational Certificate. (COR 227)

CJ 258 Aikido in Corrections 3(3-0)
A hands-on correctional defensive tactics course that is designed to assist
the students in developing skills and techniques necessary for subduing and
controlling subjects in a correctional environment.

CJ 260 Firearms/Corrections 3(3-0)
Prerequisite: Program Area approval and Corrections major. This course is
designed to assist the students in developing proficiency in the use of rifles
and shotguns in order that they may function effectively (with these weapons)
in both Corrections Academy and the correctional work environment.

CJ 270 Computers in Private Security 4(4-0)
Prerequisite: CJ 152. A practical skills development course building on the
concepts presented in CJ 152. Course will concentrate on loss control
security surveys, development, implementation and application in the field
through visitation to on-site locations.

CJ 271 Computer Fraud 4(4-0)
Prerequisite: Program Area approval. Legal, technical and investigative concepts
to aid the investigator to identify and pursue case development and prosecution
regarding computer crimes. (SEC 220)

CJ 281 Directed Independent Study 1(1-0)
Prerequisite: Program Area approval. 10 hours of course work is assigned per
credit. (LE 231)

CJ 282 Directed Independent Study 2(2-0)
Prerequisite: Program Area approval. 10 hours of course work is assigned per
credit. (LE 232)

CJ 283 Directed Independent Study 3(3-0)
Prerequisite: Program Area approval. 10 hours of course work is assigned per
credit. (LE 233)

CJ 284 Directed Independent Study 4(4-0)
Prerequisite: Program Area approval. 10 hours of course work is assigned per
credit. (LE 234)

CJ 285 Law Enforcement Internship 3(0-3)
Prerequisite: Program Area approval and sophomore status. Twelve eight-hour
shifts are scheduled with an approved police department. Required reports.
(LE 247)

CJ 286 Criminal Justice Agency Internship 8(0-8)
Prerequisite: Program Area approval and sophomore status. Working in con-
junction with a public or private human service agency, the student is assigned
for 20 hours per week. Required reports. (LE 249)

CJ 287 DNR Officer Internship 15(0-15)
Prerequisite: Program Area approval and sophomore status. Working in con-
junction with State of Michigan, Department of Natural Resources, the student
is assigned the entire term to a supervising senior conservation officer. (LE
248)

CJ 288 Corrections Internship 4(0-4)
Prerequisite: Program Area approval. Working with a corrections facility, the
student is responsible for fifteen eight-hour shifts along with report writing
requirements. (COR 231)

CJ 289 Corrections Internship 15(0-15)
Prerequisite: Program Area approval. Working with a corrections facility, the
student is responsible for an eight week, forty hours per week, assignment.
The student is also required to submit written reports. (COR 230)

Law (LAW)
Criminal Justice and Law Systems

LAW 100 Legal Rights 3(3-0)
An analysis of landlord-tenant law, debtor-creditor laws, contract relationships,
consumer credit, consumer rights, and other legal regulations affecting private
citizens.

LAW 105 Law and Social Issues 2(2-0)
A survey course designed to inform the public of its rights and responsibilities
in relation to others. Provides an overview of court decisions on contemporary
social issues and discussions regarding the foundations for these decisions.
Insight on the judicial system and the problems of insuring justice in an ever
changing social system. Topics covered include abortion and family planning,
drugs and alcoholism, conscientious objectors, discrimination, consumers' and
debtors' rights.
LAW 115 Introduction to Legal Assistant 4(4-0)
Prerequisite: Program Area approval. An introduction to the role of the legal assistant in the legal system. Includes a survey of paralegal employment and regulation, an introduction to the study of law and legal analysis, the skills of a legal assistant and application to the litigation process, and realities of law practice. Students must attend a Legal Assistant orientation session prior to starting this course, and must achieve a grade of 2.0 or higher in order to enroll in further legal assistant courses.

LAW 120 Legal Research I 4(4-0)
Prerequisite: GPA of 2.0 in LAW 215. Includes research procedures and methods, including problem analysis. It provides in-depth treatment of Federal/ or Michigan research publications: practice manuals, encyclopedias, digests, reporters, statutes, periodicals, citators, treatises, court rules, administrative publications, and others. Research assignments are given using the above-mentioned publications together with constructing citations using the Michigan Uniform Systems of Citations.

LAW 210 Litigation I (formerly Pre-Trial Procedures) 4(4-0)
Prerequisite: GPA of 2.0 in LAW 115, LAW 215. Covers an in-depth study of pre-trial considerations necessary for litigation, including jurisdiction, venue, statutes of limitation, parties, service of process, third-party practice, pleadings, discovery, and pre-trials. Practical application is used through drafting of complaints, answers, motions for accelerated judgment, motions for summary judgment, interrogatories, request for admissions, pre-trial statements, and others. Emphasis is placed on the role of the legal assistant in preparing a case for trial. It also includes witness preparation, discovery, and exhibit preparation.

LAW 211 Litigation II (formerly Trial and Appellate Procedures) 4(4-0)
Prerequisite: LAW 210. An in-depth study of trial considerations and procedures, including investigation, client and witness interviews, client preparation; evidence, including hearsay, materiality and relevancy, competency of evidence, best evidence, parol evidence, etc., right of trial by jury, selection of jury, challenges to array, voir dire examination, opening statements, presentation of evidence, arguments to jury, instructions to jury, requests to charge, dismissals, verdicts, post-trial procedures, appeals to Court of Appeals and Supreme Court. An emphasis on the role of the legal assistant in preparing for trial and appeals is made.

LAW 212 Litigation Specialties 4(4-0)
Prerequisite: GPA of 2.0 in LAW 115, LAW 215. An overview of specialty areas of law, including drafting of pleadings and related legal instruments. It includes criminal law, bankruptcy, probate, personal injury, Michigan’s no-fault automobile insurance laws, Worker’s Disability Compensation, applicable statutes, case law, and court rules.

LAW 215 Business Law I 4(4-0)
Covers fundamental principles of our law for business and non-business students, to develop understanding of our legal system (federal, state and local), its purposes and importance in society. Course content includes study of the nature and sources of law, courts and court procedure, torts, crimes, contracts, no-fault auto insurance, landlord-tenant relations, personal property and bailments. Taught in traditional classroom style or via Computer Managed Learning (CML) on self pace study.

LAW 216 Business Law II 4(4-0)
Prerequisite: LAW 215. The nature of law of sales, commercial paper, security devices, debtor-creditor rights, and insurance. Portions of the Uniform Commercial Code are explored in-depth. The UCC topics of sales, bulk sales, commercial paper, banking and secured transactions are included. Taught in traditional classroom style or via Computer Managed Learning (CML) on self pace study.

LAW 217 Business Law III 4(4-0)
Prerequisite: LAW 215 and LAW 216. Commences with agency law, the basic building block of complex business organizations. The legal aspects of sole proprietorships, partnerships and corporations are examined. Government regulation of business, real property, wills, trusts and estates are also covered. Taught in traditional classroom style or via Computer Managed Learning (CML) on self pace study.

LAW 221 Real Estate Transactions 4(4-0)
Prerequisite: GPA of 2.0 in LAW 115, LAW 215. An in-depth treatment of real property and common types of real estate transactions and conveyances. Included are pro rata's, closing statements, closings, examination of title insurance, abstracts and title opinions, legal descriptions, title searches, recording systems, landlord/tenant problems, summary proceedings, and drafting legal documents.

LAW 222 Probate 4(4-0)
Prerequisite: GPA of 2.0 in LAW 115, LAW 215. Reviews practical problems in probating estates, including all procedures involved in the commencement of probate through closing of the estate. It includes independent probate, supervised administration, and small estates.

LAW 223 Domestic Relations 4(4-0)
Prerequisite: LAW 115 and LAW 215. Covers the topics of divorce, separate maintenance, annulments, and paternity proceedings. Included also are custody, support, alimony, property, visitation, injunctions, modifications, enforcement, judgments, mediation, tax, and role of the Friend of the Court; applicable statutes, case law, and Court rules. Stresses the role of the legal assistant in domestic relations matters.

LAW 224 Administrative Law 4(4-0)
Prerequisite: GPA of 2.0 in LAW 115, LAW 215. A study of government agencies and their relationships with private activities and citizens affected thereby. Covers rulemaking, adjudication, licensing, and informal action.

LAW 225 Legal Research and Writing II 4(4-0)
Prerequisite: LAW 120 and LAW 121. Reviews principles of legal research and writing, analysis of facts, problems, and legal issues; citations; extensive research assignments in Federal and Michigan publications; drafting legal memoranda, opinion letters, and Appellate Brief. Some classes will be held at off-campus libraries.

LAW 226 Legal Interviewing and Investigation 2(2-0)
Prerequisite: LAW 115. Interviewing and investigation methods including information gathering, analysis and report preparation. Emphasis will be given to the role of the legal assistant in the interviewing and investigation process; numerous class exercise utilizing methods and information will be given.

LAW 227 Bankruptcy and Collections 2(2-0)
Prerequisite: LAW 115 and LAW 215. An in-depth study of Federal bankruptcy law and procedure; including the different bankruptcy chapters, exemptions (State and Federal), dischargeable debts, preferences, the role of the trustee and preparation of petitions and schedules in bankruptcy. The course will also cover debt collection law and procedure. Emphasis will be given to the role of the legal assistant in collection information; client interviews and document preparation.

LAW 266 Independent Study/Law 1(1-0)
Prerequisite: Program Area approval. This special course is available only with program area approval for special projects in law which are not available through regular courses. Requires 20 to 30 hours of independent study. Writing required.

LAW 267 Independent Study/Law 2(2-0)
Prerequisite: Program Area approval. This special course is available only with program area approval for special projects in law which are not available through regular courses. Requires 40 to 50 hours of independent study. Writing required.

LAW 268 Independent Study/Law 3(3-0)
Prerequisite: Program Area approval. This special course is available only with program area approval for special projects in law which are not available through regular courses. Requires 60 or more hours of independent study. Writing required.

LAW 280 Legal Assistant Internship 3(3-0)
Prerequisite: Program Area approval and successful completion of specified courses. Actual on-the-job exposure to the legal assistant career through working in a law office or other legal setting. Work includes actual paralegal tasks. Requires at least 110 hours working at the placement, weekly reports and periodic meetings. Performance is evaluated by supervisor.
HOSPITALITY SYSTEMS

Program Director: Lawrence R. Mackey
102 Old Central Building

The public hospitality industry ranks first among the service industries in its number of employment opportunities. Opportunities for qualified persons are available worldwide. Specially trained supervisory personnel for positions in hotels, motels, and food service establishments are in demand and employers in the industry are showing a preference for college-trained personnel. Business authorities are predicting an accelerated growth in the hospitality industry in the latter 1980's and the 1990's.

The programs offered within Hospitality Systems are designed to prepare the student for a career in hotel-management, food service management, tourism and travel agency operations, and culinary arts. The student receives a balanced program of academic studies and laboratory experience while being trained for one of these careers.

Hospitality students have access to hotels, motels, food service operations, retirement homes, hospitals, clubs, and airline catering companies where they will receive training in the following career-related positions:

- Hotel-motel manager
- Assistant manager trainee
- Front office manager
- Catering manager
- Assistant auditor
- Sales representative
- Reservation manager
- Entertainment director
- Food service manager
- Assistant manager/trainee
- Travel agent
- Airline reservationist

Hotel-motel managers are responsible for the day-to-day operations of a hotel or motel. They are responsible for the supervision of all departments and staff, and for ensuring that the hotel or motel operates efficiently and profitably.

Assistant managers trainees are responsible for assisting managers in the operation of various departments within a hotel or motel. They may be responsible for supervising housekeeping, front desk, food and beverage, or engineering departments.

Front office managers are responsible for the supervision of the front desk and related areas, such as concierge and parking. They ensure that guests are welcomed and accommodated in a professional manner.

Catering managers are responsible for the supervision of the catering department, which includes food and beverage services for special events, banquets, and meetings.

Assistant auditors are responsible for verifying the accuracy of accounting records and ensuring that financial transactions are recorded accurately.

Sales representatives are responsible for generating revenue by promoting and selling hotel services to potential customers.

Reservation managers are responsible for coordinating reservations for hotel rooms, meeting space, and other services.

Entertainment directors are responsible for planning and coordinating entertainment events, such as concerts, shows, and other attractions.

Food service managers are responsible for the supervision of food and beverage operations, including food preparation, service, and cleanliness.

Assistant managers/trainees receive training in various aspects of food service management, such as menu planning, cost control, and customer service.

Travel agents are responsible for planning and booking travel arrangements for guests, including flights, accommodations, and other services.

Airline reservationists are responsible for coordinating and managing airline reservations, as well as providing customer service.

Hospitality Systems offers a two-year (90 credits) Associate Degree with a choice of three curricula in hotel-motel and food service management. It also offers an Associate Degree (90 credits) in a registered chef apprenticeship program sponsored by the U.S. Department of Labor and the American Culinary Federation. Certified Hotel Administrator (CHA) courses are also available, sponsored by the American Hotel-Motel Association. In addition, the Hospitality Systems area offers an Associate Degree (90 credits) in travel and tourism.

Hotel-Motel Food Service Management

These curricula are designed to prepare students for mid-management level positions as supervisory personnel in hotels, motels, restaurants, and other hospitality institutions. (Curriculum Codes 455 through 459)

Tourism and Travel Agency Operations

This Associate Degree curriculum is designed to prepare students for careers in the airline, travel, and tourism industry. Abundant employment opportunities are available within the travel industry, both domestic and overseas, serving both pleasure and business purposes. Training includes an integration of all types of human travel, functions of travel agents, types of transportation accommodations, and familiarization with materials used in the travel industry. Destinations, weather, climate, physical characteristics, and major tourist attractions, as well as compiling of charters and tours with the appropriate and successful technologies are discussed. (Curriculum Code 484)

Community Service

Whatever the need, Hospitality Systems is prepared to offer special classes, seminars, and in-service training programs designed to prepare the student for employment, for up-grading, or to update employed persons. These special classes may be held at the College or off-campus according to the needs of the client. Instructors and coordinators of special classes include College staff, business people, and employers with expertise and qualification in the industry.

Special curricula include: airline, tourism, travel, hostess and waitess training, a learn-to-cook program, inkeeping law, the internship program, preparation of party foods, executive housekeeping, ice carving and baking.

COURSE DESCRIPTIONS

Hotel-Motel and Food Service (HMF)
Hospitality Systems
Division of Business

HMF 101 Introduction to Hospitality and Food Service Operations
(4-0)
Introduction to the hotel-motel-food service industry explaining the individual roles of the various departments in food service and lodging operations.

HMF 102 Communications
(4-0)
This certification course is concerned with the study of communication principles, especially as they relate to the hospitality industry.

HMF 103 Training and Coaching Techniques
(4-0)
The purpose of the course is to help the student develop supervisory skills needed to train employees; devise economical and efficient work methods; improve day to day performance for subordinates through sound coaching techniques, and assist in setting realistic job performance standards.

HMF 104 Dining Room Service
(3-0)
Increase guest satisfaction and repeat business. Offers in-depth detail for managing every area of food service operations, i.e., dining room, coffee shop, cafeteria, club, and banquet facilities.

HMF 131 Food Production I
(5-0)
The objective of this course is to enable the student to achieve a comprehensive educational foundation in food production management. This course will provide the student with academic theory through class discussions and lectures in addition to practical laboratory experiences emphasizing food preparation, equipment operation, and managerial procedures.

HMF 132 Food Production II
Prerequisite: HMF 131. Students entering this course should have acquired a fundamental working knowledge of terminology and procedure basic to all areas of the food service industry. This course is designed to strengthen the student's knowledge in food service management. Emphasis will be placed on the needs of the potential managerial personnel as well as established hospitality industry employees in formulating the structure for sound business management in the hospitality field. Both laboratory and lecture materials are oriented toward management of quantity food service operations and special events.

HMF 133 Food Production III
Prerequisite: HMF 132. Food production as applied to quantity food service operations. A study of standards with emphasis on managerial methods and concepts. This course will include basic as well as technical terminology along with an in-depth look at food production work methods and food presentation. This is a laboratory experience.

HMF 134 Nutrition
(2-0)
This course is a study of basic nutrition, RDA's, energy balance, weight control, diets and dietary guidelines, food processing, natural and organic foods, fast and fast foods.

HMF 135 Quantity Food Purchasing
(5-0)
This course is the study of standards in quality and quantity of food, beverages, china, glass, silver, linen, furnishings, and supplies. Also it will cover the writing of specifications and establishing procurement policies. The menu planning and design phase of the course includes the selection of menu items.

HMF 137 Food Service Catering
(4-0)
This course is designed to acquaint the student with social catering. The student will learn how to begin a catering business. Emphasis is on how to buy, prepare menus, costing and pricing techniques, equipment requirements and equipment maintenance, on/off premise functions, sanitation practices and contractual agreements. A field project will be required.

HMF 142 Meat Cutting I
(5-0)
The student will learn the retail cuts of beef and pork and will prepare, process, cut and merchandise each of the cuts for service. The student will learn the basic equipment needed in meat cutting.

HMF 143 Meat Cutting II
(5-0)
Identifying and cutting wholesale and institutional cuts of pork, beef, lamb, poultry, and fish; preparation and merchandising techniques; cutting tests; yield and loss percentages; differences between retail and wholesale cuts. A laboratory class.
HMF 144 Meat Cutting III  
5(5-0)  
The student will cut wholesale cuts of meat identifying them to the class.  
The student will direct the process of the wholesale cut assigned to them  
and process and prepare it for freezing, learning the best methods and storage  
time of each and what is the best cut and grade of beef for home, retail,  
and restaurant use. The student will learn the preparation of various types  
of sausage, as well as clean, fillet, and prepare fresh fish for cooking and  
storage. A laboratory class.

HMF 170 Menu Design and Layout  
3(3-0)  
This course includes the basics in menu planning, analysis and pricing. Menu  
layout and design fundamentals are covered; and the integration of the menu  
into the operational aspects of purchasing, production, and service is explored.  
Project required.

HMF 190 Internship and Seminar  
4(4-0)  
Prerequisite: Each student must complete 400 hours of work experience in  
the hospitality industry before the Associate Degree is awarded. Offered  
to students who have successfully completed basic courses. Allows for the  
student to be placed in an approved training facility, to earn credits for  
satisfactory work performance and earn wages for hours worked.

HMF 191 Independent Study-HMF  
1(1-0)  
HMF 192 Independent Study-HMF  
2(2-0)  
HMF 193 Independent Study-HMF  
3(3-0)  
HMF 194 Independent Study-HMF  
4(4-0)  
Prerequisite: Program Area approval. Explore a topic or problem of interest  
through readings, research, etc.; at least ten hours work per credit.

HMF 195 Culinary Art Practicum  
1(1-0)  
HMF 196 Culinary Art Practicum  
1(1-0)  
HMF 197 Culinary Art Practicum  
1(1-0)  
HMF 198 Culinary Art Practicum  
2(2-0)  
HMF 199 Culinary Art Practicum  
2(2-0)  
Prerequisite: Curriculum 457 required. On-the-job apprenticeship training  
under the supervision of a qualified chef. Practicum conducted by a staff  
member of Lansing Community College; supervised by an appointed member  
of the Capital Professional Chefs’ Association of Greater Lansing.

HMF 200 Food Service Externship  
8(8-0)  
Prerequisite: Second year students and Program Area approval. This program  
is designed to offer the student an out of the classroom and on the job  
work experience. The food program coordinator will assist you in seeking a  
place of employment. The employer agrees to hire and train you on the job.  
The employer will also agree to cross-train you in several positions. You will  
be expected to write three papers during the work experience, sharing what  
you have learned. Field experience.

HMF 201 Hotel-Restaurant Merchandising  
4(4-0)  
Sales promotion and methods used to obtain public recognition. Presents a  
practical understanding of the operating statement and precisely where, how  
and why the sales effort fits into the total earning and profit picture of a hospitality  
operation. Emphasis is on producing business at a profit. It teaches how to  
measure and gauge accurately the precise worth of every type of business  
in advance.

HMF 203 Hotel-Restaurant Law  
4(4-0)  
Creates an awareness of the responsibilities and rights which the law imposes  
upon and grants to the innkeeper; recognition of potential legal problems, to  
minimize legal action against the property.

HMF 204 Human Relations/Supervisory Development  
4(4-0)  
A course covering the role of management in the hospitality industry; specific  
emphasis on the supervisor’s role as a leader, recruiter, trainer, and a personnel  
manager.

HMF 205 Hotel-Restaurant Management  
4(4-0)  
Subjects and problems of hospitality management: general concepts, personel  
guests, and technical problems of operations. For management in the hospitality  
industry or second year HMF students.

HMF 206 Front Office Procedures  
4(4-0)  
Organization, control, and operation of the front office in the reservation and  
sale of rooms, and service. Keeping of accurate accounts, presenting bills  
and receipts of payment.

HMF 207 Financial Control and Management I  
4(4-0)  
A systematic, integrated study of hotel-motel, and food institutional activities.  
Principles, problems, and practices related to financial management will be  
presented in a balanced manner with regard to their relative importance in  
the hospitality industry. Such topics as the nature of financial statements,  
front office procedures, and the interpretation of accounts and statements  
unique to the hospitality industry will be included in the course of study.

HMF 208 Financial Control and Management II  
4(4-0)  
Prerequisite: HMF 207. Expands the student’s accounting knowledge and  
develops more comprehensive knowledge and skill in accounting practices  
and procedures for the restaurant and hotel manager. A project is required  
for a final grade.

HMF 211 Business Franchising  
4(4-0)  
An overview of the franchising of businesses and the forces affecting it. Attention  
given to the nature, scope, and history, along with the advantages and  
disadvantages to both the franchiser and franchisee. Other topics covered  
include starting and developing a franchise, recruiting, franchisee finances,  
training, location and the relations between franchisee and franchisor.

HMF 212 Liability and Loss Prevention  
3(3-0)  
This course includes organization for a security program, protection of the  
physical facilities, guest protection, emergencies, and internal and departmental  
security measures.

HMF 213 Energy Management and Control  
4(4-0)  
Although some course material is geared toward types of energy sources and  
technical terms, it is presented as a management oriented class.

HMF 214 Supervisory Housekeeping  
4(4-0)  
Provides an overview of the fundamentals of housekeeping management. This  
course describes the management functions, tools, and practices required in  
today's lodging and institutional housekeeping departments.

HMF 215 Hotel-Restaurant Marketing  
4(4-0)  
As the hospitality industry expands, competition becomes keen and today's  
guests come to expect a greater value and specific services. The hospitality  
industry is, therefore, becoming more specialized and sophisticated. Strategic  
market planning plays a crucial role in a means of surpassing the competition  
and of meeting today's guests needs.

HMF 216 Maintenance and Engineering  
4(4-0)  
To provide essential technical information in electronics, air conditioning,  
plumbing, heating, electricity, acoustics, and to establish preventative main-  
tenance routine and to make necessary decisions.

HMF 223 Club Management and Service  
4(4-0)  
This course is an application of decision-making techniques utilizing concepts  
of finance, marketing, labor relations, management, and law in management  
of public and private clubs.

HMF 229 Convention Management and Services  
4(4-0)  
Convention management is an integral part of today's hospitality industry. This  
course provides insight into convention marketing, salesmanship, detail, exe-  
cution, communication, and management. A comprehensive study of methods  
and techniques for better service.

HMF 230 Math for Food Service Managers  
4(4-0)  
A course designed to reinforce the students' understanding and use of the  
fundamentals of mathematics, specifically oriented to food service manage-  
ment. The course will cover subjects such as addition, subtraction, multiplication,  
division, fractions, percents, recipe and measurement equivalents, and the  
basics of mathematics in food service operations.

HMF 231 Resort Management  
4(4-0)  
This course offers various approaches to the operation of resort properties.  
Beginning with historical development, details are presented in planning,  
development, financial investment management, and marketing that deal with  
the unique nature of the resort business. This course also examines the future  
and the impact of the condominium concept, time sharing, technological changes  
and the increased cost of energy and transportation.
HMF 232 Food and Labor Cost Control 3(3-0)
This course covers the essential principles and procedures to control food, beverage, and labor costs. Sales, income, and resources within the food service industry are also analyzed.

HMF 233 Food Service Sanitation 3(3-0)
This course is certified by the State of Michigan and NSF in food sanitation procedures. The class is designed to enlighten the food service manager in such areas as: cleanliness, construction of equipment and facilities, safe food handling procedures and several other aspects concerning kitchen sanitation.

HMF 251 Wine Appreciation 2(2-0)
The student will be familiarized with the five basic types of wine: red, white, rose, sparkling, and fortified. The student will be exposed to a short history of wine and how it was marketed. A mastery of the presentation and serving of wines; and judging for appearance, bouquet, and taste. The class will learn how to choose and store wines for restaurant or retail use, and gain a knowledge of wine and food and how they are related.

HMF 252 Wines of America 2(2-0)
A survey of the wine growing areas of the United States with emphasis on the varietal selections of California, New York, Michigan and Ohio. A study of wine making, comparative tastings and field trips are used to acquaint the student with the wine industry in America.

HMF 253 Wines of France 2(2-0)
Prerequisite: HMF 251 or HMF 252. An in-depth survey of the major winegrowing regions of France. Particular emphasis will be given to the geographical and viticultural tradition which produce the distinct wines that have given France its world famous reputation for fine table and sparkling wines.

HMF 254 Mixology 5(5-0)
This course provides the student with a mastery of over 150 mixed beverages. It teaches the combination of the arts of efficient mixology and hospitality with control that distinguishes the "Mixologist" from the ordinary bartender. Mixology emphasizes speed incorporating accuracy.

HMF 260 Gourmet Basic Cookery 3(3-0)
This course is designed to teach the beginning cook correct techniques in pre-planning, preparation, service and cleanup involved in a meal. The student will become familiar with shopping lists, menus, recipes, cooking measuring units, and basic nutritional information. Student preparation.

HMF 261 Italian Cookery 3(3-0)
This course covers basic cookery techniques within regional areas of Italy. Local talent and community Italian experts contribute to the culinary fare. Student preparation (formerly HMF 291).

HMF 262 Gourmet Foreign Cookery 3(3-0)
This course covers basic cookery using foreign foods from around the world, prepared and tasted by the student. Wine and cheese samplings are also a part of this course. Student preparation.

HMF 263 Gourmet American Cookery 3(3-0)
This course is designed for the working person and explores four great cuisines: Regional American, French, Italian and German. The course will include planning, preparing, costing, serving and eating of ten gourmet meals. This will also include garnishes, soups, sauces, entrees, vegetables, and desserts. The proper use of cutlery, kitchen aids, pots and pans will be explored. Special attention will be provided for budgeted low-cost preparation of restaurant gourmet entrees. Student preparation.

HMF 264 Gourmet Barbecue Cookery 3(3-0)
This Spring and Summer oriented course explores innovative techniques of preparing food outside. Meat, vegetables, hors d'oeuvres, salads, and desserts are prepared throughout the term. Student preparation.

HMF 266 Chinese Cookery 3(3-0)
Chinese cooking is noted for its diversity of taste, texture, and aroma. Chinese dishes will be prepared, for example: sweet and sour pork, chicken almondine, and egg rolls; which will accentuate these characteristics through the use of techniques such as sauteing and "red" cooking. Student preparation.

HMF 267 Advanced Chinese Cookery 3(3-0)
Prerequisite: HMF 266. Student preparation of some of the more elegant Chinese dishes and use of the traditional Chinese spices and ingredients. Student preparation.

HMF 268 Vegetarian Cookery 3(3-0)
Course designed to teach basic skills in the preparation of nutritious meals using ingredients other than meat. The course will deal with the preparation of main meals with attention given the related area; nutritious snacks, sweets, frosted, frosted, stuffed, and seafood, and quick mixes. This course will cover basic cooking skills needed to plan, prepare and evaluate meatless meals. The course will include discussions and food preparation. Student preparation.

HMF 269 Mexican Cookery 3(3-0)
Introduction to basic and exotic Mexican and Spanish cookery, including proper pronunciation of Mexican dishes and corresponding symbols. Student preparation.

HMF 270 Microwave Cookery 3(3-0)
A presentation in production of various types of food geared toward introducing the student to the microwave oven and its capabilities. Student preparation.

HMF 271 Advanced Microwave Cookery 3(3-0)
Prerequisite: HMF 270 or equivalent. Enables the student to expand basic microwave cookery, using recipes from microwave cookbooks, and adapting the student's own recipes to microwave use. The technical and theoretical principles of microwave cookery will be presented. Student preparation.

HMF 272 Canning and Preserving 3(3-0)
This course includes the basics in water bath methods and steam kettle canning, smoking meats, dehydrating fruits and vegetables and jelly making. Student preparation.

HMF 273 Cajun Cookery 3(3-0)
Identification of various regional influences and cuisine which form the Cajun style including Creole Cajun and Louisiana cookery. Identification of indigenous ingredients, seasonings, and basic cooking techniques used in Cajun cookery. Discussions in class will cover historical as well as contemporary perspectives on these original American cuisines. (Formerly HMF 292)

HMF 274 Lean Gourmet Cookery 3(3-0)
Basic cooking using less fat and salt, fresh herbs, spices and chicken broth instead of cream. The focus of this class is on the foods we eat. The student will learn the composition of food and why some foods make better choices for our diets than other foods. (Formerly HMF 293)

HMF 275 Bakery Products 3(3-0)
An approach to familiarize the student with bakery products. This course is taught by a professional baker who will demonstrate various types of baked goods and products from the kitchen. Student preparation.

HMF 276 Advanced Pastry and Decorating Techniques 3(3-0)
A class from which the apprentice or a homemaker can improve his/her pastry making and decoration skills. While some use of savory pastry preparation will be covered, emphasis will be on French pastries or similar small baked products, and cake decorating from basic to trellis work and flower piping. Student preparation.

HMF 280 Food Specialties I: Garde Manger 8(8-0)
A basic course in the decoration and presentation of cold foods. This course will introduce the student to cold food specialization, vegetable carving, hors d'oeuvres, canapes, the use of spices, sauces, dressings, and complete buffet set up. Garde Manger is the showcase for the artistic presentation of foods. Student preparation.

HMF 281 Food Specialties II: Soups, Sauces, Fruits and Vegetable Cookery 6(6-0)
The purpose of this course is to help the student develop the necessary skills in the preparation of soups from scratch as well as utilization of convenience food items such as soup bases and commercial mixes. The student will gain a working knowledge of soups and sauces through hands on preparation of these items. Student preparation.

HMF 283 Ice Sculpting 2(2-0)
This course is designed to expose the student to the tools, techniques and skills required to carve a block of ice. The student will be carving from a blank of ice before the conclusion of the course. This is a hands-on course for the chef apprentice and/or for one desiring to develop new skills.

HMF 298 A.C.F.E.I. Certification Preparation 2(2-0)
As the apprentice comes close to graduation, he/she is required to plan, cost, prepare, supervise and serve a graduation dinner. The term prior to actual preparation and service of the meal, the student will need to meet with the
Division of Business

TA 145 Introduction to Cruise Sales and Operations 4(4-0)
An analysis of cruise sales and operations including how to sell a cruise, costs, selecting the right cruise, ports of call, ship profiles, ship listings, reference materials and cruise destinations of popular passenger and freighter ships.

TA 146 Seminar at Sea 2(2-0)
A seminar designed to develop a basic understanding of cruise lines and their ships. Gain firsthand knowledge of a cruise line ship, pier and dock facilities. Students will be able to dialogue with cruise ship staff members and observe daily cruise activities.

TA 150 Tourism for the Travel Industry 4(4-0)
An introduction to the principles of tourism, practices and philosophies. This course offers a practical and realistic education in the business of travel and tourism.

TA 160 Achieving Professional Excellence 3(3-0)
This course is designed to aid the student in gaining and keeping employment. It will help to adapt an individualized professional appearance for both the office and travel. Positive personal presentation will be emphasized through topics such as personal coloring, figure types, personality, and wardrobes. Interviewing procedures along with preparing resumes and cover letters will help prepare the student for the job search.

TA 170 Opening and Operating a Travel Agency 4(4-0)
This course will describe and explain the procedures involved in opening a new travel agency or acquiring an existing agency. This course also will explain travel agency operations from a management perspective.

TA 180 Career as a Flight Attendant 4(4-0)
To provide information and practical knowledge for a career as a flight attendant through lectures and discussions in the classroom and on an aircraft. This course is designed to provide an overview of a career as a flight attendant and provide practical experience of activities of a flight attendant on board an aircraft.

TA 190 Internship and Seminar 4(4-0)
Prerequisite: Second year Airline, Tourism and Travel Agency students. Available to students who have completed or are approaching 200 hours of work experience in tourism or travel agency operations. A term project is required.

TA 200 Profitable Travel Marketing and Counseling 4(4-0)
Prerequisite: Second year Airline, Tourism and Travel Agency students. An introduction to methods and techniques used in the modern travel agency covering the marketing environment, identifying consumer needs, examining the product, price and promotion.

TA 210 Group Travel Operations 4(4-0)
An overview of group tour business, where to find groups, how to organize group travel, and how to expand or start a group travel business. Includes how to assemble the group tour package.

TA 220 International Relations 4(4-0)
Discusses political, social, and economic relationships between countries and how it affects the travel and tourism industry. Defining and discussing cultural differences and introducing the foreign monetary system.

TA 230 Travel and Tourism Law 4(4-0)
Creates an awareness of the responsibilities and rights which the law imposes upon and grants to the travel agent, and illustrates the consequences caused by failure in those responsibilities.

TA 240 Computerized Reservation Training 4(4-0)
Prerequisite: TA 100. An introduction to and hands-on experience with the Sabre computer system, a multi-access airline reservation system. Developing a basic passenger name record, modifying, pricing, finding air fares and rules.

TA 250 Advanced Computerized Ticketing 4(4-0)
Prerequisite: TA 110 and TA 240. This is the second term of a two-term course covering ticketing, fare computation (international and domestic) and maximum utilization of the Sabre computer with hotel, car rental, and train travel descriptions and bookings.

TA 251 Computer Workshop 1(1-0)
The introduction to and use of the Sabre computer reservation system. This course will give the previously trained Mars Plus student a chance to adapt what they have learned on a different reservation system to Sabre. This hands-on opportunity will allow the student to realize differences and similarities between computer reservation systems.
A course designed to explain and describe basic travel agency accounting concepts. Approximately one-half the course will be given to how financial statements are compiled and interpreted. The other half of the course will discuss how accounting systems should be constructed for the travel business.

**MANAGEMENT SYSTEMS**

Program Director: William P. Holida
Office Unit B

The purpose/mission of the Management Systems area is supportive of and consistent with the Division and strategic goals of Lansing Community College. Management Systems is broad and diversified in its course offerings. Courses leading to certificates and/or Associate degrees are offered in the following areas: Advanced Management, Bank Management, Credit Union Management, Economics, Management, Marketing, Personnel/Labor Relations, Property Valuation and Assessment Administration, Real Estate, Sales, and Transportation and Traffic Management.

The courses are designed to impart knowledge and develop skills and abilities that will prove practical, useful, and marketable. The Management Systems area continually strives to maintain relevance and a high level of quality throughout the course offerings. Its instructors are experienced in the topic area(s) they teach. With their strong, vocational backgrounds, they are able to blend theory and practice in a unique, meaningful way.

Advisory committees have been established for each of the programs offered. These committees, composed of successful practitioners in the various curriculum areas, assist in reviewing course offerings and keeping in touch with the business community and emerging trends in business and society. Students desiring to enroll in courses offered by Management Systems will find the courses identified as follows:

- AIB: American Institute of Banking
- BUS: Business
- CUM: Credit Union Management
- EC: Economics
- LR: Labor Relations
- MGT: Management
- MKT: Marketing
- RE: Real Estate
- SL: Savings and Loan

Curricular guides for certificates and associate degrees are available in the Counseling Office and the Program Director's office area. Faculty advisors are available to assist in planning.

**Certificate in Advanced Management**

The completion of this curriculum results in the issuance of a Certificate in Advanced Management. It is designed especially for those who have at least an Associate Degree and/or extensive employment background. The courses in this curriculum are excellent for those who are seeking a program with up-to-date management courses of high level quality and content. Management advisors are available to tailor an individual program according to relevant background and future goals of the student. The Certificate in Advanced Management can lead to a Bachelor's Degree in Business Administration through Northwood Institute and other four-year colleges. Most course work for this Bachelor's degree is taken at Lansing Community College. (Curriculum Code 472)

**Cosmetology Management**

An Associate Degree curriculum is offered to students who have completed cosmetology certification requirements. Transfer credits into the program are available to those who are certified. Students must complete all core requirements. (Curriculum Code 470)

**Field Sales and Marketing Associate Degree**

This curriculum offers educational training to develop behavioral and selling skills necessary for students entering the field of sales. The program provides students with the fundamentals of sales needed to deal with the consumer's buying habits. The curriculum is divided into a general program for those students who are undecided on an area of concentration and a specialized program for those students who have already been identified with a particular interest. The College offers a number of courses which may be taken singly or as part of a planned curriculum. Courses offered in this area provide education and training to improve the skills, business knowledge and judgment of those preparing for, or now engaged in, the field of sales. The object of this two-year curriculum is to train individuals to participate efficiently in business sales activities. (Curriculum Code 479)

**Field Sales and Marketing Certificate**

Courses in this condensed one-year curriculum in sales are designed to meet the needs of students and local business. The curriculum is of special value to those already employed who desire upgrading or promotion. A Certificate of Achievement is granted upon successful completion of the curriculum, and the credits earned are transferable toward the requirements of the two-year Associate Degree curriculum in sales. (Curriculum Code 478)

**Financial Institution**

Certificate and/or Associate Degree curricula are offered in bank management, credit union management, and savings and loan management in cooperation with financial institutions in the Greater Lansing area. Certificate and Associate Degree curricula in banking management are under the sponsorship of the College in affiliation with the American Institute of Banking (AIB). AIB members also may earn various diplomas through National AIB. The local chapter of the AIB elects members to serve on the advisory committee for the program to assure continued relevancy for each course. (Curriculum Codes 492 and 493)

A certificate is offered in Savings and Loan Management in affiliation with the Institute of Financial Education. Students receive dual credit, both through Lansing Community College and the Institute of Financial Education. (Curriculum Code 494)

A certificate and an Associate Degree is offered in Credit Union Management. The specific credit union courses utilize material developed by the Credit Union National Association (CUNA). (Curriculum Codes 497 and 498)

**Labor Relations**

Effective labor relations has become an essential ingredient in successful management activity. The impact of collective bargaining has created a demand for skilled persons to negotiate and administer contractual agreements.

Complex legislation has created additional demands upon administrators who must be capable of achieving and maintaining a healthy balance between the pressures of unionized employees and management decisions and procedures that will ensure the future of their organization and protect the public welfare. As a result of such demands the need for highly trained men and women in labor relations continues.

A certificate in Labor Relations will be awarded to all students who successfully complete the following Labor Relations courses: LR 200, LR 201, LR 202, and LR 203 or BUS 226.

**Management Associate Degree**

This Associate Degree curriculum provides training for management in various fields as determined by the needs of students and the community. Classic management duties of planning, directing, organizing and controlling are presented to meet needs in specific situations. Each course stresses the premise that every manager is a professional worker in a field with a heritage and a future.

Lansing Community College facilities and personnel are available for organizing, conducting and coordinating management programs to meet needs of interested businesses on an individual or group basis. (Curriculum Code 470)

**Management Certificate**

This, a one-year (45 credit) curriculum in management, is designed primarily for students desiring positions at the first or supervisory level of management. Businesses are encouraged to make use of these management courses in the implementation of their employee upgrading or promotion programs. Counseling with a staff member in the Management Systems area is recommended to a student when choosing electives toward his or her desired goal. A Certificate of Achievement is granted to those students successfully completing the curriculum. (Curriculum Code 477)

**Marketing Associate Degree**

This curriculum offers organized training in retail distribution, wholesaling, market research, management and other activities related to the marketing of goods and services. The courses offered in this area provide education and training to improve the skills, business knowledge and judgment of those preparing for, or now engaged in, the growing areas of distribution marketing. The primary objective is to train individuals to participate efficiently in business activities. (Curriculum Code 475)

**Marketing Certificate**

This is a condensed one-year (45 credit) curriculum in marketing for qualified students. The courses are designed to meet the needs of both students and employers. The curriculum has special value to those already employed who desire upgrading or promotion. A Certificate of Achievement in Marketing is granted to those students who successfully complete this curriculum. Electives may be chosen from the courses listed on the curricular guide. Faculty advisors in Management Systems will recommend electives to students in accordance with the student's needs and goals. (Curriculum Code 476)

**Pre-Business Administration**

The Pre-Business Administration curriculum is designed for students preparing for transfer to a four-year institution to complete work in professional areas such as accounting, finance, management, marketing, business education, and other related business professions. Each college or university has its own curricular guide for students to follow to allow a smooth, efficient transfer. (Curriculum Code 480)
Property Valuation and Assessment Administration

This curriculum is sponsored in cooperation with the Michigan Association of Equalization Directors and the staff of the Michigan State Tax Commission. Designed for the student who is relatively new to the field of property appraisal, the technical and procedural material presented during the courses is planned to serve as an effective base for intensive on-the-job training. The program encompasses legal as well as procedural aspects of property appraisal for governmental jurisdictions. Successful completion of the program results in either the issuance of a Certificate of Achievement or an Associate Degree in Property Valuation Assessment Administration, depending upon the curriculum completed. (Curriculum Codes 490 and 499).

The curriculum is designed to provide preparation for employment, either in an Assessor's Office or an Equalization Department, and to help toward improving the competence of those already in the field. Curricular objectives are:

1. To increase the knowledge and ability of the student relative to property appraisal procedures.
2. To provide for a more cooperative working relationship between appraisers/assessors in adjacent areas.
3. To acquaint the student with the various sources of information available to the appraisal personnel.
4. To provide an effective and organized training vehicle for professional advancement of personnel in property valuation and assessment administration.
5. To serve as a basis for certification of personnel in the appraisal field.
6. To promote standardization of procedures, forms, reports, etc.

Real Estate

The real estate curricula can provide the background for persons of all ages to engage in the many activities within the real estate industry. Through a series of courses leading to a Certificate or Associate Degree, it is possible to specialize in a number of vocations involving real estate that need experienced and knowledgeable personnel. (Curriculum Codes 473 and 474).

Some of the specialties dealing with real estate include selling residential, commercial and industrial properties, appraising all types of property, real estate investment counseling, property management, urban planning, industrial planning, asset management, mortgage specialist, or serving as a closing officer in a real estate brokerage office.

Since the real estate community is involved with these curricula, the student can benefit from close association with those already in the field who are knowledgeable and willing to give their time in sharing their knowledge. Real estate is a highly competitive business, and only those with the willingness to learn, the ability to work long and varied hours, and a strong desire for success, can expect the rewards the field can offer.

Transportation and Traffic Management

A one-year certificate curriculum in Transportation and Traffic Management is offered in cooperation with the Transportation Club of Lansing. (Curriculum Code 495)

This certificate curriculum deals with the theoretical, historical, and academic aspects of Traffic Management; analyzes practical problems and specific cases; and provides excellent technical training. This course, in three terms, imparts information which might take years to obtain in the normal course of work in an individual traffic department or carrier's general office. This program is also transferable to other programs leading to degrees in the Management Systems area. Additional management and general education courses allow the student to earn an Associate Degree in this area. (Curriculum Code 496)

COURSE DESCRIPTIONS

American Institute of Banking (AIB) Management Systems
Division of Business

AIB 101 Principles of Banking 3(3-0)
This course is an introductory course to the field of commercial banking, designed for only for newcomers to the field, but for students presently employed in banking who desire to broaden their knowledge and/or increase their opportunities for advancement.

AIB 102 Effective English 3(3-0)
Covers fundamental principles for using the English language and points out the ways in which communication may be improved.

AIB 103 Oral Communications for Bankers 3(3-0)
This course reflects two basic philosophical assumptions: An understanding of core communication principles is essential for communication effectiveness, and an appreciation of the major commonalities of the major common contexts is crucial for personal and professional successes.

AIB 104 Written Communications for Bankers 3(3-0)
This course is designed to be a skill building course. As such, the primary purpose of the course is to assist participants in developing techniques of writing which will help them communicate more quickly, accurately and forcibly. A major theme of the course is that a writer who wants to impact an audience must be flexible and adjust his communication styles according to (1) his purpose of communicating; (2) the needs of the receiver, and (3) the appropriate level of language for the receiver.

AIB 120 Economics for Bankers 3(3-0)
This course provides bankers with an introduction to the fundamental principles of economics. Special emphasis is placed on topics of importance to bankers. The text covers the basics of economic theory and examples of the application of economics to banking.

AIB 170 Preparing for Supervision 1(1-0)
This seminar is designed to help the employee (student) prepare for the transition to supervisor, and/or to help those who wish to evaluate their own capabilities and desires to move toward a supervisory role.

AIB 203 Trust Service 3(3-0)
Services rendered by institutions engaged in trust business. Primarily for the personnel of trust departments of commercial banks and trust companies.

AIB 204 Credit Administration 3(3-0)
Discussion of factors influencing and determining loan policy, methods of credit investigation and analysis, credit policies, specific credit problems, and regular as well as unusual types of loans.

AIB 205 Real Estate Financing 3(3-0)
Covers mortgage markets, financing residential and special purpose property, administrative tasks, analysis of mortgage credit, policies related to collection administration of a bank's mortgage portfolio, and analysis of real estate investment yields.

AIB 206 Money and Banking 3(3-0)
Prerequisite: AIB 101. Practical aspects of money and banking, basic monetary theory, economic stabilization, types of spending, the role of gold, limitations of central bank control, government fiscal policy, balance of payments, and foreign exchange, showing their repercussions on the banking industry affecting yield curves and the structuring of portfolios.

AIB 207 Consumer Lending 3(3-0)
Techniques of installment lending, establishing credit, obtaining and checking information, servicing the loan and collecting, inventory financing, special loan programs, business development, advertising, and public relations.

AIB 208 Commercial Lending 3(3-0)
Prerequisite: ACC 210 or Program Area approval. Commercial loan processing, procedures and servicing, small business loans, real estate loans, securities loans and related areas that qualify for commercial loan status.

AIB 209 Bank Cards 3(3-0)
Overview of the bank card industry, its role in the economy, and basic operational policies and procedures.

AIB 212 Analysis of Financial Statements 3(3-0)
Prerequisite: ACC 210 or equivalent. Characteristics of financial statements and financial statement analysis; some accounting necessary for profitable study of financial statement analysis.

AIB 214 Law and Banking: Principles 3(3-0)
Legal principles and a general review of legal principles pertaining to business and banking. Includes contracts, consideration, statute of frauds, commercial paper, bank deposits, bank collections, sales, titles, agencies, and extracts from the Uniform Commercial Code.

AIB 215 Law and Banking: Applications 3(3-0)
Prerequisite: AIB 214 recommended. Legal aspects of negotiable instruments used in bank deposit and collection operations, and the payment mechanism; legal implications of normal activities and transactions in banking operations; impact of the law and applicable bank regulations.

AIB 221 Retail Banking 3(3-0)
This course is designed to present an overview of the retail branch function and the manager's role in its operation. An introduction to the processes and techniques that will be most effective in managing a retail bank is provided, with emphasis on core management skills, increasing sales, and the financial performance of a retail bank.
AIB 230  Marketing for Bankers  3(3-0)
Concepts and philosophies of marketing, marketing information, research, and
targets; marketing mix (product strategy, distribution strategy, advertising and
sales promotion, personal selling, and pricing strategy); and the methods
of marketing planning.

AIB 241  Bank Investments and Funds Management  3(3-0)
The purpose of this course is to provide students with the knowledge and
skills they need to implement their bank's investment and funds management
strategies to earn an acceptable return without undue risk. This course includes:
investment and funds management concepts, investment mathematics, yield
curves and interest rates, risk and profitability, lending instruments, investment
instruments, financial markets, liability management, investment portfolio
management, asset/liability management.

Business (BUS)
Management Systems
Division of Business

BUS 118  Introduction to Business  4(4-0)
Principles, problems and practices related to our economic framework. Includes
organization, production, marketing, personnel administration, finance, and
economics.

BUS 123  Introduction to Association Management  3(3-0)
An introductory course designed to provide an overview of the principles
involved in managing non-profit associations and organizations. It will enable
the student to understand the inter-relationships between associations, busi-
ness, government and society.

BUS 191  Independent Study-Management  1(1-0)
BUS 192  Independent Study-Management  2(2-0)
BUS 193  Independent Study-Management  3(3-0)
BUS 194  Independent Study-Management  4(4-0)
Prerequisite: Program Area approval. Special research projects and individual
readings to apply past or present aspects of personal and professional experience
to academic area of interest. Minimum of ten hours work per credit
required.

BUS 201  International Business  4(4-0)
Prerequisite: BUS 118 or equivalent. Overview of international business:
organizational, social, cultural, and economic variables that create change in
the international market place. Includes exchange rates, resource allocation,
import quotas and export controls, balance of payments, and free trade versus
protectionism.

BUS 213  Teller Training  4(4-0)
Complete activities of the bank teller: Covering identifications, check cashing,
money handling, the teller machine, coin dispenser and use of the adding
machine. The course will be divided into two major parts. The first part will be
interviews covering identifications, check cashing, and money handling. The
second part will cover the actual activities of a teller using the teller machine,
coin dispenser, money and the adding machine.

BUS 214  Advanced Teller Training  3(3-0)
Prerequisite: BUS 213 experience. Reviews check cashing techniques, endorse-
ments, collection of checks through the Federal Reserve System, identifications,
money handling, teller differences, counterfeiting, bank services, effective
communications, and customer relations.

BUS 223  Management and Supervisory Development  3(3-0)
Management principles for first-line supervisors, managerial functions of
planning, organizing, staffing, directing, and controlling, working through
policies and procedures, decision making, and the responsibilities of super-
visors for overall work performance and employee development and evaluation.

BUS 224  Human Resources Management  3(3-0)
Principles, problems, and practices of modern business, government, and other
organizations involved in the handling of employees from recruiting through
post-retirement.

BUS 225  Principles of Management  3(3-0)
Management principles for middle and upper level managers: management
relationships, communications, morale, motivation, history of management,
theoretical framework, practical applications, qualifications of executives,
business ethics, and managerial functions.

BUS 226  Employment Law for Managers  3(3-0)
This course is designed to provide an introduction and overview to the principles
and application of laws affecting the workplace, not including traditional labor
relations law. Areas of law covered include: discrimination, wage-hour, un-
employment benefits, personnel records, and common law issues relating to
discharge and other matters.

BUS 227  Organizational Leadership  4(4-0)
Prerequisite: BUS 224 or BUS 225 or BUS 228. This course is designed to
introduce students to an overview of the various theories, research and practices
of leadership while establishing a foundation for understanding and appreciation
of the numerous issues which impact the leaders' style.

BUS 228  Organizational Behavior  4(4-0)
Application of psychological principles and methods of selection, placement,
training, supervision, evaluation and motivation of workers' and managers'
efficiency. Also, accident prevention, problems of human relations, and psy-
chological illnesses in business and industry.

BUS 229  Public Relations  3(3-0)
Techniques for those in managerial positions, principles of creating and
maintaining good public relations, including employee/employer relations,
customer/employee relations, and the total public relations effort.

BUS 236  Oral Communications for Business  3(3-0)
Oral techniques of public speaking, examining the business speaker, the
audience and the text from a business viewpoint. Also studying some issues
and potential problems pertaining to listening, persuasion, interpersonal and
nonverbal communication.

BUS 250  Personal Finance  3(3-0)
Specific topics covered include: choosing your job, budgeting, smart shopping,
avoiding swindles, buying a car, renting or buying your home, selling your
home, credit and borrowing, investing, insurance, retirement and estate plan-
ning, income taxes, etc. There is a great deal of material covered in a relatively
short period of time. This class is not for individual financial advice. The student
would need to analyze his/her own situation and come to a decision based on
fundamental knowledge acquired in the course, from experience, other
readings and experts in the various fields.

BUS 251  Stock Market Essentials  3(3-0)
Study of securities market to give framework with which to set investment
goals and achieve desired results. Introduce some of the more prevalent
theories, concepts and skills to aid in developing strategies and making sound
investment decisions related to the stock market.

BUS 254  Introduction to Investments  3(3-0)
This course covers the fundamental principles of investing and its role in our
economy. Emphasis will be upon developing terminology, types of investments
and personal financial planning such as, but not limited to, mutual funds,
real estate, CD's, money market funds, limited partnerships, insurance, IRA's,
stock and tax shelters. This is an overview course.

BUS 260-262  Transportation and Traffic Management  1(3-0)
One-year, three-term program resulting in a Certificate issued by the College.
Theoretical, historical, and academic aspects of traffic management are
presented with analysis of practical problems and specific cases.

BUS 280  Property Valuation and Assessment Administration I  3(3-0)
Introduction to property tax, public relations, property description, tax mapping
and aerial photograph interpretation.

BUS 281  Property Valuation and Assessment Administration II  3(3-0)
Property tax law; cost, market, and income approach to value; and land
economics.

BUS 282  Property Valuation and Assessment Administration III  3(3-0)
Prerequisite: BUS 281 or Program Area approval. Residential and agricultural
appraisals and soil survey.

BUS 283  Property Valuation and Assessment Administration IV  3(3-0)
Prerequisite: BUS 282 or Program Area approval. Appraisal of commercial
and industrial properties.

BUS 284  Property Valuation and Assessment Administration V  3(3-0)
Prerequisite: BUS 283 or Program Area approval. Local government financing,
preparation of tax roll, eminent domain, assessment, equalization and allo-
cation.
BUS 285 Property Valuation and Assessment Administration VI 3(3-0)
Prerequisite: BUS 284 or Program Area approval. Valuation and auditing of personal property, classification and equalization of appeal procedures, allocation, truth in assessment, taxation, and Headlee rollback computations.

BUS 286 Applied Appraisal Concepts 2(2-0)
Prerequisite: BUS 282 or BUS 283 or Program Area approval. Field inspection and appraisal of residential, commercial and industrial properties. Stressing potential appraisal problems utilizing the cost approach to value.

BUS 290-293 Management Internship each 3(3-0)
Prerequisite: Coordinator approval. Weekly, on-campus, independent seminars with the coordinator and the student intern. Actual job training and experience by working with owners, proprietors, and managers in organizing and/or operating a business.

BUS 295 Small Business Management 3(3-0)
Small business operations, including business and managerial functions, principles of management, environment of small business, financial, marketing, and production management of the "going concern", and legal and governmental relationships. Development of a small business plan is required.

Credit Union Management (CUM) Management Systems Division of Business

CUM 110 Credit Union Operations 3(3-0)
A college level course providing the student with an overview of basic credit union operating procedures. This course is directed toward individual managers of smaller credit unions, staff members of credit unions, and volunteer elected officials who wish to increase their knowledge of credit union operations.

CUM 200 Credit and Collections 3(3-0)
This course covers the basic fundamentals of the credit/collection industry. Emphasis on learning the basics of the credit decision and the collection of past due loans. The course is for credit union personnel who want an understanding of credit union credit and collections including the relevant laws and regulations.

Economics (EC) Management Systems Division of Business

EC 101 Applied Economics 3(3-0)
This course is an introductory survey of business economics. The course work focuses attention on the major economic problems and issues within the American economy. It provides an overview and some tools of economic analysis to aid in logical interpretation. Major subject areas included relate to an overall look at the economic system, government policy, prices and their application, money, income, and national income accounts of the United States.

EC 201 Principles of Economics—Micro 4(4-0)
This course is designed to develop objective consideration of economic issues and provide information and understanding of how resources are allocated by prices. Topics for study include price theory; consumer demand; cost and market structure, the role of government in the market; factor pricing, and income distribution.

EC 202 Principles of Economics—Macro 4(4-0)
Prerequisite: Program Area approval or EC 201. This course deals with the theory of national income, employment, prices, and with government fiscal and monetary policies designed to influence aggregate economic activity. It also includes the relationship of the domestic economy to international economic activity.

EC 203 Economic/Business History 4(4-0)
This course provides a survey of American economic and business history, change, and growth since the civil war. Topics include an overview of business organization, the role of government, technological change, American industrial development, labor unions, and capitalization patterns.

EC 218 Money and Banking 4(4-0)
Prerequisite: EC 202. This course covers the nature of money and the role of the Federal Reserve, the commercial banks, and other financial institutions in determining the money supply. Also, the course includes information about the money market, capital markets, determination of interest rates and the relationship between monetary policy and economic activity.

EC 221 International Economics 4(4-0)
Prerequisite: EC 202 or permission of instructor. This course examines the interaction between the U.S. economy and the rest of the world. It covers from both a historical and theoretical perspective the balance of payments, exchange rate systems, the effects of international economics on domestic, monetary and fiscal policy, the gains from trade, the impact of restrictions on trade like tariffs and quotas, and the development of international trade organizations.

EC 224 Intermediate Micro-Economic Theory 4(4-0)
Prerequisite: EC 201. This course covers the theory of consumer behavior, the production and cost relationships of individual firms, the actions of those firms in different market structures, the theory of resource firms, and general equilibrium theory. The discussion of each of these areas will begin with a review of the principles of economics as covered in EC 201.

EC 266 Independent Study/Economics 1(1-0)
Prerequisite: Program Area approval. This course includes 20 to 30 hours of study in special economics projects.

EC 267 Independent Study/Economics 2(2-0)
Prerequisite: Program Area approval. Two credits requiring 40 to 50 hours of study in special economics projects.

EC 268 Independent Study/Economics 3(3-0)
Prerequisite: Program Area approval. Three credits requiring 60 to 70 hours of study in special economics projects.

Labor Relations (LR) Management Systems Division of Business

LR 200 Introduction to Labor Relations 4(4-0)
Survey historical and legal frameworks of labor movement. Major labor laws, causes and purposes of the labor movement and union structure and behavior. Labor-management approaches to solving employment disputes.

LR 201 Labor Relations/Collective Bargaining 4(4-0)
Prerequisite: Program Area approval or LR 200. Study of the collective bargaining process; the administration of a collective bargaining agreement, and wage-benefit issues of employment.

LR 202 Labor Relations/Grievances and Arbitration 4(4-0)
Prerequisite: Program Area approval or LR 200. Grievance procedure, including employee discharge and discipline, is examined in-depth, with a review of pertinent legislation. A "how to" course. Basic knowledge and skill necessary for grievance handling. Fundamentals of contract language.

LR 203 Labor Law 4(4-0)
Prerequisite: Program Area approval or LR 200. In-depth study of major laws, U.S. Supreme Court cases, and National Labor Relations Board decisions. Functional picture of the National Labor Relations Board.

LR 205 Employee Compensation Administration 4(4-0)
The course views compensation from the perspective of the employer and is intended to give the student an understanding of the characteristics, structure and objectives of a modern wage and salary program. The course will explain the development of a typical wage and salary program from its inception to the final product. Discussed total compensation, wages and benefits.

LR 208 Labor Relations in Government 4(4-0)
Structure and practice of labor relations in the public sector. Recommended for government employees.

Management (MGT) Management Systems Division of Business

MGT 300 Introduction to Management 4(4-0)
An analysis of the basic managerial functions, theories, and techniques in the areas of planning, social-environmental influences, organizational structure, authority and delegation, conflict, change, and leadership.
MGT 301 Strategic Management and Policy 4(4-0)
Prerequisite: MGT 300 or BUS 225. The course pulls together learning from the areas of management and marketing to consider an overall organizational perspective. The strategic formulation and implementation for the organization as a whole. The process involves the pursuit of organizational mission while managing the relationship of the organization to its environment. Case method is used.

MGT 304 Organizational Development 4(4-0)
A pragmatic approach to understanding and effectively dealing with the multitude of people and performance problems faced within an organization. Examines the skills needed to determine the real problem and select an appropriate plan of action.

MGT 305 Introduction to Purchasing Management 4(4-0)
Survey purchasing activities related to the manufacturing and service industries. Includes purchasing organization, principles and practices, and relationship of purchasing department with other departments.

MGT 323 CAM Internship 4(4-0)
Prerequisite: Program Area approval. Advanced internship project representing 60 hours of work, may be selected as part of Certificate in Advanced Management. Project must be outside and beyond the student's regular area of work responsibility and have employer and CAM Coordinator approval.

MGT 324 CAM Independent Study 4(4-0)
Prerequisite: Program Area approval. A detailed quality report in the student's area of interest which represents 60 hours of research and writing, applicable toward Certificate in Advanced Management and approved by the CAM Coordinator.

MGT 329 Advanced Business Communication Skills 4(4-0)
Designed to help students develop verbal communication skills used when making oral presentations, conducting meetings and interviewing employers. Business report writing skills are developed and practiced.

MGT 332 Managerial Ethics 4(4-0)
Designed to sensitize participants to the impact of ethics on decision making, both personal and organizational. Participants will examine the bases for the behavior of managers, their own behavior, various means of controlling organizational behavior, and the bases for ethical standards.

MGT 335 Managerial Statistics 4(4-0)
Prerequisite: MTH 012 or equivalent. Application of statistical tools and techniques to improve decision making process and reduce managerial decision difficulty from less than perfect data. Includes sampling, description of sample data, methods of averaging, standard deviation, probability theory, estimation and hypothesis testing.

MGT 337 Human Resource Management Skills 4(4-0)
Prerequisite: BUS 224 or equivalent. Skill areas involved in the management of our human resources are developed. Setting objectives with employees, conducting performance appraisals, working with employee problems are practiced. Students plan techniques for managing teams and for leading and motivating employees.

MGT 338 Current Topics in Management 4(4-0)
Study of specific topics and issues in today's society which affect managerial decisions. Real life experiences or from current publications. Each student will explore one issue in-depth with the class. Explore the internal and external constraints on actions. External factors considered will be legal, social, educational, and political. Internal factors considered will be the shareholders, the employees, and the customer.

MGT 339 Management Styles and Corporation Strategies (Japan and the United States) 4(4-0)
Numerous current materials relating to the management styles and corporation strategies in Japan will acquaint the student with management as practiced in Japan. The Japanese management practices are presented as an alternative managerial style for the United States to explore how Japanese techniques can produce greater productivity, higher employee morale and a successful quality of work life. (This course is offered only as part of the Japan Adventure Program.)

MGT 345 Leadership: Attitudes and Motivation 4(4-0)

MGT 346 Managerial Finance 4(4-0)
Prerequisite: ACC 101 or ACC 210. This course is designed to provide the necessary and practical skills to deal with financial matters and communicate with those people who specialize in finance.

MGT 349 Time and Stress Management 4(4-0)
Explores relationship between time and stress management. Stress is the causual factor for many of our physical and psychological problems. Suggests methods for harnessing its energy positively. Techniques and strategies for wise utilization of time and energy. Emphasis on creating action plan and initiating corrective actions.

Marketing (MKT) Management Systems Division of Business

MKT 119 Marketing and Managing Your Professional Image 4(4-0)
Marketing and managing your professional image can add significant value to business in learning how to effectively market and manage their image and their business affairs. This course is a complete guide for everything people and their companies need to know to do the right thing at the right time in every business situation.

MKT 120 Sales 3(3-0)
Fundamentals and role in the marketing mix. Develop basic skills in behavioral sciences and skills needed to enter the field. Customer buying habits, sales process, product demonstration techniques, and analysis of human relations aspects.

MKT 121 Advanced Sales 3(3-0)
Prerequisite: MKT 120 or Coordinator approval. An analysis of the sales interview. Video taping sessions where each facet of the sale is examined and analyzed individually.

MKT 122 Field Sales 3(3-0)
Prerequisite: Program Area approval. Practical field sales experience in consumer and industrial sales. Advanced techniques of selling and refining selling skills.

MKT 123 Computer Field Sales 3(3-0)
Prerequisite: Program Area approval. Practical computer field sales experience in consumer and industrial sales. Advanced techniques of selling and refining selling skills.

MKT 130 Retailing 3(3-0)
Gain understanding of activities used by retailers in selling goods to ultimate consumers. Develop awareness of problems facing retailers and develop feasible solutions. Examine career opportunities.

MKT 131 Fashion Merchandising 3(3-0)
Functions, policies, what, when, where, how much, how to, and from whom to buy. Introduction to fashion history, textile construction, design, color, figure types, and fashion trends. Career opportunities.

MKT 135 Telemarketing 3(3-0)
This course is designed to make people more productive over the telephone. The course teaches skills to help one make better use of time to increase productivity and sales by mastering the art of telephone selling. The course will also show practical methods and alternatives that work to increase efficiency as well as how to put information power to work to increase closing percentages.

MKT 140 Introduction to Advertising 3(3-0)
Methods and techniques used in modern advertising. Information on the entire advertising function. Preparation of an advertising campaign will be required to facilitate hands-on understanding of the component parts which include: marketing review, marketing plan, creative strategy and media selection.

MKT 200 Introduction to Marketing 4(4-0)
Designed to define marketing, develop an understanding of the marketing concept and functions, and generally investigate the field of marketing. Will cover the marketing environment, identifying consumer needs, examining product, price, promotion, and distribution strategies within our society. Provides a basic marketing understanding with practical applications.
MKT 202 Managerial Marketing  4(4-0)
Prerequisite: MKT 200. Study of the total enterprise regarding problems, analytical tools, and approaches to decisions. Examines allocation of funds to various means of market cultivation, development of promotional strategy, price policy, and management of field selling effort.

MKT 204 Marketing Research  4(4-0)
Prerequisite: MKT 200. Types of data, sampling, data collection, analysis, interpretation, and applications of marketing research. A practical managerial approach—NOT a statistical or mathematical orientation.

MKT 214 Merchandise Management  4(4-0)
Prerequisite: MKT 130 or MKT 131. Understand the purchasing process. Build a retail vocabulary. Understand the process of achieving a balanced and well planned inventory. Control the flow of inventory. Control the profit of retail business.

MKT 220 Sales Management  3(3-0)
Prerequisite: MKT 120 or equivalent. Explores strategies dealing with managing salespeople. Training, recruiting, motivation, evaluation, planning and organizing are all stressed. The case method of learning is utilized, along with role playing.

MKT 221 Consumer Behavior  3(3-0)
Basic perspectives involved in consumer motivation and behavior. Relevant variables that help shape consumer action. Concepts that integrate the study of consumer behavior with the practice of marketing.

MKT 225 Written Communications for Business  4(4-0)
How to write clearly, accurately, and quickly. Organize writing for the busy reader's needs. Letters, reports, memos, and procedures—technical or non-technical.

MKT 230-233 Independent Study-Marketing each 3(3-0)
Prerequisite: Coordinator approval. Advanced marketing students design, implement, and draw conclusions about an area of interest for application in the marketing field. A minimum of 10 hours work per credit is required.

MKT 235-238 Marketing Internship each 3(3-0)
Prerequisite: Coordinator approval. An approved training station, earn credits for satisfactory work performance related to marketing.

Real Estate (RE) Management Systems
Division of Business

RE 250 Real Estate Math Seminar  .5(5-0)
This seminar will provide practical applications of the most common uses of math in the real estate industry. It is designed to provide additional practice for students currently enrolled in RE 274, but is open to any interested students.

RE 251 HP-12/C Seminar  .5(5-0)
Prerequisite: Need HP-12/C calculator. This seminar will acquaint the user of the Hewlett Packard HP-12/C calculator with basic functions, financial calculations, and related real estate calculations. It is designed to provide additional practice with the HP-12/C for students currently enrolled in RE 273, but is open to any interested students.

RE 271 Introduction to Real Estate  3(3-0)
Overview of the real estate business. Emphasis on points of law and real estate principles useful to the beginning salesperson and/or potential buyer, seller, or investor.

RE 273 Real Estate Investment and Taxation  3(3-0)
Prerequisite: RE 271, RE 274 or Program Area approval. Emphasis on investment analysis, financing, depreciation, capital gains, exchanging and federal tax implications of real estate acquisitions, ownership and disposal.

RE 274 Real Estate License Examination  4(4-0)
Intensive study in the fundamentals of real estate. Preparation for the State of Michigan license examination. (Administered by ETS—Educational Testing Service.) This class meets statutory requirements including four hours in fair housing.

RE 275 Real Estate Finance  3(3-0)
Significance and nature of mortgage lending, mortgage money markets, sources, types of mortgages, instruments, qualifying, the land contract and its use, administration of a mortgage loan and a loan portfolio, and methods of foreclosure.

RE 277 Property Management  3(3-0)
Covers management and the market, marketing residential and commercial rental space, creating an organized management plan, tenant and landlord laws, rent collection, leases, tenant screening, fair housing requirements, tenant-owner relations, accounting for investment properties, real estate as an investment, managing apartments, office space, retail stores and special purpose buildings.

RE 279 Buying and Selling a Home  3(3-0)
For potential purchasers or sellers of residential property. Mechanics of buying and selling a home. Covers steps necessary to transfer title, including the "closing."

RE 280 Real Estate Listing and Sales Strategies  3(3-0)
Prerequisite: Completion of RE 274, or having earned a real estate license. This course is designed for the real estate salesperson. In a classroom setting through the assistance of lectures, tapes, handouts, and role playing, the student will develop skills needed for the purpose of selling and listing real estate. Through projects and workshop time in class, the student will develop personalized tools to assist him/her in successfully selling and listing real estate.

RE 282 Real Estate Broker Preparation  4(4-0)
Prerequisite: RE 274 or equivalent. Prepares prospective brokers for the Educational Testing Service (ETS) State Broker's license exam. Includes review of brokerage law, closing statement preparation, law of agency, rules and regulations, fair housing, civil rights, financing, and appraisal.

RE 290 Real Estate Construction Fundamentals  3(3-0)
This is a course in basic real estate construction for real estate salespersons, brokers, and those interested in learning more about single-family residential construction. Topics include: construction basics, from excavation to finished stages; various architectural styles; mechanical systems, their operation and interrelationships; reading a house plan; common problems of houses: site selection; and building materials.

RE 291 Residential Appraisal  4(4-0)
Principles, methods, and techniques of residential real estate appraising with application.

RE 292 Income Property Appraisal  4(4-0)
Prerequisite: RE 291. Advanced course for real estate brokers and/or sales associates interested in appraisal of income-producing property. Includes the rationale of the income approach, relationship of income to value, net income capitalization, mortgage-equity technique, and the residual and direct market capitalization processes.

RE 293 Real Estate Law  4(4-0)
Prerequisite: RE 271 or RE 274 or Program Area approval. Topics covered include: introduction to real estate law, land and its elements, land titles and interests in land; abstracts and title insurance, deeds, easements, liens, mortgages, land contracts and foreclosures, landlord-tenant relations; private land use controls including restrictions; condominiums and tax policies pertaining to real estate.

Savings and Loan (SL) Management Systems
Division of Business

SL 103 Teller Operations  3(3-0)
Importance of the teller in creating and maintaining good customer relations. Specific operational procedures necessary for successful performance.

SL 127 Personal Investments  3(3-0)
Examines the relationship between risk and return, importance of timing investment purchases and sales, and various investment alternatives. Covers security markets, common stock, bonds, function of investment companies, and types of speculative investments.

SL 160 Introduction to the Savings Association Business  2(2-0)
Survey the role of savings associations in business. Historical development, present-day organization, competition, and future direction.
Division of Business

SL 161 Deposit Accounts and Services 3(3-0)
This course is designed to give savings institution employees a thorough knowledge of the legal nature of the deposit contract, the forms of account ownerships, and the various services offered by savings institutions in a deregulated market.

SL 166 Communication Skills for Business 3(3-0)
Practice skills of effective two-way communication and analyze strengths and weaknesses to achieve better communication with co-workers and customers.

SL 170 Effective Business Writing 3(3-0)
You will learn specific skills needed to write effectively in your job as a financial services professional. Refining your writing skills will save you time, improve your relationship with customers, and contribute to your professional success.

SL 208 Savings Accounts 3(3-0)
Nature and types of savings account ownership and problems unique to savings accounts.

SL 209 Savings Account Administration 3(3-0)
Extends the general presentation and emphasizes the administration and insurance of savings accounts.

SL 210 Consumer Lending 3(3-0)
Introduces nature of consumer credit, compares credit providers, examines types of loans and loan features, reviews law and regulations, analyzes loan mathematics, and examines how consumer credit operations are organized. In-depth analysis of the activities performed in credit evaluation, operations, and collections.

SL 211 Mortgage Lending 3(3-0)
Residential mortgage lending operations of savings associations. Emphasis on conventional lending procedures. In-depth analysis of mortgage loan programs and the secondary mortgage market included.

SL 220 Techniques for Customer Counseling 3(3-0)
A course for all financial service professionals who meet with customers that presents theories from Sociology, Psychology, Economics and other disciplines along with practical, job-related techniques and guidelines. In this course, students investigate all aspects of customer contact in a problem-solving manner. The course covers all of the major elements that interact in financial counseling – customers and their needs, the financial services that can satisfy those needs, and the counselor's relationship to both the financial institution and the customer. This approach allows students to learn the knowledge, skills, and attitudes that are required to meet special challenges of financial counseling.

SL 226 Human Relations 3(3-0)
Purpose of course is to introduce students to behavioral concepts and techniques that are directly applicable to work environment. This course is practice-oriented. Students will be actively involved in class as they apply concepts and techniques to their own situations with goal of improving personal relationships at work.

SL 230 Branch Management 3(3-0)
This course is designed for working adults who are branch managers in a financial institution or hope to become branch managers.

Management (MGT)
Management Systems
Division of Business

Total Instructors in Management Effectiveness (TIME Series) has courses designed for those who wish to increase their managerial and marketing skills, but who are unable to attend classes on a regular basis. Each TIME course is self-paced to allow maximum flexibility in scheduling, enabling participants to study at their own convenience. (See MGT 350 through MGT 399 as described below.)

MGT 350 The PC in Plain English 1(1-0)
This course is computer-interactive to help the learner cut through the jargon of computers to understand how the personal computer works and how it can help the learner work faster, more effectively and smarter. The course is for learners with no knowledge of computers.

MGT 352 Management Information Systems 2(2-0)
A basic orientation to the structure of a Management Information System (MIS). Includes information on developing plans from routine information flows, data collection, report generation and evaluating the effectiveness of systems.

MGT 353 Personal Selling Skills 2(2-0)
An introduction to the basic sales process. Topics include: how to set up sales calls; the basic fundamentals of personal selling; the customer buying habits and the support systems available to the salesperson. At the completion of this course, the student should be aware of how to make a sale. Uses audio-cassettes.

MGT 355 Purchasing Management 2(2-0)
Designed to help managers with the purchasing activities within the company. Topics include: goal setting, planning, human relations, the psychology of management and negotiations.

MGT 356 Managing Risk in Changing Times .5(5-0)
Focuses on personal risks managers face in today's business environment. Covers choosing risks, determining appropriate risk and preparing for risk taking. A computer-interactive course.

MGT 357 Setting and Achieving Personal Goals 1(1-0)
Designed to help students achieve goals. Topics include: defining personal goals, identifying strengths and weaknesses, overcoming obstacles, solving problems and matching personal goals with company goals. Uses audio-cassettes.

MGT 358 Assertiveness for Career and Personal Success 1(1-0)
The topics covered are: shifting from habitual reaction to action, increasing ability to do the job, reducing fear and anxiety, maneuvering through the system, giving feedback, enhancing self-image, saying "no," and avoiding defensive behavior in social situations. Uses audio-cassettes.

MGT 360 Communications That Work 2(2-0)
This course will help the busy manager learn to use more effectively the tools he/she has to get a message across. Includes areas of practical application such as effective writing of letters, memos and reports, running meetings, and interviewing and listening, A video course.

MGT 361 A Manager's Guide to Human Behavior 2(2-0)
An overview of the complex area of human behavior as it applies to the management of productive organizations. Major areas of emphasis include psychological concepts, interpersonal relationships, and group behavior.

MGT 363 Basic Business Psychology 1(1-0)
Covers how to use psychology to help select the right person for the job, overcome decision-making problems, motivate high and low achievers, evaluate work performance, open up lines of communication, reduce conflict, and use the organization climate to influence people in a positive way. Uses audio-cassettes.

MGT 364 Supervisory Management 2(2-0)
Designed to help managers at all levels to develop, enhance, and update their skills. Major areas of emphasis include: planning, operating, controlling, personnel functions, decision making, job design, job analysis, and quality control within the department.

MGT 365 Participative Management Skills .5(5-0)
Answers the question "How can I get my employees involved and utilize their participation?" Suggests managerial actions to develop successful employee participation. A computer-interactive course.

MGT 366 How to Manage People at Work 2(2-0)
The purpose of this course is to identify the major areas of needs that a manager should work to satisfy and identify the basic reasons why individual needs change and why these needs differ from one group or workers to another. Topics such as human relation, formal and informal organizations, the American workforce, being a leader, motivating behavior, communications, disciplining workers and coping with problem employees are explored.

MGT 367 Customer Interaction Skills .5(5-0)
Designed to make keeping customers satisfied an easier task. Alternate goal is to improve your ability to communicate with customers. A computer-interactive course.

MGT 368 How to Implement a Business Plan 2(2-0)
This course is designed for managers who want to give their company's business plan real meaning and real power. You will learn how to develop realistic action programs and responsibility plans for allocating scarce resources, installing workable monitoring and control systems and creating supportive policies and procedures.
MGT 369 Productivity Teams: Beyond Quality Circles  
This course on team-building in organizations goes beyond quality circles to build skills in teamwork, trust, and communication, emphasizing the "problem-solving team" process. This process helps managers develop team leadership skills to increase productivity and enhance motivation. It includes training and leadership skills for team managers and a checklist for assessing how well a team is working. This is a required course for all team leaders.

MGT 370 How to Deliver Winning Presentations  
This course will provide the student with a basic awareness of the steps necessary for making an effective oral presentation. It is designed for anyone who wants to reduce the fear of public speaking by learning how to deliver presentations.

MGT 372 Getting Results Through MBO  
An introduction to the basic concepts of MBO. The system of MBO is explained and evaluated. Topics included are: installing MBO, establishing objectives and measuring performance.

MGT 373 How To Manage by Objectives  
Covers the fundamentals, principles, and procedures of managing by objectives, its benefits, and its various applications. Serves as a practical operating guide for those who wish to introduce and develop the concept as a management system in their organization; and gives additional insight and alternative techniques to individuals already practicing managing by objectives.

MGT 374 Personnel Management  
The purpose of this course is to identify and correct common misconceptions about what personnel work involves. Topics such as human resource planning, staffing, appraisals, training, development, benefits, wage and salary administration, labor relations, and safety policies are explored.

MGT 375 Zero-Base Planning and Budgeting  
Designed to help managers and top executives lead an entire company toward a results-based system. Topics covered are key terms, planning, decision packages, ranking, implementation, administration, problems, and solutions.

MGT 377 Fundamentals of Finance and Accounting for Nonfinancial Managers  
Designed to provide the manager with an understanding of finance. It is a practical way for a manager to become more effective and valuable.

MGT 378 Project Management  
An overview of the basic ideas behind Project Management. Topics include the ideal flow of power within an organization, the who and when of planning, the need for project control documentation, the benefits of in-contract service, the step-by-step approach to decision making, the steps for budgeting, and the development of systems engineering on a project, and the main tasks to be performed by the procurement, contracts, and the construction sections.

MGT 379 The Write Words  
This course aims at helping students recognize the areas in their word choice and usage that need improvement so that they can develop a more concise, straightforward writing style. Although the lesson focuses on business letters, you can apply the strategies and suggestions to any form of written business communication. A computer-based course.

MGT 380 Getting It Write  
This course takes a look at how to approach the task of writing by presenting the following: (1) make clear the intent of the document; (2) take into account the knowledge and attitudes of the intended reader; (3) get the ideas down on paper quickly; (4) organize the ideas; and (5) polish the writing so that it clearly and completely communicates the intent to the reader. A computer-based course.

MGT 381 How Successful Women Manage  
An overview of the various functions and processes involved in management. Will discuss possible explanations for women's slow rate of progress in attaining managerial positions. It is enlightening and an absolute "must" for any woman who is considering entering or is now a part of the managerial area. This course has computerized chapter quizzes for your interaction. The final test is also on the computer.

MGT 382 Dealing With Difficult Behavior  
This course teaches the student specific communication, motivational, and conflict resolution approaches that seasoned managers have proven effective time and time again. In addition, this program will show how to avoid difficult behaviors by instituting positive work strategies, structures, and values before problems develop. Uses audio-cassettes.

MGT 383 Training for Productivity  
Examines what is needed to motivate all employees to work more effectively, efficiently and productively. Participants will learn the techniques, strategies, and skills necessary to identify problems that training can solve; create a climate that encourages and supports the self-directed worker; and structures a training or development program.

MGT 384 How To Write A Marketing Plan  
This course is designed for small business owners, marketing managers, product managers and others responsible for the development of a marketing strategy. The course teaches you how to use all the tools available to create a marketing plan that is right for your product line, department, or company.

MGT 385 Using Microcomputers in Marketing  
This course is a practical, hands-on course that helps the student understand and use the software you need, easy and efficient. It is designed for marketing managers who want to use microcomputers to solve marketing problems. The course uses interactive computer activity.

MGT 386 Getting Results With Time Management  
Focuses on finding time-wasting activities and how to maximize time use. Emphasis is on situational analysis, identifying problem areas and ways to correct. Audio tapes, and an exercise workbook accompany the text.

MGT 388 Time Management for Managers  
This interactive video course covers time management, decision-making, delegating, scheduling, and managing interruptions.

MGT 389 How to Write a Business Plan Using Lotus  
This unique course combines a comprehensive self-study course, and easy-to-follow manual and an instructional data disk. It takes you through the entire planning process, from analyzing a company's marketing, organizational and financial positions, to setting achievable goals and objectives for the future.

MGT 390 Building Memory Skills  
This course uses audiotapes and a textbook to help apply the skills that increase ability to obtain and utilize information. The result of using improved listening and memory skills will help realize leadership potential.

MGT 392 How To Develop Dynamic Leadership  
This course focuses on three styles of leadership. Includes self-analysis to determine one's personal style of leadership, style comparison, and the consequences of each leadership posture, suggestions for change of style, and the process for moving toward dynamic leadership.

MGT 393 How To Manage Stress  
This course is computer-interactive and will help you learn how to handle daily stress. In the five disettes learners will become aware of positive and negative stress and how to use relaxation techniques, positive attitudes and lifestyles to relieve stress.

MGT 394 Managing Labor Relations  
Designed to provide an understanding of labor relations. Emphasizes labor relations today, negotiations, bargaining power, and advance planning. This course will cover every aspect of dealing with a union.

MGT 395 Negotiating Your Way to Success  
Covers how to approach every labor situation confidently, how to sway the opponent with timing and association techniques; how to make concessions without losing, how to communicate position clearly and precisely, and how to identify the opponent's real but often hidden needs. This course is a technical approach highlighting on industrial labor relations.

MGT 397 How to Improve Writing Skills  
Provides all the tools needed to put ideas across effectively in any business situation. Topics include writing memos and proposals, non-verbal communication and making presentations.

MGT 398 Using Mathematics As a Business Tool  
A computer-aided instruction course designed to increase familiarity with formulas and calculations most frequently used in business. Participants will learn to apply various ratios to test a company's strength, use statistical tools to present results more accurately, forecast more reliably, and assess the viability of a project through break even analysis.
MGT 399  The Executive Guide to Commercial Law
2(2-0)
Explains negotiating steps necessary to produce a legally enforceable contract. Contractual promises made to employees or outside contractors, the conditions under which a contract can be legally voided, and liability under employment contracts.

OFFICE SYSTEMS
Program Director: Dr. Mildred L. Williams

The goal of Office Systems is to anticipate the needs of business and industry by providing quality education in training or updating skills of office professionals, including administrative assistants, secretaries, word processors, receptionists, data entry specialists, and court and conference reporters. To achieve this goal, Office Systems is continually researching and implementing new ideas to provide up-to-date, innovative learning methods to offer traditional classroom instruction, hands-on training or state-of-the-art equipment, desktop publishing, computer-aided instruction (CAI), self-paced learning, and seminars. The rapid advances in office automation have changed the nature of many office positions; therefore, all programs in Office Systems have been designed to provide individuals with the expanded knowledge and technical skills which are being demanded in today's business world at entry or advanced levels. Long range plans for the 1990s are being made to provide its students with skills assuring them of employability in the present as well as in the future.

The need is great in the business world, the Office Systems has recruited the aid of advisory committees who are totally involved in each of its programs. Office Systems is extremely sensitive and listens to the advice of its advisory committee members who, because of their experience and role in the business world, greatly contribute to the excellence of the curricula offered by Office Systems.

To perfect the quality of training, Office Systems offers an internship program designed to give its students practical applications to classroom training. Participants in the internship program receive on-the-job experience in local businesses, government, or industry while earning college credit. In addition, overseas internships are being developed to broaden the scope of experience of students in Office Systems.

Office Systems offers several Associate Degree curricula designed for individuals desiring comprehensive training in preparation for employment in the professional office field. An Associate Degree requires the successful completion of a minimum of 90 credits.

Certificate of achievement curricula requiring the successful completion of a minimum of 45 credits are designed for persons desiring basic skills for rapid entry into the labor market.

Students desiring to enroll in courses offered by the Office Systems program area will find the courses identified as follows:

BUS: Business
CCR: Court and Conference Reporting
DE: Data Entry
IWP: Information/Word Processing

General curricula guides for each curriculum offered by Office Systems are available in the Counseling offices and the Program Area office in Office Unit 2B. The student is encouraged to discuss his or her particular educational background and requirements with an advisor from Office Systems.

Administrative Assistant
This Associate Degree curriculum offers opportunities to those persons who want responsible office positions in other than the secretarial areas. Successful graduates of this program are equipped to handle effectively the functions of most offices. The program provides for adequate skills to succeed in entry level positions, and incorporates the business understanding and management training necessary for advancement to supervisory positions. Formerly Office Management Program. (Curriculum Code 425)

Automated Office Specialist
This Certificate curriculum is designed for the individual who may have had previous secretarial or office clerical education and experience who desires to update training and skills for the new automated office environment. Special emphasis is given to computer usage for word processing and other applications, and writing skills that will provide information for the decision-making process within an administrative office position. Writing skills are also developed to allow for improved communications. (Curriculum Code 417)

Court and Conference Reporting
The Court and Conference Reporting curriculum is an Associate Degree curriculum presented in eight terms, including the summer term. In addition to preparing students to meet State certification requirements, this program prepares students for positions as court reporters, conference reporters, hearing examiners, legislative reporters, and general free-lance reporters. The program provides instruction in machine shorthand, computer-aided transcription, technical, legal and medical dictation and vocabulary, as well as in core skills. The curriculum begins each fall and spring term. (Curriculum Code 415)

Data Entry Specialist
The Certificate curriculum is designed to provide business, industry, and government with improved information flow. Students will be trained on various equipment and are prepared in legal and medical utilization in automated office procedures and basic data processing skills. Students will be prepared for multi-vocational skills leading them to positions such as typist, record clerk, data entry operator, etc. (Curriculum Code 421)

Executive Secretary
The two-year Executive Secretary curriculum will prepare the student for placement in the many interesting and challenging positions in business, from secretary to executive secretary. The curriculum provides the skills and knowledge necessary for entrance-level jobs and sufficient background in related areas to enable the serious graduate to advance rapidly. Varied teaching techniques are used. (Curriculum Code 435)

Information/Word Processing Associate Degree
This curriculum provides students with intensive training in skills needed for the automated office as well as skills basic to any office. The graduate of this two-year curriculum will have instruction in machine transcription, the use of the microcomputer for word processing, spreadsheets, databases, and management communications. In addition, an office simulation program is designed to enable students to move rapidly on their career path. In addition, sufficient background in related areas of business is provided so that the graduate may meet the needs of modern business and accept the opportunities provided in this exciting field. (Curriculum Code 418)

Information/Word Processing Certificate
This one-year certificate curriculum is designed for those individuals who want to develop entry-level skills in typewriting, machine transcription, and word processing applications on the microcomputer, as well as receive training in other skills basic to any office. (Curriculum Code 419)

International Administrative Assistant
This Associate Degree curriculum is designed to prepare office professionals to succeed in transacting international business. Students in the International Administrative Assistant curriculum will become familiar with different cultures and their ways of doing business and will be encouraged to learn other languages. Skills acquired in this program prepare students for administrative entry-level positions and incorporate the business understanding and management training necessary for advancement to supervisory positions. (Curriculum Code 426)

Legal Secretary
An Associate Degree curriculum which provides the student with the skills and knowledge necessary to manage the office of an attorney. It develops an understanding of the specialized legal vocabulary and the production of legal documents, in addition to providing secretarial skills. (Curriculum Code 440)

Medical Secretary
This Associate Degree curriculum provides basic secretarial skills and the technical knowledge and understanding necessary for competence and self-confidence in this specialized field. Graduates of this program may find employment in hospitals, medical offices, clinics, or other health related institutions. (Curriculum Code 445)

Medical Transcriptionist
This one-year Certificate curriculum concentrates on the knowledge of medical terminology and machine transcription skills in preparing for entry level transcription positions found in medical offices, hospitals, clinics, and other health related institutions. (Curriculum Code 423)

Office Support
The one-year general clerical curriculum is designed for those students who want to develop or increase the basic skills necessary for entry level jobs in the modern office. Further courses may be taken leading to an Associate Degree. (Curriculum Code 420)

Records and Information Management
Students completing this Associate Degree curriculum will be prepared for a position as a records department or center as a records employee or manager. Students will learn manual and electronic methods of filing, storage, and retrieval. Some courses will use the microcomputer applications. The field of records management is growing rapidly and increasing in importance due to the rapid explosion of information. (Curriculum Code 427)

Stenographer, Gregg Shorthand
This Certificate curriculum provides instruction in skills and abilities for entry level positions requiring shorthand. Students completing this program will be qualified for a variety of office positions as well. Students may elect to continue their studies for an Associate Degree in the secretarial program. (Curriculum Code 430)
BUS 100 College Typewriting I 4(4-0)
This course is designed to teach the typewriter keyboarding process in addition to developing speed and accuracy on straight-copy materials. Personal and business correspondence, and other skills will be taught. A basic skill level of 54-61 wpm is developed.

BUS 101 College Typewriting II 4(4-0)
Prerequisite: BUS 100 or previous typing. This course is designed to improve the speed and accuracy of typing straight-copy materials together with learning tabulation, manuscripts, footnotes, business letters, and special communication forms. Performance levels range from 40 to 51 wpm.

BUS 102 College Typewriting III 4(4-0)
Prerequisite: BUS 101. This course emphasizes individual skillbuilding exercises as well as refining skills in language arts, editing, proofreading, formatting, composing, priority setting, and working under pressure with interruptions. Students will complete office simulations using the electronic typewriter.

BUS 104 College Gregg Shorthand I 4(4-0)
This course teaches principles of Gregg shorthand and basic business vocabulary and is offered for students who have had no previous Gregg shorthand experience. A minimum performance level of 50 wpm for one minute at 95 percent accuracy is required before advancing to Shorthand II.

BUS 105 College Gregg Shorthand II 4(4-0)
Prerequisite: BUS 104 or previous shorthand. This course continues the application of principles learned in Shorthand I in addition to developing speed and accuracy in taking dictation and completing transcription. Students with Gregg shorthand experience gained at other schools or colleges should restrict their skill building in this course. A minimum performance level of 70 wpm for two minutes at 95 percent accuracy is required before advancing to Shorthand III.

BUS 106 College Gregg Shorthand III 4(4-0)
Prerequisite: BUS 105. This course emphasizes skills developed in Shorthand I and II in addition to developing greater ability in taking and transcribing dictation at a performance level of 80 wpm for three minutes at 97 percent accuracy level.

BUS 107 Business Calculating Machines 1 or 2 credits
Prerequisite: BUS 117 or previous math. This course teaches basic mathematical operations on the 10-key adding machine, printing calculator, and/or the electronic display and electronic printing calculator. The amount of credit allowed is dependent upon the number of machines the student learns to operate.

BUS 114 College Speedwriting I 4(4-0)
Students will learn an alphabetic shorthand. The minimum performance level for dictation and transcription is 56 wpm for two minutes at 95 percent accuracy before the student is eligible for Speedwriting II.

BUS 115 College Speedwriting II 4(4-0)
Prerequisite: BUS 114. This course is designed to build speed and accuracy. The minimum performance level for a 2.0 is 70 wpm for three minutes at 96 percent accuracy. Completion of this course will give students a marketable office skill.

BUS 117 College Business Mathematics 4(4-0)
Prerequisite: MTH 009 or placement. This course can be taken as a classroom lecture or as a laboratory course in the business math lab. Both methods of teaching develop skill and accuracy in basic mathematical computations as found in accounting, finance, management, and marketing.

BUS 119 Practical Office Procedures 3(3-0)
Prerequisite: BUS 101. Clinical office procedures and responsibilities and the study and evaluation of effective personality traits are areas of emphasis.

BUS 121 College Typewriting Skillbuilding 3(3-0)
Prerequisite: Previous typing. This course is designed to develop speed and accuracy at the typewriter. The diagnostic approach is used to individualize the development of speed and accuracy for each student. Once problem areas are identified, specific drills are implemented to correct weaknesses.

BUS 150 Professionalism in the Office 3(3-0)
A professional and personal development course designed to help individuals prepare themselves to become successful through the development of qualities and techniques.

BUS 153 College Gregg Shorthand Refresher 2(2-0)
Prerequisite: Knowledge of Gregg shorthand. This course is designed to refine and increase existing skills in Gregg Shorthand with emphasis upon producing accurate transcripts. Previous knowledge of shorthand is necessary.

BUS 160 College Refresher Typing 3(3-0)
Prerequisite: Previous typing. This course is designed to develop greater skill and accuracy in typing for students who have keyboard familiarity. Basic typing techniques are reviewed. Activities: Typing personal and business correspondence, centering materials, typing tables, and typing from rough draft copy.

BUS 199 Medical Vocabulary 3(3-0)
This course provides instruction in spelling, definition, structure and concepts of medical terms from various fields of medicine. On-campus students receive instruction and drill in medical vocabulary in the classroom as well as using laboratory materials. Off-campus students receive the same course through classroom instruction only.

BUS 203 Administrative Office Procedures 3(3-0)
Prerequisite: Sophomore status or secretarial experience. The topics of the course include typing, reprographics, composition, handling incoming and outgoing mail, postal and shipping services, telephonic and telegraphic services, records management, planning meetings and conferences, collecting, processing, and presenting business data, handling financial statements, payroll and legal responsibilities, and office automation.

BUS 204 Business Communications 4(4-0)
Prerequisite: Typing ability and WRI 119. This course emphasizes the organization of clear, concise, easy-to-understand documents by application of basic business theory in communication. On-campus sections will use the microcomputer or electronic typewriter to prepare and edit documents in addition to classroom instruction. Off-campus sections will receive classroom instruction only.

BUS 206 Legal Vocabulary 3(3-0)
This course utilizes basic legal terminology of general and specialized areas of law. It defines legal terms and their uses in legal contexts.

BUS 207 Medical Terminology and Transcription 4(2-4)
Prerequisite: BUS 199. WRI 119, and typing speed of 50 wpm. This course is designed to develop skill in defining, writing and transcribing medical words, phrases, and reports with the use of a transcriber and the electronic typewriter or the microcomputer.

BUS 208 Business Theory for Professional Secretaries 2 sections, 4 credits each (Fall and Winter Terms) 4(0-0)
This course is designed to prepare the student for the International Certified Professional Secretary examinations or to improve his or her knowledge and skills in four areas of the exam: Office Administration and Technology, Communication Applications, Behavioral Science in Business, and Economics and Management.

BUS 209 Legal Transcription 3(1-4)
Prerequisite: BUS 102 and BUS 206. This course is designed to teach the principles of legal transcription. Students will learn to transcribe accurately, neatly, and quickly cassette dictation consisting of letters, memorandums, and legal papers. In addition, they will develop familiarity with the knowledge of general legal terminology and procedures for production of legal documents.

BUS 210 Administrative Development for Office Personnel 3(3-0)
This course provides instruction in the administrative functions of an office: coordination and supervision of personnel; writing and editing reports; making speeches; attending meetings; and handling correspondence. Emphasis is given to the development of the leadership role for office personnel.
BUS 215  Records and Information Management I  4(4-0)
This course includes managing the creation, protection, storage, and disposition
of business records; alphabetic indexing; the foundation of other storage
methods; selection of proper equipment; and procedures for the operation
and control of filing methods and systems.

BUS 216  Records and Information Management II  3(3-0)
Prerequisite: BUS 215 and previous typing. This course is a concentrated study
of planning, organizing and controlling records and information management
systems and emphasizes the role of records management in integrated
information systems. The student will use the microcomputer to complete some
exercises.

BUS 217  Micro-Records  2(2-0)
This course is designed to familiarize the student with every aspect of
micrographics as it pertains to records management and information control.
Concentration will be on term definitions, microforms and how they are used;
actual article application; equipment used and operation of indexing tech-
niques; and development of business, educational, and professional applica-
tions.

BUS 218  Records and Information Management
Database Office Applications  3(3-3)
This course provides practical, hands-on experience using a database man-
gagement system with IBM microcomputers. Activities will allow the student
to create, maintain, search and retrieve records, and create reports. The current
software, Q & A, also provides experience using artificial intelligence.

BUS 220  Office Systems Management  3(3-0)
This course emphasizes the principles of office management, the role of the
office as a service center as well as part of a system, structure, and design;
workflow, procedures; job analysis; and issues relating to personnel selection,
salary administration, productivity, and budget.

BUS 221  Human Resource Management
in the Automated Office  4(4-0)
This course explores the psychological, sociological, and technological factors
affecting the quality of personnel interaction in the work environment, spe-
cifically the automated office.

BUS 222  Advanced Medical Terminology and Transcription  3(2-2)
Prerequisite: BUS 207. This course is designed to develop skill in defining,
writing, and transcribing words and phrases commonly used in medical
language. Actual medical reports from hospitals are utilized for transcription.

BUS 230  Office Seminar  5(5-0)

BUS 231  Office Seminar  1(1-0)

BUS 232  Office Seminar  2(2-0)
Classroom instruction is given on special topics of current interest. The length
of the seminar determines the amount of "P-2" credits earned. Contact Office
Systems at 483-1587 for specific seminar topics.

BUS 233  Professional Secretary Seminar  5(5-0)

BUS 234  Professional Secretary Seminar  1(1-0)

BUS 235  Professional Secretary Seminar  2(2-0)
Seminars in the Professional Secretary series are designed to prepare employed
secretaries and students who are nearing the end of their course of study
for the Certified Professional Secretary and the Professional Legal Secretary
examinations. The topics for each seminar will vary. Contact Office Systems
at 483-1587 for specific seminar topics.

BUS 240  Office Internship (Fall Term)  3(0-6)

BUS 241  Office Internship (Winter Term)  3(0-6)

BUS 242  Office Internship (Spring Term)  3(0-6)
Approval for an office internship is based on the successful completion of
basic business courses. Placement is made in an approved training station
to earn credits for satisfactory work performance and earn wages for work
performed. Occupational interests of the student are considered along with
his or her background or having completed related classes in determining
employment arrangements.

BUS 275  International Business Communication  4(4-0)
The need to communicate effectively across national barriers is becoming
more acute as the United States competes increasingly in the international
business arena. This course is designed for managers and office support
personnel to help familiarize them with the dynamics of communication in
business interactions on an international level. The content of the course deals
with various business cultures, language barriers, and protocol.

BUS 276  Critical Issues in Office Automation  3(3-0)
Office automation is the revolutionary use of the office in processing information
efficiently in order for management and workers to use this information
effectively in building a more competitive business and a desirable working
place. This course will examine the range of issues which affects office
automation. These issues cover technological, organizational, global, and social
questions.

Court and Conference Reporting (CCR)
Office Systems
Division of Business

First Year CCR—Day Sequence Courses

CCR 101  Machine Shorthand I  6(5-0)
This course involves basic touch shorthand computer-compatable, conflict-free
theory taught on a stenograph machine. The emphasis is on notetaking
accuracy.

CCR 102  Machine Shorthand II  6(8-0)
Prerequisite: CCR 101. This course provides additional computer-compatible,
conflict-free touch shorthand theory. The emphasis is on notetaking accuracy.

CCR 103  Machine Shorthand III  6(8-0)
Prerequisite: CCR 102. This course includes speed building with shorthand
skills up to 120 wpm on jury charge and literary. Work begins on Q & A.

CCR 104  Machine Shorthand IV  6(8-0)
Prerequisite: CCR 103. This course involves advanced speed building up to
140 wpm on literary and jury charge. Q & A practice will continue.

Second Year CCR Classes

CCR 201  C.A.T. Xscribe  2(1-2)
Prerequisite: CCR 211. This course is designed to give students hands-on
experience with computer-aided transcription for the court reporter with
emphasis on editing on the computer.

CCR 211  Q & A I  4(4-0)
Prerequisite: CCR 104. This course includes two-voice testimony dictation and
machine shorthand speed building up to 140-160 wpm.

CCR 212  Q & A II  4(4-0)
Prerequisite: CCR 211. This course includes two-voice testimony dictation and
machine shorthand speed building up to 150-180 wpm.

CCR 213  Q & A III  4(4-0)
Prerequisite: CCR 212. This course includes two-voice testimony dictation and
machine shorthand speed building up to 180-200 wpm. It also introduces
four-voice testimony.

CCR 214  Q & A IV  4(4-0)
Prerequisite: CCR 213. This course includes two-voice testimony dictation and
machine shorthand speed building, as well as four-voice testimony dictation
with speeds up to 210-230 wpm.

CCR 221  Jury Charge I  2(2-0)
Prerequisite: CCR 104. This course includes jury charge dictation and machine
shorthand speed building up to 130-140 wpm.

CCR 222  Jury Charge II  2(2-0)
Prerequisite: CCR 221. This course includes jury charge dictation and machine
shorthand speed building up to 150-160 wpm.

CCR 223  Jury Charge III  2(2-0)
Prerequisite: CCR 222. This course includes jury charge dictation and machine
shorthand speed building up to 170-180 wpm.
CCR 224  Jury Charge IV  2(2-0)
Prerequisite: CCR 223. This course includes jury charge dictation and machine shorthand speed building up to 190-200 wpm. Legal opinion and argument dictation is also included.

CCR 231  Literary I  4(4-0)
Prerequisite: CCR 104. This course includes literary dictation and machine shorthand speed building up to 110-130 wpm.

CCR 232  Literary II  4(4-0)
Prerequisite: CCR 231. This course includes literary dictation, and machine shorthand speed building up to 130-150 wpm.

CCR 233  Literary III  4(4-0)
Prerequisite: CCR 232. This course includes literary dictation and machine shorthand speed building up to 150-170 wpm.

CCR 234  Literary IV  4(4-0)
Prerequisite: CCR 233. This course includes literary dictation and machine shorthand speed building up to 170-190 wpm.

CCR 240  Court Internship  4(L-6)
Prerequisite: Q & A speed of 200 wpm and Literary speed of 150 wpm. A student placed in this internship will spend 10-12 hours per week with an experienced shorthand reporter writing and transcribing notes into proper form concerning courtroom trials, conferences, hearings, or depositions.

CCR 250  Introduction to Medical and Technical Testimony  4(4-0)
Prerequisite: Program Area approval or CCR 104 and BUS 199. Reinforces knowledge of medical vocabulary through classroom drills, writing and transcribing two-voice testimony, which may be encountered by court, deposition, or hearings reporters. Dictation speeds are 110-130 wpm.

CCR 251  Medical/Technical Testimony I  2(2-0)
Prerequisite: CCR 250. This course includes medical and technical dictation and machine shorthand speed building. Dictation speeds are 130-150 wpm.

CCR 252  Medical/Technical Testimony II  2(2-0)
Prerequisite: CCR 251. This course includes medical and technical dictation and machine shorthand speed building up to 150-170 wpm.

CCR 253  Medical/Technical Testimony III  2(2-0)
Prerequisite: CCR 252. This course includes medical and technical dictation and machine shorthand speed building. A performance level of 180 wpm must be reached.

Data Entry (DE) Office Systems Division of Business

DE 101  Fundamentals of Data Entry  4(0-8)
Prerequisite: Typing 35-40 WPM, reading test. The basic concepts of data entry operations are learned on the IBM Personal Computer. Data entry, editing, and document handling skills are also developed in this course.

DE 102  Key To Diskette  4(0-8)
Prerequisite: DE 101. This course is directed toward the refinement of the skills attained in DE 101. The student will enter data onto a diskette, learn complex job layouts, and the use of program and data diskettes on the IBM 3742 Key Diskette. At the completion of the course, the student should have acquired the skills needed for employment.

DE 103  Advanced Data Entry—Visual Display Terminal  4(0-8)
Prerequisite: DE 102. Students will learn new types of formatting, more complex exercises, documentation handling on the microcomputer; and expand their knowledge of common formats of input and output devices for data entry.

Information/Word Processing (IWP) Office Systems Division of Business

IWP 101  Introduction to Office Automation  4(4-0)
This is a survey course of the principles, terminology, equipment, equipment selection criteria, and implementation procedures used in information/word processing technology as well as investigating career paths. A concept course—no "hands-on" experience is provided.

IWP 102  Proofreading  2(2-0)
The course is designed to teach proofreading and editing skills essential to the production of accurate and coherent business communications.

IWP 103  Keyboarding on the Computer  2(2-0)
This course will teach the basic keyboarding skills for the microcomputer operator. Emphasis is upon speed and accuracy. This course is designed for students having no previous typing experience.

IWP 105  Machine Transcription  4(4-0)
Prerequisite: BUS 101 and WRT 119. This course is designed for the production of machineable communications by using transcribers, recorded cassettes, and microcomputers. Development of proficiency in spelling, punctuation, grammar, and business vocabulary is emphasized.

IWP 130  Word Processing Seminar  5(5-0)

IWP 131  Word Processing Seminar  1(1-0)

IWP 132  Word Processing Seminar  2(2-0)

IWP 133  Word Processing Seminar  3(3-0)
Prerequisite: Typing ability. These seminars are designed to acquire or expand skills and abilities in the word processing field. One-half credit seminars cover specific functions on various software packages. One and two-credit seminars cover basic and advanced training for various software packages.

These word processing seminars are continually being developed and updated to offer the community the opportunity for an introduction to or an intensive refresher for a specific skill area. For more information, contact Office Systems at 483-1587.

IWP 150  Business Writing Review  3(3-0)
This telecourse is designed to develop crisp, concise, and accurate writing skills for business communications. Course includes review of grammar, punctuation, and spelling, as well as practice in preparing letters and reports which are interesting, persuasive, and clear.

IWP 205  Information/Word Processing Management  4(4-0)
This course will include identifying methods of developing a realistic, practical approach to anticipating and solving managerial problems. It also includes planning and organizing systems for implementing and maintaining word processing operations plus defining, reviewing, and examining the manager/supervisor's role.

IWP 213  Fundamentals of DOS for Information/Word Processing—Microcomputer  1(1-0)
This course is designed to introduce the student to the IBM Personal Computer and compatibles. Terminology associated with personal computer hardware and software will be discussed. The major emphasis will be placed on the student learning how to use the IBM Personal Computer Disk Operating System.

IWP 214  Fundamentals of Word Processing on the IBM Microcomputer—WordPerfect  4(4-6)
Prerequisite: BUS 101 or equivalent. This course is designed to develop a basic word processing skill on the IBM Personal Computer using IBM-Perfect software for the rapid production, revision, and retrieval of routine business documents, i.e., letters, envelopes, memorandums, tables, reports, short manuscripts, and repetitive documents.

IWP 215  Fundamentals of Word Processing on the IBM Microcomputer—DisplayWrite 4  4(4-6)
Prerequisite: BUS 101 or equivalent. This course is designed to develop basic skills on the IBM Microcomputer using DisplayWrite 4 software for the rapid production, revision, and retrieval of routine business documents, i.e., letters, envelopes, memoranda, tables, reports, short manuscripts, and repetitive correspondence.

IWP 216  Business Graphics and Spreadsheet on the Microcomputer  4(4-4)
Prerequisite: IWP 214 or IWP 215. This course combines in-depth training in business graphics and spreadsheets. The course is divided into two parts with a combination of learning applications at the end of the course.

IWP 219  Office Automation Applications I—WordPerfect  4(4-6)
Prerequisite: IWP 214. This course is designed to expand on word processing skills previously developed in IWP 214.
IWP 220  Office Automation Applications I—DisplayWrite 4  4(4-6)
Prerequisite: IWP 215. This course is designed to expand word processing skills previously developed in IWP 215, Fundamentals of Information/Word Processing on the IBM Microcomputer. Introduction to additional applications such as spreadsheets, graphics, calendaring, and communications will be given.

IWP 221  Office Automation Applications II  4(4-6)
Prerequisite: IWP 219 or IWP 220. This course is a simulation of skills previously developed in machine transcription, word processing, spreadsheets, graphics, calendaring, and communications. Introduction to additional applications such as database management and merging software packages will be taught.
Lansing Community College

Business and Industry Institute

International Programs
Business Development Services
Management Development Center
Small Business Development Center
THE BUSINESS AND INDUSTRY INSTITUTE

Executive Director: Dr. Charles H. Bettin
Second Floor, North House

The purpose of the Business and Industry Institute is to serve as the college division with responsibility for business relationships between Lansing Community College and business, industry, government and labor organizations in the college's service area. The BI meets its responsibility by coordinating the College's comprehensive program of account executive contacts, by carrying out targeted outreach activities and by developing partnerships between business and industry and the College.

The Business and Industry Institute, in cooperation with the College's other divisions, serves as a broker for specialized and customized education and training services from across the College. The Institute works with the other divisions to ensure that the customized training services provided by each division of the College are flexible and timely in meeting the needs of business, industry, labor and government.

To further strengthen the College's customized training programs and services, the Institute is responsible for the development and operation of a computerized business and industry information system. This college-wide system is used by all college divisions to monitor and record the College's activities in business and industry outreach, customized training and fee-for-service programs.

The BI further supports the Commitments and Goals of the College by providing direction and coordination to the College's programs in international education. International academic work/study programs in Japan, an extensive network of sister college affiliations across the world, and intensive language and culture programs in Asian Languages provide international educational opportunities for Lansing Community College faculty and students. The Business and Industry Institute, in recognition of the competitive international marketplace and world interdependence, provides additional programs and services focusing on international trade, culture and language to meet the education and training needs of business and industry.

Divisional Objectives

The program and service objectives of the Division are:

To serve as the College's primary outreach and contact organization to business, industry, government, labor and non-profit organizations through the coordination of a program of account executive contacts within the community.

To function as a broker between the College and the community for customized education and training programs and services.

To build and maintain close working relationships between Lansing Community College and business, industry, government, labor and non-profit organizations.

To promote the growth and development of business and industry and the overall economic development of the community through business development and counseling services and through community access to customized training and education services for business development.

To coordinate the development and delivery of a group of specially designed short-term courses and seminars, through the Management Development Center, which addresses the management development training needs of private and public sector employees.

To develop and maintain a computerized information system which records and monitors the College's outreach and customized training activities with business and industry.

To promote the recognition of a competitive world marketplace and world interdependence by providing programs and services which assist students as they develop skills in Asian culture and language.

To assist business and industry in the identification and assessment of opportunities for the development of international business and trade.

To develop and maintain ongoing relationships with foreign-based companies and affiliated sister colleges to provide international academic program opportunities to students and faculty.

To serve as a resource across the College as each division develops a program of activities to internationalize its curricula.

Customized Training Support Council

The brokering and outreach functions of the BI are supported by the Customized Training Support Council. This Council is comprised of representatives from across the College, and provides a systematic method of insuring that College resources are used most effectively and efficiently to meet the education and training needs of business, industry, labor and government.

Through the Customized Training Support Council, divisional representatives will share information and develop strategies to deliver education and training which directly meets the long and short-term needs of the community. The Council will function as an information sharing and planning body and not as an academic forum or as an arbiter body.

The objectives of the Customized Training Support Council are as follows:

1) Maintain open communication among college divisions to maximize efforts in outreach and service to business, industry, government and labor.

2) Develop an information retrieval data base (Outreach and Contact Information System).

3) Serve as a clearinghouse for outreach and service information.

4) Design prototype format for such things as company contracts, pricing, billing, etc.

Representatives involved in business, industry and government outreach and customized training in each of the divisions will be assigned to the Council. The individuals will be appointed by the respective Vice President/Dean/Executive Director from each division. Each of the College's divisions will participate:

- Arts and Sciences Division
- Business Division
- Business and Industry Institute
- College Services
- Student Personnel Services Division
- Technology and Applied Sciences Division
- Telecommunication and the Arts Division

Direction and leadership for the Council will be provided on an on-going basis by a planning/oversight group composed of Vice President, College Services Division; Executive Director, Business and Industry Institute; Dean, Business Division; and Dean, Technology and Applied Sciences Division.

Account Executive Services

The Business and Industry Institute maintains close working relationships with Mid-Michigan based employers by directing the activities of a group of Lansing Community College account executives. These members of the BI staff make direct contacts at targeted organizations in the College's service area. By providing this direct link, account executives can efficiently broker the programs and services of each of the College's divisions. This unique outreach concept provides business and industry with College contacts who have years of practical experience. These account executives, working with representatives from other College divisions, will assess training needs and identify customized training solutions which can enhance productivity.

The Business and Industry Institute utilizes the customized training and instructional development resources of the Management Development Center and the Small Business Development Center.

INTERNATIONAL PROGRAMS

Director: Dr. Tai Sung Kim
First Floor, Rogers Carrier House

International Programs at Lansing Community College provides a broad array of opportunities which assist the College as it progresses toward accomplishing its strategic goal of internationalizing its curriculum. The International Programs Office develops and coordinates the College's overseas study programs, coordinates activities between the College and its sister colleges overseas, and coordinates activities of scholars visiting LCC from other countries. In addition, International Programs develops and offers special training programs for foreign students and faculty and provides curriculum development and instruction in Asian languages.

Program Areas:

- Applied Languages: Asian
- Overseas Programs
- Asian Resource Center
- Special Projects

Applied Languages - Asian
Program Director: Dr. Tai Sung Kim

The major activities of Applied Languages involve the development and delivery of instruction in Asian languages. Specialized instructional programs have been developed in the Japanese language for Lansing Community College.

ORGANIZATION OF RESOURCES

The Business and Industry Institute is uniquely organized to serve as the outreach and brokering organization for the customized training programs and services of Lansing Community College. The Business and Industry Institute work closely with other college divisions and departments to assure that BI staff are up-to-date regarding the new courses and programs offered by the College. Through this close working relationship, College staff are also immediately made aware of the specialized and evolving education and training needs of Mid-Michigan employers. By facilitating the activities of specialized interdivisional outreach teams, made up of faculty and staff from across the College, the Business and Industry Institute has access to the college resources most able to meet the needs of business, industry, labor and government.
students in the Japan Adventure and Japan Horizon programs. An intensive Japanese language and culture program, the Japan Culture and Language Academy, has been developed. This program utilizes selective admissions and an emphasis on reading, writing, listening and speaking the language.

COURSE DESCRIPTIONS

Japanese (JPN) Applied Languages

JPN 101 Elementary Japanese I 5(5-0)
Designed to provide students with basic knowledge of the Japanese language for practical communication. Develops skill in speaking, reading, writing, and listening. Also provides information concerning the everyday life and culture of Japan. Practical vocabulary and topics of conversation are emphasized. Cassette tapes accompany the textbook to aid comprehension.

JPN 102 Elementary Japanese II 5(5-0)
Continuation of JPN 101. Designed to provide students with basic knowledge of the Japanese language for practical communication. Develops skill in speaking, reading, writing, and listening. Also provides information concerning the everyday life and culture of Japan. 60 Chinese characters, Kanji, are introduced. Students learn additional, more advanced grammatical structures and expressions. Practical vocabulary and topics of conversation are emphasized. Cassette tapes accompany the textbook to aid comprehension.

JPN 103 Elementary Japanese III 5(5-0)
Continuation of JPN 102. Designed to provide students with basic knowledge of the Japanese language for practical communication. Develops skill in speaking, reading, writing, and listening. Also provides information about culture and everyday life in Japan. Previously acquired knowledge and skills are refined, and ability to communicate in Japanese is increased. 90 additional Chinese characters, Kanji, are introduced. Cassette tapes accompanying the textbook aid listening comprehension.

JPN 111 Japanese Culture & Language Academy I 7(6-2)
A three-term sequence course in contemporary Japanese. Designed to provide students with a solid foundation in the essentials of the Japanese language for practical communication. Develops skills in listening comprehension, speaking, reading and writing, as well as providing information about the everyday life and culture of Japan. Emphasizes pronunciation, practical vocabulary, and essential grammar for expressing oneself in Japanese and for understanding native speakers of Japanese. Students also learn the Hiragana and Katakana syllabaries.

JPN 112 Japanese Culture & Language Academy II 7(6-2)
Second of the three-term sequence course in contemporary Japanese. Designed to provide students with a solid foundation in the essentials of the Japanese language for practical communication. Develops skills in listening comprehension, speaking, reading and writing, as well as providing information about the everyday life and culture of Japan. Emphasizes pronunciation, practical vocabulary, and essential grammar for expressing oneself in Japanese and for understanding spoken Japanese. Students also review the Hiragana and Katakana syllabaries and learn approximately 80 Kanji (Chinese characters).

JPN 113 Japanese Culture & Language Academy III 7(6-2)
A continuation of JPN 112. Third of the three-term sequence course in contemporary Japanese. Designed to provide students with a solid foundation in the essentials of the Japanese language for practical communication. Develops skills in listening comprehension, speaking, reading and writing, as well as providing information about the everyday life and culture of Japan. Emphasizes pronunciation, practical vocabulary, and essential grammar for expressing oneself in Japanese and for understanding spoken Japanese. Students also review the Hiragana and Katakana syllabaries and learn approximately 100 Kanji (Chinese characters).

JPN 187 Intensive Conversational Japanese III 4(4-0)
Continuation of Intensive Conversational Japanese II. Designed for persons who have some prior knowledge of Japanese and wish to improve their conversational skills. Students learn practical vocabulary and essential grammar to converse in Japanese. Selected features of Japanese culture will be introduced throughout the course via audio-visual presentations and informal lectures.

JPN 201 Intermediate Japanese I 5(5-0)
Part one of a two-term sequence in contemporary Japanese. Designed to give students advanced training and practice in the four language skills—speaking, listening, reading, and writing. Includes a thorough review of basic Japanese grammar, vocabulary, the introduction of intermediate grammar, intensive vocabulary building, paragraph writing, and small group discussions. Students learn to read and write 120 additional Kanji (Chinese characters). Prerequisite: JPN 103 or equivalent. 5 credits.

JPN 202 Intermediate Japanese II 5(5-0)
Part two of a two-term sequence in contemporary Japanese. Designed to give students advanced training and practice in speaking, listening comprehension, reading and writing. Includes intermediate level grammar, intensive vocabulary building, composition, group discussion and student presentations on contemporary issues related to Japan and Japanese. Students learn 120 additional Kanji (Chinese characters). Prerequisite: JPN 201 or equivalent.

Overseas Programs

The main purpose of the College's overseas programs is to develop and coordinate overseas academic work/study programs and sister college relationships. Through these work/study programs, Lansing Community College students are provided with opportunities to work, travel and study overseas.

Japan Adventure

In cooperation with the Biwako Kisen Steamship Company, the College has developed the Japan Adventure, a unique four-term academic work/study program in Japan. The students selected for the Japan Adventure program begin their study in Lansing and continue for a nine-month period at the College's educational center, "Michigan House," in Otsu, Shiga Prefecture, Japan. Their studies focus on the Japanese language and culture, history, society and business practices. Participants earn one year of academic credit. While in Otsu they work in hospitality services aboard the "Michigan," a cruise ship owned by Biwako Kisen Steamship Company.

The selection process for the Japan Adventure program is competitive and begins each year in the summer with completion in October. The Japan Adventure group begins its year of study in January. For further information contact the International Programs Office.

Japan Horizon

The Japan Horizon program is a nine-month program of intensive study in the Japanese culture and language. Participants in the Japan Horizon program study Japanese language and culture for one term in Lansing before beginning a six-month period of intensive immersion language study in Japan. While in Japan the student will be in the College's Japan Horizon Education Center in Sakai City, Japan. The students also work in a restaurant complex operated by Keihin Fisherman's Wharf Corporation, at the foot of Japan's "Golden Gate" Bridge.

The Japan Horizon program selects two groups of students for study in Japan each year. The selection process is competitive and occurs during the spring and fall of the year. For further information contact the International Programs office.

Asian Resource Center

The Asian Resource Center is operated by the International Programs Office in order to provide instructional and reference materials on Asian language and culture to faculty and staff from K-12 school districts and community colleges throughout the state. A catalog of resource materials is circulated to school districts and colleges involved in internationalizing their courses and curricula, and materials are circulated to school districts on a loan basis.

Special Projects

The active involvement of the College in international programs has created numerous special international projects on a contracted basis between the College and interested outside organizations. These projects are developed on a fee-for-services basis and provide further opportunities for MCC faculty and staff to become involved in international learning activities.
For example, the International Programs Office has coordinated special training programs for Faculty Fellows from polytechnical colleges in the People’s Republic of China and has developed special summer English as a Second Language (ESL) and culture programs for LCC sister-college students from Japan and Korea. Overseas study tours for business and industry leaders have been arranged, and state-wide conferences on international education have been organized for participants from colleges and universities across the state.

**BUSINESS DEVELOPMENT SERVICES**

Director: Michael Pontz

Business Development Services coordinates a program of account executive contacts between Lansing Community College and business, industry, labor and government agencies in the Mid-Michigan area. College account executives, working with Business Development Services, regularly contact community-based employers in both the private and public sector to provide access to Lansing Community College programs. Through its role as a broker of Lansing Community College customized training programs and services, the full scope of the College’s education and training resources are available to the community through Business Development Services staff. In addition to its role as a broker of services from across the College, the education and training services and programs of the Management Development Center and the Small Business Development Center are available for program development and delivery. Specialized training activities include: customized management training, small business development services, management seminars, community/business leadership development and foreign trade-related training.

**Program Areas:**
Management Development Center
The Small Business Development Center
Outreach Services for Business, Industry and Government

**MANAGEMENT DEVELOPMENT CENTER**

Program Director: Majorie Zibbel

The Management Development Center supports private and public sector employers in their quest for productivity by presenting professional training programs responsive to their needs. Training programs consist of specially designed seminars covering a wide range of topics including the following:

- Management
- Supervisory Skills
- Personnel Administration
- Marketing and Sales
- Train the Trainer
- Leadership Development

Management Development Seminars (MDC)
Management Development Center
Business and Industry Institute

Open-to-the-Public Management Seminars are designed for those who want to improve their supervisory and management skills, who are interested in becoming more effective as trainers, or who wish to learn how to better manage their own careers. Scheduling information will appear in the term schedule book.

**MDC 902 Teaching Through Demonstration**

2(2-0)

This seminar will introduce participants to a variety of learning barriers they may encounter and will present them with a strategy for teaching skills in a one-on-one training situation. Participants are given opportunity to apply the strategy in simulated teaching encounters.

**MDC 903 Train-the-Trainer**

3(3-0)

The new trainer or seasoned trainer can use this seminar to re-think training methods and techniques and to develop new ones. The emphasis is on the “how-tos” of training with ample opportunity to practice training-related skills.

**MDC 904 Instructional Media for Trainers**

2(2-0)

This seminar introduces trainers to media available to make instruction more effective. Transparencies, charts, slides, videotapes, and audiotapes and other media will be discussed. Participants will analyze their own instructional programs and identify the appropriate media to use.

**MDC 905 Using Media**

2(2-0)

This seminar helps trainers use media more efficiently. Participants will be able to set up, operate, trouble-shoot, and disassemble basic audio-visual equipment used in training programs.

**MDC 911 Telemarketing**

1(1-0)

This seminar is designed to make people more productive over the phone. The seminar teaches telephone selling skills to help one make better use of time and increase sales.

**MDC 912 Customer Relations**

1(1-0)

Creating good customer relations and improving the image of the organization. Increase motivation through a positive attitude, effective communication with different types of customer personalities, handling complaints, and strategies for meeting needs to satisfy customers.

**MDC 913 Marketing Within the Organization**

5(5-0)

Managers often need to get information, gain cooperation, or exchange resources with others in their organization. This seminar will discuss the strategies to accomplish these internal marketing activities.

**MDC 923 On-The-Job Negotiating**

1(1-0)

This seminar will give participants a basic understanding of negotiation in their daily lives. Participants will assess their own negotiation skills and learn what to consider when planning for negotiation. Specific techniques will be presented, and participants will have an opportunity to determine which ones match their personality types.

**MDC 924 Self-Motivation**

1(1-0)

This seminar will help participants become more self-aware and develop habits which will aid them in becoming more self-confident and therefore more highly motivated toward personal achievement.

**MDC 926 Managing Discipline**

1(1-0)

This seminar will cover the process of discipline from the approach that it can be managed positively if certain conditions are present in the relationships that exist between managers and employees.

**MDC 927 Modern Manager Skills**

1(1-0)

To be effective, today’s manager has to understand and implement sound management practices. This seminar will help managers develop a motivated, productive workforce.

**MDC 928 Effective Presentations**

2(2-0)

Whether it’s one-on-one or in front of a group, creating a successful image is critical in getting ideas across. This seminar will increase participant’s professional impact by learning how to express what they already know.

**MDC 929 Leading Effective Meetings**

1(1-0)

Effective meetings are vital to the productivity and morale in an organization, and largely depend on the multiple skills of a leader. The purpose of this seminar is to help participants develop the planning, coordination and management skills necessary for leading effective meetings.

**MDC 932 Employee Selection Interviewing**

1(1-0)

This seminar will train participants to conduct employment interviews and to interpret the results fairly, accurately, efficiently and economically. The principles and techniques applied in selection are applicable to coaching, career development, performance appraisal and disciplinary interviews.

**MDC 933 Effective Delegation**

1(1-0)

Participants will learn how to use expectations, clear instructions and feedback to increase the effectiveness of delegation as a supervisory skill for increasing productivity.

**MDC 943 Problem Solving/Decision Making**

1(1-0)

Designed for business people who use the steps in problem solving in order to improve their decision making capability. Opportunity is provided to practice the skills used in problem solving and decision making.

**MDC 944 Collaborative Problem Solving**

1(1-0)

Participants will learn a system for acting quickly, decisively and carefully in solving problems on-the-job. It will deal with specific recurring and frustrating situations which limit productivity.
MDC 958 Developing High Performance Teams 1(1-0)
This seminar will review the following concepts: how groups develop, membership roles, managing a work group, and group problem-solving methods. It will also focus upon how trust, cooperation, communication, and shared goals can make groups more effective.

MDC 959 Developing Instructional Materials 1(1-0)
Prerequisite: Program Area approval. This seminar will teach participants how to design, develop, and evaluate instructional programs. Hands-on experience with task analysis, developing test items, giving feedback and creating outlines is included.

MDC 960 Guiding the Training Process 1(1-0)
Prerequisite: Program Area approval. Participants learn necessary skills for facilitating a training program. Those skills include asking and answering questions, administering and de-briefing exercises, constructive feedback, small group discussion, demonstration and prompting trainees.

MDC 961 Advanced Developing Instructional Materials 1(1-0)
Prerequisite: Program Area approval. This seminar will simulate the activities of instructional developers and decide in order to test their materials. Prototype testing and revision principles will be covered.

MDC 964 Employee Performance Appraisal 1(1-0)
Although feedback systems are important, many companies report dissatisfaction with their performance appraisal systems. This seminar will examine the design of a performance appraisal system which is based on sound management theory.

MDC 965 Telephone Techniques 1(1-0)
By combining effective telephone techniques with a awareness of necessary communication skills, the telephone user will enhance the professional image of his/her company.

MDC 972 Job Descriptions and Performance Standards 1(1-0)
This seminar will review and discuss procedures for obtaining job information. It is designed to allow participants to actually design their own job descriptions. Participants will also learn the importance of a job description in developing performance standards.

MDC 973 Assessing Leadership Potential 1(1-0)
Self-perception influences behavior. This seminar will give participants an opportunity to gain personal data about themselves which will provide insight into their leadership strengths and weaknesses, and their management style.

MDC 974 Managing Problem Employees 1(1-0)
Participants will learn what they can do about employees who perform their jobs unacceptably and who are "problems" to supervisors.

MDC 975 Supervising for Motivation 1(1-0)
Supervisors must understand the internal motivators of their employees in order to provide the environment and the work which enhances motivation. Participants will learn the key steps in improving employee motivation, productivity and morale.

MDC 977 Communications for Results 1(1-0)
It takes a lot of communication skill to reach an understanding between an employee and a manager as to what needs to be done. Participants will learn about many techniques which can assist in communicating effectively.

MDC 978 Time Management in Business 1(1-0)
Time management problems originate from many sources. Participants will learn to plan long- and short-term goals for their work, personal and family life. They will also develop scheduling and prioritizing skills.

MDC 982 Managing Your Career 1(1-0)
This seminar is designed to acquaint participants with personal career planning techniques. The program stresses becoming successful in one's current position first and then building long-term career goals.

MDC 984 How to Get Things Done 1(1-0)
This seminar is designed for first-level supervisors, office managers and administrative assistants. It will sharpen communication skills and time management capabilities as well as encourage an Action Plan.

MDC 985 Coaching Work Performance 1(1-0)
To properly utilize coaching principles, an understanding of how people learn best must be considered. Participants will learn the skills of active listening, self esteem, communications, and developing Action Improvement Plans.

MDC 986 Moving Up in Management 1(1-0)
This seminar helps participants, prior to, or now in the role of the supervisor, to analyze their desires and skills. By knowing what skills they possess or what ones they need to develop, the participant can examine the resources and plan the necessary steps to achieve their goals.

MDC 988 Stress Management 1(1-0)
The diversity and complexity of the modern work world subjects everyone to increasing amounts of stress. Participants will learn the skills required to prevent or alleviate the effects of job tension, stress, and burn-out.

MDC 989 Employee Relations for the Manager 1(1-0)
Designed to provide an overview of supervisory practices that enhance relations and union and non-unionized employees. Focus is on interactions of supervisors with employees and on the supervisory skills needed to maintain effective work performance.

MDC 994 Written Communication Skills for the Manager 1(1-0)
This seminar will offer participants the opportunity to learn how to practice their writing skills in regard to clarity, speed and image. It will also offer practice in critiquing and editing another person's writing.

MDC 996 Skills Training for Supervisors 3(3-0)
Since managing involves getting work done through other people, it requires a great deal of skill in working with people. This seminar stresses essential management behaviors and practical skills, which the supervisor uses daily.

MDC 997 Interpersonal Skills for Managers 3(3-0)
This seminar explores factors affecting interpersonal relationships on the job, and the process used to get and give information, including the role of self-disclosure.

Small Business Management (SBM) Management Development Center Business and Industry Institute

SBM 250 Starting a Business 1(1-0)
A seminar to familiarize participants with resources that can help them start a business. It will also increase awareness of major concepts and fundamental principles dealing with types of businesses, types of business ownership, capital sources, a business plan, credit, marketing and site location.

SBM 252 Financial Management for Small Business 1(1-0)
A seminar to familiarize participants with the fundamental principles and major concepts of financial management, including analyzing and applying the information from balance sheets, income statements and cash flow statements in order to determine key ratios and break-even.

SBM 254 Systems for Record Keeping 1(1-0)
A seminar to introduce and increase participants' working knowledge of the accounting process and the maintenance of accounting records, including ledgers, income statements, and preparation for income tax time.

SBM 256 Legal Considerations for Small Business 1(1-0)
A seminar to familiarize participants with the legal considerations of business formation, consumer protection, employee relations, competition and benefit packages.

SBM 258 Evaluating and Buying a Business 5(5-0)
A seminar to familiarize participants with the statistics needed, legalities involved, and the evaluation of the sellers' books in order to determine the business' worth.

SBM 260 Developing a Marketing Plan 1(1-0)
A seminar to familiarize participants with the marketing concept in order to develop a marketing plan which identifies the target customer, determines a marketing mix (promotion, product, price, and place), and examines uncontrollable environmental variables.

SBM 262 Promotion Overview 1(1-0)
A seminar to familiarize participants with the why, where, when, and how to advertise.
SBM 264  Customer Relations for Small Business  1(1-0)
A seminar to familiarize participants with successful strategies for satisfying
the needs of customers which include: increased motivation through a positive
mental attitude, effective communication with different types of customer
personalities, and sensitive handling of customer complaints.

SBM 270  Computers in Small Business  1(1-0)
A seminar to familiarize participants with the fundamentals of selecting and
using a computer in the small business environment.

SBM 272  Employment Practices for Small Business  1(1-0)
A seminar to familiarize participants with aspects of employment procedures
including interviewing, evaluating, and the law.

SBM 276  Writing a Business Plan  1(1-0)
A seminar to familiarize participants with the concept of business planning;
including a review of the planning process and how to develop and maintain
a business plan with the emphasis on the use of small computers to assist
the process.

SBM 278  Franchising  1(1-0)
This seminar will acquaint participants with the considerations and background
information needed to buy a franchise. Participants will also increase their
awareness of what franchising entails.

SBM 280  Business Planning  .5(1-0)
This seminar will teach participants how to use their business plan as an
on-going management tool to reduce risk and enhance chances for success.
Includes the use of small computers to assist in the process.

SMALL BUSINESS DEVELOPMENT CENTER
Program Director: Deleski Smith
12965 Old Central Building

The purpose of the Small Business Development Center is to promote new
business development by providing consulting, customized training and in-
formation services to those interested in starting or improving the management
and operation of a small business. The Lansing Community College Small
Business Development Center was established in cooperation with local
business, government and community agencies, and is supported by funding
from federal and state grants and by Lansing Community College.

The objectives of the Small Business Development Center are:
To contribute to the economic growth and development of the Mid-Michigan
area by assisting the small business community.
To function as a centralized resource to assist small business management.
To provide information concerning available services and education programs
relating to small business operations.
To provide seminars to familiarize participants with principles relating to
small business development and management.

Where appropriate, clients will be referred to agencies and organizations
which can provide specialized assistance for starting and/or improving the
operation of a small business in Michigan.
DIVISION OF TECHNOLOGY AND APPLIED SCIENCES

Dean: William Darl
2201 Gammon Vocational Technical Building

The programs offered by the Division of Technology and Applied Sciences are developed to serve a diversity of needs across the community. In addition to the career training needs of individuals, the programs are designed to meet the particular needs of labor, industry, business and government, and of other groups wishing to participate in seminars, courses, or other educational activities. With the exception of a few continuing education courses offered by the Department of Health Careers, all courses offered by the Division can be applied to a certificate or degree curriculum. However, students who wish to take individual courses may do so without being required to enroll in either a certificate or degree curriculum.

The Division of Technology and Applied Sciences includes a listing of all courses offered by the Division. However, from time to time, courses are added to satisfy changing student needs. For this reason, anyone desiring a course not listed in the catalog should contact a Department Director or the Dean for further information.

Divisional Purposes
The purposes of the Division of Technology and Applied Sciences are:

1. To meet specific individual needs through single courses, combinations of selected courses, one-year certificate curricula, and associate degree career curricula.
2. To provide an opportunity for students to prepare for today's increasingly complex jobs, to become qualified for a more advanced position, or to perform better in their present job.
3. To provide an opportunity for industries, governmental agencies, hospitals, or other organizations wishing specific courses to help their employees perform better in their assigned tasks or to become qualified for advancement.
4. To provide an opportunity for apprentices to enroll in joint "on-the-job" training with local employers and related training at the Community College.
5. To provide fee-for-service contracts for companies wanting specific training.

Organization of Resources
In addition to the College staff and full-time faculty, the career programs feature a team of adjunct faculty who are working full-time in careers related to their teaching specialties. This group includes not only technical specialists but company executives and other experienced personnel.

The Division also utilizes advisory committees for all programs to ensure that the programs are state-of-the-art and meeting industry needs. Many programs require licensing or certification for graduates in order for them to become employed after completion of their programs.

The modern facilities and equipment in the Division make it possible for the students to receive training on equipment currently being utilized in industry.

Major Programs
The programs offered by the Division of Technology and Applied Sciences fall into six categories. The categories include (1) the Associate in Applied Science, (2) the Associate in Applied Science, General Technology, (3) the Certificate of Achievement, (4) community service, (5) transfer programs, and (6) apprenticeship.

Associate Degrees
As indicated above, the Division offers the Associate in Applied Science and the Associate in Applied Science, General Technology Degrees. To receive one of the Associate Degrees, a student must meet the following requirements:

1. Completion of course requirements of specific curricula for specialized study areas outlined in the curriculum guides of each curriculum or the requirements outlined in the R830 curriculum guide for the Associate Degree in General Technology.
2. Completion of a minimum total of 90 credits.
3. A grade point average of 2.0 or better.
4. A minimum of 90 credits earned in attendance at Lansing Community College.
5. Completion of four credits of American Government and State and Local Government (SS 104 or SS 105).

Currently, an Associate Degree may be earned with a major emphasis in any one of 29 technical fields and 7 health fields (a total of 36 career fields). These fields are listed as well as in the subsequent sections of this catalog devoted to the offerings of the departments of the Division of Technology and Applied Sciences.

Certificates
Certificates are designed to meet specialized needs of students in certain career fields. Such curricula vary in duration from a few days for an intensive workshop to an extensive program requiring additional work beyond the Associate Degree. These curricula, like the Associate Degree curricula, are described in the departmental sections of this catalog. The following is a list of certificate curricula:

- Auto Body Repair
- Auto Mechanics
- Auto Body Repair
- Auto Mechanics
- Computer Repair Technician
- Dental Assistant
- Dental Business Assistant
- Die Maker Tool and Die Maker
- Diesel Engine Technology
- Emergency Medical Technician
- Heating and Air Conditioning
- Industrial Drafting
- Machine Repair
- Machinist Toolmaker
- Medical Assistant
- Millwright
- Pipefitter
- Practical Nursing
- Residential Builder
- Respiratory Therapy
- Small Engine Repair
- Truck Driver Training
- Welding

Certificates of Achievement
Currently, the Division of Technology and Applied Sciences offers a total of more curricula leading to a Certificate of Achievement. Fifteen of these curricula are in general technical fields and 6 of these are in the health field (a total of 21 career fields). Like the Associate Degree curricula, these Certificate of Achievement curricula are listed in the subsequent sections of this catalog devoted to the offerings of the departments of the Division.

Community Service Programs
The programs are designed individually to satisfy broad segments of the community. These may include educational offerings within industry or in other locations within the College service area. Recently, these offerings have been in the form of seminars designed for companies or groups of individuals. They have been intended to help upgrade the working effectiveness of individuals by the improvement of skills and the addition of new skills. Usually consisting of lectures or laboratory experience or a combination of both, these seminars have stressed the importance of human relations, as well as technical skills.

**AUT 100-AUT 121**

**AUTOMOTIVE TECHNOLOGY**

**Director:** Walter E. Hayward  
223-F Gannon Vocational Technical Building  
Automotive Technology offers courses under the following course codes:

- **ATS:** Automotive Seminars  
- **AUT:** Automotive Technology  
- **TDT:** Truck Driver Training  
- **THE:** Truck and Heavy Equipment

Automotive Technology is designed to develop service technicians able to diagnose, repair, and service today's automobiles. This series of courses will provide an individual with the job-entry qualifications needed to compete for employment in the automotive service trade. Rapidly changing technology, fuel efficient vehicles, emission considerations, and mechanic certification laws all require today's technician to be educationally prepared to face these challenges. Students will gain practical experience by doing diagnosis and repair procedures on operable vehicles in the laboratory courses.

Automotive Technology offers three Associate Degree curricula and a series of classes leading to a Certificate of Achievement. The three Associate Degree curricula are:

- Associate in Applied Science—Automotive Technology  
- Associate in Applied Science—Automobile Repair  
- Associate in Applied Science—Diesel Engine Technology

**Associate is Applied Science Degrees**

The Associate Degrees in Applied Science for Automotive Technology are designed to develop technicians who will be able to diagnose, repair, and service all components of today's automobiles. General requirements for an Associate's Degree are set forth in the section devoted to the Division of Technology and Applied Sciences. Curriculum guides for specific programs resulting in the Associate Degree are available in the Dean's Office, Technology and Applied Sciences, GVT Room 220. Students in this program are provided the opportunity to practice diagnostic and repair skills in a specialized area of their choice.

**Certificate Curricula**

The Automotive Certificate of Achievement curricula are designed to provide a student with job-entry skills for employment in the automotive service trade. The certificate curricula consist of practical courses providing the skills needed to compete in today's job market. Curriculum guides are also available in the Automotive Department office.

**Courses completed in Automotive Technology Certificate curricula are transferable toward an Associate Degree of similar nature.**

**COURSE DESCRIPTIONS**

**Automotive (AUT)**  
Automotive Technology  
Division of Technology and Applied Sciences

**AUT 100 Auto Service I**  
Basic tools and equipment, safety, lubrication, exhaust systems, precision measurement and basic oxy-acetylene welding. The student is required to spend a minimum of twenty hours per term reviewing slides and tapes of the program. Lab fee.

**AUT 110 Auto Electrical Theory**  
Prerequisite: AUT 100 or concurrent. A theory and application course covering batteries, starters, generators, regulators, ignition systems, and chassis wiring. Lab fee.

**AUT 111 Tune-Up I**  
Prerequisite: AUT 110 or Department approval. A lecture-laboratory course covering fuel systems, equipment operations, and tune-up procedure. Lab fee.

**AUT 112 Tune-Up II**  
Prerequisite: AUT 111. A lecture-laboratory course with emphasis on actually tuning engines, introduction to on-board computers and emission controls. Lab fee.

**AUT 120 Auto Drive Train**  
Prerequisite: AUT 100 or concurrent. Servicing clutches, manual transmissions, universal joints, differentials, rear axles. Lab fee.

**AUT 121 Automatic Transmission I**  
Prerequisite: AUT 120. A basic course for automatic transmission repair. Lab fee.

<tbody>
<tr>
<td>AUT 122-123</td>
<td>Automatic Transmission II-III each</td>
<td>4(2-4)</td>
<td>Prerequisite: AUT 121 and AUT 122. Advanced automatic transmission repair. Lab fee.</td>
</tr>
<tr>
<td>AUT 130</td>
<td>Auto Engines</td>
<td>4(2-4)</td>
<td>Prerequisite: AUT 106 or concurrent. Provides a background in principles, design, operation, and service procedures of gasoline engines, and preparation for practical experience in engine maintenance and service. Lab fee.</td>
</tr>
<tr>
<td>AUT 133</td>
<td>Small Engines I</td>
<td>3(2-2)</td>
<td>Basic course covering servicing and repair of two-cycle and four-cycle small gas engines. Each student is required to supply a small engine for laboratory work. Lab fee.</td>
</tr>
<tr>
<td>AUT 134</td>
<td>Small Engines II</td>
<td>3(2-2)</td>
<td>Prerequisite: AUT 132. A continuation of Small Engines I with more emphasis on laboratory work with larger, more complex engines and accessories. Each student is required to supply a small engine. Lab fee.</td>
</tr>
<tr>
<td>AUT 135</td>
<td>Chain Saw Repair</td>
<td>3(2-2)</td>
<td>Basic course for chain saw owners and mechanics covering basic maintenance, safe operation, tune-up, troubleshooting, major repair, chain oilers, and chain sharpening and repair. Lab fee.</td>
</tr>
<tr>
<td>AUT 136</td>
<td>Marine Engine Repair</td>
<td>3(2-2)</td>
<td>Covers the basics of outboard engine servicing including carburetion, ignition, and troubleshooting malfunctions. Lab fee.</td>
</tr>
<tr>
<td>AUT 137</td>
<td>Motorcycle Repair I</td>
<td>3(2-2)</td>
<td>Covers the theory of operation of a motorcycle and basic service procedures, including tune-up, wheel service, brake service, and drive mechanism. Lab fee.</td>
</tr>
<tr>
<td>AUT 140</td>
<td>Auto Brakes</td>
<td>4(2-4)</td>
<td>Prerequisite: AUT 100 or concurrent. Servicing both drum and disc brakes, including adjustment, shoe replacement, drum and disc turning, pad replacement and hydraulic system service. Lab fee.</td>
</tr>
<tr>
<td>AUT 150</td>
<td>Auto Suspension</td>
<td>4(2-4)</td>
<td>Prerequisite: AUT 100 or concurrent. Instruction in wheel alignment, wheel balancing, and front end part replacement procedures. Lab fee.</td>
</tr>
<tr>
<td>AUT 160</td>
<td>Auto Air Conditioning</td>
<td>4(2-4)</td>
<td>Prerequisite: AUT 116. Instruction in the operating principles of auto air conditioning systems and repair procedures. Lab fee.</td>
</tr>
<tr>
<td>AUT 165</td>
<td>General Auto Mechanics</td>
<td>3(2-2)</td>
<td>Automobile owners will gain a better understanding of the automobile and be able to make some repairs. Areas covered include preventive maintenance, tune-ups, brakes, engines, electrical systems, drive lines, front end, and steering. Lab fee.</td>
</tr>
<tr>
<td>AUT 166</td>
<td>General Auto Mechanics and Women</td>
<td>3(2-2)</td>
<td>Student will gain fundamental understanding of how an automobile works and will be able to perform basic maintenance and repair procedures. Lectures cover engines, fuel and exhaust, electrical systems, cooling and lubrication, transmission, steering, brakes and suspension. Lab work includes: checking and changing oil filters, belts, hoses, tires, bulbs, fuses; demonstration/identification of automotive components; use of basic hand tools.</td>
</tr>
<tr>
<td>AUT 180</td>
<td>Auto Body Welding</td>
<td>4(2-4)</td>
<td>Presents metal welding and plastic joining procedures as they apply to auto body repair. Included in the metal portion are gas, spot, and wire feed welding, soldering, brazing, hammer welding, heat shrinking, and plasma arc cutting. The plastic section covers identification of weldable plastics, selection of appropriate welding procedures, repair of soft fascia, and vinyl repair. Lab fee.</td>
</tr>
<tr>
<td>AUT 181</td>
<td>Metal Finishing</td>
<td>4(2-4)</td>
<td>Prerequisite: AUT 180 or concurrent. Teaches basic sheet metal repair methods and the basic body shop tools and their proper use, along with typical materials used in body shops to fill and repair minor damaged panels. Lab fee.</td>
</tr>
<tr>
<td>AUT 182</td>
<td>Panel Repair and Replacement</td>
<td>4(2-4)</td>
<td>Prerequisite: AUT 181 and AUT 185. Instruction in repair of larger dented panels, with the emphasis on replacing panels. Lab fee.</td>
</tr>
<tr>
<td>AUT 183</td>
<td>Major Collision Repair</td>
<td>4(2-4)</td>
<td>Prerequisite: AUT 182. Emphasizes restoration of a collision-damaged automobile to its original condition, including estimating the total job, glasswork, and painting. Lab fee.</td>
</tr>
<tr>
<td>AUT 184</td>
<td>Frame Straightening</td>
<td>4(2-4)</td>
<td>Prerequisite: AUT 183. An introduction to the basics of frame straightening, covering aligning the frame or unibody to original specifications. Portable frame equipment is used to familiarize the student with frame straightening. Lab fee.</td>
</tr>
<tr>
<td>AUT 185</td>
<td>Painting I</td>
<td>4(2-4)</td>
<td>An auto painting course designed to teach basic refinishing procedures. The student must refinish at least one panel in acrylic enamel or acrylic lacquer by the end of the course. Lab fee.</td>
</tr>
<tr>
<td>AUT 186</td>
<td>Painting II</td>
<td>4(2-4)</td>
<td>Prerequisite: AUT 185. Advanced auto painting techniques for spot repair, color matching, and troubleshooting. Lab fee.</td>
</tr>
<tr>
<td>AUT 187</td>
<td>Painting III</td>
<td>4(2-4)</td>
<td>Prerequisite: AUT 186. Advanced auto painting techniques for refinishing a complete auto in enamel, and acrylic lacquer. Includes estimating the cost of materials and overhead costs of operating a paint shop. Lab fee.</td>
</tr>
<tr>
<td>AUT 188</td>
<td>Auto Body Repair and Painting</td>
<td>4(0-8)</td>
<td>Prerequisite: AUT 181 and AUT 185. A combined course of auto body repair and painting. Provides an opportunity to practice the techniques learned in Metal Finishing I and Painting I. Lab fee.</td>
</tr>
<tr>
<td>AUT 200</td>
<td>Basic Diesel Maintenance</td>
<td>4(2-4)</td>
<td>Covers theory of operation of both two- and four-cycle diesels, maintenance operation, model identification, systems maintenance including fuel system, lubrication system, cooling system, naturally aspirated, supercharged, and turbocharged intake systems, and their repair. Lab fee.</td>
</tr>
<tr>
<td>AUT 201</td>
<td>Advanced Diesel Maintenance</td>
<td>4(2-4)</td>
<td>Prerequisite: AUT 200. Theory and practice in maintenance and minor rebuilding of head assemblies and ancillary equipment (i.e., water pumps, air pumps, oil pumps, generator starters), tune-up and electrical systems, systems diagnosis, and troubleshooting. Lab fee.</td>
</tr>
<tr>
<td>AUT 202</td>
<td>Diesel Engine Rebuilding</td>
<td>8(4-8)</td>
<td>Prerequisite: AUT 201. Covers engine rebuilding, including proper disassembly procedures, inspection, and repair of diesel engine components. Emphasis is on proper engine analysis prior to overhaul and proper run-up on completion of overhaul. Lab fee.</td>
</tr>
<tr>
<td>AUT 203</td>
<td>Diesel Fuel Systems</td>
<td>4(2-4)</td>
<td>Prerequisite: AUT 201. A complete course on diesel fuel systems covering fuel classification, fuel system functions, pumps and injectors, proper diagnosis, troubleshooting, and rebuilding the complete fuel system. Lab fee.</td>
</tr>
<tr>
<td>AUT 210</td>
<td>Auto Electrical Theory II</td>
<td>4(2-4)</td>
<td>Prerequisite: AUT 110. Practical application of related instruction to supplement the student's on-the-job training. Includes generating and starting systems, batteries, schematic troubleshooting, power assist systems and wiring harnesses. Emphasis is on actual repair of electrical defects and components. Lab fee.</td>
</tr>
<tr>
<td>AUT 237</td>
<td>Motorcycle Repair II</td>
<td>4(2-4)</td>
<td>Prerequisite: AUT 137. A continuation of Motorcycle Repair I with emphasis placed on engine overhaul, transmission service and repair. Lab fee.</td>
</tr>
<tr>
<td>AUT 251</td>
<td>Suspension II</td>
<td>4(2-4)</td>
<td>Prerequisite: AUT 150. Includes McPherson Strut front suspension replacement or repair, McPherson Strut suspension alignment procedures, replacement of McPherson Strut type carriages, manual steering gears, power steering gears, linkage type power steering, power steering pumps, steering linkage repair or replacement, and alignment of steering system. The student will also gain knowledge of minor suspension and frame repair, and rack and pinion steering on Chrysler, Ford, and General Motors products. Lab fee.</td>
</tr>
</tbody>
</table>
Division of Technology and Applied Sciences 109 AUT 271-TDT 101

AUT 271  Engine Laboratory* 6(0-12)
Prerequisite: AUT 130 and Instructor approval. A laboratory course to develop trade entry skill. Lab fee.

AUT 272  Tune-Up and Electrical Laboratory* 6(0-12)
Prerequisite: AUT 112 and Instructor approval. A laboratory course to develop trade entry skill. Lab fee.

AUT 273  Brake Laboratory* 6(0-12)
Prerequisite: AUT 140 and Instructor approval. A laboratory course to develop trade entry skill. Lab fee.

AUT 274  Suspension Laboratory* 6(0-12)
Prerequisite: AUT 150 and Instructor approval. A laboratory course to develop trade entry skill. Lab fee.

AUT 276  Automatic Transmission Laboratory* 6(0-12)
Prerequisite: AUT 122 and Instructor approval. A laboratory course to develop trade entry skill. Lab fee.

AUT 280  Auto Service Laboratory* 6(0-12)
Prerequisite: AUT 106 and Instructor approval. A laboratory course for practicing skills learned in previous courses. Lab fee.

*Approval may be given to take any of these lab courses twice (for a maximum of twelve credits each lab course).

AUT 291  Automotive Internship 6(1-5)
Prerequisite: Director approval. Earn credits while employed as a technician in auto mechanics, auto body, or diesel heavy equipment repair. A pre-enrollment interview between student and coordinator is required; Director must approve training station and working conditions. Requires one hour per week of related instruction at the College.

Trucks and Heavy Equipment (THE)

Division of Technology and Applied Sciences

THE 220  Truck Drive Lines 4(2-4)
Theory and application of the power train system including clutches, torque converters, transmissions, and final drives. Lab fee

THE 240  Air Brakes 4(2-4)
Covers air brake systems, their component parts, troubleshooting, design and control systems. Lab fee

Truck Driver Training (TDT)

Division of Technology and Applied Sciences

Program Director: John Theroux
16350 East Dickman Road
Augusta, MI 49012
(616) 711-4126
Curriculum Code 580
12 credits
Lab Fee

TDT 101  Truck Driver Training
The Truck Driver Training curriculum consists of an intensive course intended to train drivers in the theory and practical application of driving heavy duty, tractor-trailer combination units—both in interstate and intrastate operation. Also, to increase the employment possibilities of persons who have never driven commercially and desire to enter this rewarding occupation. The curriculum emphasizes safe driving from start to finish.

Transportation Training prepares drivers for a career in the transportation industry. The curriculum includes studies of the following subjects: accident prevention and reporting, air brake systems, communications, customer and public relations, defensive driving course, driver's daily logs, driver's responsibility in maintenance of vehicle, driver situations, fire fighting, highway regulations and laws, D.O.T. safety regulations, map reading, registration, and State Taxes.

Driving range activities curriculum consist of exercises on the College driving range, combined with actual road training on public highways.

Because this program is designed for qualifying for licensing, and in order to assure maximum safety practices in truck driver training, specific admission requirements have been established. Applicants must be 18 years of age before admission, and a prospective student's prior driving record will be examined before program admission is granted. Two moving violations in the last three years is considered the maximum acceptable. The student's motor vehicle operating records will be verified through the Michigan Secretary of State.

Enrollment requirements for this program include a Department of Transportation physical examination, ability to communicate in the English language—both spoken and written—and a good driving record.

Students meeting the above criteria are placed on an acceptance list, and student program start dates are determined by application date.

A $100 deposit is required with the application to reserve a space in the class desired. This deposit is refunded on cancellation at least thirty days prior to the scheduled start date. If the student drops during the first week, the tuition refund (less $100 deposit) if the student drops during the first week.

Instruction covers a four-week period, 8 a.m. to 5 p.m., five days a week. Actual driving time is 120 hours with 40 hours of classroom instruction, and an extended road trip during the last week. Applicants must know how to shift a straight stick transmission and use a clutch, before attending, as shifting a truck requires double clutching.

Student housing is provided at the Truck Driver Training Facility at no extra charge. No cooking facilities are available, and students must provide their own bedding and laundry.

AVIATION TECHNOLOGY

Director: Gayland Tennis
108 Aviation Technology Center
Capital City Airport, Lansing

Aviation Technology offers instruction in the following areas, under the codes indicated:

AFG: General Maintenance
AFM: Airframe Maintenance
AFP: Aeronautical Maintenance
AFT: Flight Technology
AV: Avionics Technology

Professional aviation career training is conducted by Lansing Community College in the areas of Flight Training and Aviation Maintenance Technology. All associated Supporting Instruction such as preparatory ground schools, flight simulator and electronics technology is conducted at the Lansing Community College Aviation Center located at Lansing Capital City Airport.

Career counseling in all fields of professional aviation is a continuous process at the Aviation Center. Such counseling is designed to maximize students' potential and concurrently maintain an awareness of the needs of the aviation industry as future employers of our graduates.

Graduates of aviation technology at Lansing Community College have achieved excellent reputations in the aviation industry and such graduates can be found working virtually worldwide in all facets of this exciting career field. Graduates are also encouraged to continue their formal education through the medium of articulation agreements with numerous four-year baccalaureate degree-granting institutions. All Aviation Technology curricula at Lansing Community College are fully approved by the Federal Aviation Administration under curriculum codes 531 and 532.

Aviation Maintenance Technology (AFG, AFM, AFP)

Associate Degree in Aviation Maintenance Technology (AFG) (AFM) (AFP). This 24-month curriculum is designed to prepare the student for a professional career in aviation maintenance and it culminates in the issuance of an Associate Degree in Aviation Maintenance Technology. Graduates of this program should have achieved the qualifications required to (a) pass the Federal Aviation Administration Examinations; and (b) to acquire formal certification as an Airframe and Power Plant Mechanic.

During the training in Aviation Maintenance Technology, students will cover a wide variety of subjects dealing with airplanes: reciprocating engines, turbine, fuel systems, propellers, ignition, electrical systems, and hydraulic systems. This program requires approximately a total of 1900 hours of classroom instruction, shop work and laboratory experience, divided into the following three areas: airframe and powerplant mechanics general—400 hours; powerplant mechanic—750 hours; and airframe mechanic—750 hours. A waiting list is maintained for admission. The curriculum code for this program is 532.

Avionics Technology (AV)

Associate Degree in Aviation Electronic Maintenance Technology (Avionics). This curriculum is designed to prepare the student for a professional career in Avionics and it culminates in the issuance of an Associate Degree in Aviation Electronic Maintenance Technology. Graduates will have achieved the qualifications necessary for an aviation radio repairman certificate to be issued upon employment by a Federal Aviation Administration certified repair station.
Graduates will have passed the general radio telephone license examination, received hands-on bench maintenance and factory approved unit training. The Avionics student curriculum covers a broad range of material from aircraft drawings to weather radar. The electrical background includes DC analog circuits of auto pilots to input diodes in radar altimeters and weather radar. This curriculum requires approximately 2000 hours of classroom instruction, lab work and bench experience. The curriculum code is 557.

**Flight Technology (AFT)**

This curriculum provides training for students who want to become professional pilots. It includes the flight simulator and classroom training to prepare students for the written and practical tests for the Private, Commercial and Instrument pilot certificates.

The curriculum electives include courses leading to certification as multi-engine flight instructor, instrument flight instructor or multi-engine flight instructor. Additionally, for the more advanced student, ground and flight training is provided in preparation for the Airline Transport Pilot as well as ground training in preparation for the Flight Engineer Basic and Turbojet written exam.

Students are encouraged to take additional elective courses in general education to complete the requirements of 90 credits for an Associate Degree and to prepare them for transfer to a baccalaureate degree-granting institution. The course requirements for this program is 531.

The courses entitled Flight Training I through IX are designed to train the students in flight maneuvers, navigation, and instrumental flying skills required of the Commercial Pilot with an Instrument and Single engine rating seeking a career as a professional pilot. Each flight training course provides at least 30 hours of concentrated flight training.

Prerequisites for these courses include: department approval; possession of an FAA class II medical certificate. Additionally, the student must have attained the age of 17 prior to the start of course. All new and continuing flight students are required to meet with the Chief Flight Instructor prior to the beginning of the term to reserve flight times. Students are required to pay a deposit toward their lab fees for the upcoming term.

AFG 108 Engine Electrical Systems 3(2-3)

Prerequisite: Coordinator approval. Study, analysis, service and repair of aircraft electrical and pneumatic systems.

AFG 219 Ignition Systems 7(5-5)

Prerequisite: Coordinator approval. Study, analysis, service, and repair of aircraft engine ignition systems and components.

AFG 221 Propeller Systems and Controls 6(4-4)

Prerequisite: Coordinator approval. Covers study, analysis, service and repair of aircraft engine propellers, systems and components.

AFG 222 Lubrication Systems 4(3-2)

Prerequisite: Coordinator approval. Studies aircraft engine lubrication systems and components.
Division of Technology and Applied Sciences

AFP 223  Engine Fuel Systems I  1(1-1)
Prequisite: Coordinator approval. Studies and analyzes aircraft engine fuel systems and components.

AFP 224  Engine Fuel Systems II  4(3-3)
Prequisite: Coordinator approval. Covers aircraft engine carburetion requirements including the application, service, and repair of carburetors.

AFP 225  Induction and Exhaust Systems  3(2-2)
Prequisite: Coordinator approval. Study of aircraft engine induction and exhaust systems; the maintenance, repair, and inspection of these systems and components.

AFP 226  Reciprocating Engine I  7(5-5)
Prequisite: Coordinator approval. Presents theory, application and practices used in inspection, tear down, and preventive maintenance of reciprocating engines. Students conduct inspection, disassembly and reassembly of reciprocating engines.

AFP 227  Turbine Engine I  4(3-2)
Prequisite: Coordinator approval. Covers the theory of operation and design of various turbine engine powerplants.

AFP 228  Reciprocating Engine II  3(2-3)
Prequisite: Coordinator approval. Covers practical installation, removal, and troubleshooting reciprocating engines and their related systems.

AFP 229  Turbine Engine II  3(2-3)
Prequisite: Coordinator approval. Covers practical test cell installation and troubleshooting turbine engines and their related systems.

AFP 230  Engine Instrument Systems  3(2-2)
Prequisite: Coordinator approval. Covers study, analysis, service and repair of engine temperature, pressure and related system indicators.

AFP 231  Engine Troubleshooting and Inspection  4(3-3)
Prequisite: Coordinator approval. Covers inspection requirements of aircraft engines to meet established conformity and standards of airworthiness. Engine systems operation and adjustments are conducted by use of FAA and maintenance publications.

AFP 240  Aviation Maintenance Intern  5(5-0)
Part-time occupational internship in Aviation Maintenance Technology. The internships will be at work stations as established by the intern coordinator. Prerequisite: Program approval.

AFP 241  Aviation Lab Technician Intern  5(5-0)
Part-time occupational internship in Aviation Maintenance Technology. The internship will be at the main Aviation facility aircraft and powerplant laboratory. Prerequisite: Program approval.

AFP 242  Preventive Maintenance  3(2-2)
This course will cover the specific items allowed by the Federal Aviation Regulations with reference to preventive maintenance, its importance, its cost savings, its safety related implications and the responsibilities associated with such maintenance. Principles of operation of aircraft systems will be discussed.

Flight Technology (AFT)
Aviation Technology
Division of Technology and Applied Sciences

AFT 100  Private Pilot Ground School  6(6-0)
Develops knowledge, skills, and techniques for successful completion of the FAA private pilot written examination. Audio-visual tutorial system available for supplemental study.

AFT 114  Aviation Meteorology  4(4-0)
This course is designed to assist pilots in the interpretation and analysis of meteorology. Topics include general circulation, synoptic systems, the atmosphere, weather services and the practical aspects of applying the knowledge of meteorology to aviation. Explores actual case studies of aviation/meteorology accidents and includes weather statistics as related to aviation.

AFT 115  Aviation History  2(2-0)
How aviation has evolved into what it is today is covered in detail. In this relatively new field, progress has been based upon the accomplishments and failures of those who have devoted their careers to aviation. Through a series of films and lectures students will learn about the evolution of aviation from a dream to the science it is today.

AFT 150  Instrument Pilot Ground School  6(6-0)
Preparation for the FAA Instrument Rating written examination. Instrument ground school training in instrument flying practices and procedures.

AFT 156  Airline Transport Pilot Ground School  3(3-0)
This course prepares the student for the FAA Written Exam for Airline Transport Pilot (Part 121). The topics include Federal Aviation Regulations, Aviation Weather and Services, High Altitude Flight Planning, IFR Procedures, Turboprop Weight and Balance and Aircraft (Turbotax) Performance Charts.

AFT 157  VFR Refresher Course  1(1-0)
The course is designed to update the VFR private pilot in the areas of rules and procedures, aviation weather services and the use of Aircraft Performance Charts.

AFT 158  IFR Refresher Course  1(1-0)
This course is designed for the instrument rated pilot desiring recurrent training in IFR procedures and flight planning. It is especially directed at the pilot who has not recently flown in the IFR environment.

AFT 159  Aviation Law Seminar  0.5(75-0)
This seminar is an overview of the legal considerations relevant to aircraft ownership and operation, legal liability and contracts.

AFT 201  Flight Training I  6(6-0)
Prequisite: Coordinator approval, AFT 100 and AFT 211 concurrently. Develops the skills and knowledge to fly an aircraft on solo cross-country flights.

AFT 202  Flight Training II  6(6-0)
Prequisite: Coordinator approval, AFT 212 concurrently. Preparation for the private pilot license flight test.

AFT 203  Flight Training III  6(6-0)
Prequisite: Coordinator approval and Private Pilot Certificate: AFT 213 and AFT 150 or AFT 220 are taken concurrently during the term. Builds experience required for the Commercial Pilot License. Involves cross-country flying and instrument skills.

AFT 204  Flight Training IV  6(6-0)
Prequisite: Coordinator approval and AFT 203. AFT 214 and AFT 220 or AFT 150 are taken concurrently during the term. Involves cross-country flying and skills in commercial pilot maneuvers.

AFT 205  Flight Training V  6(6-0)
Prequisite: Coordinator approval and AFT 204. Commercial or instrument written exam passed. Trains the commercial pilot applicant in complex aircraft and IFR procedures.

AFT 206  Flight Training VI  6(6-0)

AFT 207  Instructor Flight Training  6(6-0)
Prequisite: Coordinator approval and Commercial Pilot Certificate with Instrument Rating. Prepares the commercial pilot with an Instrument Rating for the FAA Flight Instructor Rating. Highly concentrated flight training to provide the confidence, skill, knowledge, precision, and professional attitudes required of a licensed flight instructor.

AFT 208  Instrument Instructor Flight Training  2(2-0)
Prequisite: Coordinator approval and Flight Instructor Certificate. Prepares the Certified Flight Instructor (CFI) to achieve the Instrument Flight Instructor Rating.

AFT 209  Multicopter Flight Training  2(2-0)
Prequisite: Coordinator approval. Provides the commercially licensed instrument pilot with the opportunity to obtain a Multicopter Pilot Rating. May be tailored to provide pilot refresher or Airline Transport Pilot Rating training.

AFT 211  Flight Simulator I  2(1-1)
Dual instruction in the simulator ground training and ground instruction. The simulator provides instruction in flight basics of straight, level, turns, climbs and descents, plus basic VOR navigational procedures.
AFT 212  Flight Simulator II  2(1-1)
Prerequisite: AFT 211. Emphasizes VOR and ADF navigational procedures. Includes review of applicable private pilot maneuvers.

AFT 213  Flight Simulator III  2(1-1)
Prerequisite: AFT 212. Maneuvers and procedures necessary for an Instrument Rating. Emphasizes basic instrument flying including turns, climbs, descents, partial panel, steep turns, stalls, unusual attitudes and VOR navigational procedures.

AFT 214  Flight Simulator IV  2(1-1)
Prerequisite: AFT 213. Includes VOR and ADF orientation, tracking and intercepts; VOR and ADF holding patterns at station and intersection; VOR and ADF approaches.

AFT 215  Flight Simulator V  2(1-1)
Prerequisite: AFT 214. Reviews VOR and ADF holding, ILS front and back course approaches, ASR and no-gyro approaches, and out communication procedures.

AFT 216  Flight Simulator VI  2(1-1)
Prerequisite: AFT 215. In-depth study of all instrument maneuvers and procedures.

AFT 217  Multiengine Flight Simulator  2(1-1)
Prerequisite: Coordinator approval. Ten hours of instruction in the multiengine simulator and ten hours of related ground instruction. Introductory course limited to Instrument Rated Commercial Pilots (airplane) who desire to obtain the knowledge and skills necessary to pass a six-month instrument proficiency check in multiengine aircraft.

AFT 219  Multiengine Flight Simulator II  1(1-0)
Prerequisite: Instrument rating and Commercial Pilot Certificate (airplane). Offers 5 hours of instruction in the Flight Simulator multiengine simulator and 5 hours of related ground instruction. A 1 credit course for the Instrument Rated Commercial Pilot (airplane) who desires to obtain the knowledge and skills necessary to take the multiengine flight test.

AFT 220  Commercial Pilot Ground School  6(6-0)
Prerequisite: Private Pilot Certificate or Coordinator approval. This course assists the student in the transitional phase to professional pilot. Topics include: basic aerodynamic theory, aircraft operation and performance, meteorology, and navigation. Preparation for FAA commercial pilot (airplane) written exam.

AFT 221  Flight Engineer Basic & Turbojet  3(3-0)
This course prepares the applicant who holds a commercial license with an instrument rating, for the flight engineer (Basic and Turbojet—B727). FAA Written Exam.

AFT 225  Multiengine Instructor  2(2-0)
Prerequisite: Coordinator approval. This course provides instruction in preparation for the Flight Instructor Airplane, multiengine practical test. Subjects covered include a review of lesson planning and the normal and emergency operation of multiengine airplanes, with stress placed on aircraft systems. The effective performance and teaching of multiengine training maneuvers and emergency procedures will be emphasized. These include take-off, approach, and landing. Time required is 35 hours.

AFT 255  Flight Instructor Ground School  6(6-0)
Preparation for the FAA Flight Instructor and FAA Flight Instructor Fundamentals written examination. Prepare for the FAA Advanced Ground School Instructor's License.

AFT 259  Intern Flight Instructor  4(2-5)
Prerequisite: CFII Airplane. Single engine and Coordinator approval. This course provides practical flight instructor experience through temporary employment at the Aviation Flight Technology Center. Close supervision and training is given to student/instructor relationships, record keeping and certification processes. Students must have obtained Flight Instructor certification as a student at Lansing Community College. All applications for admission must be made to the Chief Flight Instructor. Openings are limited.

Avionics (AV)
Aviation Technology
Division of Technology and Applied Sciences

AVA 96  Aviation Orientation I  5(3-5)
This course provides an overview of aviation in general. Emphasis is placed on terminology, history, airframe design and basic aerodynamics. Different career fields in aviation are explored.

AVA 97  Aviation Orientation II  5(3-5)
This course includes familiarization with flight computers, navigational charts, instruments, and avionics aboard a small aircraft. The student will gain hands on experience with the avionics and flight computer. Each student will get the opportunity to operate an IFR flight simulator.

AVA 98  Aviation Orientation III  4(2-6)
This course provides insight into the basic drawing applications used in the production of aircraft components. An overview is provided of the basic hand tools and hardware used by aircraft mechanics and avionics technicians. The student will learn how to determine the weight and balance of an aircraft using formulas used by pilots, mechanics and avionics technicians.

AV 102  Aircraft Orientation  6(5-3)
Prerequisite: Communications skills test level 9/Department approval. Familiarize with airframe design. Basic drawing applications as used in aviation maintenance. Includes reading and interpretation of drawings and schematics used in production of aircraft components, training in the use of basic hand tools, and identification of the systems used in the production of aircraft hardware. Familiarization with aircraft instruments and controls, weight and balance problems, and maintaining required records.

AV 180  Avionics Installation  4(2-4)
Prerequisite: Program approval. This course includes familiarization with the various types of wires, plugs and jacks used in the construction of aircraft wiring harnesses. The student will develop skills in soldering and wire diagram reading. The student will become familiar with the rules, regulations and standard procedures used in the construction of aircraft wiring harnesses.

AV 190  Avionics Test Equipment  3(3-0)
Prerequisite: Department approval. AV 191 concurrently. Covers operational characteristics and proper operation of basic and specialized test equipment found in the Avionics industry. Student builds and calibrates own VOM. Equipment covered includes multimeters, oscilloscopes, power supplies, multifunctions, ramp and bench test generators, wattmeters, line domain reflectometers and spectrum analyzers.

AV 191  Avionics Test Equipment Lab  2(0-4)
Prerequisite: Department approval. AV 190 concurrently. AV 191 is a lab supplement for AV 190. Test equipment and theory discussed in AV 190 will be put to practical use in the laboratory. Student builds and calibrates own VOM. Common electronic and specialized avionics test equipment is used in the lab.

AV 195  Avionics Troubleshooting  3(3-0)
Prerequisite: Department approval. AV 196 concurrently. Familiarization with basic Superheterodyne receiver theory and operation using block diagrams and component level theory. Various logical troubleshooting techniques are discussed.

AV 196  Avionics Troubleshooting Laboratory  2(0-4)
Prerequisite: Department approval. AV 195 concurrently. AV 196 is a lab supplement for AV 195. Topics covered in AV 196 will be put to practical use in lab. Students construct, align and troubleshoot a 5-stage AM Superheterodyne Receiver in lab.

AV 205  Avionics Flight Line Testing  3(3-0)
Prerequisite: Department approval. AV 206 concurrently. A study of the electronics systems aboard modern aircraft, focusing on the flight line testing of such systems as VHF communications, VOR, LOC, ADF, ILS, Radar, Autopilots and others.

AV 206  Avionics Flight Line Laboratory  3(0-7)
Prerequisite: Department approval. AV 205 concurrently. AV 206 is a lab supplement for AV 205. A laboratory study of the electronics systems aboard modern aircraft, focusing on the flight line testing of such systems as VHF Communications, VOR, LOC, ADF, ILS, Radar, Autopilots and others.
AV 210 Avionics Communications 3(0-0)
Prerequisite: Department approval. AV 211 concurrently. A study of communications systems used in aircraft with emphasis on the transmitter, receivers, audio systems, transponder lines and antennas used in VHF and HF communications.

AV 211 Avionics Communications Laboratory 3(0-7)
Prerequisite: Department approval. AV 210 concurrently. AV 211 is a lab supplement for AV 210. A "hands on" study of communications systems used in aircraft with emphasis on troubleshooting and repairing receivers, transmitters, audio systems, transponder lines and antennas.

AV 215 Avionics Flight Control Systems 2(0-0)
Prerequisite: Department approval. AV 216 concurrently. A study of aircraft flight control systems common to general aviation type aircraft including the operation and function of three axis autopilot systems, compass systems and gyro.

AV 216 Avionics Flight Control Laboratory 2(0-4)
Prerequisite: Department approval. AV 215 concurrently. AV 216 is a lab supplement for AV 215. A "hands on" study of flight control systems common to general aviation type aircraft including the use of test equipment. Emphasis will be placed on the flight line testing of these systems.

AV 220 Avionics Navigation Systems 3(0-0)
Prerequisite: Department approval. AV 221 concurrently. A study of navigation systems including VOR/LOC, glideslope receivers, marker beacons,ADF, Loran C, and other types of navigation equipment. Emphasis will be placed on acquiring factory certifications for the above equipment.

AV 221 Avionics Navigation Laboratory 4(0-8)
Prerequisite: Department approval. AV 220 concurrently. AV 221 is a lab supplement for AV 220. A "hands on" study of navigation systems including VOR/LOC, glideslope markers, ADF, Loran C and other navigation systems. Emphasis will be placed on troubleshooting and repair of this equipment.

AV 225 Avionics Certification 4(4-0)
Prerequisite: Department approval. Course covers various Federal Aviation Administration rules and regulations as they pertain to avionics shop operation. Federal Communications Regulations are discussed to prepare the student to successfully complete the General Radiotelephone Operator exam.

AV 230 Avionics Pulse Systems 3(0-0)
Prerequisite: Department approval. AV 231 concurrently. A study of the avionics pulse systems used in modern aircraft, such as DME, Radar, and transponders. The student will learn the proper use of the specialized test equipment used with pulse systems. Emphasis will be placed on the acquisition of factory certifications for the repair of pulse equipment.

AV 231 Avionics Pulse Systems Laboratory 4(0-8)
Prerequisite: Department approval. AV 230 concurrently. AV 231 is a lab supplement for AV 230. A "hands on" study of the avionics pulse systems used in modern aircraft. Systems studied will include DME, RADER and transponders. The student will use the specialized test equipment necessary to troubleshoot and repair the above systems. Emphasis will be placed on actual troubleshooting and repair of DME, RADER and transponder equipment.

AV 240 Avionics Simulator Technology 4(2-4)
Prerequisite: Department approval. An introduction to flight simulators used to train pilots in today's training environment. Various simulators will be studied in block diagram form. The student will learn the similarities and differences between analog and digital simulator systems. Troubleshooting techniques will be studied to prepare the student for an entry level position as a simulator technician.

AV 295 International Avionics Systems 4(0-0)
Prerequisite: Department approval. Familiarization with safety practices around large aircraft. Practice in identification of different airliners and manufacturers. Review of instrument systems and discussion on how these systems are designed in large aircraft. Discussion of navigation, communication and pulse systems in airliners. Discussion of the different methods of troubleshooting used on large aircraft. Familiarization with international rules and regulations. Discussion of the differences and similarities between FAA regulations and various other countries.

AV 297 Avionics Internship 4(4-0)
Prerequisite: Department approval. 20 hours per week as an Aviation Electronics Internship. Independent study. Part-time occupational internship in Avionics Technology. The internships will be at work stations as established by the intern coordinator.

AV 299 Advanced Avionics Laboratory 4(0-8)
Prerequisite: Department approval. Applications lab. May be concurrent with AV 210, 211 or 212. May be repeated once.

CONSTRUCTION AND ENGINEERING TECHNOLOGY

Director: Ronald D. Curthe
220 L Gannom Vocational Technical Building

Construction and Engineering Technology offers instruction in the following areas, under the course codes indicated:

- AT: Architectural Technology
- ATQ: Applied Technology General
- ATM: Applied Technology Mathematics
- BR: Building Related
- BT: Building Trades
- BTA: Building Trades Related (Apprentice)
- BTT: Building Trades Related (Journeyman)
- CG: Computer Graphics
- CMT: Computer Integrated Manufacturing
- CT: Civil Technology
- DT: Drafting Technology
- EQU: Equine
- FST: Fire Science Technology
- LAT: Landscape Architectural Technology
- TEC: Technology General

A student's training may consist of a single course to upgrade his or her present position or a complete curriculum to begin a new career. All courses are structured and taught by field trained professionals using the latest equipment and teaching techniques. Administrators and faculty are available to assist students in planning programs to meet their individual needs. (1) in the planning of programs to meet their individual needs, (2) in transferring credit for formal courses to be taken at other schools, including military schools, and (3) in their placement in work experiences that are pertinent to their occupational programs.

Curriculum guides are available for all associate degrees.

Architectural (AT)

The Architectural Studies Center at Lansing Community College constitutes one of the most sophisticated facilities of its type in the nation. The curriculum offers a series of two-year Associate Degree in Applied Science and other degree options designed to prepare students as technicians in the fields of Architecture and Landscape Architecture. Additional degree options are also offered to provide the necessary preparatory skills needed for successful advanced study to the student who is interested in working toward a bachelor's or master's degree.

Students enrolled in the various degree curricula or those students wishing to take individual specialty classes may choose from a wide variety of courses offered through the Architectural Studies Center. These classes are supplemented by additional college courses in Civil Technology, Art, Interior Design, Math, Science, English and Computer Design Technology. All courses are structured and taught by field trained professionals using the latest equipment and teaching techniques. Courses in Computer Aided Design (CAD) will be offered to students using the largest computer graphics system available at any community college in the nation.

The two-year Associate in Applied Science Degree in Architecture is a curriculum directed to the total development of a paraprofessional—the architectural drafting technician. Required classes for the Associate in Applied Science Degree in Architecture are assembled from the areas of architectural drafting, graphics, structural design, materials of construction, landscaping, architectural history and building codes. Additional classes are selected from the areas of math, English, technical and general electives. Please see curriculum code 540.

Building Trades Related (BR, BT)

The Residential Building Certificate of Achievement is designed to provide a student with job-entry skills in the building trades area. The curriculum (Code 823) consists of practical hands-on courses that provide the skills needed to compete in today's job market. Curriculum guides are available in the AEC office.

Computer Graphics (CG)

Curricula offered by our Computer Integrated Manufacturing Department have been developed jointly with General Electric. The future concept since the acquisition of the CADAM system: Computer graphics Augmented Design and Manufacturing (CADAM) is the trademark name of the software donated to Lansing...
COURSE DESCRIPTIONS
Architectural (AT)
Construction & Engineering Technology
Computer Integrated Manufacturing
Division of Technology and Applied Sciences

AT 100  Beginning Architectural Drawing
3(2-2)
No drafting experience required. Use of drafting equipment, lettering, line
convention, orthographic projection, basic pictorial drawing and dimensioning
techniques. Produce a basic floor plan at conclusion of class. Course fee

AT 131  Residential Planning
3(2-2)
Basic information for buying, building or remodeling a house: construction
details, architectural styles and planning concepts, some reading of blueprints
and use of working drawings. Course fee

AT 135  Architectural Pictorial Illustration
4(2-4)
Prerequisite: AT 100 or equivalent. Basics of shades and shadows and one
and two point perspective is covered. Pencils and pens are the primary rendering
media. For students with little or no experience in perspective drawing. Course fee

AT 136  Advanced Pictorial Illustration
4(2-4)
Prerequisite: AT 135 or equivalent. Pencil and pen rendering techniques will
be explored. The concept of developing a total composition by means of
entourage is used. Course fee

AT 137  Architectural Presentation
4(2-4)
Prerequisite: AT 136. Explores and develops new techniques in rendering. The
use of a variety of color media is included. Course fee

AT 150  City Planning I
3(3-0)
Covers the architecture of the city: the buildings, streets, squares and natural
topography as built and modified by men and women for collective and private
use. The physical city as a reminder of history, a most visible and permanent
record of human acts. Students will search for clues and values as they relate
to the environment and ecology of the world today and tomorrow.

AT 151  City Planning II
3(3-0)
Prerequisite: AT 150. Explores urban form and development in the Twentieth
Century. Analyzes the relationship of individual buildings and groups of
buildings, comparing sites and situations. Students will participate in several
urban design studio problems.

AT 152  Visual Communications I
4(2-4)
Develops basic skills in the use of techniques for architectural drafting and
sketching. Includes two-dimensional graphics, perspective, shadows and shades,
model construction and basic delineation. Course fee

AT 153  Visual Communications II
4(2-4)
Prerequisite: AT 152. Introduces freehand drawing with charcoal, pencil, pen
and ink media emphasizing and developing abilities for perspective sketching
and rendering. Course fee

AT 154  Visual Communications III
4(2-4)
Prerequisite: AT 153. Representational composition exploring and refining the
use of free-hand drawing with felt tip markers, prismacolor pencil, pen and
ink with a special emphasis on color. Course fee

AT 230  Architectural Drawing I (Residential Details)
4(2-4)
Prerequisite: AT 100 or drafting background. Identify component parts and
correctly draw various building details. The use of reference material in
preparing detail drawings will be emphasized. Course fee

AT 231  Architectural Drawing II
4(2-4)
Prerequisite: AT 230. Offers essentials of designing and drawing floor plans.
Begins a two-part series in residential development. Preliminary elevations
and sections will be developed. Course fee

AT 232  Architectural Drawing III (Residential Development)
4(2-4)
Prerequisite: AT 231. Floor plans and preliminary plans from AT 231 will be
used to continue the development of residential working drawings. Working
sections and elevations will be completed. Course fee
AT 233 Commercial Drafting-Design I
Prerequisite: AT 232. Stresses the design and construction of commercial buildings. Students will produce a preliminary set of commercial working drawings. Course fee

AT 234 Commercial Drafting-Design II
Prerequisite: AT 233 or equivalent. A continuation of AT 233, this course will emphasize the production of a complete set of commercial working drawings. Various examples of existing commercial structures and site inspections will be used to illustrate design theories and construction detailing. Course fee

AT 255 Underground Shelter
Design and construction of underground structures. Residential and commercial applications will be studied. Study presentations and field trips will be used to illustrate site layouts. Course fee

AT 256 Underground Shelter II
Prerequisite: AT 255. Designed as a continuation of basic theories studied in AT 235. Students will have an opportunity to design and prepare drawings to complete an individual underground project. Course fee

AT 237 Architectural Design Seminar I
Designed to introduce the student to architectural design through the study of popular theoretical and philosophical view points in architecture, as well as reviewing major historical architectural precedents, and their impact. The course will be divided between seminar, lecture discussions and studio sessions. Studio work will concentrate on specific design programs to be solved through application of course material.

AT 240 Architecture Model Building
Introduces the use of models in architectural design and presentation. Each student will construct several examples of various types of models. Course fee

AT 241 Office Practices and Procedures
Covers general specifications, supplemental or job specifications, material specifications, building codes, use of reference material, shop drawings, bidding practices, office reduction of field data and field inspection procedures. Course fee

AT 242 Building Utility Systems
Prerequisite: AT 330 concurrently or equivalent. Investigates components and arrangement of residential and commercial plumbing and electrical systems. Heating and cooling systems introduced. Emphasizes code and specification requirements. Course fee

AT 246 Heating and Air Conditioning
Explores components and arrangement of residential and commercial heating and air conditioning systems. A calculations course emphasizing environmental factors, specification requirements and code provisions. Course fee

AT 247 Architectural History I
Explores the earliest forms of ancient architecture with emphasis on specific civilizations and their contributions to the development of various styles of architecture. Highlights of the Egyptian, Mesopotamian, Greek, Roman, Romanesque, and Gothic periods will be presented, using a variety of visual media. Course fee

AT 248 Architectural History II
Prerequisite: AT 247 recommended. Examines the greatest examples of architecture as built during the Gothic, Italian, French, English Renaissance period and follows with a look at the history of architecture. Course fee

AT 249 Preservation and Adaptive Reuse
The theory and practice of historic restoration, preservation and new uses for old buildings (adaptive reuse). Visual media and field trips are used to illustrate actual projects. Course fee

AT 251 BOCA/Uniform Building Code I
Emphasizes use, interpretation and application of the Uniform Building Code. Includes occupancy requirements based on types of construction, engineering regulations, fire standards, excavation and material requirements. Course fee

AT 252 BOCA/Uniform Building Code II
Prerequisite: AT 251 or equivalent. Offers depth in occupancy requirements based on types of construction such as exit requirements, protection of corridors and multiple dwellings, standards for apartment houses six stories and higher, fire standards and materials requirements. Course fee

AT 253 Mechanical Building Code
Prerequisite: AT 232. Stresses the design and construction of commercial buildings. Students will produce a preliminary set of commercial working drawings. Course fee

AT 256 Barrier Free Design
Introduction to design, construction and inspection aspects of facilities required to be accessible to the physically handicapped. Applicable Michigan laws and codes are explained; design practice problems are included. No drafting experience necessary.

AT 259 Interior Architecture I
This course is designed to be the architectural students preliminary introduction into the various aspects of residential and commercial interiors. Examples of existing structures will be used to illustrate design theory and the basics of buildings' support systems. Students will have the opportunity to develop basic interior architectural design problems. Course fee

AT 260 Architectural CADAM Basic
Prerequisite: Department approval. An introductory course on computer graphics techniques which cover the latest in software and hardware used on the IBM CADAM Workstation. The operation will use functions and menu items to create multi-view architectural drawings. Dimensions and notes will be created to complete the drawing. Emphasis will be placed on creating and editing drawings. Course fee

AT 261 Architectural CADAM Drafting I
Prerequisite: AT 260 or GG 2501 or Department approval. This class is the first in a two-part series which utilizes the CADAM system for the production of architectural graphics. Students will develop the skills learned in basic CADAM and produce architectural schematics, details, pictorial and various types of working drawings. Production of individual works as well as group projects will be available. Course fee

AT 262 Architectural CADAM Drafting II
Prerequisite: AT 261 or equivalent of Department approval. This class will enable the advanced CADAM student to expand their knowledge of computer graphics and utilize the functions of the CADAM system to its fullest extent. Emphasis will be placed on the production of complete sets of drawings which can be included in a portfolio. Course fee

AT 264 Architectural CADAM Lab
Prerequisite: Instructor approval. The project lab provides the advanced student with the opportunity to work on a specific architectural project of their own design. Lecture time will be devoted to a "one on one" exchange of ideas with the architectural CADAM instructor. The subject will be the design, development and production of this specific project. Course fee

AT 265 Architectural Micro Computer Graphics
Prerequisite: CG 250 recommended. This course is intended to give students a firm understanding of the basic concepts and skills necessary to use a microcomputer system in the design and implementation of architectural, interior design and related construction drawings using AutoCAD, a Computer Aided Drafting package designed for these and many other applications. Course fee

AT 266 Architectural Micro Computer Graphics II
Prerequisite: AT 265 or equivalent. Designed as a continuation of AT 265, students will learn and use remaining functions in a final design project. Course fee

AT 268 Architecture Micro Graphics Project Lab
Prerequisite: AT 265 or equivalent. Research, design and construct a project with the guidance of an instructor. For students who have completed basic micro-graphics courses. Course fee

AT 271 Structural Design
Prerequisite: AT 231 or equivalent and MTH 012. Introduces statics with the application of these physical forces to structural elements of steel, wood, and concrete. Develops an awareness of the physical forces which must be resisted through the selection for building materials and their effect upon architectural design. Course fee
### Applied Technology General (ATG)

**Construction & Engineering Technology**

</table>
Division of Technology and Applied Sciences 117  BR 113-BT 253

BR 113  Antiquing and Furniture Refinishing  3(2-2)
Step-by-step procedures for removal of old finishes, minor repairs, selection of new finish, surface preparation techniques, methods of application of new finish and antiquing. Fabric work and upholstery are not included. Course fee

BR 116  Paper Hanging I  3(2-2)
For painter-decorators. Includes preparation of surfaces, selection and care of tools, selection of materials and adhesives, estimating of materials, layout, avoiding and correcting faults, application of paper and vinyl. Course fee

BR 117  Paper Hanging II  3(2-2)
Prerequisite: BR 116. For painter-decorators. Includes preparation of surfaces, selection and care of tools, selection of materials and adhesives, estimating of materials, layout, avoiding and correcting faults, application of paper and vinyl. Course fee

BR 120  General Home Maintenance I  3(2-1)
An introductory course in general home maintenance. Topics are furnace maintenance, humidifiers, painting, hot water heaters, basic plumbing and electrical repairs. Course fee

BR 123  Masonry Home Projects  3(2-2)
Instruction in building home masonry projects such as barbecue pits, patios and masonry walls. Not designed for preparation as a bricklayer. Individuals wishing to prepare for a career in bricklaying should apply to enter the Bricklaying Apprenticeship Program. Course fee

BR 126  Build Your Own Patio Deck  3(2-1)
Plan, estimate, layout, build your own patio floor or the ground deck. Investigate materials, designs, structural considerations and costs. Course will include tips and techniques for getting the job done. Course fee

BR 128  Build Your Own Home  3(3-0)
For persons who wish to build their own home or have their home built. Includes design considerations, land acquisition, selection of materials, choosing contractors, scheduling of work, financing and landscaping. Features guest speakers who are experts in their various fields.

Building Trades (BT)
Construction & Engineering Technology
Computer Integrated Manufacturing
Division of Technology and Applied Sciences

BT 109  Introduction to Construction  3(3-0)
Covers basic concepts of construction, including city and regional planning, managing, contracting, designing, engineering, estimating, bidding and inspecting, as well as the production work normally associated with construction.

BT 103  Structural Blueprint Reading  4(4-0)
Shows how to visualize and interpret illustrations and sections from blueprints, and translate them into practical solutions. Also shows the purpose of and the relationship between specifications and blueprints as applied to various trades.

BT 104  Structural Blueprint Reading II  4(4-0)
Prerequisite: BT 103. Covers symbols, conventions and abbreviations used in structural blueprints, and further develop perceptual skills required for comprehension of prints. Emphasis will be on reading prints for commercial buildings.

BT 111  Residential Foundations  2(2-0)
Information on concrete blocks, poured concrete, and treated wooden timbers, relative advantages and disadvantages with respect to one another. Also, the layout of footings, excavations, setting of forms and the erection of residential foundations.

BT 121  Residential Framing I  3(2-1)
Describes various types of frame construction but concentrates on platform framing. Includes stages of house construction from top of the foundation to top of exterior walls. Lab work covers layout and assembly for sills, posts, bridges, sub-floor and exterior wall components. Course fee

BT 122  Framing Square  3(2-1)
Covers use of the framing square. Students will lay out common, hip, valley and jack rafters. Layouts will also include gable end studs, cross bridging and stair stringers. Instruction will emphasize understanding of math and decimal conversions involved in using the square. Course fee

BT 123  Residential Framing II  3(2-1)
Prerequisite: BT 121 and BT 122. A continuation of BT 121. Hands-on experience with ceiling joists, gable end studs, cornice construction, door and window installation and roof sheathing. Course fee

BT 124  Remodeling  3(2-2)
Prerequisite: BT 121. A course on building of additions, restoring and renovations. Lecture and lab work will show how to measure up work, planning and drawing; figure how to tear into building, roof and foundations. Course fee

BT 125  Shingling and Siding  2(1-2)
Prerequisite: BT 121 or Instructor approval. Covers tools, materials, estimating and techniques of application. Materials covered will include asphalt shingles, wood shingles and shakes, as well as siding options and introduction to aluminum trim products. Course fee

BT 126  Stair Building  3(2-1)
Prerequisite: BT 122. To learn how to assemble the component parts of a flight of stairs. To understand the layout of the rise and run of the stair stringers and stair well opening. To learn about cutting of the stringers, treads, riser and handrail to newel post. Course fee

BT 128  Pole Barn Construction  3(2-2)
Prerequisite: BT 121. An introductory course in the planning, layout and construction of a pole barn. Instruction will include terminology, materials, techniques, practices and procedures currently being used by pole barn contractors. Course fee

BT 141  Floor, Doors and Interior Trim  3(2-2)
Prerequisite: BT 121. For the individual who wishes to build or remodel a home. Topics covered will be an introduction to interior trim and basic tool use. Course fee

BT 231  Blueprint Reading for Plumbers I  4(4-0)
Covers orthographic projection, linear and angular measurement and reading of prints in which three views are given in the three principal planes of projection. Examples apply to the plumbing trades.

BT 232  Blueprint Reading for Plumbers II  4(4-0)
Prerequisite: BT 231 or Instructor approval. Continuation of BT 231 with emphasis on more complex prints. Actual construction prints are used whenever possible.

BT 235  Sheet Metal I  3(2-2)
Includes mathematics and pattern drafting related to sheet metal. Covers straight line, parallel line, radial line, triangulation pattern development and current techniques of fabrication. Course fee

BT 236  Sheet Metal II  3(2-2)
Prerequisite: BT 235 or Instructor approval. Continuation of Sheet Metal I with more advanced problems. Course fee

BT 237  Sheet Metal III  3(2-2)
Prerequisite: BT 236. Continuation of Sheet Metal II with specialty work. Course fee

BT 251  National Electrical Code I  4(4-0)
Students will review the entire code book, locating and interpreting the National Electrical Code. Designed for individuals with little or no knowledge of the electrical code.

BT 252  National Electrical Code II  4(4-0)
Prerequisite: BT 251. For the wireman who has had some experience working with the code book, a general review plus problems and calculations taken from the code book.

BT 253  National Electrical Code III  4(4-0)
Prerequisite: BT 252. For the wireman interested in writing for a master license. Covers the local electrical code and interpretation of various sections, along with review of the most recent code changes.
1989 Catalog Lansing Community College

Division of Technology and Applied Sciences

BT 271 Residential Estimating 4(4-0)
Prerequisite: BT 121 and BT 103. Covers the execution of a complete material takeoff and material pricing of a residential structure. Includes the entire structure with the exception of mechanical and electrical materials.

BT 275 Construction Estimating 4(4-0)
Prerequisite: BT 271. Provides experience in construction estimating: blueprint reading, specification reading, math calculations, use of labor, time tables, current material costs and weather factors. Emphasis on estimating costs of light commercial buildings.

BT 280 Building Trades Training 6(1-20)
Prerequisite: Coordinator approval. Practice of skills learned in previous courses in a real work situation. The training station, working conditions, and student must be approved by the coordinator. The student is required to attend one hour per week of related instruction at the College. A pre-placement interview between the student and coordinator is also required.

BT 281 Building Project Credits variable
These seminars are planned to assist any building trades group or groups to upgrade their skills or to review new and emerging techniques.

BT 290 Builders Review 1(1-0)
A two-day workshop offered by the college, designed to ready individuals for the State of Michigan Builders Examination. The workshop will include concentrated instruction in Blueprint Reading, State Regulations, Building Terms, Basic Math, and Construction Codes, which are topics covered by the exam.

Building Trades (Apprenticeship) (BTA)
Construction & Engineering Technology
Computer Integrated Manufacturing
Division of Technology and Applied Sciences

BTA 100 Apprentice Bricklaying 4(3.5-3.5)
For apprentice bricklayers on registered programs with the Lansing Bricklaying and Stonemasonry Joint Apprenticeship Committee. Includes manipulative practices, related theory, mathematics, estimating, blueprint reading and drawing.

BTA 105 Apprentice Asbestos Workers 4(2-4)
Open to apprentice asbestos workers indentured to the Asbestos Workers Joint Apprenticeship Training Committee. Covers blueprint reading, applied science, related mathematics, estimating and manipulative practices.

BTA 110 Apprentice-Carpentry 4(3.5-3.5)
For apprentice carpenters on registered programs with the Lansing Carpentry Joint Apprenticeship Committee. Covers free-hand sketching and drawing, blueprint reading, mathematics, use of steel square, estimating and layout, building codes, safety practices, manipulative practices and applied science. Includes light and heavy construction practices.

BTA 120 Apprentice-Electrical (inside) 4(3.5-3.5)
Open to electrical apprentices indentured to the Lansing Electrical Joint Apprenticeship and Training Committee. Covers blueprint reading and drawing, electrical theory, laboratory work, electrical code and mathematics.

BTA 125 Apprentice Residential/Electrical 4(2-2)
Open to electrical residential trainees indentured to the Lansing Electrical Residential Training Committee. Covers blueprint reading and drawing, electrical theory, laboratory work, electrical code and mathematics necessary for residential electricians.

BTA 140 Apprentice Painting and Decorating 4(2-2)
Open to painting and decorating apprentices on registered programs with the Lansing Painting and Decorating Joint Apprenticeship Committee. Includes trade techniques, color mixing and matching, mathematics related to the trade, estimating and paperhanging.

BTA 150 Apprentice Plumbing or Pipelitting 4(3.5-3.5)
For apprentice plumbers and pipelitters indentured to the Lansing Joint Plumbing and Pipelitting Apprenticeship and Training Committee. Includes mathematics, manipulative practices, theory, blueprint reading and drawing, job analysis, physics and other sciences, and supplementary courses from the regular College offerings approved by the J.A.T.C.

Building Trades (Journeyman) (BTJ)
Construction & Engineering Technology
Computer Integrated Manufacturing
Division of Technology and Applied Sciences

BTJ 128 Journeyman Electricians Welding I 4(2-4)
Open to electrical journeymen. Includes some fundamentals of oxyacetylene welding and cutting. Major emphasis on arc welding and skills needed by the electrician. Course fee

BTJ 129 Journeyman Electricians Welding II 4(2-4)
Prerequisite: BTJ 128 or Instructor approval. Open to electrical journeymen. Includes some fundamentals of oxyacetylene welding and cutting. Major emphasis on arc welding and skills needed by the electrician. Course fee

BTJ 160 Journeyman Pipelitters Welding I 4(2-4)
Students who enter this class should be Journeyman Plumbers or Pipelitters. Apprentices to the plumbing or pipelitting trades will be admitted when the degree of training they have achieved meets the approval of the Joint Apprenticeship Committee on Plumbing. Training begins with a review of welding fundamentals and proceeds rapidly into more advanced skills according to the needs of the individual student. Teaches welding of all varieties of pipe, including stainless steel, using the helical method. Course fee

BTJ 161 Journeyman Pipelitters Welding II 4(2-4)
Prerequisite: BTJ 160. Continuation of BTJ 160. Course fee

BTJ 162 Journeyman Pipelitters Welding III 4(2-4)
Prerequisite: BTJ 161. Continuation of BTJ 161. Course fee

Computer Graphics (CG)
Construction & Engineering Technology
Computer Integrated Manufacturing
Division of Technology and Applied Sciences

CG 131 Industrial Drafting with AutoCAD 4(4-0)
Prerequisite: DT 100 or equivalent. A computer graphics course designed to learn the software package called AutoCAD. Using AutoCAD, the student will draw a mechanical drawing complete with dimensions and notes. Emphasis will be placed on creating and editing mechanical drawings. Course fee

CG 141 Industrial Drafting with CADKEY 4(4-0)
Prerequisite: DT 100 or equivalent. A computer graphics course designed to learn the software package called CADKEY. Using CADKEY, the student will draw a mechanical drawing complete with dimensions and notes. Emphasis will be placed on creating and editing mechanical drawings. Course fee

CG 201 CADAM Training: Basic 4(2-4)
Prerequisite: DT 101 or equivalent. This class will provide students with a basic understanding of how to use the Micro-CADAM software on an IBM PC AT or the IBM PS/2-80. The student will use functions and menu items to create multi-view mechanical drawings complete with dimensions and notes. Emphasis will be placed on mastering basic Micro-CADAM software applications related to an industrial environment. Course fee

CG 241 CADAM Training: Industrial I 4(2-4)
Prerequisite: CG 201, DT 102 and DT 103 concurrently. This class is designed to apply the skills of basic CADAM. Emphasis will be placed on how the computer may increase productivity by applying the basic functions to industrial drawings of moderate detail. Course fee

CG 242 CADAM Training: Industrial II 4(2-4)
Prerequisite: CG 241 and DT 106 concurrently. This class is an in-depth study of most functions and menu items on the CADAM system. The operator will use details from the standard library. Emphasis will be placed on design drawings with the down stream consideration of Computer Integrated Manufacturing. Course fee

CG 271 CADAM 3-D I 4(2-4)
Prerequisite: CG 242. This class will introduce 3-Dimensional design concepts and practices used on the CADAM system. Using the 3-D Interactive Module, wire frame modeling with surfaces will be completed on mechanical components. Course fee
Division of Technology and Applied Sciences

CG 272 CADAM 3-D II 4(2-4)
Prerequisite: CG 271. This course will expose full 3-D design conceptualization, working with many types of 3-D methods filling, blending using kan cut sections, section cutting and plane offs, surface networks, surface fairing, and macro for light source shading. Course fee

CG 285 CADAM Project Industry 2(0-4)
A project lab gives the industrial drafting student the opportunity to do an independent study on the IBM CADAM Graphics System. Project assignment will be through a mutual agreement between student and instructor. It will be the responsibility of the student to define and outline the project objectives. A preliminary design concept will be made utilizing conventional drafting practices, etc. A material specifications, standard components and tolerance requirements, etc. Upon approval of this design, a time estimate will be made for the completion of this assignment using the Computer Graphics facility (CADAM). The lab fee will vary depending on time necessary to complete project.

Computer Integrated Manufacturing (CIM) Construction & Engineering Technology
Computer Integrated Manufacturing
Division of Technology and Applied Sciences

CIM 100 Introduction to Computer Integrated Manufacturing 2(2-0)
Manufacturing businesses are generally a complex form of business and basic to a nation’s economy. This course will provide an overview of the concepts of CIM including computer aided design, computer aided manufacturing, robotics, quality control, and manufacturing information systems.

CIM 250 Personal Computer Applications 3(1-3)
This class provides students with a basic understanding of the uses of microcomputers. A major emphasis will be placed on the IBM-PC. Students are given a basic understanding of what software is available for micros and are given a working knowledge of the major software packages that are available. Half of this class will be computer based using the IBM-PC. Course fee

CIM 251 Personal Computer Applications II 3(1-3)
Prerequisite: CIM 250. An in-depth study of the use and operation of the IBM or IBM compatible PC computer systems. There will be four major software programs representing the operating system, word processing, spreadsheets, and data bases. The class will study the technique of building batch files, changing operating system prompts, setting paths, backing up and restoring, building hierarchical subdirectories and I/O piping. In the word processing portion, merging files and mail merge uses will be studied for the purpose of producing form letters. The spreadsheet portion will include complex formula construction, data base uses, and creating macros. Finally, the data base section will include report generation, menu construction and dBase programing techniques. Course fee

CIM 260 DOS Applications 3(2-2)
This class will provide advanced instruction regarding the PC-DOS/MS-DOS operating system. Making directories on a fixed disk drive will be covered. Students will be taught to make batch files and retrieve lost files, as well as other advanced DOS commands. The class will be useful for users in general and in particular for those who are responsible for installing and maintaining software or PCs. Course fee

CIM 270 Technical Publishing Using Ventura 3(2-2)
Using Ventura for writing technical publications, e.g. technical manuals. Course fee

CIM 272 Technical Publishing Using PageMaker 3(2-2)
Using PageMaker for writing technical publications, e.g. technical manuals. Course fee

Civil Technology (CT) Construction & Engineering Technology
Computer Integrated Manufacturing
Division of Technology and Applied Sciences

CT 107 Civil Drafting 4(2-4)
Prerequisite: CT 100 or equivalent. Helps students prepare a clear, readable, graphic representation of data from survey notes. Emphasizes traverse, profile and topographical drawing problems. Fall term. Course fee

CT 131 Basic Surveying I 4(2-4)
Prerequisite: Math Placement Test. Covers surveying, study of terminology, use of tape, level and transit for measuring distances, elevations and angles. The emphasis is on developing field work skill in the handling of the equipment, analysis and use of V Beer,ers. Fall, spring, summer terms. Course fee

CT 132 Basic Surveying II 4(3-2)
Prerequisite: CT 131, TEC 151. Reduction of field notes for office use. Taping, leveling, and transit problems including error analysis. Traverse, horizontal curve, vertical curve and earthwork calculations. Winter term. Course fee

CT 133 Basic Surveying III 4(2-4)
Prerequisite: CT 132. Stresses field work for bench mark circuits, profiles, cross-sections, traverses, topography and mapping. Spring term. Course fee

Industrial Drafting (DT) Construction & Engineering Technology
Computer Integrated Manufacturing
Division of Technology and Applied Sciences

DT 100 Basic Drafting 3(2-2)
Focuses on basic concepts in orthographic projection, auxiliary projections, sketching, both orthographic and pictorial. Lettering techniques will be stressed; a brief approach to industrial dimensioning practices is presented. Course fee

DT 101 Industrial Drafting I 4(2-4)
Prerequisite: DT 100 or Placement Test. Emphasis is placed on orthographic projection, sections auxiliary views and dimensioning techniques. Each student will work on a set of drawings applying above mention drafting methods to accomplish tasks. Course fee

DT 102 Industrial Drafting II 6(4-4)
Prerequisite: DT 101. Emphasis is on advanced techniques. Beginning layout will be stressed along with preparation of welding or fabrication type drawings. Conventional drafting techniques will be used to accomplish tasks. Course fee

DT 103 Descriptive Geometry 4(2-4)
Prerequisite: DT 101. Covers graphic representation and solution of space problems through the practice of fundamental principles of advanced orthographic projection. Includes points, lines and planes, primary and successive auxiliary views, parallelism, perpendicularity, development and intersections, civil and mechanical engineering problems. Course fee

DT 104 Jigs and Fixtures Design I 4(2-4)
Prerequisite: DT 101. Detailing techniques and dimensioning will be emphasized through the development of working drawings. These drawings will be extracted from a design concept or assembly type drawing. Familiarization with standard components will also be stressed. Course fee

DT 105 Jigs and Fixtures Design II 4(2-4)
Prerequisite: DT 104. Design concepts and a problem solving type approach will be utilized in designing tools for various product drawings. Course fee

DT 106 Industrial Drafting III 4(2-4)
Prerequisite: DT 102. Stresses layout and design concepts, and practical design projects in product solving and creativity. Assignments prepare the student for DT 294 and DT 296. Course fee

DT 110 Industrial Blueprint Reading I 4(4-0)
Prerequisite: DT 100. Covers basic concepts in orthographic projection, with emphasis on interpretation of engineering drawings.

DT 111 Industrial Blueprint Reading II 4(3-2)
Prerequisite: DT 110. A continuation of DT 110 with emphasis on more complex prints. Shop processes will also be covered.

DT 135 Technical Illustration I 4(2-4)
Prerequisite: DT 101. Introduces methods of illustration currently used in industry: use of sketches, photographs, axonometric construction, and introduction to the perspective grid. Use of line weights is stressed to achieve desired finished drawing effects. Course fee

DT 202 Die Design (Detailing) 4(2-4)
Prerequisite: DT 101. This course will emphasize the proper steps to designing a die. Also, it will cover the names of various die components and understanding how they work. Course fee

DT 203 Die Design II (Layout) 4(2-4)
Prerequisite: DT 202. Includes the design of blanking, piercing, basic forming, basic trim, progressive, and transfer dies. Also, this course will emphasize the processing and estimating of sheet metal tools. Course fee
**Division of Technology and Applied Sciences**

**FST 125** Arson Investigation 4(0-0)
Arson Investigation offers specialized training for insurance investigators and building operators, as well as firefighters and Fire Marshal officers. Topics covered include duties of the firefighters, investigators, police officers and prosecutors; electrical fires, scientific evidence, forensic laboratory services and vehicle fires. General areas will cover psychodynamics of criminal behavior, court decisions affecting fire investigation, insurance company operation, and any new items as current events require. No prerequisite. Course fee.

**FST 130** Fire Protection Historical Overview 3(0-0)
Examines fire prevention and control in a historical and philosophical context; role of fire service in society and input from various municipal and private fire protection agencies; an overview of the nation's fire problems; job opportunities and necessary qualifications.

**FST 160** Fire Fighting Strategy and Tactics I 3(0-0)
Fire fighting strategy and tactics, planning methods of attack, and preplanning fire problems.

**FST 161** Basic Fire Protection 3(0-0)
Investigates organization and function of local, county, state, federal, and private fire protection agencies. Studies history of loss of life and protection by fire, and the history and philosophy of fire protection.

**FST 164** Fire Protection Systems and Equipment I 3(0-0)
Covers fire detection and alarm systems, special hazard protection systems, sprinkler systems and fire extinguishing equipment.

**FST 165** Hazardous Materials I 3(0-0)
Prerequisite: TEC 202. Explores fire fighting methods related to hazardous materials; includes solids, liquids and gases, and their storage. Consideration also given to the laws, standards and handling techniques of hazardous materials.

**FST 166** Fire Training I-A 6(6-0)
Prerequisite: Active firefighter. Phase I of the Michigan Fire Fighters Association Training Program (56 hours).

**FST 167** Fire Hydraulics I 3(0-0)
Prerequisite: FST 170. Outlines fundamentals of fire hydraulics. Includes water supply problems, standards on pump requirements, formulas, test criteria and physical laws relating to hydraulics, and practical application of fire fighting problems.

**FST 168** Math for Firefighters 4(0-0)
Focuses on basic arithmetic operations and algebraic equations as they relate to fire science of operations and equipment.

**FST 170** Physics for Firefighters 3(0-0)
Highlights several basic principles of physics: solids and their characteristics, liquids in motion, gas laws and applications.

**FST 176** Fire Training I-B 6(5-0)
Prerequisite: FST 166. In Phase II, the student will handle and properly use the tools of the fire service. Emphasis is placed on the self-contained mask and the fire fighting protective clothing worn on the fireground.

**FST 177** Fire Hydraulics II 3(0-0)
Prerequisite: FST 167. Emphasizes applications of hydraulic circuitry in pumping operations of fire fighting equipment.

**FST 180** Fire Fighting Strategy and Tactics II 3(0-0)
Prerequisite: FST 160. Studies manpower assignments for stations and apparatus in communities of various sizes, to assist officers in making proper decisions in organizing and operating fire fighting forces.

**FST 186** Fire Training 2-C 6(6-0)
Prerequisite: FST 176. In Phase III, a refinement of all the techniques used in Phase I and II. Fireground hydraulics and drivers-training exercises are studied and practiced.
FST 196  Fire Training 2-D  6(6-0)
Prerequisite: FST 186. Phase IV deals with the strategy and tactics used on
the fire ground. Fire ground evolutions are conducted and critiqued. In most
instances, this involves a structural burn. This phase is the culmination of
many hours of training and testing. Students must exhibit proper physical
coordination during the hands-on portion of equipment handling and apparatus
operation.

FST 204  Fire Protection Systems and Equipment II  3(3-0)
Prerequisite: FST 164. Covers the proper installation and need for standpipe
systems, pressure tank installations, hydraulic calculations and water supplies,
and study of actual installation shop drawings.

FST 263  Building Construction for Fire Security I  3(3-0)
Involves essentials of building design and construction; special features and
considerations relating to fire security.

FST 264  Fire Investigation I  3(3-0)
Investigate fire behavior, importance of determining origin, and procedures
used in identifying accidental, incendiary, or arson type fires. Covers methods
of recognizing and identifying motivation for arson and the laws that are relative
to the intentional setting of fires.

FST 266  Fire Investigation II  3(3-0)
Prerequisite: FST 264. Preservation of evidence and photographic coverage
of fire, methods of interrogation related to fire investigation, and conduct for
investigators. Libel, slander case procedures related to evidence and
statements, and the importance of cooperation between investigative agencies,
records, reports, and case histories.

FST 268  Hazardous Materials II  3(3-0)
Prerequisite: FST 165. Covers methods of fire detection, control and extin-
guishing and the problems which are likely to arise whenever chemicals,
explosive or radioactive materials are used, stored or transported.

FST 269  Responding to Emergencies in Hostile Situations  4(4-0)
Prerequisite: Must be a member of an emergency service unit. The purpose
of this course is to acquaint personnel in emergency services occupations
with a multi-disciplinary focus in dealing with the hazardous environment.
Although the course is academic in nature, emphasis will be placed on
developing diverse skills which enhance the safety of the practitioner is rarely
exposed but where the likelihood of morbidity is great, and should be prepared
to guard against danger to himself/herself and others on the scene.

FST 270  Advanced Fire/Arson Investigation  3(3-0)
Prerequisite: FST 125. Active member of fire department, law enforcement
agency, or private security. This is an advanced course in Fire/Arson Inves-
tigation for law enforcement and fire department personnel.

FST 275  Fire Claim Investigation for the Insurance Adjuster  3(3-0)
Prerequisite: Insurance Claim Adjuster or Representative. This is a special
course for insurance claim personnel with interest in fire claim investigation.

FST 283  Building Construction for Fire Security II  3(3-0)
Prerequisite: FST 263. Studies building construction, protection of openings
in floors, walls and partitions, exits, smoke and heat warning, protection against
exposures, life safety codes, sprinkler systems and special structures.

FST 290  Fire Administration  3(3-0)
Provides chief officers with a better understanding of motivation with proper
direction from management, and presents modern approaches to the chal-
enges which face today's fire executives.

FST 292  Instructor Training Methods  4(4-0)
Course is designed for training Fire Service and Emergency Services Personnel
to become instructors in the subject area they know best. Will sharpen teaching
skills, or beginning students will find this course in Methodology valuable. Some
of the topics covered are: communication skills, classroom arrangement,
establishing goals and objectives, building an effective lesson plan, etc.
Approved and recognized by the Michigan Fire Fighter's Training Council.

FST 293  Fire Science Project  3(0-5)
Undertake and complete an independent study or project under staff super-
vision. Consult with faculty advisor before enrolling.

Landscape Architecture (LAT)
Construction & Engineering Technology
Computer Integrated Manufacturing
Division of Technology and Applied Sciences

LAT 100  Intro Landscape Drafting  3(2-2)
No drafting experience required. The use of drafting equipment, emphasizing
lettering, line convention, and title blocks. Develop basic format for designing
construction drawings. Provides essential skills for beginning LAT Program.
Course fee

LAT 130  Interior Landscaping  4(3-2)
The aim of this course is to acquaint the student with the identification, culture,
placement and use of foliage and flowering plants in the home, office, mall or
restaurant. Information relating to soil media, watering, light requirements,
fertilizer, insect, and disease control and management will be discussed in
relation to the plant's placement and use within the interior landscape.

LAT 132  Residential Landscaping  3(2-2)
Highlights a basic planning approach for improving your home landscape. The
development of a basic design focusing on your own home including placement
of plant material, decks, patios, water features and other landscape elements.
A course for the new homeowner, homeowner renovating his landscape,
residential landscaper or nurseryman. Course fee

LAT 133  Residential Landscape Maintenance  4(4-0)
Basic insect and disease identification and control measures will be discussed.
A course for the homeowner, nurseryman or maintenance contractor. Course fee

LAT 140  Landscape Plant Materials I  4(2-4)
(Deciduous Trees & Evergreens)
Explores a group of hardy ornamental plants emphasizing deciduous trees,
shrubs, evergreens, and ground covers. How to select the best and newest
varieties will be highlighted. A good course for the landscaper, nurseryman
or homeowner who would like to identify or refresh one's skills in identification.
Course fee

LAT 141  Landscape Plant Materials II  4(2-4)
(Flowering Trees, Shrubs and Ground Cover)
The exploration of spring flowering trees, shrubs, broadleaf evergreens,
and groundcovers. Highlighting the time of bloom and special features such as
fruit, bark, foliage color and buds as they relate to the landscape. Basic plant
identification is developed and positive design characteristics of individual
plants are stressed. Slides of individual plants will be presented, as well as
walking labs to highlight these plants. Course fee

LAT 142  Landscape Plant Materials III  4(2-4)
(Perennial and Annual Flowering Plants)
This class will discuss identification and basic culture of approximately 150
perennial and annual flowering and bedding plants. Specific features of each
plant will be discussed in relation to its proper landscape use. Herbs, grasses,
rock and water garden plants will also be highlighted. Guest speakers will
highlight major areas. Course fee

LAT 150  Introduction to Landscape Architecture  4(2-4)
Previews the broad scale concepts of landscape architecture. Lectures, reading,
and practical problem-solving exercises provide a basic overview of the
historical, philosophical, and technical aspects of the landscape architecture
profession. Course fee

LAT 152  Landscape Graphic Communication I  4(1-6)
Explores a wide variety of media and illustration techniques relative to the
field of landscape architecture. Both the formal and informal applications of
mechanical and freehand drafting communication are emphasized to include
basic reproduction printing methods. Course fee

LAT 153  Landscape Graphic Communication II  4(1-6)
Prerequisite: LAT 152. Explores the basic principles of perspective layout,
acceptable landscape sketching techniques, preparation of graphic presenta-
tions. Primarily stresses black and white value drawing techniques. Course fee

LAT 160  Planting Design I  4(2-4)
Prerequisite: LAT 140 or LAT 141 or equivalent. Provides an overview of the
planting design process from site analysis to construction documentation.
Covers the basic theoretical principles of planting design as well as the practical
aspects of plants and design implementation. Projects cover a range of design
situations and stress development of basic skills. Course fee

Description:
- **DT 209 Industrial Drafting Lab**: Prerequisite: Department approval. Gives additional lab time to industrial drafting students to fulfill extra requirements. This lab must be taken in conjunction with a drafting class.
- **DT 210 Industrial Dimensioning Practices**: Prerequisite: DT 102 or equivalent. Establishing rules, principles and methods of dimensioning and tolerancing for specific design requirements on engineering drawings, and uniform practices for stating and interpreting these requirements. Includes geometric tolerances and introducing the symbolic method of specification.
- **DT 294 Drafting Independent Study (Industrial)**: Prerequisite: Department approval. Further drafting skills in beginning layout and advanced detailing. Advanced problems and research in design application. Course fee.
- **EQU 101 Equine Health/Management**: This course is an introductory course to a series of equine health and management courses. It will be of interest to the average horse owner or those interested in a career in the horse science or management field. Breeding, foaling, feeding, selection, conformation, housing, and basic behavior of the horse will be covered. Course fee.
- **EQU 102 Equine First Aid Seminar**: Equine First Aid will cover common injuries and ailments that require prompt action and attention by the horse owner. Included in the course will be recognition of common disorders, providing the veterinarian with pertinent information, and appropriate treatment. Course fee.
- **EQU 103 Equine Hoof Care**: This course will cover the anatomy and physiology of the foot, preventive foot care, maintenance of the healthy foot, and common foot ailments. A farrier will address selection of appropriate shoes, trimming, nailing, and corrective shoeing. Course fee.
- **EQU 107 Equine Farm Management**: This course is designed to cover management of the facilities, property selection, and development, and equipment. Topics included will be barn design and construction, ventilation, stabilizing, waste disposal and pasture management. Course fee.
- **EQU 109 Saddle Repair**: In this seminar the student will learn how to clean, recondition, and make minor repairs on English and Western saddles. Course fee.
- **EQU 125 Horse Training**: This is the first of two courses dealing with the theory of horse handling and training. Topics included will be ground work, trailer loading, safety, clipping and starting the young horse under saddle. Correction and prevention of behavioral problems will be discussed. Course fee.
- **EQU 126 Equine Anatomy and Physiology**: Prerequisite: EQU 101. This course will provide an in-depth study of anatomy and physiology and emphasize the function of all equine body systems. Course fee.
- **EQU 128 Show Your Horse**: This course is designed for horse owners interested in showing their horses. Preparation for the show ring will be discussed. Grooming, dressing and training for a maximum performance will be emphasized. Hunt Seat, Saddle Seat, Western, Halter and Showmanship class requirements will be covered. Students will take several field trips throughout the term. Course fee.
- **EQU 151 Beginning Pleasure Driving**: This course is designed as a beginning course for those interested in pleasure driving. Topics included: selection, purchase, and fit of appropriate harness, vehicle, and related tack; safety measures; ground work; harnessing, driving, selection of appropriate horse. Course fee.
- **FST 125 Arson Investigation**: Arson Investigation offers specialized training for insurance investigators and building operators, as well as fire fighters and Fire Marshal officers. Topics covered include duties of the fire fighters, investigators, police officers and prosecutors: electrical fires, scientific evidence, forensic laboratory services and vehicle fires. General areas will cover psychodynamics of criminal behavior, court decisions affecting fire investigation, insurance company operations, and any new items as current events require. No prerequisite. Course fee.
- **FST 130 Fire Protection Historical Overview**: Examines fire prevention and control in a historical and philosophical context; role of fire service in society and input from various municipal and private fire protection agencies; an overview of the nation's fire problems; job opportunities and necessary qualifications.
- **FST 160 Fire Fighting Strategy and Tactics I**: Fire fighting strategy and tactics, planning methods of attack, and preplanning fire problems.
- **FST 161 Basic Fire Protection**: Investigates organization and function of local, county, state, federal, and private fire protection agencies. Studies history of loss of life and protection by fire, and the history and philosophy of fire protection.
- **FST 164 Fire Protection Systems and Equipment I**: Covers fire detection and alarm systems, special hazard protection systems, sprinkler systems and fire extinguishing equipment.
- **FST 165 Hazardous Materials I**: Prerequisite: TEC 202. Explores fire fighting methods related to hazardous materials; includes solids, liquids and gases, and their storage. Consideration also given to the laws, standards and handling techniques of hazardous materials.
- **FST 166 Fire Training I-A**: Prerequisite: Active firefighter. Phase I of the Michigan Fire Fighters Association Training Program (66 hours).
- **FST 167 Fire Hydraulics I**: Prerequisite: FST 170. Outlines fundamentals of fire hydraulics. Includes water supply problems, standards on pump requirements, formulas, test criteria and physical laws relating to hydraulics, and practical application of fire fighting problems.
- **FST 168 Math for Firefighters**: Focuses on basic arithmetic operations and algebraic equations as they relate to fire science of operations and equipment.
- **FST 170 Physics for Firefighters**: Highlights several basic principals of physics: solids and their characteristics, liquids in motion, gas laws and applications.
- **FST 176 Fire Training I-B**: Prerequisite: FST 166. In Phase II, the student will handle and properly use the tools of the fire service. Emphasis is placed on the self-contained mask and the fire fighting protective clothing worn on the fire-ground.
- **FST 177 Fire Hydraulics II**: Prerequisite: FST 167. Emphasizes applications of hydraulic circuitry in pumping operations of fire fighting equipment.
- **FST 180 Fire Fighting Strategy and Tactics II**: Prerequisite: FST 160. Studies manpower assignments for stations and apparatus in communities of various sizes, to assist officers in making proper decisions in organizing and operating fire fighting forces.
- **FST 186 Fire Training 2-C**: Prerequisite: FST 176. In Phase III, a refinement of all the techniques used in Phase I and II. Fire-ground hydraulics and drivers-training exercises are studied and practiced.
FST 196  Fire Training 2-D  6(6-0)
Prerequisite: FST 186. Phase IV deals with the strategy and tactics used on the fire ground. Fire ground evaluations are conducted and critiqued. In most instances, this involves a structural burn. This phase is the culmination of many hours of training and testing. Students must exhibit proper physical coordination during the hands-on portion of equipment handling and apparatus operation.

FST 204  Fire Protection Systems and Equipment II  3(3-0)
Prerequisite: FST 164. Covers the proper installation and need for standpipe systems, pressure tank installations, hydraulic calculations and water supplies, and study of actual installation shop drawings.

FST 263  Building Construction for Fire Security I  3(3-0)
Involves essentials of building design and construction; special features and considerations relating to fire security.

FST 264  Fire Investigation I  3(3-0)
Investigate fire behavior, importance of determining origin, and procedures used in identifying accidental, incendiary, or arson type fires. Covers methods of recognizing and identifying motivation for arson and the laws that are relative to the intentional setting of fires.

FST 266  Fire Investigation II  3(3-0)
Prerequisite: FST 264. Preservation of evidence and photographic coverage of fire, methods of interrogation related to fire investigation, and conduct for investigators; libel, slander and court procedures related to evidence and statements, and the importance of cooperation between investigative agencies; records, reports, and case histories.

FST 268  Hazardous Materials II  3(3-0)
Prerequisite: FST 165. Covers methods of fire detection, control and extinguishing and the problems which are likely to arise whenever chemicals, explosives or radioactive materials are used; stored or transported.

FST 269  Responding to Emergencies in Hostile Situations  4(4-0)
Prerequisite: Must be a member of an emergency service unit. The purpose of this course is to acquaint personnel in emergency services occupations with a multi-disciplinary focus in dealing with the hazardous environment. Although the course is academic in nature, emphasis will be placed on developing diverse skills which will enhance the safety of the practitioner is rarely exposed but where the likelihood of morbidity is great, and should be prepared to guard against danger to himself/herself and others on the scene.

FST 270  Advanced Fire/Arson Investigation  3(3-0)
Prerequisite: FST 125. Active member of fire department, law enforcement agency, or private security. This is an advanced course in Fire/Arson Investigation for law enforcement and fire department personnel.

FST 275  Fire Claim Investigation for the Insurance Adjuster  3(3-0)
Prerequisite: Insurance Claim Adjuster or Representative. This is a special course for insurance claim personnel with interest in fire claim investigation.

FST 283  Building Construction for Fire Security II  3(3-0)
Prerequisite: FST 253. Studies building construction, protection of openings in floors, walls and partitions, exits, smoke and heat venting, protection against exposure, safety codes, sprinkler systems and special structures.

FST 290  Fire Administration  3(3-0)
Provides chief officers with a better understanding of motivation with proper direction from management, and presents modern approaches to the challenges which face today's fire executives.

FST 292  Instructor Training Methods  4(4-0)
Course is designed for training Fire Service and Emergency Services Personnel to become instructors in the subject area they know best. Will sharpen teaching skills, or beginning students will find this course in Methodology valuable. Some of the topics covered are: communication skills, classroom arrangement, establishing goals and objectives, building an effective lesson plan, etc. Approved and recognized by the Michigan Fire Fighter's Training Council.

FST 293  Fire Science Project  3(0-6)
Undertake and complete an independent study or project under staff supervision. Consult with faculty advisor before enrolling.

Landscape Architecture (LAT)

Construction & Engineering Technology

Computer Integrated Manufacturing

Division of Technology and Applied Sciences

LAT 100  Intro Landscape Drafting  3(2-2)
No drafting experience required. The use of drafting equipment, emphasizing lettering, line convention, and tile blocks. Develop basic format for designing construction drawings. Provides essential skills for beginning LAT Program. Course fee

LAT 130  Interior Landscaping  4(3-2)
The aim of this course is to acquaint the student with the identification, culture, placement and use of foliage and flowering plants in the home, office, mail or restaurant. Information relating to soil media, watering, light requirements, fertilizer, insect, and disease control and management will be discussed in relation to the plant's placement and use within the interior landscape.

LAT 132  Residential Landscaping  3(2-2)
Highlights a basic planning approach for improving your home landscape. The development of a basic design focusing on your own home including placement of plant material, decks, patios, water features and other landscape elements. A course for the new homeowner, homeowner renovating his landscape, residential landscaper or nurseryman. Course fee

LAT 133  Residential Landscape Maintenance  4(4-0)
Basic insect and disease identification and control measures will be discussed. A course for the homeowner, nurseryman or maintenance contractor. Course fee

LAT 140  Landscape Plant Materials I
(Deciduous Trees & Evergreens)  4(2-4)
Explores a group of hardy ornamental plants emphasizing deciduous trees, shrubs, evergreens, and ground covers. How to select the best and newest varieties will be highlighted. A good course for the landscaper, nurseryman or homeowner who would like to identify or refresh one's skills in identification. Course fee

LAT 141  Landscape Plant Materials II
(Flowering Trees, Shrubs and Ground Cover)  4(2-4)
The exploration of spring flowering trees, shrubs, broadleaf evergreens, and groundcovers. Highlighting the time of bloom and special features such as fruit, bark, foliage color and buds as they relate to the landscape. Basic plant identification is developed and positive design characteristics of individual plants are stressed. Slides of individual plants will be presented, as well as walking labs to highlight these plants. Course fee

LAT 142  Landscape Plant Materials III
(Perennial and Annual Flowering Plants)  4(2-4)
This class will discuss identification and basic culture of approximately 150 perennial and annual flowering and bedding plants. Specific features of each plant will be discussed in relation to its proper landscape use. Herbs, grasses, rock and water garden plants will also be highlighted. Guest speakers will highlight major areas. Course fee

LAT 150  Introduction to Landscape Architecture  4(2-4)
Previews the broad scale concepts of landscape architecture. Lectures, reading, and practical problem-solving exercises provide a basic overview of the historical, philosophical, and technical aspects of the landscape architecture profession. Course fee

LAT 152  Landscape Graphic Communication I  4(1-6)
Explores a wide variety of media and illustration techniques relative to the field of landscape architecture. Both the formal and informal applications of mechanical and freehand drafting communication are emphasized to include basic reproduction printing methods. Course fee

LAT 153  Landscape Graphic Communication II  4(1-6)
Prerequisite: LAT 152. Explores the basic principles of perspective layout, acceptable landscape sketching techniques, preparation of graphic presentations. Primarily stresses black and white value drawing techniques. Course fee

LAT 160  Planting Design I  4(2-4)
Prerequisite: LAT 140 or LAT 141 or equivalent. Provides an overview of the planting design process from site analysis to construction documentation. Covers the basic theoretical principles of planting design as well as the practical aspects of plants and design implementation. Projects cover a range of design situations and stress development of basic skills. Course fee
LAT 161 Planting Design II 4(2-4)
Prerequisite: LAT 160. Stresses the functional aspects of plants as major design considerations. Familiarization and use of indigenous plant material is expanded and basic soil analysis skills are developed. Emphasis is placed on graphic techniques for delineating planting plans. Course fee

LAT 164 Landscape Design I 4(1-6)
Emphasizes use of the design process to solve a variety of elementary urban and non-urban site planning problems. Project design solutions require graphic delineation primarily stressing plan view presentations. Course fee

LAT 165 Landscape Design II 4(1-6)
Prerequisite: LAT 164. Focuses on advanced landscape design problem solving. Comprehensive design and analysis techniques are explored. Graphical problem solutions include the use of auxiliary elevations and detail plan views. Specialized design problems emphasize environmental design factors. Course fee

LAT 170 Site Grading I 4(2-4)
Prerequisite: MTH 012. Stresses the basic principles, methods, and procedures for grading a site. Provides familiarity with the use of contour lines, the interpretation of landform features, and computation of earthwork cut and fill manipulations. Course fee

LAT 171 Site Grading II 4(2-4)
Prerequisite: LAT 170. Explores advanced principles, methods, and procedures for grading a site. Emphasis is placed on the Michigan Soil Erosion and Sedimentation Control Act with respect to earth change plans and the specialized requirements related to grading recreational and utility facilities. Course fee

LAT 250 Landscape Construction Methods 4(4-0)
Analyzes the comparative uses and methods of installing masonry, asphalt, wood, concrete, and other landscape materials. Physical properties of landscape materials are studied. Course fee

LAT 260 Planting Design III 4(2-4)
Prerequisite: LAT 161. Covers the implementation aspects of planting design dealing with cost estimating, project phasing, planting plan detail development, and specialized planting situations and conditions. Acceptable nursery standards are previewed and planting plan specifications are examined. Course fee

LAT 261 Planting Design IV 4(2-4)
Prerequisite: LAT 260. Outlines the principles and considerations for maintenance efficiency in developing planting design proposals. Provides information concerning all aspects of landscape planting care, plant installation techniques, fertilizing, disease and pest control and pruning. Low maintenance indigenous plant species are highlighted. Course fee

LAT 264 Landscape Design III 4(1-6)
Prerequisite: LAT 165. Emphasizes specialized design problem solving. Environmental impact considerations are examined and alternative design solutions are explored. Presents large scale regional design techniques. Course fee

LAT 265 Landscape Construction Details I 4(3-2)
Prerequisite: AT 100 or LAT 100 or equivalent. Focuses on the acceptable graphic approach for drawing landscape construction details. Includes various landscape features, pedestrian and vehicular circulation systems, utilities, light construction elements, and recreation facilities. Stresses detail coordination with site plan layout. Course fee

LAT 266 Landscape Construction Details II 4(1-6)
Prerequisite: LAT 265. Emphasizes the design and build aspects of detail landscape planning. Coordinates project design with detail development, material tabulation, and cost estimating factors. Includes detailed considerations of irrigation systems, general site appurtenances, and additional light construction features. Course fee

LAT 276 Landscape Documents and Specifications 4(2-4)
Elaborates the principles and relationships between specifications and working drawings. Stresses familiarity with bidding procedures and general contract conditions. Involves practical landscape specification writing. Course fee

LAT 277 Landscape Office Practice 4(4-0)
Introduces the elements of office business practice and organization, record-keeping, on-the-job inspection, and close out, and initial proposal writing and contract formulation. Course fee

LAT 280 Financial Management 4(4-0)
This class will provide a basic outline of forms and management techniques for the design professional as well as the nursery owner or general contractor. Form used and recommended by various organizations and businesses will be discussed. The proper management format for a successful small or large business will be outlined. All horticultural related businesses will be highlighted.

LAT 282 Microcomputers in Landscape Architecture 4(2-4)
No prerequisite. To introduce students to the use of microcomputers in the landscape field. Exposure to the use of computers for business purposes, preparing forms, data, etc. Course will feature a "hands-on" utilization for plant selection, material inventory, site construction data and design assistance. Course fee

LAT 287 Site Layout I 4(2-4)
Prerequisite: LAT 171. Covers plan dimensioning and basic techniques for laying out a variety of landscape elements, such as parking lots, roadway development, sidewalks, patios and building locations. Graphical techniques are stressed. Layout and design orientation for sports and recreation facilities are highlighted. Course fee

LAT 288 Site Layout II 4(2-4)
Prerequisite: LAT 287. Features layout of horizontal and vertical alignment of pedestrian and vehicular circulation systems as well as the layout and design of utilities, irrigation, and outdoor electrical systems. Proficiency in graphic delineation is stressed. Course fee

LAT 294 Landscape Project (Landscape Architecture) 4(0-8)
Prerequisite: Advisor's approval. Research, design and construct a project with the guidance of an instructor. For students who have completed basic landscape architectural courses and desire in-depth projects in a particular area of landscape architectural drawing.

Applied Technical Math/Writing (TEC) 4(4-0)
Construction & Engineering Technology
Computer Integrated Manufacturing
Division of Technology and Applied Sciences

TEC 102 Industrial Communications 4(4-0)
A practical approach to clear written communication, including organizational skills, a review of grammar, skills needed to write effectively on the job. Written assignments include memos and business letters. All terms.

TEC 150 Technical Math Introduction 5(5-0)
Prerequisite: High School Algebra or Placement Test. Covers the prerequisite material to the TEC 151 and 152 math series. Topics include arithmetic, approximate numbers, simple equations, and factoring. All terms.

TEC 151 Technical Mathematics I 5(5-0)
Prerequisite: Math Placement Test. Applies topics from algebra and trigonometry to architectural technology, civil technology, electronics and mechanical technology. Covers quadratic equations, trigonometry, vectors, and j-operator. Fall, winter, and spring terms.

TEC 152 Technical Mathematics II 5(5-0)
Prerequisite: TEC 151 or equivalent. Covers the application of logarithms, differential calculus and integral calculus to practical technical problems. Topics include related rates, maximum and minimum problems, and areas under curves. Winter and spring terms.

TEC 153 Technical Mathematics III 5(5-0)
Prerequisite: TEC 152 or equivalent. Applies topics from algebra and trigonometry to architectural technology, civil technology, electronics and mechanical technology. Covers quadratic equations, trigonometry, vectors, and j-operator. Fall, winter, and spring terms.

TEC 201 Applied Physics 4(4-0)
Prerequisite: Algebra. Includes basic principles of mechanical technology, electricity and electronics technology, civil technology, hydraulics, metal working, heating and air conditioning. Provides basic training in fundamental physical phenomena and emphasizes practical problems. All terms.

TEC 202 Industrial Chemistry 4(4-0)
Focuses on basics in general chemistry for the technician. Topics include atomic and molecular theory, bonding properties or elements, oxidation reduction reactions, kinetic-molecular theory, solutions and electrochemistry. Applications are made to the field of fire protection primarily.
Division of Technology and Applied Sciences

TEC 203 Technical Report Writing (4-0-0)
Prerequisite: TEC 102. Covers technical writing style, format and techniques. Emphasis is on organization and purpose. Special unit on developing materials for employment applications. Recommended for second year students. All terms.

TEC 204 Technical Internship Training (4-0-0)
After successful completion of basic courses, usually following the freshman year, students may elect an internship. This course allows the student to be placed in an approved training situation and earn credits for satisfactory work performance. To participate in this program students must be qualified to receive approval from their department. Their occupational interests are considered along with their background or related classes to determine placement.

HEALTH CAREERS TECHNOLOGY

Director: Donna Price
175 Gannon Physical Education Center

Department Role and Objectives
Health Careers Technology provides initial and lifelong education opportunities for health occupations, health promotion, and rehabilitation for individuals within the college and community.

Graduates of health occupations curricula are prepared to function as beginning practitioners in their specialty. Their participation assists the health care delivery system in providing safe, effective health care.

Credentialed health professionals are provided continuing education to update knowledge, learn new skills, or retrain for reentry into the health care delivery system.

Individuals in the community are provided educational opportunities to learn health promotion, disease prevention, and rehabilitation for lifelong physical well-being.

The department continually monitors trends and changes in health care technology, advances in medical science, and changes in the health care delivery system so that it can respond with appropriate courses and curricula in a timely manner.

Programs of Study
Health Careers Technology currently offers programs leading to the Associate Degree in Applied Science with major emphasis in:

- DA: Dental Assistant
- DH: Dental Hygiene
- DHA: Dental Assistant and Dental Hygiene
- DMS: Diagnostic Medical Sonography
- ESA: Advanced Emergency Medical Technology (Paramedic)
- HF: Health and Fitness
- HFC: Health, Fitness/Cardiac
- HFN: Health, Fitness/Neurologic
- NJR: Nursing (Career Ladder L.P.N. — R.P.N.)
- RAD: Radiation Therapy Technology
- RT & RTA: Respiratory Therapy Technology
- RX: Radiologic Technology

And one-year curricula leading to the Certificate in:

- DA & DHA: Dental Assistant
- DMS: Diagnostic Medical Sonography
- EMS: Emergency Medical Services
- EMT: Emergency Medical Technician
- ER: Emergency Care
- MA: Medical Assistant
- NJR: Practical Nursing
- RAD: Radiation Therapy Technology
- RT: Respiratory Therapy Technician
- ST: Surgical Technician

And one or two term curricula:

- CHS: Aide for Developmentally Disabled
- CHS: Central Supply Technician
- CHS: Dental Insurance Billing
- CHS: Health Unit Clerk/Coordinator
- CHS: Home Health Aide
- CHS: Hospital Food Service Supervisor/Dietary Assistant
- CHS: Pharmacy Technician
- CHS: Phlebotomy Technician
- CHS: Psychiatric Technician
- DSC: Dental Service Courses

*The length of these programs varies from three to nine quarter terms in order to meet curriculum, clinical practice, and other requirements established by professional accrediting agencies and government licensing agencies. Most curricula also require more than the minimum ninety quarter term credits for graduation. Because Health Careers curricula are designed to assist the student in achieving eligibility to write Licensing or National Certification Examinations, and meeting minimum standards of safety in practice in the respective field, specific admission requirements have been established for each curriculum. Applicants are expected to satisfy requirements for the College as well as for the individual curricula and not be eligible for licensing examinations unless all requirements are met.

All programs conducted in the Department are subject to criteria and minimum education standards of government licensing agencies and/or professional accrediting agencies. The following agencies have either granted full approval and/or full accreditation or are currently in process:

- American Medical Association Committee on Allied Health and Accreditation, and the respective Joint Review Committees on Accreditation of programs in Radiologic Technology, Nuclear Medicine Technology, Radiation Therapy, and Medical Diagnostic Sonography
- American Dental Association, Commission on Dental Accreditation
- National League for Nursing, Department of Associate Degree curricula in Nursing
- Association of Surgical Technologists
- Michigan Board of Nursing
- Michigan Board of Dentistry
- Michigan Department of Public Health, Division of Emergency Medical Services

In addition to health occupations curricula, the department offers courses and curricula in Health Education for healthy living, Health Promotion Services, and Adaptive Rehabilitation Education. Fitness testing, exercise prescription and a variety of opportunities for physical exercise and health education is available to students interested in improving their physical well-being.

Rehabilitation exercise for persons with cardiac conditions is available to those persons referred by their physicians. Emphasis is placed on a return to optimum levels of physical activity for those with cardiac, neurological or other chronic conditions.

Audio-Visual/Patient Care/Practice Laboratory
Health Careers Technology has developed a series of audio-visual study units which have been designed to replace some traditional teaching methods, and others which supplement or enhance classroom and laboratory instruction. Study units include color slide films or filmstrips, audio-tapes and video-tapes. These study units have been developed for the audio-visual laboratory with all faculty participating to assure effectiveness and pertinence to respective curricula.

Development of additional study units is in a continuing process in the department; and as units are completed they will be utilized in the respective curricula and courses.

Students in all curricula receive an orientation in the use of audio-visual laboratory equipment, and staff assistance.

Other laboratories used in conjunction with A.V. materials provide hospital, medical, and dental equipment and materials for student practice and skill development.

An increasing number of courses involve computer assisted instruction. Students applying for admission to health careers curricula or courses are encouraged to inquire whether computer use is included. At present, students are oriented to computer use in those courses where it is required. Other courses in computer use are offered in the Business Division.

New Programs, Curricula, and Courses
In addition to the curricula and courses offered currently, Health Careers Technology will continue to review and respond to community needs, developments in computerization, and high technology. As the need is determined, new courses and/or new programs will be developed and offered.

The growing use of computers in relation to x-ray and laboratory procedures, laser beam surgery, miniaturization, and artificial organ replacements will require revisions of current curriculums, or the development of new technical programs. Therefore, prospective students are encouraged to contact the Department in addition to their review of the catalog.

Community Health Services
Program Director: Carol Phelan
175 Gannon-Physical Education Building

Programs which meet a need in the community for training technicians in certain vocational areas are also offered. These technicians currently include Health Unit clerk/coordinator, nurse health aide, central supply technician, pharmacy technician, aide for developmentally disabled, psychiatric technician, cardiac technician, phlebotomy technician, dietary assistant, medical assistant and medical insurance billing. Also, a series of courses and seminars are offered, in coordination with the Center for Aging Education, for the family in-home care giver.
Continuing Health Careers
Program Director: Carol Phalan
175 Gannon-Physical Education Building

Continuing Health Careers offers courses, workshops and seminars in all health disciplines to graduates of basic programs to update their skills and knowledge obtained in basic programs, and to enable them to acquire the new skills and additional knowledge necessary for expanding their roles, or for assuming new roles. Because these new programs are being developed continuously, please contact the department for periodic updates regarding new offerings.

Dental Assistant
Program Director: Sally Deck, R.D.H., M.S.
007 Arts & Sciences Building

This is a two-year career ladder curriculum. The first year combines basic dental assistant courses and science courses with minimal clinical experience. Upon completing the first year program, the college grants a Certificate and the student may apply for the second year curriculum.

The second year curriculum includes advanced dental assistant courses, comprehensive clinical experience and intra-oral advance functions for dental assistants. Upon completing both years, the graduate earns an Associate Degree from the college and is eligible for the national certifying exam administered by the Dental Assisting National Board and the licensing exam administered by the Michigan Board of Dentistry.

The career ladder curriculum prepares one to function first as a Chairside Dental Assistant and then as a Registered Dental Assistant with the dental health team. The Dental Assistant curriculum is accredited by the Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and by the United States Department of Education.

The college also provides a three semester Dental Business Assistant curriculum for persons interested in performing receptionist and office manager duties for the dental office.

Admission requirements for each of these dental assistant curricula and information about career options may be obtained from the Dental Adviser at the Dental Auxiliary Programs Office, 007 A&S Bldg, phone 483-1457. Admission requirements information may also be obtained from the Admissions Counselor for Health Careers at the Admissions Office.

Dental Hygiene
Program Director: Sally Deck, R.D.H., M.S.
007 Arts & Sciences Building

Lansing Community College offers a two-year* dental hygiene curriculum. Upon successful completion an Associate Degree is awarded, and the graduate is eligible for the licensing examination in dental hygiene administered by the Michigan Board of Dentistry. Following graduation and successful completion of the examination for licensure, the dental hygienist is prepared to function as a member of the dental health team in the state of Michigan.

The Dental Hygiene curriculum is accredited by the Commission on Dental Accreditation, a specialized accrediting body recognized by the Council on Postsecondary Accreditation and by the United States Department of Education. Admission qualifications and basic curriculum are carefully designed to assist the graduate in meeting the responsibilities of the dental hygienist's professional role.

Admission requirements and information about career options may be obtained from the Dental Adviser at the Dental Auxiliary Programs Office, 007 A&S Bldg, phone 483-1457. Admission requirements may also be obtained from the Admissions Counselor for Health Careers at the Admissions Office.

*Prerequisite courses generally require three additional terms prior to the six term curriculum for Dental Hygiene.

Diagnostic Medical Sonography
Program Director: Ronald Griffith
175 Gannon-Physical Education Building

Graduates of the Associate Degree in Applied Science in Diagnostic Medical Sonography are eligible to write the Registry Examination as given by the American Registry of Diagnostic Medical Sonographers, entitling them to the privilege of carrying the insignia initials, R.D.M.S.

The curriculum is four terms in length and is open to those persons who are graduates of CAHEA approved Allied Health Programs (Radiologic Technology, Respiratory Therapy, Nursing, etc.). Because of the structure of the curriculum, individuals with questions should contact Health Careers Technology, phone 483-1410.

Emergency Medical Services
Program Director: Richard Broussard
175 Gannon-Physical Education Building

Health Careers Technology offers curricula for the education of Basic Emergency Medical Technicians (EMT), EMT Specialists, and Paramedics. Also, the EMT Instructor Coordinator course, first aid courses, CPR seminars and continuing education seminars for EMS personnel are offered.

The Basic EMT curriculum is approved by the EMS Division of Michigan Department of Public Health and its curriculum exceeds the nationally recommended EMT-DOT curriculum. Upon successful completion the student is eligible to take the Michigan written and practical exam. The three term Basic EMT course is approved by the EMS Division of Michigan Department of Public Health and its curriculum exceeds the nationally recommended EMT-DOT curriculum. Upon successful completion the student is eligible to take the Michigan written and practical exam.

The EMT (Paramedic) curriculum is a two year program designed to prepare the student for the Michigan written and practical exam. The three term Basic EMT course and a series of other courses designed to prepare the student in all aspects of basic emergency medical technology including physical assessment, anatomy, terminology, extrication, communications, ambulance driving, pharmaceutical introduction to paramedic and emergency medicine. The Basic EMT course may be completed in a part-time or full-time basis. Basic EMT is intended to prepare students for the Advanced EMT (Paramedic) and its curriculum constitutes that which is required for the first year of the program leading to the Associate Degree in Emergency Medical Sciences.

An intermediate level of EMT called the EMT Specialist is available in a series of 2 courses. It is approved by the EMS Division of Michigan Department of Public Health and prepares the student for the state certification examination. The Advanced EMT (Paramedic) curriculum is three terms in length and constitutes the courses of the second year of the Associate Degree. It is approved by the EMS Division of Michigan Department of Public Health and requires attendance on a full-time basis. Following successful completion the student is eligible to take the state examination for licensure.

All curricula consist of classroom and clinical instruction by registered nurses, paramedics, EMT's and physicians in cooperation with local hospitals and EMS agencies. A training ambulance is available for simulations and provides a realistic atmosphere for learning.

Health, Fitness and Rehabilitation
Program Director: Rosalie Walker
175 Gannon-Physical Education Building

Health Careers Technology and Center for Health Education/Rehabilitation offers an Adaptive Rehabilitation and Health Education Program. A significant portion of the curriculum includes continuous aerobic exercise classes which are conducted under the guidance of a physician for students needing health improvement. Rehabilitation is directed at students and their spouses with heart disease, neurological disorders, or chronic diseases.

Anyone wishing to increase fitness and decrease the risk factors which might cause disease is also welcome to participate. As with rehabilitation, adult fitness is health education which emphasizes aerobic exercise, proper nutrition, stress reduction, smoking cessation, cholesterol reduction and assessment of individual lifestyle styles. Staff members are experienced in the development and establishment of corporate fitness programs.

Medical Assistant
Coordinator: Jacque Woessner
175 Gannon-Physical Education Building

Medical Assisting is a three term certificate curriculum that begins every fall term. Upon successful completion of the program and one year of work experience, graduates are eligible to take the certification examination offered by the American Association of Medical Assistants.

Applicants are required to meet the admission requirements of the college and the prerequisite course requirements established by the curriculum. The curriculum includes general health career courses and specific courses pertinent to Medical Assisting. Clinical experience is completed in a physician's office or a health care institution. Individuals with questions should contact Health Careers Technology, phone 483-1410.

Practical Nurse-Associate Degree Nursing
(Career Ladder in Nursing)
Program Director: Patricia Lambert
175 Gannon-Physical Education Building

Nursing is a curriculum which builds on previous learning and experience. All students will be admitted into the first year of the Nursing curriculum. Upon successful completion of required courses students may exit after the first year and are eligible to take the Practical Nurse National Council Licensing Examination (NCLEX-PN).

Qualification will be admitted into the second year to complete the requirements of Associate Degree Nursing. After successful completion of required courses students will be eligible to take the Registered Nurse National Council Licensing Examinations.

Courses in behavioral science, biological sciences, and the Humanities provide an academic background of scientific principles and communication skills on which to base client care. Theory content, simulated laboratory experiences, and clinical laboratory experiences are provided at the college and/or in area hospitals and nursing homes.

Student learning experiences are planned to progress from simple to complex client care problems. Emphasis is placed on the process of nursing, development of nursing skills, and development of communication skills. The concepts of applied pharmacy, applied nutrition, common health problems,
Division of Technology and Applied Sciences

health team, cultural diversity, and human sexuality are also integrated throughout the curriculum.

Upon completion of the first year of the curriculum the graduate will have received theory and clinical experience in Nursing Foundations, Medical Surgical Nursing, Maternity Nursing, Nursing of Children, and Practical Nurse Role.

The student who exits after the first year is required to meet the Department of Health Careers criteria for practical nursing students to be eligible for certification.

Licensed practical nurses may apply for advanced standing to the Associate Degree in Nursing.

Upon completion of the second year of the curriculum the graduate will have received theory and clinical experience in Nursing Foundations, Medical Surgical Nursing, Maternity Nursing, Nursing of Children, Psychiatric Nursing, Beginning Nursing Managerial Skills, and Associate Degree Nursing Role.

The student who completes the Associate Degree Nursing curriculum and college requirements will be eligible to graduate with an Associate Degree in Applied Science—Nursing major.

The Associate Degree Nursing curriculum is approved by the Michigan Board of Nursing and is accredited by the National League for Nursing.

Applicants to the Career Ladder in Nursing are required to meet admission requirements established by the College and Health Careers Technology. Applicants are admitted to the program on a first-qualified, first-served basis.

Radiation Therapy Technology
Program Director: Ronald Griffith
175 Gannon-Physical Education Building

The Associate Degree in Applied Science in Radiation Therapy Technology at Lansing Community College is approved by the American Medical Association's Committee on Allied Health Education and Accreditation. Graduates are eligible for the Associate Degree in Applied Science and are eligible to write the Registry examination as given by the American Registry of Radiologic Technologists, entitling them to the privilege of carrying the initials, R.T.(R).

The curriculum is five terms in length and is open to those persons who are graduates of CAHEA approved curricula in Radiologic Technology. Because of the structure of the curriculum, individuals with questions should contact Health Careers Technology, phone 485-1411.

Radiologic Technology
Program Director: Ronald Griffith
175 Gannon-Physical Education Building

The Associate Degree in Applied Science in Radiologic Technology at Lansing Community College is approved by the American Medical Association's Committee on Allied Health Education and Accreditation. Graduates are eligible for the Associate Degree in Applied Science and are eligible to write the Registry examination as given by the American Registry of Radiologic Technologists, entitling them to the privilege of carrying the initials, R.T.(R).

The two-year (24 continuous months) curriculum includes selected liberal arts and science courses which provide the basis for an in-depth consideration of theory and clinical applications in Radiologic Technology. The students are first evaluated on their performance in an examination at the College laboratory before they complete their assignments at one of the five affiliated hospitals.

Interested students are urged to contact the Admissions Counselor for Health Careers, Admissions Office, for specific requirements for program admission.

Respiratory Therapy
Program Director: Jerry Rocho
175 Gannon-Physical Education Building

The Lansing Community College Health Careers Technology offers a two-year associate degree curriculum designed to prepare therapist level personnel, and a one-year certificate designed to train technician level personnel. Both curricula involve classes in the liberal arts and sciences, general health career courses, and specific courses in respiratory therapy. The respiratory therapy courses involve classroom lectures, campus laboratory practice and extensive scheduled hospital practice.

Upon successful completion of seven terms* in the curriculum for the Associate Degree, the student is awarded an Associate Degree in Applied Science, with a specialty in respiratory therapy. After completing required work experience in respiratory therapy, an Associate Degree graduate becomes eligible to take the written and clinical simulation National Registry Examination administered by the National Board for Respiratory Care.

Upon successful completion of four terms in the curriculum for the Certificate, the student is awarded a Certificate in Respiratory Therapy. A Certificate graduate is eligible to take the National Certification Examination administered by the National Board for Respiratory Care.

by the National Board for Respiratory Care. Also, Certificate graduates are eligible to apply for re-admission to the second year of the Associate Degree after completing at least nine months of post graduate work experience in respiratory therapy.

Respiratory Therapy admissions are limited due to the small number of students who can be effectively trained in equipment and procedures on campus and in supervised hospital clinical practice.

Prospective applicants should obtain detailed admissions information and requirements from the Admissions Counselor for Health Careers, Admissions Office.

Surgical Technology
Program Director: Donna Price
175 Gannon-Physical Education Building

Upon completion of a nine month (3 terms) curriculum in surgical technology, the student will have earned a certificate and will be eligible for certification by the Association of Surgical Technologists.

The surgical technologist is employed in the hospital as part of the surgical team. Duties include preparing and positioning patients for surgical procedures, operating surgical equipment and directly assisting the surgeon by providing instruments. The surgical technologist must be able to work well under stress and be able to communicate effectively with other members of the surgical team.

Applicants to the curriculum are required to meet not only the admission requirements of the college but those established for the Surgical Technology Program. Information regarding requirements for program admission may be obtained from the Admissions Counselor for Health Careers, Admissions Office.

COURSE DESCRIPTIONS

Allied Health Careers (AHC)
Health Careers Technology
Division of Technology and Applied Sciences

AHC 102 Nutrition
2(2-0)
Prerequisite: Allied Health Professional, BIO 101 recommended. Principles of nutrition including identification of the major nutrients, metabolism, body requirements during various life stages, effects of variations of intake, and food sources of the nutrients. Some diseases for which diet plays an important role in treatment are discussed.

AHC 104 Patient Care Principles
5(3-4)
Prerequisite: Admission to Surgical Technology, Radiologic Technology or Respiratory Therapy Technology Programs. Principles of patient care are given with emphasis on Allied Health Personnel role in the health team. Includes basic patient practices with aid to emotional support.

AHC 106 Introduction to Pathology
3(3-0)
Prerequisite: Allied Health Professional. Course includes concepts of disease processes and effect on normal structure and function of the body. To develop a new way of thinking about disease processes, general principles of pathology are discussed, rather than specific disease entities.

AHC 108 Body Systems
5(2-0)
Prerequisite: Allied Health Professional. Introductory or review course for students in allied health careers. It provides a concise survey of the human body and emphasizes the practical application of physiological concepts. It does not meet the requirements for a full anatomy or physiology course.

Continuing Health Careers (CHC)
Health Careers Technology
Division of Technology and Applied Sciences

CHC 100 Nurse Refresher
12(7-12)
Prerequisite: Current Michigan License. For the inactive R.N. and L.P.N. who would like to reenter active practice. Includes theory and practice in nursing care, pharmacology, professional practices and new concepts of delivering health care. A clinical component is included.

CHC 101 Suicide Seminar
0.5(5-0)
Seminar designed for health care professionals and paraprofessionals, security and custody professionals. Includes techniques necessary to recognize suicide potential, assess suicidal lethality and prevent suicide.
Division of Technology and Applied Sciences

CHC 102 Pharmacology 6(6-0)
Prerequisite: Pharmacology Math and PGO 212. Primarily for the Licensed Practical Nurse, but a useful refresher for the inactive Registered Nurse. Includes dosage calculations, drug administration, systemic approach and pharmacological actions, reactions and untoward effects, IV solution preparation, hypertalination, body fluid maintenance, and pH homeostasis. Known significant drug-drug, drug-food, and drug-laboratory interactions will be covered. This course is NAPNES approved. A minimum grade of 2.5 is required for a certificate.

CHC 103 Basic Psychiatric Technician Update 2(2-0)
A course designed to update current mental health practices and to provide additional information for the practicing basic psychiatric technician. Course content will include: the borderline personality disorder, substance abuse, dual diagnosis, the developmentally disabled, signs and symptoms of depression, crisis intervention and psychotropic medications. The material will be presented through lecture, case studies and group discussions.

CHC 106 Cardiac Arrhythmia Interpretation 3.5(3-1)
Prerequisite: Nurse, AEFT, or equivalent. This is a comprehensive level course designed for practicing RN's, but also open to other interested health professionals. Emphasis will be placed on the identification and treatment of major and/or lethal arrhythmias according to ACC.A.S guidelines. Discussion of anatomy and physiology of the cardiovascular system will serve as a basis for analyzing the hemodynamic changes occurring with rhythm disturbances. Students will have opportunities to identify arrhythmias both on rhythm strips and on a monitor. Cardiac drugs commonly seen will be studied in relationship to their use in the treatment of cardiac arrhythmias.

CHC 107 Community Resources for Health Professionals 1(1-0)
A course designed to help health care professionals identify and utilize community resources for their client population. Material will be presented through lecture by representatives of various local health care providers for clients and/or families.

CHC 109 Oral Radiography for Dental Auxiliary 3(2-2)
Prerequisite: Dental Auxiliary with one year experience. Upon completion of this course the dental auxiliary will have the knowledge and skills needed to produce a full mouth series of intraoral radiographs of diagnostic quality. Emphasis will be on the use of peripheral periapical technique. The course content will include the production and emission of X-rays, the effects of factor variation on the image, radiation properties, radiation safety, measures, processing procedures, mounting radiographs, evaluation and interpretation of radiographs, and types and uses of extraoral exposures. Individualized laboratory sessions provide student practice in exposing, processing, mounting and evaluating radiographs.

CHC 110 Oral Radiography Update 3(1-0)
This course is designed for the dental hygienist and the dental assistant who desire to improve the diagnostic quality of the radiographic techniques they expose. The course format includes a review of dental radiology concepts and hands-on instruction in using intraoral techniques. Lecture material includes: radiation physics, radiation safety and protection, quality assurance and intraoral techniques.

CHC 112 Dental Auxiliary X-Ray 2(1.5-1)
Prerequisite: Dental Auxiliary with one year experience. For dental auxiliaries to update their skills and knowledge of making intraoral radiographs. Includes theory and laboratory practice on a radiographic skull or DXTFR.

CHC 113 Physical Assessment Refresher 1(1-0)
This seminar is designed for students who have already had formal training in physical examination skills. Course content is designed to help students recall important signs of pathology as well as normal physical findings. There is also ample opportunity through supervised practice sessions, to improve specific techniques of physical examination.

CHC 114 Physical Assessment 3.5(3-1)
Prerequisite: Active LPN or RN. Expand the skills of the RN and LPN in data collection evaluation and decision-making regarding the physical status of patients. Lectures and supervised practice sessions with live models. Useful for nurses in any area of clinical practice. Includes the study of each major body system. Practice in physical exam skills and equipment relative to each system.

CHC 128 Cardiac Nursing Problems 3(3-0)
Prerequisite: RN, LPN, or Allied Health Professional. An introductory level course designed for RN's, but also open to LPN's and other health professionals. To equip nurses with knowledge base necessary to provide safe nursing care for the cardiovascular patient. Focus is on the application of concepts applicable to the rehabilitation process. Cardiovascular anatomy and physiology will serve as a basis for analyzing problems of heart disease and determining nursing management. Patient needs, pharmacology of cardiac drugs will be studied, in addition to the concepts and use of CPR, pacemaker, central venous pressure and Swan-Ganz monitoring.

CHC 134 Neurologic Assessment Nursing 1(1-0)
Prerequisite: RN, LPN, or Allied Health Professional. Acquaint the practicing nurse with the basic neurologic exam. Primary focus is on the application of specific parts of the exam to patients with a variety of clinical problems. Includes sensory exam, motor and cerebellar exam, testing of reflexes, examination of cranial nerves and selected signs of neuropathology. Supervised practice sessions.

CHC 181 Hemodynamic Monitoring 2(2-0)
Prerequisite: RN or Allied Health Professional. For nurses and health professionals working in special care settings where various modes of hemodynamic monitoring are employed. Different pressure monitoring systems are discussed. Detect abnormal waveforms as well as potential problems in the pressure modulations. Practice with pressure tracings and to examine and handle pressure monitoring equipment.

CHC 182 Acute Trauma Nursing 3(3-0)
Prerequisite: RN or Allied Health Professional. For nurses, paramedics, emergency service technicians and other health care professionals. Expand knowledge of assessment and management of selected types of acute trauma. Lectures, case study situations, and "hands-on" practice sessions assist the understanding of the evaluation and immediate treatment of acute trauma. Head and neck injuries, chest trauma, major abdominal trauma, and the complicated multiple trauma patient included.

CHC 185 Laboratory Tests for Nurses 0.75(7-0)
For nurses in any area of clinical practice. Explanations of specific lab tests, collection and handling of specimens, interpretation of laboratory test values, and application of lab data to nursing practice. Mock lab reports and case study situations to assist the student's understanding and application of laboratory data.

CHC 186 Neuropathology for Nurses 1(1-0)
Prerequisite: Nurse or Allied Health Professional. For nurses interested in learning more about specific types of pathologic conditions frequently encountered. Mechanics of increased intracranial pressure and means of monitoring ICP.

CHC 190 Pharmacology Math 1(1-0)
Prerequisite: Allied Health Professional. A six-week seminar designed for the RN, LPN or student in a nursing curriculum. The course will include a basic math review and will familiarize the student in working with drug dosages, IV calculations and pediatric dosages.

CHC 192 Fetal Monitoring 2(2-0)
Prerequisite: RN or LPN. To update and explore fetal-maternal monitoring, instrumentation and clinical application in both the antepartum and intrapartum period. Integration of physiological principles and variables affecting fetal heart rate patterns emphasized. Demonstration and practice reading reading monitoring records enable application of patient identification. Practice application of external and internal transducers is included.

CHC 193 Cardiac Interpretation for EKG Technicians 3(3-0)
Prerequisite: RN, LPN, Technician. For technicians, EMFT's, AEFT's and non-critical care nurses. Emphasis on identification and immediate treatment of major and lethal arrhythmias. Sign of cardiac pathologies. Cardiac drugs discussed in relation to each arrhythmia. How to monitor patients and to obtain a 12 lead EKG.

CHC 194 Mental Health Nursing Seminar 2(2-0)
This course is designed for registered nurses who currently work or potentially will work in a mental health/psychiatric setting or with clients with emotional problems. Students are taught the content for a mental status assessment; therapeutic communication techniques; uses, side effects, adverse reactions and contraindications of psychotropic medications; patient teaching techniques; nursing interventions for psychotic responses/behaviors, and the evaluation of client progress.
Division of Technology and Applied Sciences 127

CHC 195 Effective Interactions and Problem Solving Techniques 1(0-0)
Prerequisite: RN, LPN, or Allied Health Professional. A seminar for nurses and other health professionals in any work setting, as well as those currently inactive. Stress the application of effective communication skills in typical situations encountered in nursing and medical practice. Identify personality and temperament styles and learn skills of empathic listening; conflict resolution; values clarification; and confrontation skills. Real and theoretical work situations to assist in effective problem solving.

CHC 198 Geriatric Nursing Seminar 1(0-0)
Prerequisite: RN or LPN. Designed specifically for nurses practicing in the field of geriatrics. Problems relating to administering care to the geriatric patient.

CHC 199 Pediatric Hospice Seminar 0.5(5-0)
This Pediatric Hospice Care Seminar will emphasize to the learner a holistic approach to the management of the terminally ill child in the home setting. The content will include: contrasting pediatric and adult hospice, an overview of the state and national trends, assessment of the pediatric hospice patient and family, pediatric pain management, developmental issues specific to the patient's physical and emotional needs, fears and grief of the patient and family, strategies for bereavement to include the presentation of at least two models for structuring a program, and care for the caregiver.

CHC 200 Managing Aggression Seminar 2(2-0)
A course for health professionals who face a real possibility of physical assault or aggression in their work. Course content covers recognition of specific cues to impending aggressive outbursts, and management of an aggressive behavior in a therapeutic way that de-escalates or defuses the situation. Demonstrations, simulations and supervised practice session are used to teach maneuvers, strategies and awareness.

CHC 201 Assertiveness Workshop for Nurses 2(2-0)
Application of assertiveness in typical situations encountered in nursing practice. Identification of personality/temperament styles, empathic listening; conflict resolution; values clarification; and confrontation skills.

CHC 205 Intravenous Therapy 2(2-0)
Prerequisite: Nurse. This is a specialty seminar designed for nurses or health care professionals who care for clients receiving intravenous therapy in the home or extended care setting. Class content includes information about many types of IV therapy, solutions, and specialized infusion devices. Demonstrations and supervised practice sessions are included in each class session.

CHC 206 RN IV Therapy 0.5(5-0)
Prerequisite: RN or LPN. Up-to-date information on intravenous technique, solutions, and intravenous medications. Various types of equipment used and hands-on experience included.

CHC 209 First Aid for Nurses 1(1-0)
Prerequisite: RN, LPN, or Allied Health Professional. Designed for any nurse who needs specific instruction and practice in first aid skills to deal effectively with common emergency situations. Demonstration and practice sessions are utilized in learning to deal with typical crisis situations such as management of fractures, bleeding, what to do at the scene of an accident, rapid assessment of the accident victim and more.

CHC 212 Pediatric Assessment II 0.5(5-0)
Prerequisite: Must be taken with CHC 215 concurrently. This course is appropriate for the nurse working with children in any setting: from acute care to home care or school nursing. Students learn specific tests to evaluate growth and development and to learn to recognize significant deviations from normal. Typical signs of pathology for common diseases and disorders are also included. Content covers the full pediatric age groups. It is taken concurrently with CHC 115.

CHC 213 Basic Psychiatric Technician 5(6-2.2)
The basic psychiatric technician program teaches students meaningful ways of caring for patients with emotional disturbances. Students also develop self-understanding while attempting to understand the behavior and difficulties of others. Concepts of personality development, identification of maladaptive behavior patterns, and therapeutic interventions are integrated into the course content. Additional emphasis is placed on understanding the patient's rights, legal and ethical aspects of confidentiality issues and specific means of evaluating the care given by each student. Blocks of supervised clinical experience are included to provide opportunities for students to apply classroom material to practical situations.

CHC 215 Pediatric Physical Assessment 3(3-0)
Prerequisite: Must be taken with CHC 212 concurrently. Designed for the active RN or LPN. Gathering information about the physical status of infants and children. Stresses the use of the four basic skills of inspection, palpation, percussion and auscultation in the examination of the major body systems and regions. Relevant information about normal growth and development is integrated throughout the course. Improve abilities in the areas of data collection, evaluation, and decision-making.

CHC 216 Advanced IV Therapy for Nurses 0.5(5-0)
Prerequisite: CHC 206 recommended. Seminar offering advanced intravenous therapy concepts for nurses. Topics include: pediatric IV therapy, TPN, PPN, lipid therapy, Broviac catheters, nursing assessment of advanced IV therapy and nursing implications of IV therapy.

CHC 218 Nursing License Update 3(3-0)
Prerequisite: Diploma, ADN, BSN, or Nurse. This course is for graduates of nursing schools. It is designed for new RN graduates to update their knowledge in psychiatric, medical/surgical, pediatrics, obstetrics, pharmacology, nutrition and other pertinent information.

CHC 219 Pediatric Nursing Respiratory Seminar 1(1-0)
Prerequisite: RN, LPN, or Allied Health Professional. For nurses in pediatric practice who require specific information about the normal functioning of the respiratory system, respiratory pathology and nurses responsibilities in using respiratory therapy equipment.

CHC 220 Nurses Respiratory Workshop 1(1-0)
Prerequisite: RN, LPN, or Allied Health Professional. Workshop designed for nurses desiring information about function and dysfunction of the respiratory system. Topics include: concepts of respiratory anatomy and physiology, blood gas interpretation, physical assessment of lungs and thorax, pulmonary pathology, and chest x-ray interpretation.

CHC 221 12 Lead EKG Workshop 2(2-0)
Prerequisite: CHC 106 or equivalent. For nurses and allied health professionals to expand skills in reading and interpreting full electrocardiograms. Each student must have a working understanding of basic electrocardiography and arrhythmia interpretation. Emphasis on application to nursing practice.

CHC 225 Pharmacology Update 3(3-0)
Prerequisite: Health Professional. For nurses basic considerations of new and current drug therapy, and the mechanisms of drug actions, utilizing basic anatomy and physiology. Acquaint the nurse with the increasing complexity of clinical drug therapy and increased risk of error by emphasizing accuracy in dealing with drugs, including simple calculations that are encountered daily.

CHC 227 New Dimensions of Nursing Practice 0.5(5-0)
Prerequisite: Nurse. On-going series of day-long seminars designed to update nurses both active and inactive—about topics of current interest in the health care field. New advances; new treatment approaches or political topics will be stressed.

CHC 228 Health Care Management 3(3-0)
Designed to heighten the students' awareness of the relationship of nursing to the "Big Business" of health care. Principles of management and marketing are integrated throughout the course, as well as emphasis on improving style of conflict resolution; effective communication and skills needed to succeed in the business world of health care.

CHC 230 Advanced Cardiac Life Support Provider Course 3(2-2)
Prerequisite: Department approval. For the physician, paramedic, and critical care emergency personnel to develop knowledge and skills in advanced life support. Includes arrhythmia interpretation, airway intubation, central venous and arterial lines. Supervised clinical laboratory practice sessions and specific preliminary course preparation. A Heart Association Advanced Life Support Certificate upon successful completion of the course.

CHC 231 Advanced Cardiac Arrhythmias 1(1-0)
Prerequisite: CHC 106 or equivalent. This specialty course is appropriate only for the nurse or health professional with a strong, working knowledge of basic cardiac arrhythmias. Complex arrhythmias are presented with the distinguishing features of each. Students must possess the required cardiac terminology to understand this advanced course content.
CHC 232 Health Care Marketing
Prerequisite: Health Professional. This three credit course provides a basic understanding of the fundamentals of marketing. The emphasis of the course is an application of these marketing principles to the health care industry with emphasis on the non-profit health care segment.

CHC 233 RN Monitoring of Pacemakers
Prerequisite: RN or Allied Health. For nurses. The normal functioning of permanent pacemakers. Focuses on functions and types of pacemakers; care of patients with permanent pacemakers, etc. Also sensing, inclusions for pacing, and pre-operative nursing care of patients with pacemakers. Demonstration to acquaint with pacemaker equipment, pacemaker EKG tracings, pacemaker leads and patient transmitter system.

CHC 235 ACLS Recertification Seminar
Prerequisite: ACLS Certificate. Designed to recertify (American Heart Association Standards) those people currently possessing valid ACLS cards. Includes lectures, supervised clinical lab sessions and specific preliminary course preparation.

CHC 236 Impact of AIDS
This is a seminar for all health care professionals to explore the numerous challenges of the impact of AIDS on the health care delivery system. This seminar will access the necessary resources available to support the AIDS patients, their families and the health care professional.

CHC 240 ACLS Director/Coordinator Workshop
Prerequisite: ACLS Course Director. This course is designed to provide an update of current ACLS course requirements as well as helpful hints for prospective as well as present ACLS course directors and coordinators. It is intended to provide a forum for interchange of ideas and for suggestions for improvement of Michigan ACLS courses. It is a required course for all physicians who intend to direct ACLS courses.

CHC 243 Geriatric Dentistry
Prerequisite: Dental Professional. This seminar is designed for dental and health professionals who provide care for the elderly. The specific objectives are to discuss factors characteristic of the elderly population that influence utilization of dental care, normal and pathological, physical and oral, changes associated with age, medications, nutrition, oral hygiene and management of the elderly dental patient. This course will also review the unique problems and challenges related to oral health and dental care presented by the homebound patient.

CHC 244 Hospice Administration I
This course combines current theory on quality assurance and leadership with application of concepts to hospice programs in all stages of development. Delegation and competencies under the administrative functions of planning, organizing, directing and controlling are presented specifically for administrative leadership and management of a quality assurance program.

CHC 245 Dental Hygiene Periodontal Management
Prerequisite: Dental Hygienist. This course is designed specifically for the dental hygienist and the dentist associated with a general practice, who are interested in developing and implementing comprehensive care for the patient. Special emphasis will be placed on periodontal concerns. Course topics include: dental hygiene treatment, periodontics, patient history, periodontal diagnosis, periodontal charting, radiographic interpretation, treatment approaches for general practice, treatment evaluation/assessment, referral vs. treatment in a general practice, maintenance and re-evaluation, billing codes and future trends in therapy.

CHC 247 Dental Hygiene Periodontal Management II
This course is designed for the licensed dental hygienist and general dentist who wish to develop and implement comprehensive periodontal care in their dental practice. Special emphasis will be on refining root planning skills and periodontal probing techniques. Students will receive clinical instruction in proper instrumentation techniques, instrument selection, and instrument care. Also included will be a close look at the effectiveness of chemotherapeutic agents, treatment planning and methods to accomplish thorough recording of data. This is the second in a series of courses on dental hygiene periodontal management.

CHC 248 Hospice Administration II
This course combines current theory on leadership, supervision, and management with application of concepts to hospice programs in all stages of development. Delegation and competencies under the administrative functions of planning, organizing, directing and controlling are presented for staff personnel, and fiscal management.

CHC 249 Hospice Administration III
This course combines theory on marketing, public relations and leadership in meeting the needs of the hospice patient/family and the community for all stages of program development. Emphasis is on delegation and competencies under the administrative functions of planning, organizing, directing, and controlling. In addition, this course will focus on patient rights, communication and increasing community, physician, clergy, and governing board awareness/participation in hospice care.

CHC 250 Patient Dental Anxiety
Prerequisite: Dental Personnel. This seminar will aid dental personnel in identifying patients with dental fears and/or phobias by conducting a simple screening procedure, and will demonstrate techniques for teaching patients anxiety reduction. Techniques included are: progressive relaxation, desensitization, guided imagery, biofeedback and thought control.

CHC 253 Dental Team Utilization
Prerequisite: Dental Professional Staff. A seminar including the following topics: quality with efficiency, financial planning, staffing and their roles, communications, scheduling, hygiene, and recall. The goal is to build your dental team into a skilled, motivated, professional operation with capabilities far beyond those it currently has.

CHC 255 Herpes, AIDS and Hepatitis
Information on biological characteristics of the infecting agent, its mode of transmission, and its implication in human diseases will be presented. Topics include: what a virus is, specific virus characteristics, transmission modes, office sterilization, disinfection and prevention of cross contamination, hepatitis vaccines, and dental management of infectious patients. Also includes current findings on Acquired Immune Deficiency Syndrome—suspected cause of transmission, incubation periods, signs and symptoms and other pertinent information. Participants are encouraged to minimize the risk of transmission to the dental practitioner.

CHC 257 Oral Cancer Symposium
The focus of this symposium is to provide the dental health care professional with the knowledge and expertise necessary for early oral cancer detection and team management of patients with oral cancer. The program content includes: etiology, epidemiology, observation and detection, staging systems, treatment plan alternatives and treatment modalities. Prosthetic rehabilitation and continued dental care will be discussed. Special considerations for rehabilitation will include: nutritional counseling, psychological issues, social considerations and identifying community resources to assist in the management of this patient population. A practical experience in detection techniques is included.

CHC 258 RDA Utilization
Prerequisite: Dental Auxiliary. Seminar designed for the dental and dental team members to create a thorough understanding of RDA utilization concepts and to create office settings that will utilize Registered Dental Assistants. Topics include: increased efficiency and productivity with RDA utilization, delegating duties to the RDA, State of Michigan Dental Practice Act regarding the RDA, rewards, benefits and appointment scheduling.

CHC 259 RDA Update
Prerequisite: RDH or RDA. Seminar is designed especially for Registered Dental Assistants who wish to update themselves on new procedures that they can now legally perform in Michigan. Topics include, but not limited to: periodontal dressings, sulcus removal and pit and fissure sealants through lectures and laboratory sessions.

CHC 261 Respiratory Therapy Update
Prerequisite: Respiratory Therapist. Selected topics in respiratory care have been developed for the respiratory practitioner who is in the certification entry level program, offering information in respiratory therapy pharmacology, physiology of respiration, oxygen transport and basic acid base balances. Principles of ventilatory care monitoring and adjunctive modes of ventilation will also be covered. Experience in respiratory care is necessary to apply concepts presented.

CHC 262 Pulmonary Rehabilitation Tech
Prerequisite: Respiratory Therapist with 6 months experience. One day seminar designed to give the health professional a specific plan of action in developing a pulmonary rehabilitation program for the COPD patient, including discussion of nutrition, breathing retraining, bronchial hygiene and patient education.

CHC 264 Neonatal Respiratory Care
Prerequisite: Respiratory Therapist or Nurse. Course geared to the respiratory therapist and registered nurse, presenting pathophysiology of congenital heart defects, RDA, IDM and other disease states of neonates. Management of the neonate on a ventilator will be included.
Division of Technology and Applied Sciences

CHC 265 Geriatric Assessment 2(2-0)
Prerequisite: Nursing. Two day seminar is designed for nurses responsible for the physical and psychosocial assessment of geriatric clients and the management of related patient care problems. Includes interaction with several guest speakers who represent expertise in specific topical areas. It is strongly recommended that participants have had an introductory course in physical assessment.

CHC 266 Focus Problems in Geriatric Nursing Practice 2(2-0)
In-depth study of selected patient problems in geriatric nursing practice. Students learn specific physical assessment skills to evaluate the geriatric patient while developing and using a broader medical vocabulary to accurately describe their physical findings. Additional emphasis is placed on related physiologic concepts.

CHC 267 Therapeutic Communication for the Health Professional 1(1-0)
Prerequisite: Health Professional. This course is designed for nurses and health professionals in any setting. Emphasis is on application of communication theory to practice in health care. Communication techniques useful in everyday interactions, as well as crisis and difficult situations, are included. Videotape simulations, film strips, slides, structured role playing and a written assignment are utilized to enhance the student’s learning in this fast-paced course.

CHC 268 Influence Interactions With Power for Health Professionals 3(3-0)
Prerequisite: Health Professional. This course is designed to help health professionals take responsibility for the quality of his/her relationship with others in the Health Care Delivery System. The sessions are informal and will aid the participant to gain self-esteem and confidence in expressing themselves effectively and forthrightly. Lecture, group discussion, role-playing and assignments will be included.

CHC 270 Computers for Health Care Professionals I 2(2-0)
Prerequisite: Health Professional. The focus of this two-day seminar is to orient the health care professional to computer systems related to health care delivery services. Seminar content includes computer history, computer languages, input and output devices, applications of computers in medicine and spreadsheets. Small group sessions and hands-on practice sessions will be provided.

CHC 271 Computers for Health Care Professionals II 0.5 (3-0)
Prerequisite: CHC 270 or equivalent. The seminar will provide the health professional with knowledge of computer applications in medicine. Topics include: CAI, critical care monitoring, advanced radiology techniques and dental office applications.

CHC 272 Pulmonary Function Test Update 1(1-0)
Prerequisite: Respiratory Therapist. A one-day seminar designed primarily for the respiratory therapist who is interested in preparing for the Pulmonary Function Technologist Exam offered by the NBRC. Topics will include pulmonary functions equipment, data management and calculation, arterial blood gas laboratory instrumentation, diagnostic application of test results and pulmonary stress testing.

CHC 273 RN Critical Care 4(4-0)
This is a four credit course designed for registered nurses practicing in the field of critical care or preparing to work in critical care. Emphasis will be placed on the CCRN core course content which includes anatomy and physiology, pathophysiology of selected common conditions, related nursing interventions and medical management.

CHC 275 Respiratory Diseases Update: Current Theory 1(1-0)
Prerequisite: Respiratory Therapist or Nurse. This seminar focuses on four diseases that are of major concern currently. Discussion of anatomy and physiology, clinical presentation and course, lab tests and other diagnostic procedures will be discussed as they relate to SIDS, BPD, Legionnaire’s Disease and AIDS. An X-ray lab with case history presentation will also be made available.

CHC 280 TMJ Dysfunction 0.5(5-0)
Prerequisite: Dental Professional. This course deals with the detection and management of the TMJ patient. Topics to be discussed include: TMJ anatomy and physiology, symptoms of the TMJ syndrome, muscle patterns, oral and facial examination for patients with mandibular dysfunctions, traumatic occlusion and bruxism. Radiographs and patient demonstrations will be used.

CHC 282 Dental Sealants 1(1-0)
Prerequisite: DOS, RDH, RDA. This course presents a study of pit and fissure sealants through lecture, product comparison and clinical experience. The lecture includes advantages and disadvantages of sealant use, procedure, application techniques and current research on pit and fissure sealants. The clinical experience offers the student individual instruction and clinical practice in placing pit and fissure sealants on extracted teeth and on patients.

CHC 283 Intraoral Photography 1(1-0)
Prerequisite: Dental Professional. Types of clinical camera systems, handling and care of camera systems and support equipment; composition of a series of intraoral photographs, with special shots and evaluation criteria. Exploration of future ideas discussed.

CHC 284 Career Directions for the Dental Hygienist 0.5(5-0)
Prerequisite: Dental Hygienist. This seminar is designed specifically for dental hygienists. It will identify future roles of the hygienist and encourage discussion from participants. Seminar topics will include: Dental Hygiene, Past, Present, Future, Issues and Trends, Role Definitions and Responsibilities, Opposition, Is this really Now? And How do we make the transition?

CHC 287 New Dental Products and Instruments 5(5-0)
Prerequisite: Dental Professional. This seminar is designed to inform the dental assistant and dental hygienist about new products and instruments that are currently being used clinically in dental offices. A comparison of dental products and instruments and discussion of changes in major categories is included.

CHC 289 Dental Radiology Educators Workshop 0.5(5-0)
An intensive Dental Radiology course for Dental Radiology instructors which focuses on “What Should We Teach?” and “How We Teach?” Format includes lecture, round table discussions, demonstration and laboratory experience.

CHC 291 Dental Insurance Billing Update 0.5(5-0)
Prerequisite: Dental Professional. How to set up the insurance aspect of the dental office. Major emphasis on how to process effectively and efficiently with the processing of dental claims.

CHC 293 Disinfection/Sterilization 0.5(5-0)
Prerequisite: Dental Professional. The goal of this course is to inform dental health professionals of effective barrier techniques, basic procedures and materials recommended to decrease the possibility of transmitting disease and incurring infection. Discussion will include: Hepatitis B, Herpes simplex and AIDS, and why these diseases are of concern to dental professionals. Disinfection procedures utilized in preparation and aseptic maintenance of the operating area will also be extensively considered.

CHC 294 The Dental Auxiliary in a Specialty Office 0.5(5-0)
Prerequisite: Dental Auxiliary. Acquaints the dental auxiliary with the six dental specialties: periodontics, endodontics, oral maxillofacial surgery, pediatric, prosthodontics, and orthodontics. Emphasis on defining the duties and responsibilities of the auxiliary in each area.

CHC 296 Dental Instrument Sharpening 0.75(3-0)
Prerequisite: Dental Professional. Update dental auxiliaries on the advantages and characteristics of sharp cutting edges on dental instruments and to increase their skill in sharpening instruments. Includes hand cutting instruments, sharpeners, curves (their working end characteristics and use); methods for sharpening: recognizing and testing for dull instruments, types of sharpening stones and their care.

CHC 297 Dental Clinical Oral Pathology 0.5(5-0)
Case histories will be presented in which the student’s objective is to formulate a differential diagnosis of an unknown oral lesion and propose a rational approach for evaluation and treatment of the patient. Lecture will also include a review of human embryology in its relation to developmental disturbances.

CHC 298 Dental Stress Management 1(1-0)
This course is designed to assist dental professionals in developing strategies and skills for lifelong career and personal survival. The seminar will focus on the four Cs of stress management: causes, cures, consequences, and cures. A special emphasis will be placed on specific types of stressors common to members of and support staff for the dental profession. Proven strategies to combat the physical and psychological effects of stress will be presented. Motivational factors that affect total well-being and success will also serve as the core to this process of self-management for job and life survival.

CHC 299 ACLS Instructors Course 3(3-0)
Prerequisite: ACLS Provider. A course to educate and train Advanced Cardiac Life Support instructors. Topics include: introduction to advanced life support, adjuncts for airway breathing, monitoring, defibrillation and cardioversion, intravenous techniques, essential drugs, useful drugs, acid base balance, sudden cardiac death, myocardial infarction and medical legal aspects. Performance stations are included.
CHS 104 Developing Disability Disabled Assistant 6(5-2)
Prerequisite: CHS 101 or equivalent. The program will prepare Respite Care Workers who can help clients who have medical care needs, in their homes. In addition to lectures the student will have supervised clinical experiences on-campus and in selected off-campus sites. Students must be a certified Home Health Aide and have a current BCLS card. A CPR seminar may be taken concurrently. A certificate will be awarded for a grade of 2.5 or better.

CHS 111 Medical Insurance Billing I 3(0-0)
Prerequisite: CHS 121, or six months experience with Insurance Billing. Preparation to perform medical insurance billing procedures from receiving the patient information until money is received. Includes how to obtain the patient information, procedure coding, HCFA coding plus federal, commercial and independent billing forms and procedures.

CHS 121 Medical Terminology Allied Health I 3(3-0)
Introduces medical terminology and the formulation of terms. Covers pronunciation, word elements and variations, medical word elements, body parts and function anatomically and physically, diseases, diagnoses and surgical procedures.

CHS 122 Medical Terminology Allied Health II 3(3-0)
Prerequisite: 3.0 grade or better in CHS 121. Medical terms in context by applying them to the functioning and structure of body systems. Further knowledge in specific vocational areas through intense study of body systems. Build on medical terms in CHS 121.

CHS 132 Health Unit Clerk/Coordinator I 6(6-0)
Prerequisite: 3.0 grade in CHS 121 (Medical Terminology). Introduce basic ward secretarial skills. Include communication skills, chart forms, computers and death and dying. Clinical component included.

CHS 133 Health Unit Clerk/Coordinator II 6(6-0)
Prerequisite: Department approval. Advanced ward secretarial skills. Includes pharmacology, laboratory tests, transcription, physicians' orders, and job application skills. Clinical component will be included.

CHS 143 Phlebotomy Technician 4(4-1)
Designed to prepare a person to function as a laboratory phlebotomist technician. Knowledge and skills necessary to obtain a blood specimen from a patient demonstrating venipuncture or micro technique. A clinical experience is included.

CHS 145 Central Service Technician 6(4-4)
Prepares for employment in area hospital Central Supply Departments. Duties: processing of hospital equipment, supplies and instruments for use in all hospital departments. Includes principles and practices of decontamination, cleaning, sterilization and dispensing of supplies.

CHS 201 Dietary Manager I 6(3-6)
Prerequisite: Department approval. Entry level skills for a dietary supervisor, particularly in nursing home or private household, under the supervision of a dietician consultant. Will include general principles, food storage, hygiene, nutrition and balanced diet.

CHS 202 Dietary Manager II 6(3-6)
Prerequisite: CHS 201. Includes meal planning, therapeutic diets, cooking principles, cooking for large numbers, budgeting, cost accounting and purchasing.

CHS 203 Dietary Manager III 6(3-6)
Prerequisite: CHS 202. The third course designed to prepare to become a Food Service Supervisor in a hospital or nursing home. Focuses on food evaluation and management principles.

CHS 205 Advanced Diet Therapy 3(3-0)
Prerequisite: Dietary Assistant. In-depth study of therapeutic diets and their relationship to various disease states. Includes modules on: analyzing medical charts for nutrition-related information, effective charting, nutrition history and assessment, participation in patient care planning and effective diet instructions.

CHS 207 Dietary Managers Update 0.75(7-0)
Prerequisite: Dietary Manager. A seminar designed for Dietary Managers to include data gathering on patient/client nutrition, hiring and supervising food facility personnel, managing supplies, equipment use, sanitation, safety, production and the facility itself. This seminar would be helpful to a Dietary Manager in their preparation for the CEN Credentialing examination.

CHS 231 Pharmacology of Substance Abuse 3(3-0)
Chemical and physiological nature of the substances (alcohol-hard drugs-amphetamines) which have addictive possibilities. A course in a Certificate program on Substance Abuse Emphasis on pharmacology of substance abuse, detection, identification of physiological responses specific to various substances. Designed for the Allied Health Professional.

CHS 232 OD Crisis Intervention 2(2-0)
Designed for the health worker. Focus on psychological and physiological aspects of overdose, assessment of the program, and ways to deal with on-the-spot problems. Emergency intervention measures included.

CHS 235 Pharmacy Technician I 4(4-0)
Prerequisite: CHS 190 or equivalent. First of a two course series designed to introduce the student to the skills necessary for the position of a pharmacy technician in a hospital or retail pharmacy. Topics include: pharmacy abbreviations, dosages, pharmacy distribution systems and the top 200 drugs. Students must complete the course with 2.5 grade or better to continue to CHS 236.

CHS 236 Pharmacy Technician II 4(4-0)
Prerequisite: CHS 235. Second course is designed to prepare the student to function with knowledge and accuracy in the dispensing and control of drugs in either hospital or retail pharmacy. Topics include: the physiological effect of drugs, inventory control, and computer operations. A certificate will be awarded after successful completion with a 2.5 grade or better.

CHS 240 Dietary/Housekeeping Aide I 18(0-16)
This course is designed to educate the student in the principles of both dietary and housekeeping job responsibilities. In the dietary component the student will learn knowledge of diets, food preparation, and sanitation and safety techniques. In the housekeeping component the student will gain knowledge of various cleaning techniques and their application in specialty clinical areas. Body mechanics will also be covered. The Campus/Clinical Lab component will cover both areas.

CHS 241 Dietary/Housekeeping Aide II 7(0-14)
This course is designed as a continuation of CHS 240. Dietary and Housekeeping aide. The student will learn advanced techniques in both dietary and housekeeping aide job responsibilities, application of appropriate Medical terminology, and development of job search related skills.

CHS 245 Executive Housekeeper's Seminars 1(1-0)
Prerequisite: Housekeeping Employee. A series of seminars on required or elective topics defined by the National Executive Housekeepers Association, Inc. Topics include introduction to housekeeping techniques, safety, work controls, chemical controls, microbiology, pest control, management of budgets, purchasing and staff, etc. At the successful completion of these seminars, the student will be eligible for Executive Housekeeper certification by the National Executive Housekeepers Association, Inc.

Dental Assistant (DA)
Health Careers Technology
Division of Technology and Applied Sciences

DA 110 Dental Assistant Seminar 2(1.5-5)
Prerequisite: Admission to program. Lectures, worksheets, activities and self-instruction are utilized to prepare the student in dental/medical terminology. Information and concepts will be discussed regarding the Dental Team, Michigan Dental Law, professional organizations, dental specialty practices, and dental history.

DA 120 Introduction to Clinical Dental Assisting 5(3-4)
Prerequisite: DA 110, DAH 111, DAH 112. Through lecture and simulated clinical experience the student will be introduced to dental procedures: four-handed chairside assisting, preparation of chairside dental materials, charting, management of clinical records, and taking and recording vital signs.
Division of Technology and Applied Sciences

DA 122 Oral Histology, Embryology and Pathology 2(2-0)
Prerequisite: DHA 111. This course first presents a study of the microscopic anatomy of human tissue with emphasis on the embryologic development of the face and the hard and soft tissues of the oral cavity. This is followed by a study of diseases affecting the oral region including diseases of teeth and supporting structures, developmental disturbances, oral infection, injuries, and neoplasms.

DA 130 Clinical Dental Assisting I 7(1-12)
Prerequisite: DA 110 and DA 120. Practice four-handed chairside dental assisting procedures with emphasis on general restorative procedures (i.e., amalgams, composites). Seminar sessions are planned to correlate clinic practice and procedure information with private practice and field experience participation.

DA 131 DA Ethics and Jurisprudence 2(2-0)
Prerequisite: DA 110 and DA 120. A discussion of interviewing techniques, employment opportunities, insurance protection, continuing education, law and professional ethics as they relate to dental assisting and dentistry.

DA 210 Clinical Dental Assisting II 7(1-5-11)
Prerequisite: Admission to DA II. A continuation of DA 130 offering evaluation and practice in dental radiography and four-handed chairside dental assisting, emphasizing general restorative procedures. Seminar sessions are planned to correlate clinic practice and procedure information with private practice and field experience participation.

DA 211 Dental Materials 4(2-4)
Prerequisite: Admission to DA II. Lecture and laboratory sessions will address the selection, manipulation and evaluation of materials used in dentistry. Laboratory activities emphasize materials prepared by the dental assistant.

DA 212 Dental Office Management 3(2-2)
Prerequisite: Admission to program. Lectures and worksheet activities are utilized to prepare the student in office procedures relating to appointment management, recall systems, correspondence, telephone techniques, record keeping, pre-paid dental care plans and dental payment plans and inventory control.

DA 220 Clinical Dental Assisting III 7(2-10)
Prerequisite: DA 210 and DA 211. A continuation of chairside dental assisting techniques with emphasis on the duties and responsibilities of the dental assistant in dental specialty functions.

DA 221 Registered Dental Assistant Procedures 4(2-4)
Prerequisite: DA 210 and DA 211. Lecture sessions teach intro-oral functions delegated only to the licensed Registered Dental Assistant in the State of Michigan. Laboratory time is emphasized and field experience assignments arranged to provide clinical application of those techniques that are supportive to the dentist.

DA 230 Clinical Dental Assisting IV 11(1-20)
Prerequisite: DA 220 and DA 221. A continuation of DA 220 offering additional practice in four-handed chairside dental assisting procedures with emphasis on RDA functions. Seminar sessions discuss field experience procedures and student's progress.

Dental Hygiene (DH)
Health Careers Technology
Division of Technology and Applied Sciences

DH 110 Dental Hygiene Seminar 2(2-0)
Prerequisite: Admission to program. Lectures, worksheets, and self-instruction are utilized to prepare the student in oral hygiene. The student also receives an overview of dental history, basic dental law, the dental health team, professional organizations, professionalism, and a code of ethics.

DH 111 Oral Histology and Embryology 2(2-0)
Prerequisite: Admission to program. This course presents a study of the anatomy and microscopic anatomy of human tissues with emphasis on formation of the face, oral cavity, and dental structures.

DH 120 Introduction to Clinical Dental Hygiene 7(3-8)
Prerequisite: DHA 110, DHA 111 and DHA 112. An introduction to the selection and application of prophylaxis instruments, taking medical and dental histories, and performing oral examinations. Small group clinical instruction includes implementation of procedures on student partners.

DH 122 General Oral Pathology 3(3-0)
Prerequisite: DHA 110, DHA 111 and DH 111. Diseases affecting the oral region including the principles of inflammation and repair, developmental disturbances, stains and accretions, diseases of the teeth and supporting structures, oral infections, oral injuries and neoplasms.

DH 123 Dental Emergency Procedures 3(2-2)
Prerequisite: DH 111 and DHA 112. Study of dental office emergencies with emphasis on prevention, prompt recognition and effective emergency care. Laboratory instruction will provide experience in monitoring vital signs, recognizing and handling emergency simulations and Cardio-Pulmonary Resuscitation treatment.

DH 130 Clinical Dental Hygiene I 7(1-12)
Prerequisite: DH 120, DH 122. Initial clinical course offering individual instruction and clinic practice in all phases of providing basic dental hygiene services (recognition and recording of oral conditions, medical history, patient education, prophylaxis, fluoride treatment, sterilization, and desk procedures.) Seminar session introduces the clinic evaluation system, office management procedures, and intensifies oral exam observation and recording procedures.

DH 131 Dental Hygiene Procedures 3(2-2)
Prerequisite: DH 120. A continuation of didactic information and skills that will enhance performance of procedures in a clinical setting. Emphasis on treatment planning, patient home care, periodontal examination, caries detection, instrument sharpening, and clinical photography. Small group lab instruction provides application of didactic information in a clinical setting.

DH 210 Clinical Dental Hygiene II 7(1-12)
Prerequisite: DH 130. A continuation of DH 130 offering additional practice in dental hygiene clinical skills. Coordinated the periodontal patient case study and reviews preventive dental hygiene procedures and treatment planning of more complex needs of the patient. (Deep scaling, root planing, periodontal charting, nutritional counseling, intraoral photography, and use of ultrasonic scalers.)

DH 211 Advanced Dental Hygiene Procedures 4(2-5-3)
Prerequisite: DHA 122 and DH 130. Study advanced clinical dental hygiene procedures with emphasis on root planing, nutritional counseling, soft tissue curettage, and ultrasonic instrumentation. Small group lab experience includes practice of these procedures on patients and/or cadavers.

DH 212 Periodontics 3(3-0)
Prerequisite: DHA 111 and DH 111. Study of anatomy, physiology and histology of the periodontal tissues as it relates to the identification, etiology, prevention and treatment of periodontal disease and occlusal disorders. Knowledge, skills and attitudes that will enhance the dental hygienist's clinical competence in treating periodontal patients are emphasized.

DH 213 Dental Health Education 2(2-0)
Prerequisite: DHA 110 and DH 130. Studies will include human behavior, interpersonal relations, and communication skills relating to patient education, factors affecting patient motivation and acceptance of health care, introduction to teaching methodology for groups, and utilization of audiovisual aids for delivering oral health care.

DH 214 Clinical Oral Pathology 2(2-0)
Prerequisite: DH 130 and DHA 131. Case histories are presented in which the student's objective is to formulate a differential diagnosis of an unknown oral lesion and propose a rational approach for evaluation and treatment of the patient. Lecture will include oral surgery practices and procedures.

DH 220 Clinical Dental Hygiene III 7(1-12)
Prerequisite: DH 210 and DH 211. Practice of advanced dental hygiene procedures and emphasis on advanced procedures and skills. A case study presentation utilizes differential diagnosis techniques. Seminar sessions update clinical emergency procedures and support inclusion of myofunctional therapy, study models, pH and fissure sealant application with patient needs assessments.

DH 221 Dental Materials and Methods 4(2-5-3)
Prerequisite: DH 210 and DH 211. Lecture and laboratory sessions will address the terminology, selection, manipulation and evaluation of materials used in dentistry. Laboratory activities emphasize procedures performed and materials used by the dental hygienist.
DH 222 Registered Dental Assistant Procedures 2(75-2.5)
Prerequisite: DH 210, DH 211, DH 212. A specially designed course for dental hygiene students wishing to learn ancillary dental hygiene procedures and those integral functions delegated to the licensed Registered Dental Assistant in the State of Michigan. Instruction is emphasized in the laboratory setting to prepare the student for practical application of these procedures.

DH 223 Public Health Dentistry 2(2-0)
Prerequisite: DH 213. Through lecture and course activities the student will review scientific literature, dental epidemiology, principles of public health and health care delivery systems. Community and private systems are compared for providing dental health care.

DH 229 Testing Styles & Inventory 2(2-0)
Prerequisite: Admission to Dental Hygiene program. Through lecture sessions, the student will be introduced to testing techniques, test construction and item analysis. Students inventory their knowledge of dental hygiene, and through self evaluation and planning, establish study skills while recognizing their personal study needs.

DH 230 Clinical Dental Hygiene IV 7(1-12)
Prerequisite: DH 220. Clinical sessions combine basic and advanced dental hygiene procedures with time utilization for private practice. Seminar sessions are planned to correlate clinic experiences with private practice. Professional and individual roles and responsibilities for total health care within the usual dental practice setting are discussed.

DH 231 Dental Specialties 4(3-4)
Prerequisite: DH 220 and DH 212. Lectures and individualized instruction include 1) dental specialists, reviewing their procedures and practices and 2) information for providing oral hygiene care for special needs patients. Students observe specialty procedures in dental specialty offices.

DH 232 DH Ethics and Jurisprudence 2(2-0)
Prerequisite: DH 220. A discussion of interviewing techniques, employment opportunities, insurance protection, continuing education, law and professional ethics as it relates to dental hygiene and dentistry.

DH 233 Community Practice 2(1-2)
Prerequisite: DH 213, DH 220, and DH 223. Students implement a dental health education program utilizing assessment, planning, implementation and evaluation processes. Each student will observe and prepare a investigative report on a community health agency/practice.

Dental Assistant & Dental Hygiene (DHA)
Health Careers Technology
Division of Technology and Applied Sciences

DHA 110 Oral Health Practices 4(2-4)
Prerequisite: Admission to program. Introduction to dental operative, aseptic techniques, cavity and periodontal disease processes and oral hygiene procedures to prevent diseases. Small group laboratory instruction allows the student to learn through investigation, involvement, and application. Each student will become successful in maintaining their own good oral health.

DHA 111 Oral Anatomy I 4(2-4)
Prerequisite: Admission to program. Study of dental nomenclature, anatomic form, gross structure and function of human primary and permanent teeth, through lecture, laboratory and AVT sessions. Small group laboratory practice includes identification of natural extracted teeth and the reproduction of tooth forms to emphasize morphology and functional relationships.

DHA 112 Dental Instruments & Equipment 3(2-2)
Prerequisite: Admission to program. Through lecture and practical experience the student will be introduced to dental procedures, use and maintenance of dental instruments and equipment, and chairside assisting procedures. Practical learning activities are supervised by instructors in small group settings.

DHA 121 Oral Anatomy II 3(2-2)
Prerequisite: Admission to DA II/DH Program. A descriptive anatomical study of the head and neck regions including the skeletal, muscular, circulatory, lymphatic and nervous systems. Lecture, small group laboratory, and AVT sessions relate anatomical structures to clinical procedures.

DHA 122 Pharmacology 2(2-0)
Prerequisite: Admission to DA II/DH program. A study of the administration, use, action, and effect of commonly used drugs on the human body. Emphasis on practical evaluation of drugs being taken by dental patients and their effect on dental treatment.

DHA 131 Dental Radiography 5(3-4)
Prerequisite: DHA 111 and DA/DH 121. Lectures discuss production and emission of dental X-ray, indications for exposure, technics of exposure, processing, evaluation and interpretation of dental radiographs. Individualized laboratory sessions provide students practice in exposing, processing, mounting and evaluating radiographs.

DHA 132 Nutrition and Oral Health 2(2-0)
Prerequisite: DHA 110. Series of lectures discuss the identification, function, metabolism and sources of specific nutrients required for normal growth and development. Application of principles to the individual's needs and to the concerns of the dental auxiliary providing nutritional and diet information to patients emphasized.

Diagnostic Medical Sonography (DNS)
Health Careers Technology
Division of Technology and Applied Sciences

DMS 201 Sonographic Anatomy I 6(6-0)
Prerequisite: Admission to program. Provides the student with cross-sectional anatomy and pathology as it relates to sonographic scanning of the abdomen and vascular system.

DMS 202 Sonographic Anatomy II 6(6-0)
Prerequisite: DMS 201. Provides the student with cross-sectional anatomy and pathology as it relates to gynecological and obstetrical sonography. Fetal cardiac anatomy and appearance will be presented.

DMS 203 Sonographic Anatomy III 4(4-0)
Prerequisite: DMS 202. Presentation of cross-sectional anatomy and pathology with interpretation of scans as it relates to the thyroid, scrotum and breast. In addition, neurology of the neonate will be presented.

DMS 234 Sonographic Physics 3(3-0)
Prerequisite: Admission to program. The student will study the fundamental principles of acoustical physics; how sound is produced, manipulated, and how it reacts in various mediums.

DMS 245 Sonographic Instrumentation 3(3-0)
Prerequisite: Admission to program. The student will be introduced to the mechanics of A-Mode, B-Mode, M-Mode, Doppler and Real-time equipment. Accessory equipment such as the camera, transducer, and cathode ray tube will be presented. Methods of quality assessment will also be presented.

DMS 265 Sonographic Interpretation I 4(4-0)
Prerequisite: Admission to program. The student will be presented with the identification of and interpretation of anatomy and pathology on sonographic exams as it relates to the abdomen and vascular system.

DMS 266 Sonographic Interpretation II 4(4-0)
Prerequisite: DMS 265. The student will be presented with the identification of and interpretation of anatomy and pathology on sonographic exams as it relates to the obstetric and gynecological patient.

DMS 280 Introduction to Clinical Experience 6(1-0-15)
Prerequisite: Admission to program. First course in a four-term sequence of clinical application in medical diagnostic sonography. The course is programmed with specific performance activities. Credit is arranged for each individual term with a ratio of one credit hour to three clinical clock hours.

DMS 281 Clinical Experience I 9(0-0-23)
Prerequisite: DMS 280. Second course in a four-term sequence of clinical application in medical diagnostic sonography. The course is programmed with specific performance activities. Credit is arranged for each individual term with a ratio of one credit hour to three clinical clock hours.

DMS 282 Clinical Experience II Variable
Prerequisite: DMS 281. Third course in a four-term sequence of clinical application in medical diagnostic sonography. The course is programmed with specific performance activities. Credit is arranged for each individual term with a ratio of one credit hour to three clinical clock hours.
Emergency Medical Services (EMS) Health Careers Technology

Division of Technology and Applied Sciences

EMS 101 EMS Continuing Education 1 0.5(3-6)
Prerequisite: EMS Personnel. A series of continuing education seminars for the Basic EMT, Advanced EMT (Paramedic), or EMT Specialist, designed to meet relicensure requirements. Students may elect to take as many as needed to fulfill continuing education requirements.

EMS 102 EMS Continuing Education 2 0.5(3-6)
See EMS 101 course description.

EMS 103 EMS Continuing Education 3 0.25(3-0)
See EMS 101 course description.

EMS 104 EMS Continuing Education 4 0.25(3-0)
See EMS 101 course description.

EMS 105 EMS Continuing Education 5 0.25(3-0)
See EMS 101 course description.

EMS 106 EMS Continuing Education 6 0.25(3-0)
See EMS 101 course description.

EMS 222 EMT I Course 8(0-0)
Prerequisite: Admission to program. Designed for persons interested in becoming an EMT Instructor Coordinator, and is approved by the Michigan Department of Public Health. Includes teaching and testing methods, lesson plan development, writing performance objectives, administration of a class, applications for MDPH course approval and meeting the State requirements. Participants will be required to student teach 20 hours in an EMT class or CE program.

EMS 225 Trauma Seminar 3(3-0)
Prerequisite: Admission to course. This course provides instruction and intense evaluation of the current skills used in prehospital care of the trauma victim. Prior preparation is required to successfully complete the course. The BTL5 text is provided to assist in pre-preparation.

EMS 226 Emergency Department Practicum 3(0-0)
Prerequisite: Health Professional. A course designed to prepare Health Professionals to function as a member of the Emergency Department Health Care team. Nurses, Paramedics, EMTs, Respiratory Therapists and other health professionals are frequently being hired in Emergency Departments. This course enables the professionals to perform at a beginning level by providing the knowledge and skills unique to the Emergency Department.

EMS 227 Emergency Department Clinical 2(0-4)
Prerequisite: EMS 226. A course to provide Emergency Department clinical experience for health professionals. The knowledge and skills gained in EMS 226 will be applied during the clinical.

Emergency Medical Services (EMS) Health Careers Technology

Division of Technology and Applied Sciences

EMT 103 Extrication 3(2-2)
Prerequisite: Basic EMT student or licensed EMT or rescue person. Designed to provide skills in light and heavy extrication. Includes backboards, power tools and extrication in emergency situations.

EMT 104 EMS Communications 3(3-0)
Prerequisite: Basic EMT student or licensed EMT. Introduction to types, methods, and use of emergency communication. Telemetry systems defined and used discussed.

EMT 105 Ambulance Driving 3(2-2)
Prerequisite: Basic EMT student or licensed EMT. Designed to teach EMT safety, precision, and confidence. Upon completion, EMTs are expected to apply calculated, calm, proficient and specialized maneuvers to the techniques of good driving. Laboratory sessions in driving an emergency vehicle.

EMT 108 Emergency Pharmacology 2(0-0)
Prerequisite: Basic EMT student or licensed EMT. Medications frequently encountered in emergency situations; “street” drugs; medications used in emergency situations, and sterile techniques essential to assisting a paramedic, nurse or physician in administering emergency medication.

EMT 112 Basic EMT I 6(4-4)
First in a series of two courses to prepare for practice as a Basic Emergency Medical Technician. Skills and knowledge required to provide specialized care at the scene of an emergency; recognition of emergency situation; administer effective care, use equipment properly and use proper communication with emergency departments. EMT 112 and 113 are an MDPH approved Basic EMT courses. Upon successful completion the student is eligible to take the State examination for licensure.

EMT 113 Basic EMT II 6 (4-4)
Prerequisite: Graduate EMT 112. Second of two courses to prepare for practice as a Basic Emergency Medical Technician. Skills and knowledge required to provide specialized care at the scene of an emergency recognition of emergency situation; administer effective care, use equipment properly and use proper communication with emergency departments. EMT 112 and 113 are an MDPH approved Basic EMT courses. Upon successful completion the student is eligible to take the State examination for licensure.

EMT 114 EMT Refresher 4(4-0)
Prerequisite: Licensed EMT. Designed to provide the EMT an opportunity to meet licensure requirements. Required content includes CPR, airway management, oxygen administration, patient assessment, diagnostic signs, backboarding, spinal injuries, management of shock and MAST trouses, medical emergencies, trauma, environmental emergencies, emergency childbirth and pediatric emergencies. Successful completion of the course requires passing written and practical exams.

EMT 116 EMT Physical Assessment 3(2-2)
Prerequisite: Basic EMT student or licensed EMT. This course is designed for the EMT. A knowledge of anatomy and physiology is necessary to understand concepts that will be presented in physical assessment. Emphasis on history taking, patient interviews, and interpretation of patient vital signs. Collect data, interpret findings and make application to patient’s condition. Physical examination, skills of inspection, percussion, auscultation and palpation will be utilized. Guidance will be given and problem solving techniques to establish priorities in assessment and history taking.

EMT 117 Psychiatric Emergencies 2(2-0)
Prerequisite: Basic EMT student or licensed EMT. Designed to improve psychological approach to emergency and crisis situations. Includes both psychological and communications theory. Practical application of communication techniques stressed.

EMT 122 Basic Emergency Care I 6(4-4)
Prerequisite: Admission to program. First of a three sequence course which is part of the three term Emergency Medical Technician (EMT) curriculum. Includes the skills necessary to provide on the spot emergency care to accident victims and victims of sudden medical emergencies. Through a combination of lectures, practical lab sessions and clinical rotations the student will utilize information presented.
EMT 123 Basic Emergency Care II 6(4-4)
Prerequisite: EMT 122. Continuation of the skills learned in EMT 122, and skills dealing with medical, environmental, pediatric emergencies, and emergency childbirth consisting of lectures, practical lab sessions, class simulations and clinical rotations.

EMT 124 Basic Emergency Care III 5(1-8)
Prerequisite: EMT 123. Emphasis will be placed on geriatric patients, water related emergencies, triage, treatment of rape and child abuse victims and treatment of patients under the influence of various illegal drugs and alcohol utilizing skills previously learned. Majority of time will be spent in various clinical locations involving direct patient contact. Upon successful completion of this three term sequence the student will be certified as having successfully completed the EMT program and will be eligible to take the Michigan State Licensing Examination for Basic Emergency Medical Technician.

EMT 125 EMT Field Practicum 4(0-8)
Prerequisite: Department approval. Currently available only to successful candidates of the Basic EMT program, having completed EMT 122, 123, and 124. Offers the licensed EMT an opportunity to obtain actual field experience by completing a minimum of 8 hour/week “internship” at an agency which provides prehospital emergency care. The agency and faculty advisor will determine the final grade depending upon performance.

EMT 126 Emergency Medical Legal 3(3-0)
Prerequisite: Basic EMT student or licensed EMT. To assist the prehospital emergency care provider in making decisions based on an understanding of legal principles by familiarizing the student with legal systems, and principles pertinent to prehospital emergency care.

EMT 150 EMS Systems I 2(2-0)
Prerequisite: Admission to program or current EMT. First of a two sequence series designed to provide the EMT with skills and knowledge in EMS systems operations and report writing/documentation. The EMT role is reviewed in relation with other health care providers on a local, state and national basis.

EMT 151 EMS Systems II 2(2-0)
Prerequisite: EMT 150. Continuation of EMT 150 focusing on more intense history taking, terminology, and documentation, with practice documentation on working report forms. Topics also include: job interviewing skills, employment opportunities, stress management and other systems operations.

EMT 201 EMT Specialist 4 (4-0)
Prerequisite: EMT 112, EMT 113. First in a two sequence series which prepares the Basic EMT to the level of EMT Specialist for functioning within a limited Advance Life Support System. Students will be prepared in IV therapy and airway management to include esophagal airway and endotracheal intubation. Lectures and skill preparation must be completed before clinical.

EMT 222 EMT Skills A 2(1-2)
Prerequisite: Admission to program. First in a series of two courses designed for students who are licensed Basic EMTs or have completed EMT 112-113 prior to admission to the Basic EMT Program. The course will provide open lab and skills instruction to assure maintaining adequate skills and knowledge level for entering the third term clinical course.

EMT 223 EMT Skills B 2(1-2)
Prerequisite: EMT 222. Second in a series of two courses, see EMT 222 for description.

Emergency Care (ER)
Health Careers Technology
Division of Technology and Applied Sciences

ER 100 Red Cross First Aid 3(3-0)
Designed to provide skills to treat emergency situations until professional help arrives. A Red Cross Certificate issued upon successful completion.

ER 101 American Heart Association CPR/Bystanders 0.5(5-0)
Designed for CPR instruction of the general public and adheres to American Heart Association guidelines. The course will include information about heart disease, risk factors, prudent heart living, heart and lung function, one-person cardiopulmonary resuscitation (CPR) and foreign body airway obstruction management. At completion the student will meet all performance and skill objectives as outlined for certification as provider “A” through the American Heart Association.

ER 102 CPR for Health Professionals 1(1-0)
Prerequisite: Health Professional. Designed for CPR instruction of Health Professionals and adheres to the American Heart Association guidelines. The course will include information about heart disease, risk factors, prudent heart living, heart and lung function, one and two person cardiopulmonary resuscitation (CPR), foreign body airway obstruction management and pediatric resuscitation. At completion the student will meet all performance and skill objectives as outlined for certification as Provider “C” through the American Heart Association.

ER 103 American Heart Association CPR Recertification 0.5(5-0)
Prerequisite: Current Provider “C” Card. This course is recommended for Health Professionals who have a current American Heart Association Provider “C” card for recertification.

ER 111 CPR Instructoring 1(1-0)
Prerequisite: Current BCLS certification or admission to program. Instruct in methods of teaching CPR. An instructor-trainer from the American Heart Association teaches the course. Students must have current BCLS certification.

ER 112 CPR Instructor’s Recertification 0.5(5-0)
Prerequisite: CPR instructor certificate. Instruction in current concepts of American Heart Association for recertification of instructors. Must have current BCLS card and instructor’s card.

Advanced Emergency Medical Technology (ESA)
Health Careers Technology
Division of Technology and Applied Sciences

ESA 209 Paramedic Concepts 4(3-2)
Prerequisite: Paramedic. A course which provides the paramedic with the required and elective continuing education points needed for relicensure.

ESA 221 Medical Trauma I 6(6-0)
Prerequisite: Admission to program. First in a series of three lecture courses within the paramedic curriculum which provide recognition and treatment of medical emergencies and trauma, general theory and legal implications of paramedic practice.

ESA 222 Medical Trauma II 6(6-0)
Prerequisite: ESA 221. Second in a series of three courses, see ESA 221 for description.

ESA 223 Medical Trauma III 5(5-0)
Prerequisite: ESA 222. Third in a series of three courses, see ESA 221 for description.

ESA 231 Cardiology I 2(2-0)
Prerequisite: Admission to program. All aspects of cardiology for paramedics are presented in this series of three courses within the paramedic curriculum.

ESA 232 Cardiology II 3(3-0)
Prerequisite: ESA 231. See ESA 231 for description.

ESA 233 Cardiology III 2(2-0)
Prerequisite: ESA 232. See ESA 231 for description.

ESA 241 Pharmacology I 1(1-0)
Prerequisite: Admission to program. Prehospital emergency drugs, dosages, methods of administration, side effects, and drug calculations are presented in this series of three courses within the paramedic curriculum.

ESA 242 Pharmacology II 2(2-0)
Prerequisite: ESA 241. See ESA 241 for description.

ESA 243 Pharmacology III 1(1-0)
Prerequisite: ESA 242. See ESA 241 for description.

ESA 251 Skills I 3(0-6)
Prerequisite: Admission to program. The clinical portions of the paramedic program allows application of theory in actual situations. The students often practice in the skills labs. The clinical courses run concurrent with Medical Trauma, Cardiology, pharmacology and skills labs.

ESA 252 Skills II 3(0-6)
Prerequisite: ESA 251. See ESA 251 for description.
Division of Technology and Applied Sciences 135

ESA 253 Skills III 3(0-6)
Prerequisite: ESA 252. See ESA 251 for description.

ESA 261 Clinical I 5(0-10)
Prerequisite: Admission to program. The clinical portions of the paramedic program allows application of theory in actual situations. The students often practice in the skills labs. The clinical courses run concurrent with Medical Trauma, Cardiology, pharmacology and skills labs.

ESA 262 Clinical II 5(0-10)
Prerequisite: ESA 261. See ESA 261 for description.

ESA 263 Clinical III 5(0-10)
Prerequisite: ESA 262. See ESA 261 for description.

Health and Fitness (HF)
Health, Fitness/Cardiac (HFC)
Health Careers Technology
Division of Technology and Applied Sciences

HF 146 Choice for Change—Weight Control Program 2(2-0)
Diet program utilizing moderate caloric intake and recommended food guidelines of the American Dietetic Association. Principles of permanent, nutritionally sound weight loss are stressed.

HF 148 Staying on Track: Lifelong Weight Management 1(1-0)
A continuation of the Choice for Change Weight Control Program. Designed to help students continue to lose weight or maintain their goal weight. Principles of permanent, nutritionally sound weight loss and maintenance are stressed. Professionally trained staff assist students in establishing healthy habits.

HF 149 Cholesterol Management—6 Weeks to a Lower Level 1(1-0)
A six-week cholesterol lowering dietary program which begins with a computerized dietary analysis and cholesterol test and ends with a cholesterol test. A practical, nutritionally sound, deliciously satisfying food plan is described and to be followed. Professionally trained instructors assist students in identifying high cholesterol and saturated fat foods in their diet and establish healthy eating habits.

HF 165 Foundations for Healthy Living 2(2-0)
Designed to familiarize students with fundamentals and benefits of fitness. Emphasis is on preventive health exercise programs, rehabilitation, and guidelines for the general population.

HF 166 Caring For Your Back 1(1-0)
Designed for individuals without pathological back problems. For those who have experienced back discomfort and want to prevent it through a combination of lectures and slow progressive exercise sessions. Students will learn ways to reduce back discomfort and prevent back injuries.

HF 167 Wholistic Health 3(3-0)
This course will concern itself with the study of Health from a wholistic perspective (body-mind-spirit) - seeing the human life as a total system.

HF 168 Un-Smoking for Life 2(2-0)
A lecture series is offered which strives to help individuals change the lifestyle linked with smoking. The goal is to enable the smoker to quit permanently and thereby reduce his/her associated health risks.

HF 170 Fit for Life Exercises 1(0-3)
Designed specifically for the older person, this exercise course is aimed at reducing the debilitating effects which inactivity has upon aging. Exercises are taught for ambulatory students and for those confined to wheelchairs.

HF 172 Basic for Exercise Instruction 1(1-0)
A seminar designed for those involved in teaching exercise courses. Through lecture and laboratory components the student will be given the basic knowledge necessary to teach exercise safely and effectively, and increase the awareness of potential problems in adult exercises.

HF 248 Stress Management 1(1-0)
A stress management course in which participants learn about the nature of stress and understand the effects of stress. Each participant explores personal stress profiles and develop new individual coping strategies.

HF 261 Aerobic Groups 3(85-3.5)
Prerequisite: Department approval. An opportunity for continuing students to maintain and/or improve their fitness level through supervised aerobic exercise sessions and health education lecture/discussions. Emphasis is on regular, safe exercise and healthy lifestyles. Continuing students enrolled for 13 weeks.

HF 270 Massage Therapy—Beginning 3(1-4)
Introduction to history, techniques, and theory of massage therapy.

HF 271 Massage Therapy—Intermediate 3(1-4)
This course will cover specialized massage techniques such as advanced foot massage, exploration of other aspects of Swedish massage acupuncture.

HF 272 Massage Therapy—Advanced 3(1-4)
This is the final course in a three-course sequence. Advanced techniques and practice will be covered.

HF 280 Touch for Health I 2(2-0)
This course combines ancient oriental disciplines with the modern practice of applied kinesiology. The student will improve postural balance and reduce physical and mental pain and tension. Athletes can improve performance and decrease the risk of muscle injury.

HF 281 Touch for Health II 3(3-0)
This course teaches additional techniques and applications including additional muscles, balancing using wheel and five element theory and pain tapping.

HFC 140 Adaptive Cardiac Rehabilitation 2(2-0)
Prerequisite: Department approval. Lecture/discussion for people who are recovering from heart attack/surgery. Recommended for student and a close family member since lifestyles, habits, and information known to increase risks associated with heart problems are discussed.

HFC 151 Adaptive Physical Rehabilitation Cardiac Exercise 4(4.5-5.4)
Prerequisite: Department approval. Designed for continuing students who wish to participate in the health lectures and medically monitored aerobic exercise classes. The emphasis for students with cardiac problems is to further reduce the risk factors which led to their cardiovascular illness and to improve or maintain their individual fitness level. Methods and level of exercise are determined by the participant's physician or by the program medical director. Monitoring by staff. Continuing students enrolled for 13 week terms.

Health, Fitness/Neurologic (HFN)
Health Careers Technology
Division of Technology and Applied Sciences

HFN 100 Living with Multiple Sclerosis 2(2-0)
Prerequisite: Diagnosis of MS. Series of lectures/discussion groups on issues related to living with MS. Lectures include: research, current treatment, diet, exercise, stress management, family dynamics (family members are encouraged to enroll).

HFN 150 Physical Rehabilitation and Fitness 2(2-0)
Prerequisite: Department approval. For persons with physical limitations who are interested in developing and maintaining an individualized exercise program to increase strength, endurance, range of motion, and mobility. Instruction and supervision are provided by physical and occupational therapy personnel. This is an ongoing class and participants may enroll at any time.

HFN 205 Neuro Rehab Adjustment Group 1(1-0)
Designed to assist the student and family members adapt to living with the effects of chronic neurological problems. One hour lecture per week.

Medical Assistant (MA)
Health Careers Technology
Division of Technology and Applied Sciences

MA 100 Administrative Medical Assisting 4(4-0)
Prerequisite: Admission to program. Introduction to role of Medical Assistant行政(Administrative/Clerical functions; professionalism, written communication, telephone communication, scheduling, referrals, filing, medical records management, processing incoming and outgoing mail, payboard system, and basic banking functions.

MA 103 Medical Communication Skills 3(3-0)
Prerequisite: Admission to program. Provides students with an understanding of interpersonal skills necessary to work in a medical facility including verbal and non-verbal communications, listening and responding to patients and family, dealing with ill and dying patients, and empathy.
MA 114 Legal/Ethical Concepts 1(0-0)
Prerequisite: MA 100. Designed to familiarize the student with the basic concepts relating to medical ethics, legal medicine, and professional liability.

MA 124 Microcomputers In Health 3(2-2)
Using IBM microcomputers, students are offered a basic understanding of hardware and software used in medical offices. This includes extensive hands-on training with DOS and applications including word processing, database management, and medical office management.

MA 131 Clinical Skills I 5(3-4)
This course is designed to cover a sequence of clinical duties the medical assistant will perform. The student will gain knowledge in and become adept in performing skills relating to the following topics: 1) physical measurements, 2) health history and physical examinations, 3) infection control, 4) instrument identification and sanitation, 5) health care process, 6) problem oriented medical records, 7) eye and ear injuries, 8) dosage calculations, 9) universal precautions, and 10) CPR certification.

MA 132 Clinical Skills II 5(3-4)
Prerequisite: MA 131. Designed to cover both in theory and campus lab the more advanced technical skills necessary to perform in the clinical setting. Skills and procedures covered will include surgical asepsis, minor surgery assisting, orthopedic appliances, electrocardiography, medication administration, pulmonary function screening, collection of specimens, and first aid.

MA 141 Medical Lab Procedures 3(1-5-3)
Prerequisite: MA 131. Basic principles and procedures for laboratory tests performed in medical offices including collection/preparation of specimens, venipuncture, hematology procedures. Equipment, requisitions, and safety procedures are discussed.

MA 151 Medical Assistant Pharmacology 3(2-2)
Prerequisite: MA 131. Using basic anatomy, physiology, and pharmacology concepts, medications will be presented as they affect various body systems. The medical assistant's responsibilities to pharmacology in the office setting will be emphasized.

MA 181 Administrative Extern 6(0-12)
Prerequisite: MA 100 and MA 124. Clinical Practicum I is the first of two sequential courses and is designed to provide application of administrative theory. The course is programmed with specific performance objectives and activities and is taken concurrently with MA 182.

MA 182 Clinical Extern 6(0-12)
Prerequisite: MA 131, MA 132, MA 141, and MA 151. Clinical Practicum III is the second of two sequential courses and is designed to provide application of theory and practice relevant to the clinical skills required of a Medical Assistant. The course is designed with specific performance objectives and activities and is taken concurrently with MA 181.

Nursing (Career Ladder L.P.N.—R.N.) (NUR) Health Careers Technology Division of Technology and Applied Sciences

NUR 121 Introduction to Nursing 7(4.5-7.5)
Prerequisite: Admission to the program. Introduces biophysical and psychosocial needs of humans. Use of the nursing process to facilitate client adaptation to basic human need deficits is emphasized.

NUR 122 Introduction to Nursing Role 1(1-0)
Prerequisite: Admission to the program. Introduces the nursing roles and functions in practice settings; the health care system; and ethical/legal aspects of nursing practice.

NUR 123 Nursing Care Adult I 8(5-9)
Prerequisite: NUR 121, NUR 122 and PGY 212. Completes the basic human needs and begins study of problems in the intracutaneous, special senses, renal, and reproductive systems. Emphasizes the use of the nursing process to facilitate client adaptation to system problems.

NUR 124 Nursing Care Adult II 10(6-12)
Prerequisite: NUR 123 and NUR 219. Completes study of problems in the hematologic, musculoskeletal, cardiovascular, respiratory, neurological, and endocrine systems. The use of the nursing process to facilitate client adaptation to system problems is emphasized.

NUR 125 Nursing Care Child I 5(3-6)
Prerequisite: Department approval. Introduces the common health problems of children. Use of nursing process to facilitate the child's adaptation to health problems emphasized.

NUR 126 Maternity Nursing I 4.5(3-4.5)
Prerequisite: Department approval. Introduces the adaptive needs and responses of the maternity client, the neonate, and the family during childbearing. The use of the nursing process to facilitate adaptation of all family members in the maternity and perinatal cycle emphasized.

NUR 127 Practical Nurse Role 0.5(5-0)
Prerequisite: NUR 124. Examines the role of the practical nurse; ethical and legal dimensions of practice; professional organizations; role transition; job preparation; and history and trends in practical nursing. Required for those taking the Practical Nurse-National Council/Licensing Examination.

NUR 219 Pharmacology 3(3-0)
Prerequisite: Admission to program and PGY 212. Introduces the student to basic aspects of pharmacology. Various drug categories are discussed as well as nursing responsibilities that are associated with medication administration.

NUR 220 Transition Course 2(0-2)
Prerequisite: Department approval. Introduces the returning Licensed Practical Nurse (LPN) student to the nursing process, POR charting, role transition, and curriculum concepts. Assessment and evaluation of nursing skills will also be done.

NUR 221 Psychiatric Nursing 5(3.5-4.5)
Prerequisite: NUR 125, NUR 126 and CEM 165. Introduces psychiatric-mental health concepts. Development of therapeutic nurse-client relationships is emphasized.

NUR 222 Nursing Care Adult III 10(6-12)
Prerequisite: NUR 221, NUR 224 and MDC 203. Introduces the adaptation problems associated with fluid and electrolyte/acid-base imbalance, shock, GAS-LAS imbalance, and chronic illness. Use of the nursing process to facilitate client adaptation to clinical problems emphasized.

NUR 223 Nursing Care Child II 2(2-0)
Prerequisite: NUR 222 and WRI 122. Introduces the special adaptation problems in children. The nursing process will be used in observational experiences to help solve client problems.

NUR 224 Maternity Nursing II 2(2-0)
Prerequisite: NUR 125, NUR 126, CEM 165. Introduces the high risk maternity and neonate client. The nursing process will be used in observational experiences to help solve client problems.

NUR 225 Beginning Management Skills 6(1.8-12.6)
Prerequisite: NUR 222 and WRI 122. Using beginning management skills to provide direct nursing care through use of the nursing process, as well as to delegate and supervise ancillary personnel in giving direct nursing care to clients.

NUR 226 Associate Degree Nurse Role 0.5(5-0)
Prerequisite: NUR 222 and WRI 122. Examines the role of the Associate Degree Nurse (ADN); ethical and legal dimensions of practice; professional organizations; history and trends of Nursing; role transition; and job preparation.

NUR 230 Advanced Pharmacology 3(3-0)
Prerequisite: NUR 219. A course designed to introduce drug categories used in critical care and high risk areas. Nursing role and responsibilities associated with these drugs is discussed.

Radiation Therapy Technology (RAD) Health Careers Technology Division of Technology and Applied Sciences

RAD 105 Introduction to Radiation Therapy 4(4-0)
Prerequisite: Admission to program. Provides the student with an overview of radiation therapy and its role in medicine. Students responsibilities and benefits will be outlined. Students will be oriented to academic and administrative structure, key departments and personnel, and to the profession as a whole.

RAD 106 Clinical Oncology Seminar 2(2-0)
Prerequisite: RAD 105. Provides the student with the basic concepts of: diagnostic process, pathophysiology, oncologic problems, oncologic emergencies, chemotherapy protocols, agents and side effects, bereavement, psycho-social aspects of disease and specific case studies.
Division of Technology and Applied Sciences

RAD 205 Principals of Oncology II
Prerequisite: Admission to program. Provides the student with the fundamentals of Clinical Radiation Oncology. Malignant conditions, their etiology and methods of treatment are discussed. Attention is given to patient prognosis, treatment results and the effects of combined therapies.

RAD 221 Technical Radiation Oncology
Prerequisite: RAD 205 and RAD 270. Provides the student with the technical aspects of Radiation Therapy Technology. Modalities of treatment, the distinctive properties of each and patient set-up considerations will be discussed.

RAD 231 Radiation Therapy Physics I
Prerequisite: Admission to program. Provides the student with the basic principles and concepts of radiation protection. Methods for preventing unnecessary radiation exposure to patients, radiation workers and the public are discussed.

RAD 232 Radiation Therapy Physics II
Prerequisite: RAD 231. Provides the student with the specifics of ionizing radiation. Details of production, interactions and types of radiation are discussed. Application to the treatment of patients is included.

RAD 233 Radioactive Materials
Prerequisite: RAD 232 and RAD 270. Provides the student with the principles of radioactivity. Medical uses of radioactive material and technical considerations of applications of radiation are discussed.

RAD 235 Clinical Dosimetry I
Prerequisite: RAD 232. Provides the student with the basic concepts of clinical dosimetry and treatment planning. Various external beam techniques, depth dose, area, and summation of simple isodose curves are discussed. Fundamental procedures in dose measurement and verification, as well as machine calibration is included.

RAD 238 Radiation Therapy Math
Prerequisite: Admission to program. Provides the student with background material in the areas of whole numbers, fractions, decimals, basic algebra, factors, factoring, equations, and those areas needed for a Radiation Therapy Technologist.

RAD 270 Radiobiology
Prerequisite: RAD 231. Provides the student with the principles of cell response to radiation. Factors which influence the effects of radiation, tissue sensitivity, and environmental factors are discussed.

RAD 285 Clinical Experience I
Prerequisite: Admission to program. See description under RAD 288.

RAD 286 Clinical Experience II
Prerequisite: RAD 285. See description under RAD 288.

RAD 287 Clinical Experience III
Prerequisite: RAD 286. See description under RAD 288.

RAD 288 Clinical Experience IV
Prerequisite: RAD 287. This four term sequence of clinical application in Radiation Therapy Technology in all phases of Radiation Therapy Technology is designed to present the student with an environment of combining cognitive, psychomotor and effective aspects of the profession. Formal discussion groups are held weekly at the clinical facility. These courses are programmed with specific performance activities. Credit is arranged for each individual term: as appropriate with a ratio of pmr credit hour to three clinical clock hours. The ratio for lecture or discussion group is consistent with the one to one ratio.

Respiratory Therapy (RT)
Health Careers Technology
Division of Technology and Applied Sciences

RT 100 Orientation to Respiratory Therapy Science
Prerequisite: Admission to program. Covers history, and agencies associated with respiratory care; review physical and chemical principles applicable to respiratory therapy; a review of respiratory anatomy.

RT 101 Clinical Respiratory Therapy I
Prerequisite: RT 105. Involves more clinical instruction and more direct patient care activities. Designed for practice and re-emphasis of those concepts introduced in RT 105.

RT 102 Physiology for Respiratory Therapy
Prerequisite: RT 100. Mechanics of ventilation, pulmonary volumes and capacities, pulmonary defense mechanisms, cardiac physiology, vascular physiology, systemic and pulmonary circulation, diffusion, gas exchange and V/Q relationships, O2 and CO2 transport, acid-base balance, controls of ventilation, O2 and CO2 abnormalities, blood gas interpretation, work of breathing, respiratory/ventilatory failure.

RT 103 Respiratory Pathology and Disease
Prerequisite: RT 102. Types of pulmonary disease entities with an approach towards the classification of groups of similar diseases according to their types of dysfunction and related pathophysiology. Emphasizes obstructive pulmonary pathology, restrictive pulmonary pathology, acute inflammatory pathology, diffuse pulmonary pathology, pulmonary vascular pathology.

RT 104 Clinical Respiratory Therapy II
Prerequisite: RT 101. Re-emphasizes the principles of clinical practice discussed in RT 114. More emphasis in critical patient care areas.

RT 105 Introduction to Clinical Respiratory Therapy
Prerequisite: Admission to program. This first term clinical course is designed to expose the student to the hospital environment and function, in addition to practicing and reinforcing the concepts so outlined at the campus in the RT 115 course.

RT 106 Clinical Practicum—Certificate
Prerequisite: RT 104. Ten one-week rotations. Includes pulmonary function lab, non-invasive cardiology lab, neonatal respiratory care, and respiratory disease rotation (including physician rounds and conferences). Other rotations involve primarily adult intensive care units, utilizing the various techniques required.

RT 107 Clinical Practicum—Associate Degree
Prerequisite: RT 104 or admission to AD program. Designed to further refine the skills developed during first year and clinical experience and training in new areas. Observe and participate in the drawing and analysis of arterial blood for blood gas studies.

RT 108 Pharmacology for Respiratory Therapy
Prerequisite: RT 100. Principles and effects of medications a practicing therapist or technician will be exposed to.

RT 111 Respiratory Therapy Techniques II
Prerequisite: RT 105. Extends procedures and equipment in RT 115. Emphasis on IPPB Therapy (principles and theory), IPPB equipment, beginning patient assessment, patient charting, mechanical aspiration of secretions, percussion, vibration and coughing, respiratory home care, incentive spirometry and breathing exercises.

RT 114 Respiratory Therapy Techniques III
Prerequisite: RT 111. Continuous Mechanical Ventilation (covering initial setup, indications, contraindications, weaning, etc.), use of mechanical ventilators (volume, time and pressure cycles), adjutive support (PEEP, IVN, Optimal PEEP, etc.), advanced CPR, artificial airways and airway management, and thoracic suction principles.

RT 115 Respiratory Therapy Techniques I
Prerequisite: Admission to program. Covers concepts of equipment operation and therapeutic application; procedures, purposes and indications for use, contraindications and hazards, precautions; electrocardiography (procedure); cleaning, disinfection and sterilization; compressed gas usage; regulators, flowmeters and connection systems; humidity, aerosol and oxygen administration.

RT 116 Respiratory Therapy Techniques—Certificate
Prerequisite: RT 114. Designed to cover neonatal and pediatric physiology, pathology and ventilatory management, use of other mechanical ventilators, sleep study equipment, pulmonary function testing, hemodynamic monitoring, physical assessment.

RT 117 Respiratory Therapy Techniques—Associate Degree
Prerequisite: RT 114 or admission to AD program. A preparatory course for second year of the program. Designed to emphasize areas that will be used and discussed in clinical rotations during second year. Covers cardiovascular hemodynamic monitoring and measurement, pulmonary function testing, clinical radiology and physical assessment, basic biomedical concepts and safety.

RT 120 Language of Cardiopulmonary Care
Explores the terms and patterns of communications necessary to function as a respiratory therapist in modern clinical practice. Places emphasis on organizations, general medicine, and cardiopulmonary therapy.
RXT 201 Advanced Respiratory Physiology and Testing 4(0-16)
Prerequisite: RT 117. Includes ventilatory control, pulmonary ventilation, mechanics of ventilation, cardiovascular function, pulmonary circulation, ventilation, cardiovascular function, pulmonary circulation, ventilation-perfusion relationships, diffusion, gas transport, blood gases, A-B balance, fluid and electrolyte balance, pulmonary and cardiovascular development, and aging.

RXT 202 Clinical Respiratory Therapy III 8(0-16)
Prerequisite: RT 107. Six five-week rotations (total of 30 weeks over three terms). The specific rotations are: blood gas analysis/pulmonary function testing, cardiovascular intensive care rotation, advanced therapeutic techniques, neonatal critical care, adult intensive care, and non-invasive cardiology.

RXT 203 Advanced Respiratory Pathology and Disease 4(4-0)
Prerequisite: RXT 201. Presentation of the many disease entities specific to the cardiopulmonary system, including treatment, various approaches to their treatment. The topics discussed are manifestations of compensation for respiratory pathology, respiratory defense mechanism, pulmonary immune mechanism, pneumonias, pulmonary infections, adult respiratory distress syndrome, i.e., pulmonary mycoses, pneumocystis, diffuse interstitial fibrosis, sarcoidosis and pulmonary collagen diseases, pulmonary neoplasm, obstructive pulmonary pathology, chronic obstructive pulmonary disease, respiratory immune deficiency, congenital cardiovascular pathology, acquired cardiovascular pathology, and pulmonary vascular pathology.

RXT 204 Clinical Respiratory Therapy IV 5(0-16)
Prerequisite: RXT 202. Continuation of clinical instruction rotation as listed for RXT 202.

RXT 205 Respiratory Therapy Management Skills 4(4-0)
Prerequisite: RXT 203. Responsibilities and duties of a Department Manager or Educator in Respiratory Therapy. Provides insight into the operation of a hospital, as well as respiratory therapy department.

RXT 206 Clinical Respiratory Therapy V 5(0-16)
Prerequisite: RXT 204. Continuation of clinical instruction rotation as listed for RXT 202.

RXT 212 Advanced Respiratory Therapy Techniques I 4(4-0)
Prerequisite: RT 117. Use of various lung ventilators, proper approaches utilized with patients requiring Continuous Ventilatory Support. Patient management problems. Includes methods of support (and monitor) circulation and principles of ventilatory management (including physiology, pathology and related equipment).

RXT 214 Advanced Respiratory Therapy Techniques II 4(4-0)
Prerequisite: RXT 212. Continuation of advanced techniques and types of ventilators. Includes review of basic and advanced CPR, physiology and methods associated with the support of ventilation and oxygen deficits, medical management of the O.P.D. patient and pulmonary rehabilitation. Exposed to type of questioning encountered on Written Registry Examination.

RXT 216 Advanced Respiratory Therapy Techniques III 4(4-0)
Prerequisite: RXT 214. Heavy emphasis on medical management of CNS abnormalities, peripheral neurological dysfunction, thoracic trauma, aspiration and near drowning, burns, pulmonary vascular disease, pulmonary neoplasms and pulmonary infection and pneumonias. Also a continuation of written review exams and practice in taking Clinical Simulation Exams, preparation for the N.R.B.R.C. Registry Exams.

Radiologic Technology (RXT)
Health Careers Technology
Division of Technology and Applied Sciences

RXT 100 Introduction to X-Ray Services 3(2-2)
Prerequisite: Admission to program. Survey of the role of Radiologic Technologists in the hospital setting. Includes historical development of x-ray, ethics, medical terminology, radiation protection, and patient-relationship. Complementary roles of other health care professionals analyzed.

RXT 101 Clinical Seminar I 1(1-0)
Prerequisite: RXT 100, RXT 111. Application of principles learned in previous courses. Introduction to the physical environment of the Radiology Department, the student practices interpersonal skills, basic patient care, and radiographic positioning.

RXT 111 Radiographic Positioning I 6(4-4)
Prerequisite: Admission to program. Review the structure and organs of the body. Topographic anatomy and detailed information on the positions for pediatric and adult x-ray procedures. Application in a radiographic room. Included are the nomenclature of positioning, bones of the extremities, pelvic girdle, thorax, and basic abdominal viscera.

RXT 112 Radiographic Positioning II 8(6-4)
Prerequisite: RXT 111 and AMC 104. Positioning of the structure and organs of the body to include both the common pediatric and adult radiographic procedures using contrast media. Topographic physiology is given with practical clinical instruction and application in a radiographic room. Includes spine, skull, general characteristics of contrast media, organs of the gastrointestinal tract, biliary tract, urinary tract, and procedures in obstetrics.

RXT 113 Radiographic Positioning III 4(3-2)
Prerequisite: RXT 112. More complex technical procedures, includes topographic physiology, studies of sophisticated major and auxiliary equipment, opaque media, and general indications for each examination; specialized neurologic, orthopedic, dental and vascular procedures, and body section radiography. Clinical component.

RXT 121 Radiographic Exposure I 4(3-2)
Prerequisite: Admission to program. Fundamentals of radiographic exposure which are concerned with production, analysis, and recording of the image. Study devices, factors, and properties which are applicable to radiographic quality. Includes a study of basic chemistry, film apparatus, and processing techniques for both manual and automatic processing.

RXT 122 Radiographic Exposure II 4(3-2)
Prerequisite: RXT 121. Factors involved in film contrast, detail and quality application of accessory devices, capabilities limitations of radiographic equipment, technical conversion techniques, exposure technique charts, and mechanical aspects of fluoroscopy.

RXT 123 Independent Study in Radiologic Technology 2(2-0)
Prerequisite: Department approval. Opportunity to prepare and submit a formal research paper. Advanced study in a specific area. May include patient care, positioning, physics, exposure and quality, special procedures, radiobiology, quality control, or x-ray pathology. Involves library research, laboratory experiments, questionnaires, use of audio visual and/or a combination. Bi-weekly meetings required to assess progress.

RXT 124 Independent Study in Radiologic Technology 3(3-0)
Prerequisite: Department approval. Opportunity to prepare and submit a formal research paper. Advanced study in a specific area. May include patient care, positioning, physics, exposure and quality, special procedures, radiobiology, quality control, or x-ray pathology. Involves library research, laboratory experiments, questionnaires, use of audio visual and/or a combination. Bi-weekly meetings required to assess progress.

RXT 131 Radiologic Physics I 3(3-0)
Prerequisite: MTH 102 or equivalency. Principles of physics and relationship to radiology, fundamentals of ionizing and radium physics, and principles underlying the construction and operation of x-ray equipment and auxiliary devices. Includes theory for practical radiation monitoring and protection.

RXT 132 Radiologic Physics II 3(3-0)
Prerequisite: RXT 131. Study units of radiation measurement, radiation exposure and instrumentation, quality factors, such as half-value layers, and tube voltage. Specifics of x-ray generators and circuitry, filtration, x-ray beam restrictors, intensifying screens, with emphasis on patient exposure and protection.

RXT 160 Radiologic Emergencies 2(2-0)
This course is designed to prepare the student to meet a variety of emergency situations encountered in the radiology department. The theory provided will enable the student to recognize when an emergency exists, what the situation is, and the knowledge to provide immediate action.

RXT 200 Introduction to Radiologic Pathology 2(2-0)
Prerequisite: AHC 106 or equivalent. The disease processes most frequently encountered in the Radiology Department. Emphasizes how each disease is diagnosed radiographically and the relationship of the radiographic appearance of the disease to its anatomic, physiologic and pathologic characteristics. The etiology, treatment and resolution of each disease discussed, with an attempt to relate more recent advances in these areas.
Division of Technology and Applied Sciences

RXT 210 Clinical Seminar II
2(0-0)
Prerequisite: RXT 213. Current concepts in radiology to function more effectively within the radiology department. Includes contrast media utilized, the department, advances in special procedures radiography, ultrasound, xerography, thermography, positioning and new items of equipment. Also to acquaint the student with the organization, function, supervision, and financial arrangements related to departments of radiology, basic x-ray equipment for performing preventive maintenance, and detecting simple functioning difficulties.

RXT 212 Clinical Practice I
6(1-15)
Prerequisite: RXT 111, GPA 2.50 or more in major. First course in a four-semester sequence of clinical applications in radiographic technology in all phases of radiologic technology. Weekly discussion groups at each clinical facility. The course is programmed with specific performance activities. Credit is arranged for each individual term with a ratio of one credit hour to three clinical clock hours. The ratio for lecture is consistent with the one to one ratio.

RXT 213 Clinical Practice II
6(1-0-15)
Prerequisite: RXT 212. Second course in a four-term sequence of clinical applications in radiographic technology in all phases of radiologic technology. Weekly discussion groups at each clinical facility. The course is programmed with specific performance activities. Credit is arranged for each individual term with a ratio of one credit hour to three clinical clock hours. The ratio for lecture is consistent with the one to one ratio.

RXT 214 Clinical Practice III
6(1-0-15)
Prerequisite: RXT 213. Third course in a four-term sequence of clinical applications in radiographic technology in all phases of radiologic technology. Weekly discussion groups at each clinical facility. The course is programmed with specific performance activities. Credit is arranged for each individual term with a ratio of one credit hour to three clinical clock hours. The ratio for lecture is consistent with the one to one ratio.

RXT 215 Clinical Practice IV
9(1-0-23)
Prerequisite: RXT 214. Fourth course in a four-term sequence of clinical applications in radiographic technology in all phases of radiologic technology. Weekly discussion groups at each clinical facility. The course is programmed with specific performance activities. Credit is arranged for each individual term with a ratio of one credit hour to three clinical clock hours. The ratio for lecture is consistent with the one to one ratio.

RXT 216 Comprehensive Experience I
9(0-0-23)
Prerequisite: RXT 215. First in a three-term sequence of clinical application in radiography technology in all phases of radiologic technology. Formal and informal discussion groups are held weekly at each clinical facility. The course is programmed with specific performance activities. Credit is arranged for each individual term with a ratio of one credit hour to three clinical clock hours. The ratio for lecture is consistent with the one to one ratio.

RXT 217 Comprehensive Experience II
9(0-0-23)
Prerequisite: RXT 216. Second in a three-term sequence of clinical application in radiography technology in all phases of radiologic technology. Formal and informal discussion groups are held weekly at each clinical facility. The course is programmed with specific performance activities. Credit is arranged for each individual term with a ratio of one credit hour to three clinical clock hours. The ratio for lecture is consistent with the one to one ratio.

RXT 218 Comprehensive Experience III
9(1-0-23)
Prerequisite: RXT 217. Third in a three-term sequence of clinical applications in radiography technology in all phases of radiologic technology. Formal and informal discussion groups are held weekly at each clinical facility. The course is programmed with specific performance activities. Credit is arranged for each individual term with a ratio of one credit hour to three clinical clock hours. The ratio for lecture is consistent with the one to one ratio.

RXT 219 Imaging Seminar
2(0-0)
Prerequisite: Allied Health Professional. This class will provide the student-to-graduate imaging technologist with an update of positioning, exposure and physics knowledge. In addition, the use of a comprehensive test will assess the student level of knowledge in the aforementioned subjects.

Surgical Technology (ST)
Health Careers Technology
Division of Technology and Applied Sciences

ST 101 Introduction to Surgical Technology
7(5-4)
Prerequisite: Admission to program. Introduction to role and function of Surgical Technologist as a member of the surgical team. Historical aspects of surgery, care and safety of the patient, medical terminology, and ethical/moral-legal responsibilities. Hospital laboratory sessions on basic skills to function in the operating room.

ST 102 General Surgical Procedures
6(6-0)
Prerequisite: ST 101. Procedures for bringing the patient to surgery, types and methods of anesthesia, positioning surgical incisions and tissue closures. Includes disease related symptoms, diagnostic procedures, preoperative and postoperative care and complications.

ST 103 Applied Operating Room Techniques I
8(0-16)
Prerequisite: ST 102. Clinical session at an assigned area hospital—two full days a week. Participation in and assisting with selected surgical procedures.

ST 104 Surgical Specialty Procedures
6(6-0)
Prerequisite: ST 103. Advanced and special areas of surgery: obstetrics and gynecology, thoracic, genito-urinary, ear, nose, throat, plastic, eye, orthopedics, neurosurgery.

ST 105 Applied Operating Room Techniques II
8(0-16)
Prerequisite: ST 104. Clinical session at an assigned hospital—two full days a week. Participate in and assist in selected surgical procedures.

ST 107 Surgical Pharmacology
2(0-0)
Prerequisite: Admission to program. Medication frequently used in the operating room; local and general anesthetics, drugs used for surgical patients, procedures for handling in sterile and non-sterile areas, mixing and measuring medications.

ST 110 Surgical Aspects
2(0-0)
Prerequisite: Allied Health Professional. For Surgical Technology Program. Basic considerations of surgical infections including definitions, pathogens organisms and bacteria, fungi, viruses, protozoa, helminths and transmission of infectious agents. Covers sterilization and disinfection of equipment and supplies in the operating room.

INDUSTRIAL OPERATIONS TECHNOLOGY

Director: Helen Webb
220-D Gannon Vocational Technical Building

Industrial Operations Technology directs its study toward preparing manufacturing staff to examine concerns as wide ranging as process design, redesign of facilities for more effective production, and tooling improvements. This area of study is ideal for the person interested in manufacturing applications, specifically manufacturing process and technology.

Individual courses and curricula are designed for the person interested in one or a combination of the individual fields of electronics, electrical technology, industrial automation, quality engineering, and production and inventory management.

Industrial Operations Technology offers courses under the following course codes:
- EM: Electrical Courses
- ET: Electronics
- IA: Industrial Automation
- PIM: Production & Inventory Management
- QC: Quality Control & Reliability

Electrical Courses (EM)

Electrical Technology curriculum provides education and training in electrical control of mechanical systems. This curriculum has been developed to provide course work for people who are interested in becoming industrial electricians, maintenance personnel, testing technicians, machine control circuit designers, and construction electricians. The curriculum will prepare students to enter the advanced technology process and manufacturing environment. Graduates may be employed by original equipment manufacturers of components or systems, testing facilities and end users in light to heavy manufacturing, food processing and warehousing industries, or electrical contracting firms.

For the employed electrician, maintenance person, or control circuit designer, the Electrical Technology curriculum includes courses that provide in-depth knowledge of documentation systems used in industry, electrical codes and standards, theoretical foundation for how systems and components work, and information about how to create electrical control systems using relays, programmable controllers, off-the-shelf electronic units, and computers.

To ensure that graduates can perform in the modern automated and programmable environment, the Electrical Technology Associate Degree requires related courses in Electronics Technology, Industrial Automation, Computer Technology, and other curricula of CVM.

Completion of the Associate Degree entitles the student to claim two years credit toward the work experience required to apply for a State of Michigan Class 3 electrician's license.
Electronics (ET)
The field of electronics continues to expand rapidly as technology in computers, communications, navigation, industrial automation, medical life support systems and numerous other "High Technology" applications are developed. Lansing Community College offers a two-year curriculum leading to an Associate Degree. The college also provides a one-year certificate curriculum in Computer Repair.
Job opportunities in electronics technology are many and varied. Students may follow one of several "tracks" developed to emphasize specialty areas of electronics. The following specialties are for the two-year Associate Degree curriculum: digital, biomed, and communications.
Digital Electronics (Computer Electronics) is one of the most dynamic and challenging areas in the electronics field. Recent developments in this technology promise to make computers as common in everyday life as radio and television. Digital electronics is devoted to the circuits and devices used in modern digital and industrial computers and other digital devices of modern technology. LCC's Digital Electronics curriculum will prepare the student to maintain, troubleshoot, repair, and often design and install computers, computer peripheral devices and similar digital equipment.

Industrial Automation (IA)
The field of industrial automation is in an interesting stage of development. The Associate Degree curriculum will cover all types of hard and flexible automation technology, such as vision systems, speech recognition, robotics, and bar coding. It is focused on the creation of a general automation technician who may work on a robot one day, a numerical control machine the next, and a conveyor line or another. The student will select a concentration from three tracks: managerial, technician, or design.

Production and Inventory Management (PIM)
This curriculum will assist production schedulers, inventory planners, manufacturing supervisors, MRP II project team members, purchasing staff, and materials managers. It will also interest distribution, data processing, and financial staff in manufacturing firms. Current computer software offers tools in manufacturing firms new and powerful tools for the advancement of production and inventory functions. The integration of manufacturing information by a computerized communication system will provide more managers in manufacturing organizations with the ability to closely and accurately manage and direct scheduling, material management, and production functions.
The study of production and inventory management will cover the theory of the discipline in a practical manner based on manufacturing operations. Emphasis will be given to manufacturing applications and company-wide implementation of manufacturing systems. This will make the curriculum advantageous to those responsible for managing and planning the resources in a manufacturing company.

Quality Control and Reliability (QC)
Current demand for better quality and reliability has become increasingly challenging in recent years. The task of controlling the quality and reliability of goods and services for industry has become a professional discipline. Quality management, instrumentation, and statistical methods have been proven effective and are used by manufacturers today. They need quality control and reliability engineers, managers, inspectors, technicians, and analysts to assist them in their task of improving the quality and reliability of goods and services. The performance of these tasks requires specialized training in the theory and application of quality assurance.
The quality control and reliability curriculum at Lansing Community College is designed to provide the training to meet industry and government needs for proficient persons in this field. The curriculum provides the core concentration in statistical methods and elective concentration in quality management and metrology.
EM 161 Introduction to Programmable Controllers 4(3-2)
Prerequisite: EM 100 and EM 131. Covers major components of a programmable controller and how these components are connected to create an operating programmable controller; the capabilities, similarities and differences among controllers and their component parts; programming relay equivalent circuits on both Allen Bradley and Modicon programmable controllers. Course fee

EM 163 Allen Bradley Programmable Controllers I 5(4-3)
Prerequisite: EM 161 and EM 132 concurrently. Programming and system connections for Allen Bradley programmable controllers, beginning with timers, counters and math through subroutines. Learn logic design for machine control. System documentation. Troubleshooting. Course fee

EM 164 Modicon Programmable Controllers I 5(4-3)
Prerequisite: EM 161 and EM 132 concurrently. Programming and system connections for modicon programmable controllers, beginning with timers, counters, and math. Learn to configure PC, I/O and traffic cop. Learn logic design for machine control. System documentation. Troubleshooting. Course fee

EM 211 DC Motors and Generators 4(3-2)
Prerequisite: EM 100, ET 112 and EM 123. Covers basic principles of dc motors and generators including induced voltage, development of torque, and mechanical output power; operating characteristics, modern dc motor control. Emphasis on mathematical problem solving. Course fee

EM 212 Alternators and Single Phase Motors 4(3-2)
Prerequisite: EM 211. Begins with review of three phase theory and calculations. Covers construction and operating characteristics of three-phase alternators. Brief introduction to three phase motor theory. Common single-phase motor construction and operating characteristics emphasized. Course fee

EM 213 Transformers and Three Phase Motors 4(3-2)
Prerequisite: EM 212. This is a continuation of EM 212. Covers three-phase induction and synchronous motors, single-phase and three-phase transformers. Common transformer hook-ups are discussed and investigated in lab. Course fee

EM 240 Electrical Estimating 3(2-2)
Prerequisite: EM 102 and EM 135. Covers the basics of preparing accurate, competitive, electrical estimates for the building trades. Fundamental take-off procedure using electrical, mechanical and architectural prints; labor and materials cost, evaluation techniques, and proper use of specifications. Students should have practical wiring experience, considerable practice in the use of National Electrical code rules, and be able to read electrical construction prints before enrolling. Course fee

EM 264 Modicon Programmable Controllers II 5(4-3)
Prerequisite: EM 164. Write programs using R to T and T to R, sequencers and drum controller instructions. Learn about intelligence cards, analog, ASCII, etc., Network 2 or more PC's on Modicon. Course fee

EM 265 Allen Bradley Programmable Controllers II 5(4-3)
Prerequisite: EM 163. Write programs using file, block transfer, sequence, logic and bit manipulation instructions. Learn about intelligent cards, ASCII, analog, etc., Network 2 or more similar PC's on data highway. Course fee

EM 291, 292, 293 Project Labs 1(0-2), 2(0-4), 3(0-6)
Prerequisite: Department approval. Use of the electrical laboratory and other resources to pursue an individual project. Submit a written proposal outlining the project and secure approval from the supervising instructor before enrolling. It is recommended that the student be at least halfway through the Electrical Technology curriculum before attempting a project lab.

Electronics (ET)
Industrial Operations Technology
Computer Integrated Manufacturing
Division of Technology and Applied Sciences

ET 100 Electronics for Non-Majors 4(2-4)
Prerequisite: High School Algebra. Covers the fundamental concepts of electricity to electronic amplification, using transistors. Emphasis on laboratory work. Course fee

ET 101 Electronics Math I 5(5-0)
Prerequisite: Math Placement Test. Covers the mathematics necessary for electronics technology. Emphasis is placed on developing skills required for dc and ac circuit analysis. Topics include: algebraic manipulation and use of electronic formulas, efficient use of the scientific calculator, basic trignometry and its application to ac circuits, and the application of complex numbers to ac circuits.

ET 102 Electronics Math II 3(2-0)
Prerequisite: ET 101. A continuation of ET 101 covering the mathematics required for electronics technology. Topics include exponential and logarithmic functions, binary, octal, and hexadecimal number bases, basic logic and Boolean algebra.

ET 111 Electrical Circuits I (DC Circuits) 4(4-2)
Prerequisite: ET 101 concurrently. Introduces basic electrical circuits with emphasis on direct current. Covers electrical units, resistor color code, Ohm's law, Kirchhoff's laws, network theorems, inductance, capacitance and R, C, time constants. Laboratory work includes measurement of voltage, current and resistance in d.c. circuits using the VOM and DVM, constructing and testing simple meters, and using the oscilloscope to measure the period and amplitude of an A.C. signal. Basic troubleshooting concepts are also introduced. Course fee

ET 112 Electrical Circuits II (AC Circuits and Diodes) 4(4-3)
Prerequisite: ET 111 and ET 102 concurrently. The second of a series of three courses in electrical and electronic fundamentals. ET 112 deals with the sine wave, inductive and capacitive reactance, impedance of series and parallel circuits, series and parallel resonance and filters. Solid state diodes are introduced, and circuits using these devices are discussed, including rectifiers and zener regulators. Small signal characteristics of diodes are examined. Course fee

ET 113 Electrical Circuits III (Transistors) 6(5-4)
Prerequisite: ET 112. The last of a series of three courses in electrical and electronic fundamentals. ET 113 deals with bipolar and field effect transistors. Biasing methods, small signal and large signal characteristics of typical transistors, amplifiers are discussed, both from an analysis and from a design standpoint. Interstage coupling and bypassing are examined. Solid state troubleshooting is introduced. Course fee

ET 120 Digital Programming Concepts 4(3-2)
Prerequisite: ET 111 and ET 101 or ET 160. This course is designed specifically for electronic students and will include a basic introduction to several of the most common programming languages. Emphasis will be on the specific requirements of the language as it relates to the job of a computer field engineer. In this course a link is established between the higher level languages, assembler and the machine language training that the students will receive the following term, while actually programming the microprocessors in the electronics lab. Course fee

ET 121 Machine Language Programming 3(2-2)
Prerequisite: ET 112 and ET 131 concurrently. For electronics majors planning to study digital electronics. Covers fundamentals of machine language programming for the 6802 microprocessor, emphasis on number systems, addressing modes, machine instructions, branching and interrupts. Lab work in writing and debugging programs in machine language. Course fee

ET 131 Digital Basics 3(2-2)
Prerequisite: ET 112. Introduces digital electronics and associated circuitry, binary number systems, basic logic gates, flip flops, counters, Boolean algebra, the basics of TTL integrated circuits, and fundamentals of computer operation. Laboratory work in construction and analysis of digital circuitry using TTL integrated circuits. Course fee

ET 151 Computer Systems Repair I 3(2-2)
Prerequisite: Department approval. A basic troubleshooting course intended for students in the computer repair certificate program. This course stresses logical troubleshooting procedures and thought processes as related to computer repair. The student will troubleshoot and diagnose digital circuitry. Course fee

ET 152 Computer Systems Repair II 3(2-2)
Prerequisite: Department approval. A course intended for students in the computer repair certificate program. This course includes topics on computer systems diagnosis and repair. Board swap troubleshooting is stressed. Use of computer self-diagnostic programs are discussed. Lab work includes disassembly and assembly of systems and efficient diagnosis of system problems. Course fee
ET 160 Math for Computer Repair 5(3-0)
Prerequisite: Department approval. A mathematics course intended for students in the computer repair certificate program. This course deals with arithmetic and algebra concepts related to electronics. Basic logic circuits, truth tables, Boolean algebra, and conversion between different number bases are discussed along with the use of a scientific calculator.

ET 161 Soldering and Desoldering 2(1-2)
Prerequisite: Department approval. A course intended for students in the computer repair certificate program. This course deals with theory and practice of soldering and desoldering processes. Lab work includes practice in soldering, desoldering, and parts removal from printed circuit boards. Course fee

ET 170 Electronics for Computer Repair 6(5-2)
Prerequisite: Department approval. A basic electronics course intended for students in the computer repair certificate program. This course deals with basic electricity. Resistive, inductive, and capacitive circuits. Bipolar and field effect transistors and transistor circuits. Course fee

ET 171 Digital Electronics and Computer Systems I 6(4-4)
Prerequisite: Department approval. A course intended for students in the computer repair certificate program. This course includes topics in basic digital electronics, multivibrators, logic gates, and basic computer systems, including memory, registers, and microprocessors. Lab work includes troubleshooting and testing electronic circuits. Course fee

ET 172 Digital Electronics and Computer Systems II 6(5-2)
Prerequisite: Department approval. A course intended for students in the computer repair certificate program. This course includes topics in digital electronics, computer systems, and the internal operation of the computer, computer expansion boards, and peripherals such as: disk drives, monitors, printers, and modems. Lab work includes disassembly and testing of the computer. Course fee

ET 180 Test Equipment for Computer Repair I 3(2-2)
Prerequisite: Department approval. A course intended for students in the computer repair certificate program. This course introduces the student to the basic operation of test equipment such as the digital multimeter, the volt/ohm meter, and the oscilloscope. Course fee

ET 182 Test Equipment for Computer Repair II 3(2-2)
Prerequisite: Department approval. A course intended for students in the computer repair certificate program. This course includes topics on test equipment that are used in computer systems diagnosis and repair. Logic analyzers and signature analyzers are discussed along with computer diagnostic routines. Lab work includes using a logic analyzer and other computer troubleshooting test equipment. Course fee

ET 206, 207, 208 Project Laboratory 1(0-2), 2(0-4), 3(0-6)
Prerequisite: ET 113 and Department approval. Pursue a topic of interest within the area of electronics, using the Project Lab to construct an electronic device, or develop a research paper on a particular aspect of electronics

ET 211 Electronic Applications I 4(3-2)
Prerequisite: ET 113. A continuation of ET 113 with emphasis upon bipolar and field effect transistors, and an introduction to characteristics and applications of operational amplifiers. Course fee

ET 212 Electronic Applications II 4(3-2)
Prerequisite: ET 211. A continuation of ET 211 with units on waveform, power supplies, phase locked loops and frequency to voltage and voltage to frequency conversion. Course fee

ET 213 Electronic Applications III 4(3-2)
Prerequisite: ET 212. A continuation of ET 212 with units on digital to analog and analog to digital conversion, data acquisition, active filters and operational amplifiers, and applications of analog electronics. A portion of the laboratory activity in this course is devoted to an electronics construction project including printed circuit board design. Course fee

ET 211 Digital Electronics I 5(4-2)
Prerequisite: ET 113, ET 121, ET 131. Covers logic gates, combinational logic, pulsed logic, flip flops, digital counters, electronic displays, multivibrators, timers, TTL, CMOS, and ECL circuitry. Lab work in breadboarding and measuring digital circuits. Course fee

ET 232 Digital Electronics II 5(4-2)
Prerequisite: ET 231 and ET 121 concurrently. Covers electronic memories, magnetic memories, analog interface devices and an introduction to microprocessors and microcomputers, including the 6802 and 8085 processors. Lab work in breadboarding electronic circuits, and using a microcomputer. Course fee

ET 233 Digital Electronics III 5(4-2)
Prerequisite: ET 232. This course deals with advanced topics in microprocessors, including the 8086, 68000, 68020 and other microprocessors. Lab work includes a microprocessor-based computer design project. Course fee

ET 241 Test Equipment I 4(3-2)
Prerequisite: ET 113. The first of a series of two courses for second year students that deals with modern test equipment and instrumentation application and theory. The course covers analog and digital instrumentation, including function generators and oscilloscopes. Laboratory work utilizes digital and analog breadboarding and emphasizes the calibration and standardization of various test equipment. Course fee

ET 242 Test Equipment II 4(3-2)
Prerequisite: ET 241 and ET 232. This course is a continuation of ET 241 and deals with sophisticated instrumentation. Storage oscilloscopes, spectrum analyzers and dual time base delayed sweep oscilloscopes are covered. In the latter part of the course the emphasis is on digital and computer based test equipment. Students spend time using logic analyzers and ICE (in-circuit-emulator) equipment in problem solving exercises using Intel and Motorola Microcomputers. Course fee

ET 243 Peripherals Devices 4(3-2)
Prerequisite: ET 232 and ET 242. This course is intended for the second year student interested in computer peripheral devices. The course deals with circuit components within the computer system such as address decoders, memory components, parallel and serial peripheral support chips, CRT controllers, disk drives, printers, data terminal, modems and data communications protocols. The laboratory work covers interfacing configuration and the use of data communications test equipment, emulators and logic analyzers to solve system problems. Course fee

ET 251 Digital Troubleshooting I 3(2-2)
Prerequisite: ET 131 and ET 231 concurrently. Introduces basic techniques of troubleshooting lab experience in troubleshooting basic digital circuits including clocked circuits, counter circuits, multiplexed displays, and other digital circuitry. Course fee

ET 252 Digital Troubleshooting II 3(2-2)
Prerequisite: ET 232, ET 243, concurrent. ET 251. Covers use of test equipment and troubleshooting procedures for troubleshooting microprocessor based microcomputer systems. Lab work in writing troubleshooting procedures and diagnostic routines for microcomputer equipment. Course fee

ET 260 Introduction toServicing 5(3-4)
Prerequisite: ET 113. An introductory service course for students who do not plan on taking the Radio-TV Servicing sequence. Topics covered: general troubleshooting and repair techniques, superheterodyne receiver, B & W TV sweep circuits, B & W CRT and tape recorder mechanical system. Course fee

ET 261 Radio Servicing 5(3-4)
Prerequisite: ET 113 or Department approval. Includes theoretical and practical troubleshooting techniques: AM, FM-MPX radio operation, radio concepts using a block diagram of a superheterodyne receiver, vacuum tube and transistor radios. Students provide own handtools and radios for repair. Course fee

ET 262 Television Servicing 5(3-4)
Prerequisite: ET 261. Explores principles of operation of black and white television receivers; troubleshooting techniques. Students provide own handtools and televisions for repair. Course fee

ET 263 Advanced Television Servicing 5(3-4)
Prerequisite: ET 262. Troubleshooting and alignment of color circuits. Students provide own handtools. Course fee

ET 267 VCR Servicing 2(1-2)
Prerequisite: ET 262 and ET 263. Basic servicing of VCR's and Microwave units. Course fee

ET 271 Communications I 4(3-2)
Prerequisite: ET 113. First of a three-term sequence of courses dealing with electronic communication theory. Topics include active and passive filter networks, rf power amplifiers, and oscillator circuits. Course fee
ET 272 Communications II 4(3-2)
Prerequisite: ET 271. Phase locked loops, amplitude modulation, single sideband, frequency modulation, and receiving systems are covered. Course fee

ET 273 Communications III 4(3-2)
Prerequisite: ET 272. Investigates antennas, transmission lines, microwave devices, and transmitting systems. Course fee

ET 283 Biomedical Instrumentation 5(4-2)
Prerequisite: ET 242 and ANT 152. Transduction of physiological variables to electrical signals and the measurement of these signals with emphasis on instruments used in a hospital.

Industrial Automation (IA)
Industrial Operations Technology
Computer Integrated Manufacturing
Division of Technology and Applied Sciences

IA 101 Introduction to Robotics 4(4-0)
Prerequisite: CIM 100. An introduction to the history and internal workings of robotic and automation devices. Students will be introduced to electric, electronic, mechanical, hydraulic, and pneumatic components and their operations.

IA 102 Applied Robotics I 4(2-4)
Prerequisite: IA 101. Logical thinking and robotic programming are presented in this course. Although AML will be used in the lab work, other languages and programming methods will be discussed. An introduction to using the IBM personal computer will also be given. Course fee

IA 103 Applied Robotics II 4(3-2)
Prerequisite: IA 102. An introduction to the application of robotic devices. Students will study system components, such as tools, and effectors, position sensors, and servo control systems. Course fee

IA 135 Introduction to Fiber Optic Communications 4(4-0)
Prerequisite: IA 101 and TEC 151. An introduction to fiber optic communications including, vocabulary, fundamentals of light energy, fundamentals of wave guiding, power requirements, optic fiber construction, light sources, and light detectors.

IA 136 Fiber Optic Installation, Termination, and Repair 4(3-2)
Prerequisite: IA 135. Practical experience in installing, testing, and repairing fiber optic systems. The student will use state of the art equipment including: an inspection microscope, an automated polish, an optical time domain reflectometer (OTDR), and a microprocessor controlled fusion splicer. Course fee

IA 201 Robotic Systems I 4(3-2)
Prerequisite: IA 103. Vision systems, bar coding and stepper motors are among the topics to be discussed and used in this class. Course fee

IA 204 Robotic Project I 4(3-2)
Prerequisite: IA 201. Students will work on several projects with the instructor's guidance. These projects will involve using industry literature and components to solve manufacturing problems. Course fee

IA 206 Robotic Project II 4(0-8)
Prerequisite: IA 204 and Instructor approval. This is a self study lab where the student does projects of their own choosing (with Instructor approval). Examples of projects: building an end-effector to pick up a specialized part; design a position sensing system for a hydraulic bang bang robot; or design a work cell. Students should be prepared with a problem statement when asking for Instructor approval. Course fee

Quality Control and Reliability (QC)
Industrial Operations Technology
Computer Integrated Manufacturing
Division of Technology and Applied Sciences

QC 100 Introduction to Quality Control 3(3-0)
An introduction to the quality field, this class provides an understanding of what quality control is and why it is important. Covers quality control applications in different industries and companies, the role of statistics, concepts of management, job opportunities in the quality field, a history of the field, and definitions of many of the terms. Course fee

QC 101 Problem Solving Using Graphs & Charts 3(3-0)
An introduction to basic graphs and control charts to analyze processes and identify problems. Covers use of SPC in task force of team problem solving. Covers such techniques as design and use of data collection sheets, how to use different charts and graphs, cause and effect diagrams, histograms, X and R charts, and attribute charts. Course fee

QC 102 Total Quality Assurance 3(3-0)
Basic managerial techniques and functions of running a quality control department. This class explores the area of managing for quality, using a total quality control approach. Topics include quality costs, organizing for quality, commitment to quality, marketplace demands, and responsibilities for quality. The engineering technologies basic to the modern program will be reviewed. Course fee

QC 103 Probability and Statistics for SPC 4(4-0)
Basic probability and statistics are an introduction to the normal poisson and binomial distribution as related to statistical process control. Material covered includes probability, counting techniques, binomial distribution, hypergeometric sampling plans, Poisson distribution, and normal distribution. Course fee

QC 104 Shop Floor Data Collection 2(2-0)
This class will cover the use of electronic hand-held collectors, primarily the Datamap. Areas to be covered are how to set up and use a Datamap, use of data collectors and SPC, accessories available with data collectors for use on various applications, and interfacing of data collectors with computers. Course fee

QC 105 Cost of Quality 3(3-0)
Explains the definitions and philosophy of cost of quality and covers quality improvement using cost of quality (cost collection, trend analysis, problem solving, and cost reductions), and reporting to management.
QC 108 Quality Systems Management
This course will focus on developing, managing and implementing quality assurance systems. Course materials and assignments are designed to develop skills in intercompany, vendor and customer relations including communication requirements, certification programs, sample submission, quality planning and quality manual developments. Course fee

QC 109 Manufacturing Supervision
A course to develop skills for supervising production personnel in the manufacturing environment. Topics include employee selection and development, task analysis, leadership, equipment utilization, and continuous improvement, of quality and productivity utilizing employee involvement. Course fee

QC 112 Quality Consensus Management
Prerequisite: QC 101. This course is designed to direct individuals in the preparation, formation and operation of quality circles and the management practices required to accomplished a successful program.

QC 120 Equipment and Lab Management
The study of tools found in quality assurance lab environments relating to their use, calibration, storage, maintenance and management.

QC 121 Instrument Interfaces
Prerequisite: QC 120. The practices utilized in industry to proficiently use digital measurement equipment and interfacing computer systems.

QC 122 Geometric Tolerancing
Prerequisite: DT 101 or DT 110 or industrial experience. The course aligns an industrial dimensioning system with quality assurance considerations for the relationships of variable data usage. Course fee

QC 123 Computer Interfaces
Prerequisite: QC 121. The application of data translation from the Mitutoyo DP-3DX to a PC computer, formatting of data reporting, and the use of optical comparators. Course fee

QC 124 Quality Assurance Instrumentation
Prerequisite: QC 123 and QC 122 or DT 210. Develop proficiency in the use of the Coordinate Measurement Machine to make basic measurements, operator interfacing computer systems; work with optical comparator and surface test machines. Includes wiring reports on assigned projects. Course fee

QC 200 Control Charts
Prerequisite: QC 103. Application, design, and selection of control charts. The student will learn to plan the implementation of control charts for their processes, to construct X bar R charts, numerically analyze a process from a chart, distinguish between capability and control, determine when to react to a process based on a control chart, analyze control chart patterns in terms of probabilities, and to construct attribute charts. Course fee

QC 201 Sampling for Process Control
Prerequisite: QC 103.Acquaints students with the design and selection of sampling plans for variables and attributes. Material covered includes acceptance sampling, fundamental concepts of sampling, military standards, and aspects of life testing and reliability. Course fee

QC 202 Basic Reliability
Prerequisite: QC 103. Introduction to fundamental reliability definitions and concepts, such as probability density function, reliability function, and hazard/failure rates. Covers life characteristic curve and reliability modeling. May include reliability/cost ratio studies.

QC 203 Advanced Control Charts
Prerequisite: QC 200. This course continues to develop the concepts learned in QC 200. Many different types of control charts will be presented.

QC 204 Computer Programming for Quality Engineers
Prerequisite: QC 209. This course is an introduction to computer programming the Turbo PASCAL language, with an emphasis on statistical computing methods. The course will cover the elementary principles of computer programming in PASCAL for the first part of the course, and progress into specific applications in probability and statistics in the second part of the course. Course fee

QC 205 Introduction to Biostatistics I
Introduction to basic concepts of statistics with practical application in the biological and health sciences. Materials covered include descriptive statistics, probability, probability distributions (binomial and normal), random sampling, estimation, hypothesis testing, chi-square, student t, and non-parametric tests.

QC 208 Design of Experimentation—I (Applied Stats)
Prerequisite: QC 103. Introduction to various tests to analyze data: hypothesis testing, chi-square, student-t, and so on. At the conclusion of the class, the student should be able to use the characteristics of the normal curve to analyze processes, understand the concept of hypothesis testing and apply it with various tests to means, differences in means, variances, and percentages, establish confidence intervals around estimates, and determine necessary sample sizes.

QC 209 Design of Experimentation—II (ANOVA)
Prerequisite: QC 208. Exploring the use of analysis of variance and regression analysis for problem solving. Covers correlation and regression analysis, confidence interval, and analysis.

QC 210 Design of Experimentation—III (Experiments)
Prerequisite: QC 209. Exploring the different methods of performing a design of experiment, including nested and block. This class introduces the student to the concept of planned experimentation, gives the student the ability to work through basic designs manually, and explains the importance of planned experimentation to statistical process control.

QC 211 Statistical Problem Solving
Prerequisite: QC 103. This course will concentrate on methods for both detecting chronic variation in a process and for tracing it back to its root causes. Course fee

QC 212 Design of Experiments—Taguchi Method
Covers experimental design methods with an emphasis on the Taguchi Method, including the Loss Function concept, factorial designs, analysis of variance, orthogonal arrays, parameter design, signal to noise ratios, and graphic analysis methods.

MANUFACTURING TECHNOLOGY

Director: William F. Denardo
220 Gannon Vocational Technical Building
Manufacturing Technology offers courses under the following course codes:
AT: Solar Energy Courses
ATR: Machine Trades
CEN: Cooperative Education
CNC: Computerized Numerical Control
HAC: Heating and Air Conditioning
SAF: Safety Courses
WLD: Welding

Manufacturing Technology has been going through an evolution. Today as never before this "evolution" is at a pace which is uncomprehendable. Today's complex world requires sophisticated manufacturing processes that need computers to control them.

Manufacturing Technology curricula have been designed to provide each student with a meaningful educational experience with direction. Every course has been developed using current technological data from industry representatives from our advisory committees and our skilled instructors.

Each student will receive individualized counseling into curricula based on their interests and skills. These curricula follow a logical sequence of experience which can be adjusted to individual needs yet provide minimum efficiency in learning essential concepts.

Emphasis is placed on hands-on activities and problem solving.

Machine Trades (ATR)

We are living in an age of metal. There has been a rapid change in the way we design, form, fabricate, assemble and inspect metal. This rapid change has created a cluster of job opportunities for men and women.

The metal machine trades curriculum has been designed to meet the current and future needs of industry by providing students with the basic skills and technical knowledge necessary to manipulate modern machines, tools, instruments and materials safely and productively.

This curriculum provides a comprehensive treatment of all metal working procedures with a special emphasis on computerized numerical control. A wide variety of Certificates and Associate Degrees are offered in this area.
Computerized Numerical Control (CNC)

Numerical Control (NC), Computerized Numerical Control (CNC), and Direct Numerical Control ( DNC) are the "cutting edge" of modern machining processes. These sophisticated machines linked with the powerful CAD/CAM system open a very bright future for those who choose this high-tech field. Computerized Numerical Control Programming is the critical link that takes a part design and makes it real.

Students in this field will learn the following major topics:
1. Machine Code that is used to drive the machine tools.
2. APT AC (Automatically Programmed Tool—Advanced Contouring), a high level computer language that simplifies programming of complex parts.
3. CAD/CAM NC 2, a graphics system that enables programming directly from computer drawings and graphically verifies tool motion.

To qualify, the student must first acquire solid machining, blueprint reading, and mathematical skills. This curriculum provides job entry skills and enough related knowledge to work effectively with other personnel in this area. Associate Degrees available.

Heating and Air Conditioning (HAC)

The Heating and Air Conditioning curriculum is designed to teach students how to service and install a total comfort air conditioning system in residential and light commercial applications. The student works with air conditioning systems designed to control the temperature, humidity, purity and circulation of air within an enclosed space, such as a home or business. Students receive necessary background to calculate heat gains and heat losses, and learn layout, planning and design of cooling and heating systems.

In the heating sections, the installation and servicing of oil burners, gas-fired systems and the controls needed for these systems are thoroughly covered. Much time is spent in the cooling sections, building a background knowledge of the combination of motors, compressors, valves, coils, piping, ducts, electrical wiring and automatic controls that make up air conditioning systems.

The student gains a thorough knowledge of the latest tools, gauges and testing equipment used in Heating, Air Conditioning and Refrigeration, and a sound background in troubleshooting of related equipment. Specialized advanced courses in Pneumatics, Hydraulics and Power Plants as it pertains to Heating, Ventilation, and Air Conditioning are also offered. Certificates and Associate Degrees available.

Industrial Safety (SAF)

Increasing emphasis on safety inspection, training, and record keeping is due largely to federal and state laws and regulations on safety and health standards. Many federal, state, and local government agencies, as well as the National and Michigan Occupational Safety and Health Act, require professionally trained people to carry out the functions of these standards. Industry also needs trained people to implement safety practices within companies and departments.

Welding (WLD)

The field of welding has become one of the most important skilled trades in our present technical society. Welding Technology is universally recognized as the principle joining process in manufacturing, maintenance, construction and agriculture. With the need for greater production economy and more effective metal bonding, a variety of welding processes have been developed to meet these increasing demands. This program has been designed to provide comprehensive coverage of all current welding practices, including testing and inspection. Certificates and Associate Degrees are available.

COURSE DESCRIPTIONS

Solar Energy (AT)

Manufacturing Technology

Computer Integrated Manufacturing

Division of Technology and Applied Sciences

AT 202 Energy Efficient Design

Survey of modern methods and materials used to improve the energy efficiency of all buildings: super-insulation techniques, solar energy input, energy storage systems and other concepts are presented along with the Michigan Energy Code. Course fee

AT 211 Passive Solar Design I

Prerequisite: HAC 270 or HAC 274. Emphasis on the natural process of heating and cooling buildings using site planning, earth sheltering, internal massing and hybrid assists. Mazria's design patterns and the P-chart method will be presented. Course fee

AT 218 Solar Greenhouse

Design and construction of walk-in solar collectors. Greenhouse horticulture, movable insulation techniques and design calculations are presented to assist in planning a heat and food producing greenhouse. Course fee

Machine Trades (ATR)

Manufacturing Technology

Computer Integrated Manufacturing

Division of Technology and Applied Sciences

ATR 100 Machine Tool Survey

Prerequisite: ATR 150 Lecture covers machine and hand tools used by an industrial machinist. Laboratory offers a variety of hands-on experience on all modern machine tools and equipment. For maintenance people, supervisors, mechanical engineers, students of Engineering Technology, machinist sales and quality control. Course fee

ATR 101 Machine Shop I

Prerequisite: ATR 151. Theory and practice in the operation and setup of machine tools with emphasis on lathe, drill press, benchwork, and measuring instruments. Course fee

ATR 102 Machine Shop II

Prerequisite: ATR 101. Continuation of ATR 101, with emphasis on milling machine practice. Some reference to shapers and planers and an introduction to heat treating of steels. Course fee

ATR 103 Machine Shop III

Prerequisite: ATR 102. Continuation of ATR 102 with emphasis on grinding machine practice, metalurgy, and cutting fluids with an introduction to numerically controlled machines (N/C). Course fee

ATR 104 Tool and Cutter Grinding

Prerequisite: ATR 151. Operations and setup in tool and cutter grinding of drills, reamers, single point tools, all types of milling cutters, including ball end mills, and concave radius cutters. Can be adapted to the needs of the student from a particular shop. Course fee

ATR 105 Project Laboratory (Machine Shop)

Prerequisite: ATR 103 or Department approval. Advanced course for students wishing to do in-depth work in the machine shop area or to develop trade entry skills. Students select projects compatible with their individual fields of work. (Approval may be given to take this course twice for a maximum of eight credits.) Course fee

ATR 107 Insert Tools—Selection and Use

Prerequisite: ATR 102. Examines comparative advantages of high speed steel vs. carbides, ceramics, cubic boron nitride and diamond cutting tool materials. Enables economic selection of carbide and ceramic grades and appropriate tool holders and milling cutter bodies. Study of speeds, feeds and depths of cuts for insert tooling. Analyzes causes and remedies for insert failure, poor tool life and/or finish quality. Includes coverage of setup for insert milling cutters and tool holders. Course fee

ATR 108 Model Engine Building

Prerequisite: ATR 101 or Department approval. The student will machine and assemble a model engine of his/her own choosing, although completion of the engine will not be a necessary criteria as extremely difficult or complex projects may be chosen by the students. Course fee

ATR 113 Die Construction I

Prerequisite: DT 100 or DT 110 and ATR 150. Emphasis on layout and processing, types and uses of aids applying to die construction, selection of steels, limitations on accuracy, and finishing parts used in die construction. Covers various types of die construction used in industry and presses related to die construction.

ATR 114 Die Construction II

Prerequisite: ATR 113 or Department approval. Continuation of ATR 113. Covers theory of heat treat, repair and maintenance, welding, types of steels, and types of aids used in die construction: also auxiliary equipment to dies such as lifters, loaders, kickers, stackers, hoppers, and drain feeds. Shows how dies should be built for long life and maintenance.

ATR 118 Principles of E.D.M.

Prerequisite: ATR 127. Theory, fundamentals, and practice of Electric Discharge Machining: programming the control console, machining of electrodes, practical applications, and estimating time of operation. Course will be offered during Spring Term only. Course fee

ATR 127 Machinery Handbook I

Prerequisite: ATR 151. The Machinist's Handbook has been recognized as the "Bible" for all phases of the metal working industry. This course will familiarize each student with the effective utilization of information contained in the Machinery Handbook.
ATR 137 Industrial Presses I 4(4-0)
Covers different types of mechanical presses, terminology, purposes, and functions in industry. Includes movies and slides of mechanical action, maintenance, safety, and automatic safety devices. Prerequisite: Department approval. This course gives an in-depth hands-on application of the proper procedures of installation, leveling, balancing, and alignment of industrial equipment. Special emphasis is given to problem solving and quality control. Course fee

ATR 138 Industrial Presses II 4(4-0)
Prerequisite: ATR 137. Continuation of ATR 137 with emphasis on maintenance. In-depth coverage of the various clutches, slides and bearings, supplemented by slides, movies, and field trips. Press tonnage capacities and various applications to dies utilized provide a broader knowledge for individuals from many different trades and occupations. Course fee

ATR 139 Rigging 3(2-2)
Prerequisite: ATR 150. Covers uses and strengths of ropes, chains, block and tackle, and the construction and erection of gin poles, with a study of rope knots used in rigging. Also, safe working strength of slings, hooks, sheaves, ropes and chains, and the use of personal safety equipment. Course fee

ATR 142 Applied Metallurgy 4(4-0)
Prerequisite: ATR 150. Explains physical and mechanical properties of metals, their identification, selection, and crystal structure. Phases in metal systems, phase diagrams, and metallurgy.

ATR 143 Industrial Heat Treat 3(2-2)
Prerequisite: ATR 142. Covers hardening, normalizing, annealing, case hardening, carburizing, cyaniding, nitriding, flame hardening, induction hardening, marquenching, austempering, martempering, and production of metals. Course fee

ATR 144 Hydraulics and Pneumatics 3(2-2)
Prerequisite: ATR 150. Introduces the theory of fluid power and basic circuits, using cylinders, valves, accumulators, filters, pumps, motors, etc., as they are used in current industrial applications. Hands-on experience will be given, using cutaways, standard components, and test stands. Course fee

ATR 145 Industrial Hydraulics 3(2-2)
Prerequisite: ATR 144. Continuation of ATR 144. Emphasis on applications of hydraulic and pneumatic circuits, ANSI symbols and troubleshooting. Course fee

ATR 160 Precision Inspection I 3(2-2)
Prerequisite: ATR 150. Techniques of tool and gage inspection including micrometers, verniers, gauges blocks, fixed dial and thread gauges, test indicators, and comparator measurement.硬 testing. Course fee

ATR 161 Precision Inspection II 3(2-2)
Prerequisite: ATR 160. Continuation of ATR 160. Precision in-depth layout work related to gauges and inspection problems. Course fee

ATR 170 Fork Lift Truck Driver Training 1(5-1)
Prerequisite: Department approval. A course intended to teach the safe operation of industrial lifting and touring trucks. All instruction leads toward a State of Michigan lift truck certificate. Course fee

ATR 218 Machine Maintenance I 4(2-4)
Prerequisite: ATR 150. Explains theory and industrial application of machine repair, safe practices, troubleshooting, dismantling, and the rebuilding of a tool room machine to be continued through three terms. Course fee

ATR 219 Machine Maintenance II 4(2-4)
Prerequisite: ATR 218 and ATR 151. Emphasizes problem solving, replacement of parts, scraping, machining and the use of parts and service manuals. Establishing preventative maintenance programs is also covered. Course fee

ATR 220 Machine Alignment and Balancing 4(2-4)
Prerequisite: ATR 219 or Department approval. This course gives an in-depth hands-on application of the proper procedures of installing, leveling, balancing, and alignment of industrial equipment. Special emphasis is given to problem solving and quality control. Course fee

ATR 224 Industrial Pump Repair 4(2-4)
Prerequisite: ATR 150. Fundamentals and operating principles of pumps and pump controls, applications of pump equipment in industry, along with installation, alignment, operation, and maintenance procedures. Course fee

ATR 230 Pneumatic Tool Repair 3(1-3)
Covers maintenance and repair of industrial and automotive pneumatic tools. Lubrication, gears, motors, hoists, spray gun seals, and bearings will be covered. Course fee

Cooperative Education (CED) Manufacturing Technology Computer Integrated Manufacturing Division of Technology and Applied Sciences

CED 211, 212, 231, 41, 251, 261 Cooperative Education 3(1-15)
Cooperative education enables the student to technical programs to gain work experience in a job related to the field of study. The Co-op student reports to the work site for a minimum of 15 hours per week (165 clock hours per term), and 1 hour in classroom activities (11 clock hours per term). Classroom instruction is a required part of the co-op experience and includes verbal and written activities relating to job related objectives. Evaluation of the co-op student is conducted cooperatively by both on-the-job and college personnel. Enrollment in this course requires approval of the Co-op Coordinator and/or the instructors in your major area.

Computerized Numerical Control (CNC) Manufacturing Technology Computer Integrated Manufacturing Division of Technology and Applied Sciences

CNC 101 Numerical Control I—Fundamentals of Numerical Control 4(3-1)
Prerequisite: ATR 153 and CIM 250. The basic, first course of Numerical Control programming. Topics covered are the Word Address programming format, proper logic, program entry and editing, Problems involve Point-to-Point and three-axis milling. Course fee

CNC 102 Numerical Control II—Manual Programming for Numerical Control 4(3-1)
Prerequisite: CNC 101 and ATR 153. Continuation of CNC 101 with emphasis on complex curve milling, i.e. spirals, helices, cam, and thread milling. Course fee

CNC 104 Lathe 4(3-1)
Prerequisite: CNC 102. This course is designed to teach students set-up and operations of CNC Lathe equipment with primary focus on the functions of CNC Controls. Methods of machine set-up, program storage and editing, and tool management will be taught using our Cincinnati CNC Turning Center. Course fee

CNC 120 APT Programming 4(3-1)
Prerequisite: CNC 102. APT is a powerful high level CNC language designed to simplify part programming. The definitions and rules of APT language are studied and applied to various part problems. Course fee

CNC 121 Advanced APT Programming 4(3-1)
Prerequisite: CNC 120. A continuation of CNC 120 APT Programming featuring the advanced capabilities of APT-AC. Course fee

CNC 200 CADAM NC 4(2-4)
Prerequisite: CG 201 and CNC 102. Introductory course in adding Numerical Control data to the CADAM model geometry. Cutter diameter, path, toolpath, spindle speeds, etc., will be developed for 3-axis milling machines and lathes. Procedures for producing the NC program will be discussed. Course fee

CNC 209 Project Lab: Computerized Numerical Control 3(0-6)
Prerequisite: Department approval. Further skills are pursued involving modern concepts of numerical control of machine tools including the interrelationship of these new manufacturing methods in the various departments of a company. Course fee

Heating and Air Conditioning (HAC) Manufacturing Technology Computer Integrated Manufacturing Division of Technology and Applied Sciences

HAC 100 Applied Electricity I 4(3-1)
Basic electricity, both theory and applied, Ohms Law, meters and their usage, symbols, series and parallel circuits, schematics, wiring diagrams, motors and motor starters are discussed and applied in the lab work. Course fee
HAC 101 Heating and Cooling Fundamentals 4(4-0)
An introduction to the mechanical refrigeration cycle as it applies to residential and light commercial refrigeration and air conditioning equipment. The refrigeration system operation as well as the function of its individual components, such as compressor, evaporator, condenser, and metering device are covered in detail. Also covered is a brief overview of residential central air conditioning, exercises in psychrometrics, and an introduction to system design and sizing. Course fee

HAC 105 Heating and Cooling Schematics 4(4-0)
Prerequisite: HAC 220, HAC 221, and HAC 231. Read and draw electrical diagrams and develop troubleshooting procedures from schematics. Also covers various controls used in the HVAC industry. Course fee

HAC 106 Systems Design and Code 4(4-0)
Prerequisite: HAC 232, HAC 240, BT 103. This combination lecture and lab class deals with heat loss and heat gain calculations needed for sizing of HVAC equipment, design considerations, equipment selection, and some emphasis on duct design. The basics of mechanical codes are also discussed. Course fee

HAC 110 Refrigeration Servicing I 4(2-4)
Prerequisite: HAC 231. Covers common types of domestic refrigerators, with particular attention to principles of construction and operation of complete refrigeration systems. Includes theory and principles underlying repairing and practical shop work, including jobs such as tube bending, flaring and soldering, and charging and testing refrigeration equipment. Course fee

HAC 122 Power Plant Fundamentals 5(3-3)
Prerequisites: HAC 100, 101, 105, 220, 221, and 222. This course will provide basic information about high pressure boiler/turbine theory and operation that applies in coal-fired power stations. When completed, the student will understand more thoroughly, the equipment necessary to operate and maintain a steam/electric power plant. Course fee

HAC 200 Applied Electricity II 4(3-1)
Prerequisite: HAC 100. The study of troubleshooting of motors and motor controls, control circuits, transformers, wire sizing, distribution systems, and circuit protection devices. Course fee

HAC 210 Refrigeration Servicing II 4(2-4)
Prerequisite: HAC 231 or Department approval. Beginning course in light commercial refrigeration servicing. A major emphasis on electrical controls and system operation. Students receive practical work in adjusting and servicing refrigerant valves and controls and in troubleshooting defrost systems and pressure controls. Course fee

HAC 211 Refrigeration III 4(2-4)
Prerequisite: HAC 210. Servicing of commercial units such as reach-ins, walk-ins, display cases and ice makers. Piping, EPR valves, head pressure control devices are examples of the topics covered in detail. In addition, emphasis in this course will be placed on maintenance and repair of semi-hermetic compressors. Course fee

HAC 220 Gas Heating I 6(4-4)
Prerequisite: HAC 100 and HAC 101. Basic construction and function of components in residential gas furnaces, with detail on theory, application, troubleshooting and servicing standard gas heating systems. Installation procedures and codes will also be covered. Course fee

HAC 221 Oil Heating 4(2-4)
Prerequisite: HAC 100 and HAC 101. Knowledge of electrical schematics recommended. Construction and operation of various types of oil-fired heating equipment. Emphasis on high-pressure oil burners; other topics will be discussed. Covers systematic burner service and proper combustion testing procedures; techniques of troubleshooting in residential oil heating equipment. Course fee

HAC 222 Hydraulics 3(2-2)
Prerequisite: HAC 220 and HAC 221. Covers gas and oil fired hot water and steam residential heating systems, piping and all accessories, safety controls, expansion tanks, zone valves, installation procedures and codes. Students perform testing and troubleshooting, adjusting, and servicing of components to insure maximum efficiency. Course fee

HAC 224 Pneumatic Control 4(2-4)
Prerequisite: HAC 105. Basic concepts of pneumatic controls for HVAC equipment in commercial structures; adjustment and calibration of pneumatic thermostats, checking spring ranges of valves and damper operators. Familiarization with equipment, fittings and devices in common use. Course fee

HAC 230 Gas Heating II 4(2-4)
Prerequisite: HAC 220. This course will cover electronic ignition systems, conditioning of air, filtering and humidification equipment. A major emphasis is placed on a variety of high efficiency condensing furnaces, component identification, installation, servicing, and troubleshooting. Course fee

HAC 231 Air Conditioning I 5(4-2)
Prerequisite: HAC 100 and HAC 101. Fundamentals and principles of residential air conditioning systems. Students will learn soldering and brazing of tubing, wiring, component testing, evacuation procedures, charging, and maintenance of both split systems, as well as small packaged units. Course fee

HAC 232 Air Conditioning II 4(2-4)
Prerequisite: HAC 231. Advanced air conditioning, light commercial equipment, water cooled units, cooling towers, and wiring both control and line voltage circuitry. The latest in test equipment and meters will aid the student in becoming proficient in servicing and maintenance of commercial equipment. Course fee

HAC 233 Air Conditioning III 4(2-4)
Prerequisite: HAC 232. This course deals entirely with heat pumps, (air to air, water to air), installation, servicing, and proper application of equipment compared to improperly designed systems. Heat pump components and extensive wiring schematics. Course fee

HAC 240 HAC Sheet Metal I 4(2-4)
Prerequisite: HAC 101. Designed to aid the installer in the skills and techniques for installation of residential heating and cooling systems. Covered will be sheet metal layout, identification of sheet metal fittings, various types of venting, firestop and insulated duct, and general furnace installation procedures. Course will be run Fall and Spring Terms only. Course fee

HAC 241 HAC Sheet Metal II 4(2-4)
Prerequisite: HAC 220 and HAC 240. This course will cover electronic ignition systems, conditioning of air, filtering and humidification equipment. A major emphasis is placed on a variety of high efficiency condensing furnaces, component identification, installation, servicing, and troubleshooting. Course will run Winter Term only. Course fee

HAC 244 Uniform Mechanical Code 4(4-0)
Prerequisite: HAC 220 and HAC 221 or Department approval. A fundamental course designed to acquaint the student with the methods and techniques used in field inspection of mechanical systems.

Industrial Safety Courses (SAF)
Manufacturing Technology
Computer Integrated Manufacturing
Division of Technology and Applied Sciences

SAF 205 Safe Practices and First Aid 3(3-0)
Covers first aid and treatment through lectures, demonstrations, and practice as outlined by the American Red Cross or equivalent; safe working practices with hand tools and around machines; safety devices of machines, and how to identify and use them.

SAF 291 OSHA/MIOWSA Safety Seminar (AVT) 1(1-0)
Slide-tape topics include: construction safety, powered industrial trucks, metal working machinery, fixed and portable ladders, abrasive wheels, fire exits, face and eye protection, and many more.

SAF 292 Safety Seminar 2(2-0)
Covers methods used in the development of an Occupational Safety Program. Student performs an independent project.

SAF 293 OSHA/MIOWSA Safety Seminar (AVT) 2(2-0)
Covers methods used in the development of an Occupational Safety Program. Complete twenty-two hour instruction in AVT. Prepare a paper outlining a safety hazard, a proposed solution, and/or a complete solution to the problem.
Welding (WLD)

Manufacturing Technology

Computer Integrated Manufacturing

Division of Technology and Applied Sciences

WLD 100 Combination Welding

Pre-requisite: ATM 150. Introduces basic principles, safe operation, and application of the oxyacetylene welding, cutting and arc welding processes. Each process consists of butt, lap, and corner joints in the flat and horizontal positions. Course fee

WLD 101 Arc Welding I

Pre-requisite: WLD 100. Develops skills and confidence producing quality type single pass fillet and groove welds in steel plate. Conventional and iron-powdered electrodes and recommended procedures are presented in preparation for performance tests in all positions. Course fee

WLD 102 Advanced Gas Welding and Brazing

Pre-requisite: WLD 100. A practical course designed to develop skills and confidence in joining low and medium carbon steels, cast iron and aluminum. Silver brazing alloys, tin/bronze, general purpose brazing alloys and the common filler metals are presented. Course fee

WLD 103 Gas Metal Arc Welding (MIG)

Pre-requisite: WLD 100. This course provides technical understanding of welding safety, MIG fundamentals, equipment, adjustments, metal transfer and shielding gases. Also develops manual skills in all position welding and fixture design. Some facets of destructive and non-destructive testing are also covered in this course. Course fee

WLD 105 Blueprint Reading for Welders

Pre-requisite: ATM 150. This course is designed for individuals who want to know and apply the fundamentals of welding symbols. The language of welding is the welding symbol and with advancements in metallurgy, welding processes, consumables and strict code enforcement through non-destructive testing. It is critical that welding symbols be correctly drawn and/or interpreted. Course fee

WLD 115 Structural Fabrication

Pre-requisite: WLD 201 and ATM 151. Introduction to the American Welding Society Structural Welding O1.1 and its application to steel fabrication. Satisfactory completion of this course can assist the student in passing a State of Michigan Structural Welding certification test. Course fee

WLD 201 Arc Welding II

Pre-requisite: WLD 101. Develops skills in vertical and overhead positions. Multiple pass fillet and groove welds are demonstrated in preparation for performance tests. Covers the use and interpretation of welding symbols related to arc welding applications. Course fee

WLD 202 TIG Welding

Pre-requisite: WLD 100. Study of the principles and fundamentals of Tungsten Inert Gas (TIG) or Helianc, Plasma Arc, and Submerged Arc welding in different positions or a variety of metals. Refreshes manipulative skills with the oxyacetylene process in preparation for TIG Welding. Upon completion of WLD 100, 101, 102, 201 and 202, the student can seek a proficiency certificate in welding. Course fee

WLD 205 Tool and Die Welding

Pre-requisite: WLD 101, WLD 202, and ATR 142. Practice methods involved in welding various alloyed metals, ferrous and non-ferrous metals, pre- and post-heating of metals, recognition of materials, and the proper usage of air, oil and water hardening steels. Course fee

WLD 210 Pipe Welding I

Pre-requisite: WLD 101 and WLD 201 or Department approval. Applies welding skills acquired in prerequisite courses to welding all kinds of pipe, using the shielded metal arc method. Course fee

WLD 211 Pipe Welding II

Pre-requisite: WLD 210. Advanced pipe training to extend on from WLD 210. We will focus on pipe with low hydrogen electrode in 5G and 6G positions, and socket welds. Course fee

WLD 212 Automated Welding with Robots

Pre-requisite: WLD 100 or Department approval. This course familiarizes people with the GMF welding robot. Time will be devoted to practical hands-on experience in programming, setup and adjustment of automated and semi-automated equipment, weldments, design and fixture building. Course will be offered Fall and Spring Terms only. Course fee

WLD 214 Aircraft Welding

Pre-requisite: Department approval. Presents welding applications and methods used in repairs and inspection of aircraft structures in accordance with approved aviation maintenance techniques. Course fee

WLD 220 Testing and Inspection

Pre-requisite: WLD 100. This course provides the fundamental principles of weld testing and inspection. Proper procedures of destructive and non-destructive testing of welds along with a knowledge of codes, standards and procedures will be stressed. Course fee

WLD 293 Project Lab: Welding

Pre-requisite: Department approval. Further welding skills in maintenance welding, production welding, resistance welding, and/or tool and die welding, etc., depending on the direction the student would like to take his/her welding skills. Course fee
Lansing Community College

Dean James Platte

DIVISION OF
TELECOMMUNICATION & THE ARTS

Department of Library Information Services
Department of Media
Department of Performing Arts
DIVISION OF TELECOMMUNICATION AND THE ARTS

Dear James P. Plate

324 Office Unit F

The Division of TeleCommunication and the Arts has two roles in supporting the mission of the College:

1. Serving the cultural, learning and information needs of students, staff and the community with library resources, current information, and media technology.

2. Instructing students in the technical skills of human expression in imagery, performance and media.

Division’s Objectives

The objectives of the Division are:

1. To acquire, produce, organize, promote and distribute materials and equipment that facilitate communication, learning and instruction.

2. To manage the circulation of print and non-print resources from libraries in each of the three unit colleges.

3. To produce faculty designed instructional media.

4. To support faculty and staff experimentation with alternative learning environments in classrooms and laboratories, or in the community through telecommunications.

5. To provide instruction and assistance to students, faculty and staff in the development of competencies in locating and using information and resources.

6. To assist students, faculty, and administrators in College communications systems, supporting community and College relations, performing arts, student activities, etc.

7. To initiate and maintain networks of resources by working with community, state and professional agencies concerned with communication and information access.

8. To schedule and produce a year-round calendar of visual and performing arts that serves the cultural interests of the community and showcases the College and the competencies of its students.

Organization of Resources

To carry out these objectives, the Division has a staff of faculty, technicians, designers, engineers, and administrators with extensive academic and technical expertise. They combine their expertise in varying instructional and work teams that provide both state-of-the-art services and academic teaching. For example, in the media and information access areas, faculty and technicians may interrelate as video producers, camera persons, teachers, information specialists, computer operators, systems designers and artists. In the performing arts area, faculty and staff serve both as teachers and as directors, producers, and performing artists in musicals, ensembles, original choreography, technical theatre design and productions.

Since the Division provides diverse College-wide services and instructional programs, the facilities of the Division are to be found in almost every building on campus. Directories should be consulted for specific program or service location.

Major Programs and Services

The major services and curricula are:

Library and Information Services
Media, Audio, and TV Production Services
Commercial Art
Computer Graphics Art
Interior Design
Fine Arts
Radio and Television
Filmaking
Photo Technology
Dance
Music
Theatre

DEPARTMENT OF LIBRARY INFORMATION SERVICES

Chairperson: Ellen Person

233 Old Central Building

Library information services are offered from two campus libraries. The Arts & Sciences Library (ASL) is located on the second floor in the A&S Building.

Old Central Library (OCL) is located in Room 332 in the northwest corner of the Old Central Building on the second floor. The hours of the two library service centers generally coincide and these hours are posted at the doors. Telephone for library service information at 483-1988. All Library users must present an LCC ID card validated at registration to obtain a library computer system barcode identifier.

Resources Available

The collection of over 115,000 book and A-V titles and 1,500 periodical titles has been selected by librarians and faculty to present varied points of view and current information on subjects which support instruction. In general, each library contains those resources related to the programs offered in the building. The computer on-line catalog with terminals in the libraries lists materials found in both OCL libraries. Twenty-five on-line catalog terminals, which may be searched by author, title, subject and other search approaches, each library's terminal displays information on the holdings of both libraries, arranged in Library of Congress classification order. To determine where to find a particular item, users should check at a catalog terminal for location codes which designate a given library—OCL for the Old Central Library, ASL for the Arts & Sciences Library. Lansing Public Library's holdings are included in the catalog database. Approximately 200,000,000 holdings of needly Decimal classification are listed, bringing the database total to over 300,000 records.

Other resources of the libraries include instructional lab circulation support, back-files of magazines, newspapers, bound, and unbound on microfilm, a file of telephone directories (OCL), corporate annual reports (OCL), the Career Information Center collection including MORT, the CD-ROM College USA system, and microfiche college catalogs (OCL); coin operated copy machines, recordings, audiotapes, filmstrips and slides, an OCL computer catalog terminal to locate material which can be borrowed from over 3,000 libraries; Easy Reading Borrowing (ERB) books to support developmental reading courses (ASL).

Facilities for student use in the libraries include study carrels and television-viewing stations, although limited at this time. Students may view 16mm films and videotapes from the OCL teaching collection in the A&S Library as well as use tape and record players or sound filmstrip and slide players in the listening-viewing area. Cassette players and calculators are loaned for use in the libraries.

Services Offered

The staff of the libraries provide users their most important link to the information in LCC's library resources collection and other libraries of the community and beyond. LCC actively participates in the OCLC and other interlibrary loan programs, including a Michigan Telecommunication Network. Students should request interlibrary service information from the reference staff for magazine article photocopies and books which LCC's libraries do not own.

Reference desks are conveniently located in both centers, and the reference staff answers requests for assistance and information.

Faculty are encouraged to discuss with librarians the acquisition of new materials for their programs. Materials are also placed on reserve for short term use. Librarians will also run computer-printed subject bibliographies and prepare "Focus On..." study guides relative to individual class needs. More than seventy "Focus On..." guides to subject resources and services are available.

Other services to faculty include provision of AV equipment for classroom use which may be checked out from each of the libraries. LCC-owned films and videotapes may be checked out for classroom use through the libraries. Printed catalogs of both libraries are available at the libraries. Films and videotapes for faculty use can be rented from other organizations through the libraries.

For details, contact library check-out desks.

Large remote computer-based banks of electronically coded information, called databases, supplement the Library's on-site collections. Using DIALOG and other database sources, the reference staff conduct online searches to pinpoint sources of information and print out complete articles or abstracts from reports and periodicals. Online search service requests should be made at the reference desk.

Services for handicapped persons include special equipment and materials such as 4-track tape recorders, talking calculators, variable speech controllers, TV print-magnifiers, Perkins Brailler, large print typewriters, Braille maps of the OCL campus, Braille and large-print dictionaries. The librarians will provide information about the location and use of these items.

Audio tapes, videotapes and other materials are available to assist students in independently developing library and information use skills and to assist faculty with library use instruction.

Students, faculty and staff using the libraries should acquire copies of various free Library Information Services handouts to use to become familiar with the detailed aspects of services and procedures. Handbook folders are available at the libraries.
MEDI A DEPARTMENT
Chairperson: Dale Dunham
108-B Academic and Office Facility

Services Offered
The Media Department offers many services to help faculty with classroom
media and to help College departments prepare and present media materials.
Audio Services staff provide recording facilities and assistance to
faculty and staff in preparing instructional tapes. Public address systems and
location recording services are also available. From master tapes, staff make
cassette or 8-Track duplicates for classroom use.

Television Services include production assistance for instructors who wish to
prepare their own instructional television programs. Television Services staff
provide closed circuit television channels for classroom programming. Instructors
may schedule videotapes from the College collection, view programs during
commercial broadcasts or play back their own tapes. Telecourse offerings over
public broadcasting and cable are coordinated and supported by the Television
Services staff.

Photo and Graphic Services include all forms of still photography, color and
black-and-white prints, enlargements, slides, copywork, and location photo-
graphy as well as printing and graphic services for instruction and other College
operations.

FACILITIES AVAILABLE

Television Studio
A complete color television studio supported by full 3/4 inch editing facilities
provides the opportunity for instructional based and public affairs programming
to be aired on Lansing Cable Channel 33 or the LCC closed circuit distribution
network. Students may gain practical experience by enrolling in television
production classes and by participating in all aspects of program production.

Computer Graphics Center
The Commercial Art & Design Program offers hands-on training using
professional, stand-alone systems designed for a wide range of graphic arts
applications, from desktop publishing to video production. Programming skills
are not necessary. With each high-quality color system, the student has access to
16.7 million colors, 256 at a time, as well as a selection of pens, brushes/browser,
type fonts, shapes and grids. Each system can perform complex manipulations such as multiple imaging, scaling, rotation, baying,
perspective and animation. Images can also be captured with a video camera
for computer manipulation. Students can make copies of their work
using a laser printer, a color printer, a film recorder, and/or videotape.
Each student has the exclusive use of a workstation during scheduled class
or lab time.

Photography Center
The Photography Center offers the students a variety of facilities and
equipment. Black and white printing laboratories with a total of thirty-eight
enlargers are available during open laboratory hours as well as scheduled class
times. Black and white roll and sheet film processing rooms are open during
operating hours. Six separate color printing rooms and automatic print processor
offer the color printing student an opportunity for serious, controlled work.
Processing of color reversal and negative films is available at low cost. Two
studios and a variety of electronic flash and continuous lighting equipment
give students practice in portrait and product photography. Densitometers,
matt cutters, dry mount presses, retouching machines and equipment, normally
owned only by professional studios and laboratories are available for instruction
and practice. A variety of cameras, lights, meters, and lighting equipment may
be checked out for student projects.

Motion Pictures
Film classes at LCC are conducted in small groups, and students have access
to the best modern production facilities and equipment. Nearly all production
is done in 16mm film. Studio and location film equipment, editing labs, sound
mixing facilities, animation and processing equipment are available to students.

Radio Station
Media, radio and television students participate in the broadcasting oper-
ations of the campus radio stations, serving as disc jockeys, newscasters,
producers, and technicians. The studios are fully equipped: professional radio
facilities that provide excellent operational experience at every level of program
production.

Large Group Media Facilities
Media Department renders both technical and operational support to the following
multi-media facilities across the campus: Dart Auditorium, Dart Media
Seminar Room, Old Central Lecture Hall, Arts and Sciences Amphitheatre
and Planetarium. In addition to supporting science, humanities, and other curricula,
the Planetarium Multi-media Center provides special request programming
for the community.

PROGRAMS OF STUDY
Commercial Art & Design
Art is a dynamic field expanding and changing with the world it serves. The
Commercial Art & Design Program at Lansing Community College keeps
abreast of these changes and offers courses and Associate Degrees designed
to meet the needs of persons who wish to pursue careers in Commercial Art,
Fine Art, Interior Design, and Computer Graphics. Each art curriculum may be
completed at the student's own pace on a full or part-time basis.

Media Technology
A broad-based media curriculum leading to an Associate of Applied Science
Degree provides the ART student with the practical skills necessary to pursue
a professional media career. As business and industry continue to expand
their use of media, more and more jobs will be available for students with
such "hands-on" production experience. Offering over forty courses, the
program provides specialty tracks in video production, radio broadcasting,
and audio production and recording. Media professionals instruct students in both
the theory and practice of media operations. Internships are encouraged and
opportunity is given for gaining production experience on the College's full-
time cable channel.

Photographic Technology
Photography is one of the most useful of today's activities, not only as an
industry but as an indispensable art of other fields: advertising, training,
and medicine. In innumerable areas, the visual recording is essential to
progress. The program offers five different photographic career options. They
are Commercial Photography, General/Fine Arts Photography, Photographic
journalism, Motion Picture Production, Photo Marketing, and Multi-image.

The Photography Program operates conventional class offerings and a Media
Institute, where the student progresses through a year-long integrated study of
photography.

COURSE DESCRIPTIONS
Art (ART)
Media Department
Division of TeleCommunication & the Arts

ART 101 Design I
(4-2-4)
Universal principles of design, design theory and vocabulary with emphasis
on composition and its application to black and white media.

ART 102 Design II
(4-2-4)
Prerequisite: ART 101. Continuation of two-dimensional design principles with
emphasis on color theory, color interaction, properties, principles, and qualities
of color.

ART 103 Design III
(4-2-4)
Prerequisite: ART 102. Line, shape, form, value, and texture in a variety of
three-dimensional materials, applying principles and elements of design.

ART 110 Introduction to Computer Graphics Art
(3-3-0)
A comprehensive overview of the computer graphics field through the use
of videotapes, lectures, demonstrations and local field trips.

ART 111 Computer Graphics Art I
(4-2-4)
Prerequisite: Department approval. A beginning course for students interested
in creating artistic images in the environment of the computer. Emphasis is on
hands-on training utilizing sophisticated, user-friendly artistic software. Programming
skills are not necessary, but students must show evidence of design and drawing
skills to receive Department approval.

ART 112 Computer Graphics Art II
(4-2-4)
Prerequisite: Department approval. A continuation of Computer Graphics Art
I (ART 111) with emphasis on color and digitizing images with the aid of a
computer to create more sophisticated work.

ART 113 Computer Graphics Art III
(4-2-4)
Prerequisite: Department approval. A continuation of Computer Graphics Art
II (ART 112) with emphasis on computer animation.

ART 114 Computer Graphics Art IV
(4-2-4)
Prerequisite: Department approval. A continuation of Computer Graphics Art
III with an emphasis on presentation graphics for business applications.
ART 115  Computer Graphics/Special Projects  4(0-8)
Prerequisite: Department approval. Individual pursuit of special projects not included in regular course offerings. May be taken four terms for credit.

ART 116  Computer Graphics 3D Animation  4(2-4)
Prerequisite: Department approval. An introduction to 3D solid modeling and animation of a PC-based graphics system.

ART 120  Computer Graphics Desktop Publishing  4(2-4)
Prerequisite: ART 101. A hands-on course designed to provide the student with a working knowledge of Artcs/PageMaker and related software programs utilizing a Macintosh computer. Emphasis is on desktop publishing applications. Fine Art applications will be discussed as well.

ART 130  Beginning Drawing  2(1-2)
An introductory course using a variety of materials including pencil, charcoal and ink.

ART 131  Drawing  4(2-4)
Prerequisite: ART 101 recommended concurrently. A studio course using a variety of tools and methods. Introduces realism, abstraction, and stream of consciousness, using materials such as pencil, ink, and conte crayon.

ART 132  Life Drawing  4(2-4)
Prerequisite: ART 101. Basic concepts, approaches, and techniques involving drawing the human figure, using materials such as pencil, ink, charcoal, and conte crayon. May be taken four terms for credit.

ART 134  Advanced Drawing  4(2-4)
Prerequisite: Department approval. More complex problems in still life, portraits, and landscape using a variety of tools and materials in black and white and color. May be taken four terms for credit.

ART 135  Introduction to Printmaking  4(2-4)
Examines the various printmaking techniques, tools, and vocabulary of the printmaker. Fine art and career opportunities for printmaking are discussed.

ART 139  Printmaking II  4(2-4)
Prerequisite: ART 135. A continuation of basic printmaking knowledge into more advanced technical and aesthetic concerns. May be taken four terms for credit.

ART 140  Screen Printing I  4(2-4)
Prerequisite: ART 135. Silkscreen printing and basic photographic silkscreen processes includes constructing a frame and making a photo-transparency.

ART 141  Screen Printing II  4(2-4)
Prerequisite: ART 140. Practice techniques and experimentation with more complex problems.

ART 143  Studio Practices I  4(2-4)
Keyline and paste-up techniques for graphic arts reproduction with emphasis on printing terminology and processes. Color separation and pagination are introduced.

ART 144  Studio Practices II  4(2-4)
Prerequisite: ART 143. Continuation of keyline techniques with emphasis on speed and professional accuracy. Copy preparation, paper selection, and professional finishing techniques are introduced.

ART 145  Lettering I  4(2-4)
Introduction to typography. Includes history of type and typesetting, type styles, identification, classification, design principles for specific purposes, and type indication for layout.

ART 146  Lettering II  4(2-4)
Prerequisite: ART 145. Use of type in layout and graphic design with emphasis on type selection, and copyfitting.

ART 147  Perspective Product Rendering I  4(2-4)
Basic principles of perspective drawing utilized in product and architectural illustration; rendering in one, two, and three-point perspective utilizing photographs or actual products.

ART 148  Perspective Product Rendering II  4(2-4)
Prerequisite: ART 147. Emphasis on color rendering and practicing techniques of illustrating architectural and product subjects most often used in the graphics or visual communications industries.

ART 150  Design/Layout I  4(2-4)
Prerequisite: ART 145 and ART 101. Layout activities used in visual communications such as newspapers, brochures, and other printed matter. Includes research, conceptualization and execution of layouts from "thumbnails" to "comprehensives"; design principles, their effect on composition and organization, and the role of layout in the commercial art industry.

ART 151  Drawing Techniques  4(2-4)
Prerequisite: ART 132 & 134. Illustrative techniques utilized to take a preliminary pencil drawing and convert it to a "finished" ink drawing, emphasis on sound craftsmanship and variety of contemporary, realistic, illustrative black and white techniques in both solid black line and wash. Suitable for both commercial art and fine art students.

ART 155  Art Form Development I  4(4-0)
Survey of the fine and decorative arts including painting, sculpture and architecture of ancient and primitive cultures: Egypt, Mesopotamia, Greece, and Rome. Covers the original and contemporary affect of the art, the uniqueness of the styles and the social, psychological, and historical correlations with the styles.

ART 156  Art Form Development II  4(4-0)
Emphasis on the humanistic art of the Islamic, Romanesque, Gothic, Renaissance and Mannerist periods. Correlations and comparisons between specific pieces of art and historical events; artists and artistic techniques are identified and compared.

ART 157  Art Form Development III  4(4-0)
Surveys painting, sculpture, and architecture: sixteenth century Baroque through nineteenth century Contemporary Art. Correlations and comparisons between specific pieces of art and historical events; artists and artistic techniques are identified and compared.

ART 160  Interior Design I  4(2-4)
Introduction to the profession of interior design, design theory, color theory, principles and elements of design used to communicate solutions to environmental interior problems; design vocabulary, differences in hue, value, and saturation levels of color as they affect human and interior environments; principles and elements of design in a composition such as space planning of various rooms and wall elevations. ART 163 Interior Design Drawing is recommended concurrently.

ART 161  Interior Design II  4(2-4)
Prerequisite: ART 160 and 101. Styles and materials used in designing interiors with emphasis on floor coverings, accessories, window treatments, and the effects of textiles. Includes the design and drafting techniques of various window treatments. ART 164 Interior Design Drawing II is recommended concurrently.

ART 162  Interior Design III  4(2-4)
Prerequisite: ART 161 and ART 163. Examines the relationship of human needs to interior environmental design with emphasis on using lighting to create various atmospheric effects; and to fulfill certain functions. ART 165 Interior Design Drawing III is recommended concurrently. Offered Spring Term only.

ART 163  Interior Design Drawing I  4(2-4)
Practice in fundamental drafting techniques used by the interior designer. Includes drafting terminology; drafting techniques in pencil and ink; kitchen and bathroom planning; principles of architectural lettering; electrical and lighting overlay techniques; interior elevations; and isometrics.

ART 164  Interior Design Drawing II  4(2-4)
Prerequisite: ART 163 and ART 101. Introduction to various media used by the interior designer, emphasis on techniques and practice in a variety of media; rendering perspectives of interior space in one and two-point perspective, eyeball sketching, logos; different methods for reproduction of drawings.

ART 165  Interior Design Drawing III  4(2-4)
Prerequisite: ART 164 and ART 102. Focus on problem solving and practice in all media and preparation of a professional portfolio of renderings.

ART 166  Home Decorating  2(2-1)
Survey of general information on decorating residential buildings. Introduces and utilizes principles of interior design.

ART 167  Antiques and Collectibles  2(2-0)
Learn to recognize, date, and evaluate antiques and collectibles from the bases of materials, methods of construction, styles and periods.
ART 190  Matting and Framing Techniques 2(1-2)
Various materials and techniques for displaying and exhibiting art work, applying demonstrated techniques to matting and framing.

ART 200  Painting I 4(2-4)
Prerequisite: ART 102 and 131. Introduction to objective oil painting concepts in the realistic tradition; basic materials and tools; handling qualities.

ART 201  Painting II 4(2-4)
Prerequisite: ART 200. A continuation of Painting I (ART 200), emphasizing more advanced techniques and increasingly complex problems in oil painting. May be taken three times for credit.

ART 202  Portrait Painting 4(2-4)
Prerequisite: ART 132 and 102. An introductory course in human portraiture with primary concentration on oil painting.

ART 203  Figure Painting 4(2-4)
Prerequisite: ART 102 and 132. An introductory course in the human figure using various media with primary concentration on oil painting. May be taken three times for credit.

ART 204  Watercolor I 4(2-4)
Prerequisite: ART 102 and ART 131. Introduction to the art of transparent watercolor. Examines paper characteristics, degrees of wetness, brushes and tools, and various techniques in producing watercolor artworks.

ART 205  Watercolor II 4(2-4)
Prerequisite: ART 204.

ART 206  Watercolor III 4(2-4)
Prerequisite: ART 205.

ART 207  Advanced Watercolor 4(2-4)
Prerequisite: ART 206. A continuation of Watercolor I (ART 204). Each emphasizes more advanced techniques and increasingly complex problems in watercolor painting. ART 207 may be taken three times for credit.

ART 208  Experimental Painting 4(0-8)
Prerequisite: Department approval. Developing and analyzing a personal approach toward painting; producing a series of canvases of increasing complexity for preparation of a portfolio of exhibit-quality works. May be taken three terms for credit.

ART 210  Design/Layout II 4(2-4)
Prerequisite: ART 150. An overall view of the Media; its uses in planning campaigns; procedures for campaign building; and graphic design campaign techniques.

ART 211  Design/Layout III 4(2-4)
Prerequisite: ART 210. Three-dimensional commercial design, packaging and display, with emphasis on surface graphics using a variety of materials, tools, methods, and techniques.

ART 212  Design/Layout IV 4(2-4)
Prerequisite: ART 211 and ART 148. Preparation of a commercial art portfolio for presentation and job procurement, including magazine, newspaper, brochure, and corporate identification layouts.

ART 213  Illustration I 4(2-4)
Prerequisite: ART 151. Practice and development of skills using India ink with pen and brush, and tempera techniques; basic illustrative techniques; preparation of portfolio pieces.

ART 214  Illustration II 4(2-4)
Prerequisite: ART 213 and ART 102. Full color exercises in tempera, introduction to acrylic techniques; stylized drawing expressions and design-oriented compositions.

ART 215  Illustration III 4(2-4)
Prerequisite: ART 214. Portfolio preparation to include full color illustration in either tempera, acrylic, dye, or mixed media; black and white ink renderings in pen and brush; wash drawings; and scratch board drawings.

ART 216  Cartoon Drawing I 4(2-4)
Prerequisite: ART 132. Focus on strong, stylized drawing, dramatic exaggerated action, simple but imaginative characterizations, and uncluttered ink rendering techniques. Exercises in pencil, fiberglass pen, and brush and pen ink.

ART 217  Cartoon Drawing II 4(2-4)
Prerequisite: ART 216. Cartoon illustrations from simple spots to complex compositions and comic strip panels, slide film cartoon art in full color, album covers and greeting cards.

ART 218  Fashion Illustration I 4(2-4)
Prerequisite: ART 132. Fashion illustration utilizing black and white line and wash technique, emphasizing use of pen and ink.

ART 219  Fashion Illustration II 4(2-4)
Prerequisite: ART 218. Fashion illustration using brush, markers, soft pencil, chalk, white ink, and paint.

ART 220  Fashion Illustration III 4(2-4)
Prerequisite: ART 219. Introduction of watercolors, pastels and crayons; preparation of a portfolio of sample pieces for presentation and job procurement.

ART 221  Airbrush Techniques I 4(2-4)
Introduction to the operation and techniques of the airbrush in shading and creating textures in both black and white and color.

ART 222  Airbrush Techniques II 4(2-4)
Prerequisite: ART 221. Focuses on more complex airbrushing problems; work on areas of specialization.

ART 223  Introduction to Scientific Illustration 4(2-4)
Prerequisite: ART 134. Introduction to medical and scientific illustration. Includes realistic drawing from anatomical models and specimens and the visual presentation of abstract scientific information.

ART 224  Introduction to Animal Illustration 4(2-4)
Prerequisite: ART 134. Introduction to animal illustration includes realistic drawing from mounted specimens and live animals.

ART 225  Animal Illustration II 4(2-4)
Prerequisite: ART 224. A continuation of Introduction to Animal Illustration (ART 228). Students will practice techniques and experiment with more complex problems as skills progress.

ART 230  Interior Design IV 4(2-4)
Prerequisite: Department approval. Emphasizes the architectural aspects of interior design, focusing on building materials, energy efficiency, building codes, efficient utilization of space, and alternative housing design. Offered Fall Term only.

ART 231  Interior Design V 4(2-4)
Prerequisite: Department approval. Emphasizes contract design. Includes designing commercial interiors; integrating client's needs and the sociopsychological aspects of the environment; estimating and specifying a contract interior. Offered Winter Term only.

ART 232  Interior Design VI 4(2-4)
Prerequisite: Department approval. Examines the fundamentals of the interior design business process; design responsibilities in the profession; incorporation of design ethics in the professional practice. Emphasis on problem-solving situations simulating designer/client roles. Offered Spring Term only.

ART 233  Interior Design/Textiles 4(2-4)
Prerequisite: ART 161 and 102. Examines the fundamentals of textiles, their characteristics and identification, fabric weaves and uses, basic fiber uses, currently used complex weaves, natural fibers, and man-made fibers. Offered Spring Term only.

ART 234  History of Decorative Arts I 4(4-0)
Prerequisite: ART 161. A survey of the history of decorative arts periods including furniture, architecture, textiles and accessories, covering periods from Ancient through Renaissance and relating to modern day environments. Offered Fall Term only.

ART 235  Interior Design Workshop Practices I 4(2-4)
Prerequisite: Department approval. Examines studio workshop methods and techniques of floor, wall and window coverings, and the diagram methods used to enable the designer to communicate the design concept to the workshop person. Offered Fall Term only.
ART 236 Interior Design Workroom Practices II 4(2-4)
Prerequisite: Department approval. Emphasizes cost estimating for a total job, installation techniques for window treatments and wall coverings, and workroom procedures. Offered Winter Term only.

ART 237 Interior Design Sources 4(2-4)
Prerequisite: Department approval. Examines specific resources used in the current design industry and the setting up of a source file for client presentation. Offered Spring Term only.

ART 239 History of Decorative Arts II 4(4-0)
Prerequisite: ART 234. Emphasis on the Baroque to Modern periods, and an examination of preservation principles. Offered Winter Term only.

ART 240 Interior Design Business Practices 4(2-4)
Prerequisite: Department approval. Examines how to facilitate introduction, how to proceed on jobs, recommendation for jobs, when to close them, actual set-ups, estimates, purchase orders, and invoicing. Offered Winter Term only.

ART 256 Advanced Screen Printing 4(2-4)
Prerequisite: ART 141. Review and practice; producing portfolio pieces. May be taken three terms for credit.

ART 260 Basic Art For Elementary Teachers 4(2-4)
Especially for elementary school teachers responsible for the student art experience. Emphasis on developing a greater art appreciation, awareness of art forms, and competency, working with a variety of art media. Covers the creative and mental growth of children and their needs in an art situation.

ART 272 Printmaking Independent Study 4(0-8)
Prerequisite: Department approval. An individual pursuit of special projects not incorporated in regular course offerings.

ART 274 Commercial Art Independent Study 4(0-8)
Prerequisite: Department approval. An individual pursuit of special projects not incorporated in regular course offerings.

ART 276 Art Independent Study 4(0-8)
Prerequisite: Department approval. Individual pursuit of special projects not incorporated in regular course offerings.

ART 278 Commercial Art Internship 8(0-16)
Prerequisite: Department approval. An off-campus field study. Students will gain pre-career experience by working in a studio environment under the supervision of a professional artist/designer. Regularly scheduled progress reports will be given and discussed with supervising faculty member.

ART 279 Interior Design Internship 8(0-16)
Prerequisite: Department approval. An off-campus field study. Students will gain pre-career experience by working in a studio environment under the supervision of a professional artist/designer. Regularly scheduled progress reports will be given and discussed with supervising faculty member.

ART 281 Art Internship 8(0-16)
Prerequisite: Department approval. An off-campus field study. Students will gain pre-career experience by working in a studio environment under the supervision of a professional artist/designer. Regularly scheduled progress reports will be given and discussed with supervising faculty member.

Art Workshop (ARW)
Division of TeleCommunication and the Arts

ARW 131 Computer Graphics Workshop 2(1-1)
A condensed hands-on introduction to computer graphics utilizing sophisticated, user-friendly artistic software. Programming skills are not necessary.

ARW 141 Watercolor Workshop 2(1-2)
A condensed learning experience introducing to the student the art of transparent watercolor. Emphasis on the use of different papers, degrees of wetness, tools and techniques. Students will progress to more complex problems as ability develops.

ARW 142 Oil Painting Workshop 2(1-2)
A condensed learning experience introducing the student to the art of traditional oil painting. Emphasis on color and composition, tools and techniques. Students will progress to more complex problems as ability develops.

Division of TeleCommunication and the Arts

ARW 143 Landscape Painting and Drawing 2(1-2)
Emphasis on the use of color and composition. Students will work independently and progress to more complex problems as ability develops.

ARW 181 Painting/Drawing Life Workshop 2(0-4)
Prerequisite: ART 132 and ART 200. An intense workshop combining painting and life drawing. Students will work independently and progress to more complex problems as ability develops.

ARW 200 Hand Made Paper 2(1-2)
A condensed learning experience introducing the student to the art of hand made paper. Emphasis on pulp making and casting techniques. Students will progress to more complex problems as ability develops.

ARW 221 Calligraphy 2(1-2)
A workshop designed to introduce the student to the art of fine writing using Italic pens. Emphasis on hand lettering, surveying different styles and scripts used in early manuscripts; and adaptation to modern use.

ARW 222 Advanced Calligraphy 2(1-2)
Prerequisite: ARW 221. A continuation of Calligraphy (ARW 221), emphasizing a variety of tools, materials and techniques. Students will progress to more complex problems and experiment with aesthetic expression as skills progress.

Media Technology (MRT)
Division of TeleCommunication and the Arts

MRT 110 Consumer Audio 2(2-0)
Provides an overview of the audio industry; introduces common audio terms used with home stereo systems; examines equipment specifications, function, and home stereo setup.

MRT 112 Media Materials Production I 4(4-0)
Introduction to graphic processes: graphic photography, screen printing, letterpress, typography, mounting, laminating, and their application to media materials.

MRT 116 Fundamentals of Media Production 4(4-0)
Shows integrated usage of film, photography, television, graphics, and other audio-visual arts; selection of the best media for a given communication problem or design.

MRT 118 Media Production Symposium 4(4-0)
Prerequisite: MRT 116. Continuation of MRT 116 with emphasis on specific student projects.

MRT 120 Audio Production I 4(4-0)
Covers the basics of audio recording techniques: audio mixing, tape editing, and microphone practices applicable to media production and live performance.

MRT 125 Audio Production II 4(4-0)
Prerequisite: MRT 120. Introduces professional audio equipment and techniques used to produce radio commercials and sound tracks for other media; explores methods of recording narration and sound effects; also, techniques for selecting music beds, timing mixes, and production mixing.

MRT 130 Introduction to Broadcasting 4(4-0)
Analyzes the nature, origin, function, and development of television and radio.

MRT 132 Fundamentals of Radio 4(4-0)
Survey of the radio broadcast industry: careers, qualifications, responsibilities, station operations. Introduces basic studio production and on-air presentations.

MRT 134 Radio Production 4(4-0)
Prerequisite: MRT 132. Continuation of MRT 132. Studio equipment and techniques used in radio production for recorded and live presentation. Students produce radio programs, commercials and public service announcements.

MRT 136 Radio Performance 4(4-0)
Prerequisite: MRT 134. Continuation of MRT 134. Studio production principles for radio broadcast on air: Commercial, news, on-air skills practiced in class and during lab exercises. Simulation and critique of actual on-air performance.
MRT 145 Reporting for TV 4(4-0)
Survey of the broadcast news industry, including practical exercises in newswriting and presentation.

MRT 150 Fundamentals of Television 4(4-0)
Analyzes components of effective visual communication. Stress pre-production work such as scriptwriting, storyboarding, light plot, and floor plan design, as well as graphic card preparation. Provides some "hands-on" studio experience.

MRT 152 Television Production I 4(4-0)
Prerequisite: MRT 150 or Department approval. Offers extended access to TV production equipment and facilities. Practice exercises involve students in all crew responsibilities. Emphasis on practical application of theoretical framework provided in MRT 150. Graded exercises.

MRT 155 Television Production II 4(4-0)
Prerequisite: MRT 152. A more rigorous application of skills learned in MRT 152. Student will also participate in individual projects.

MRT 160 Broadcast Copywriting 4(4-0)
Planning, preparing, and writing basic script materials for radio and television production. Emphasis on practical copy needs of broadcasting stations, such as commercial messages, station continuity, promotion, and public service announcements.

MRT 165 Broadcast Script Writing 4(4-0)
Basic writing techniques and formats utilized in preparing program scripts. An introduction to news, public affairs, documentary and entertainment writing for radio and TV.

MRT 170 Audio Systems Maintenance 4(4-0)
Prerequisite: MRT 220. Hands-on experience in troubleshooting and routine maintenance of audio recording, production, and audio systems equipment. Practice in techniques for interconnecting audio devices, basic tape recorder alignment.

MRT 180 Telecommunications Technology and Society 4(4-0)
Study of the interrelationship between media and society.

MRT 200 Electronic Graphics for Media 4(4-0)
Production of graphic materials for TV and motion pictures; the use of graphics in titling, electronic keying, and achieving artistic effect. Includes aspect ratios, color relationships, and electronic video format.

MRT 210 Broadcast Sales and Marketing 4(4-0)
Covers methods and specialized skills employed in selling radio and television advertising and air time.

MRT 215 Radio Program Director 4(4-0)
Prerequisite: MRT 132. Covers radio station operation from management's perspective; FCC rules and other legal considerations as they pertain to programming and daily station operations; ratings, advertising and sales, promotion, and station relationships between departments and with community.

MRT 218 Sound Reinforcement 4(4-0)
Prerequisite: MRT 120 or Department approval. Teaches principles and practical techniques that apply to sound reinforcement for voice, music, performance, theatre, film, and television. Includes equipment selection, setup, troubleshooting, and operations.

MRT 219 Sound Reinforcement Practicum 4(4-0)
Prerequisite: MRT 218 or Department approval. A continuation of MRT 218 giving practical experience in planning, setup, and operation of various sound reinforcement systems used in musical performance theatre.

MRT 220 Audio Recording I 4(4-0)
Prerequisite: MRT 120. Introduces professional audio recording equipment and applies techniques learned in MRT 120 to location and studio recording. Placement of microphones and mixing to two track format is emphasized.

MRT 225 Audio Recording II 4(4-0)
Prerequisite: MRT 220. Deals with special techniques used in multi-track recording studios, using four and eight-track recorders and signal processing devices for recording and mixdown.

MRT 230 Audio Production III 4(4-0)
Prerequisite: MRT 125. Advanced techniques in creative audio production; applies the multi-track recorder to complex commercial and media production projects.

MRT 234 Radio Workshop 5(5-0)
Prerequisite: MRT 132 or Department approval. Advanced operations in production and management of the student-operated radio stations.

MRT 235 Audio Recording III 4(4-0)
Prerequisite: MRT 225. Provides additional hands-on experience to refine technical and creative recording skills.

MRT 242 Radio Practicum 2(2-0)
Prerequisite: Department approval. Practical experience in radio studio operations. Students work in staff positions at campus radio stations, WLCR and WLCC. Various assignments, including disc jockey, newscaster, production specialist, scriptwriter, shift manager, and related jobs.

MRT 244 Audio Practicum 2(0-5)
Prerequisite: Department approval. Practical experience in audio production and recording techniques. Students work on assigned audio projects, which vary according to production schedules.

MRT 246 TV Practicum 2(0-4)
Prerequisite: Department approval. Practical experience in television studio operation. Students work on assigned video projects, which vary according to production schedules.

MRT 250 Electronic Field Production I 4(4-0)
Prerequisite: MRT 150 or Department approval. Remote video production emphasizing equipment operation, single camera shooting styles, and basic video editing.

MRT 251 Electronic Field Production II 4(4-0)
Prerequisite: MRT 250. A more rigorous application of skills learned in Electronic Field Production I, emphasizing individual remote projects. Computer controlled editing stressed.

MRT 252 TV Producer-Director 4(4-0)
Prerequisite: MRT 155. A refinement of the two fundamental jobs of producer and director, as experienced in MRT 155. More advanced assignments in preparing budget, scripts, casting, rehearsal, and production.

MRT 255 Lighting for Video 4(4-0)
Prerequisite: MRT 152. Theory and practice of lighting for television.

MRT 260 Ethics and the Social Impact of Television 4(4-0)
Study of the effects of television on society. Critically explores such issues as violence, sexuality, children, advertising, stereotypes, and others.

MRT 280 Video for Business and Industry 4(4-0)
Design and production of instructional materials for television, instructional design techniques appropriate for video production.

MRT 285 Media Portfolio 4(4-0)
Prerequisite: Department approval. Individualized project provides student opportunity to demonstrate media skills in production of a portfolio tape. Proposal approved by Program Director required.

MRT 290 Independent Study 2(0-5)
Prerequisite: Department approval. Pursuit of advanced study in areas not formerly taught within the curriculum. Students must submit written applications detailing their projects for departmental approval.

MRT 291 Independent Study 3(0-8)
Prerequisite: Department approval. Pursuit of advanced study in areas not formerly taught within the curriculum. Students must submit written applications detailing their projects for departmental approval.

MRT 292 Independent Study 4(0-11)
Pursuit of advanced study in areas not formerly taught within the curriculum. Students must submit written applications detailing their projects for departmental approval.
MRT 296 Internship in Media Production  Credits Variable
Prerequisite: Department approval. MRT students work up to 30 hours per week as interns in a professional media environment.

MRT 299 Media Special Projects  4(4-0)
Prerequisite: Department approval. MRT students work closely with faculty or production staff in developing particular programs for college departments or divisions.

Photography (PHO)
Division of TeleCommunication and the Arts

PHO 108 History of Photography I  3(3-0)
Survey of the development of photography through study of the people and processes involved.

PHO 110 Basic Camera Operation  3(3-0)
Practical application of camera controls and pictorial composition utilizing commercial processing for class projects.

PHO 111 Basic Camera Operation II  3(3-0)
Prerequisite: PHO 110 or equivalent. Emphasis on the photographic image, as opposed to the mechanics of camera operation, practice in photographic composition and design, photography under adverse lighting conditions, photography of sporting events, informal portraiture, close-up photography, creative use of electronic flash, abstract photography, and the use of accessory lenses and lens attachments.

PHO 118 History of Photography II  3(3-0)
Survey of contemporary photographers and processes.

PHO 120 Introduction to Photography I  4(2-4)
Introduction to types of cameras, camera controls, exposure and selection of sensitized materials. Camera handling and exposure techniques are emphasized. Students are expected to process, proof, and print their own work; print spotting, mounting and presentation will be covered. Adjustable camera required. Students supply film and paper.

PHO 125 Black and White Processing Lab  3(2-2)
Prerequisite: PHO 110. Film and paper processing, exposure control for black and white work, and information needed to proceed in photographic classes. Students are required to provide film and paper.

PHO 126 Basic Motion Picture Production  4(4-0)
Introduction to all aspects of filmmaking leading to the production of individual projects. Write, direct, and photograph a short film. Create a sound track and edit the picture. Lectures, demonstrations, and exercises in introductory procedures in filmmaking.

PHO 128 Photographic Design  4(4-0)
Prerequisite: PHO 110 or PHO 120 concurrent. Explore, through photographic medium, the elements and principles of design.

PHO 129 Professional Photographic Technical Lecture  Credits Variable
Facets of the role of the professional photographer: materials, processes, and new developments.

PHO 136 Fundamentals of Cinematography and Sound  4(3-0)
Prerequisite: PHO 126. Principles of composition, lighting, sound, continuity, mood, and dramatic impact. Operation of professional cameras, film and exposure, sync sound, coverage and camera angles.

PHO 138 Understanding Photographic Communication  3(3-0)
By viewing photographs, interacting with guest experts, participating in class discussions, and completing assigned readings, the student will acquire an understanding of photographic content and function.

PHO 140 Introduction to Photography II  4(2-4)
Prerequisite: PHO 120. Continuation of PHO 120 with refinement of exposure, processing, printing controls, and print finishing.

PHO 146 Fundamentals of Lighting  4(4-0)
Use of light for effect and dramatic impact in film, television, or still photography. Emphasize shape, texture, depth, and shadows. Balance light ratios and color temperatures. Shoot in the studio and on location.

PHO 148 Photo Design II  4(4-0)
Prerequisite: PHO 128. A continuation of Photo Design I concepts. This class will emphasize practical application in each student's own visual processing system.

PHO 149 Photographic Technical Laboratory  Credits Variable
Prerequisite: Department approval. Demonstration, laboratory experience, and involvement with and about new ideas in the photographic fields.

PHO 150 Basic Photo-Chemistry  3(3-0)
Prerequisite: PHO 120. Introduction to the black and white photo-chemical processes including chemical compounding and testing.

PHO 154 Professional Product Lighting  3(3-0)
Prerequisite: PHO 140 or concurrent. Lighting problems encountered in photography of products of various shapes, textures, specular quality, and reflectance. Students will conduct problem-solving projects to determine their competence in meeting and overcoming common lighting problems utilizing simple, readily available lighting equipment.

PHO 155 Black and White Printing Lab  2(0-4)
Prerequisite: PHO 140/Department approval. Guided practice in black and white printing geared to each student's need or problem.

PHO 158 Print Finishing and Presentation  3(3-0)
Prerequisite: PHO 120. Development of expertise in print finishing and presentation.

PHO 160 Introduction to Photography III  4(4-0)
Prerequisite: PHO 140. Continuation of PHO 140 with emphasis placed on visual perception, introduction to medium and large formats, survey of 200 level specializations, and preparations for 200 level review.

PHO 161 Camera Maintenance  2(2-0)
Prerequisite: PHO 120. Fundamentals of caring for photographic equipment, including routine maintenance, preventive maintenance, simple servicing and cleaning, as well as basic adjustments.

PHO 165 Manipulative Printing  4(3-2)
Prerequisite: PHO 160 or concurrent. Imagery achieved through manipulative camera and darkroom techniques. An introduction to various special films and papers and their use.

PHO 166 Fundamentals of Film Editing and Sound  4(4-0)
Prerequisite: PHO 126. Assembling picture and sound elements for effective and dramatic impact. Editing action and dialogue sequences. Building sound tracks with music, dialogue, and sound effects. Exercise and practical editing projects.

PHO 170 Basic Color Printing  4(2-4)
Prerequisite: PHO 110. Basic color processing and printing, using readily available equipment, designed primarily for the photographer who has no requirements for production color printing. Emphasis is on correct exposure of both positive and negative color film, small tank processing of those films, printing both positive and negative films, and drum and tube processing of the prints.

PHO 175 Photographic Theory Laboratory  2(2-0)
Prerequisite: Department approval. A trouble-shooting class for students whose deficiencies in photography would prevent their continuing in the course sequences. The objective is to provide the student with the necessary skills to enter the photo program beyond the Intro III level.

PHO 176 Fundamentals of Film Directing  3(3-0)
Prerequisite: PHO 126. Covers directing motion pictures, principles of story development, production planning, work with actors, creative staging, coverage, continuity, sequences for theatrical or documentary films.

PHO 179 Media Studies: Photography I  12(8-8)
Together with PHO 189 and PHO 195, this course forms the first year of the Institute program in photography. At the completion of the year, students will establish credits in the following: PHO 120, PHO 128, PHO 129 (2 cr.), PHO 140, PHO 154, PHO 160, PHO 200, SD 124, WRI 121, WRI 122.

PHO 186 Fundamentals of Film Animation  3(3-0)
Prerequisite: PHO 126. Covers concepts used in animation of motion pictures; student will produce animated film(s) and projects.

1989 Catalog Lansing Community College www.lcc.edu
PHO 189 Media Studies: Photography II 12(S-8)
Prerequisite: PHO 179. Together with PHO 179, and PHO 199 this course forms the first year of the Institute program in photography. At the completion of the year, students will establish credits in the following: PHO 120, PHO 128, PHO 129 (2 cr.), PHO 140, PHO 154, PHO 160, PHO 200, SD 124, WRI 121, 245.

PHO 190 Photography in Business and Industry 3(3-0)
Prerequisite: PHO 160. Study of occupational situations and opportunities in the photographic industry.

PHO 199 Media Studies: Photography III 12(S-11-4)
Prerequisite: PHO 189. Together with PHO 199 this course forms the first year of the Institute program in photography. At the completion of the year, students will establish credits in the following: PHO 120, PHO 128, PHO 129 (2 cr.), PHO 140, PHO 154, PHO 160, PHO 200, SD 124, WRI 121, 245.

PHO 200 Introduction to Color Theory 3(3-0)
Prerequisite: PHO 140. Introduction to color theory, materials, and their practical application.

PHO 201 Photo-Journalism I 4(4-0)
Prerequisite: PHO 140. Techniques involved in photography for publication, including events, story-telling, and photography at the decisive moment.

PHO 202 Portrait I 4(4-0)
Prerequisite: PHO 160. Lighting techniques and lighting systems in a variety of modes; performance of posing and lighting exercises on single persons, couples, and small groups.

PHO 203 Environmental Photography I 4(4-0)
Prerequisite: PHO 160/200. Techniques and equipment utilized in nature and environmental photography.

PHO 204 Large Format Photography I 4(2-4)
Prerequisite: PHO 160. Camera technique, perspective and sharpness controls, optics, processing and printing of large format negatives. 4 x 5 cameras provided.

PHO 205 Non-Silver Processes I 4(4-0)
Prerequisite: PHO 150 or PHO 165. An introduction to the various non-silver processes which preceded the silver print.

PHO 206 Workshop I—Film Production 4(2-4)
Prerequisite: 9 credits from PHO 136-186. Students who have completed at least three fundamental level film classes may produce their own films, under supervision, to gain increased technical and practical experience in film production.

PHO 207 Close-up Photography I 3(3-0)
Prerequisite: PHO 160. Study of the specialized equipment and lighting techniques unique to this area of photography.

PHO 208 Color Applications and Aesthetics 4(4-0)
Prerequisite: Department approval. Will survey the history of color photography, evaluate the use of color as a commercial tool and evaluate students use of color in photography.

PHO 209 Professional Black and White Printing 4(4-0)
Prerequisite: PHO 160. Introduction to production printing, including processing, printing, finishing, and presentation of commercial black-and-white prints.

PHO 210 Color Processing 2(2-0)
Prerequisite: PHO 160/200. Study of reversal and negative color film and paper processing procedures. Emphasizes process monitoring for quality control.

PHO 214 The Zone System Photography 4(2-4)
Prerequisite: PHO 160. Comprehensive testing and evaluation of the zone system as it applies to exposure/development control. 4 x 5 view cameras and light measurement are stressed.

PHO 216 Workshop II—Film Production 4(2-4)
Prerequisite: PHO 206. Students who have completed PHO 206 may produce their own films, under supervision, to increase their technical and practical experience.

PHO 220 Color Printing I 4(2-4)
Prerequisite: PHO 160/200. Introduction to materials and processes of color printing.

PHO 221 Photo-Journalism II 4(4-0)
Prerequisite: PHO 201/202/220. Continuation of photography for publication.

PHO 222 Portrait Photography II 4(4-0)
Prerequisite: PHO 202/204/220. A continuation of PHO 202 with primary emphasis on color portraiture in the studio. Students study professional style, techniques, and business methods as currently practiced in the field.

PHO 224 Large Format Photography II 4(4-0)
Prerequisite: PHO 204/220. Continuation of techniques used in large format photography. Emphasis on studio product lighting, architectural photography, and use of color films.

PHO 225 Non-Silver Processes II 4(4-0)
Prerequisite: PHO 160/205. Continuation of PHO 205 providing in-depth experience in several non-silver photo processes.

PHO 226 Workshop III—Film Production 4(2-4)
Prerequisite: PHO 216. Students who have completed PHO 216 may produce their own films, under supervision, to increase their experience and build their personal film portfolios.

PHO 230 Cibachrome Printing 4(2-4)
Prerequisite: PHO 220 and Department approval. Designed to introduce the student to the equipment, technique and process of the cibachrome color print system.

PHO 231 Composition, Cropping and Editing 4(4-0)
Prerequisite: PHO 160/201. Fundamentals of composing, cropping and editing photographs. This is essential for photojournalism students and valuable for all students in the vocational photography program.

PHO 240 Color Printing II 4(4-0)
Prerequisite: PHO 220. Continuation of materials and processes used in color printing.

PHO 244 Large Format Photography III 4(4-0)
Prerequisite: PHO 204/220. Continuation of large format techniques with emphasis on architectural photography.

PHO 246 Multi-Image I 4(4-0)
Prerequisite: PHO 140/200 or equivalent. This course will introduce the student to basic concepts of multi-image production—both technical camera exposure techniques and shooting/editing strategies for presentation.

PHO 250 Color Printing III 4(4-0)
Prerequisite: PHO 220. Advanced color processing and printing with emphasis on the mastery of techniques of color image construction. Includes various forms of color print manipulation, reversal processes, duplicating methods, and proper use of color analyzers.

PHO 252 Portrait III 4(4-0)
Prerequisite: PHO 222 & 220. Combines the techniques of portrait and product photography. Student will work primarily in color, and will put people and products together to produce effective photographs suitable for reproduction in various media.

PHO 260 Professional Photo Workshop 4(0-8)
Prerequisite: Department approval. Courses include field expeditions for specific study areas, professional guest lectures and workshops, and producing special requests for industry or other academic departments in the College. Specific descriptions are published in advance. May be repeated for credit.

PHO 270 Field Projects 4(0-11)
Prerequisite: Department approval. Work experience in actual photography situations for practical application of course based skills.

PHO 275 Advanced Photographic Theory 4(4-0)
Prerequisite: PHO 215 or 221 or 224 or 244. Allows the advanced student to pursue an area of weakness in his/her field of study under the guidance of an instructor. Thus the student can obtain competencies needed to proceed. May be repeated for credit.
PHO 279 - Media Studies: Photography IV  
12(10-4)  
Prerequisite: PHO 199. Together with PHO 289 and PHO 299, this course forms the second year of the Institute program in photography. At the completion of the year, students will establish credits in the following: PHO 108, PHO 201, PHO 202, PHO 204, PHO 208, PHO 220, SS 104, and four credits each of computer and media courses.

PHO 280 - Directed Independent Study  
2(0-5)  
Prerequisite: Department approval. Advanced study in areas not formerly taught within the curriculum. Students must submit written application detailing their projects for departmental approval.

PHO 289 - Media Studies: Photography V  
12(10-4)  
Prerequisite: PHO 279. Together with PHO 279 and PHO 299, this course forms the second year of the Institute program in photography. At the completion of the year, students will establish credits in the following: PHO 108, PHO 201, PHO 202, PHO 204, PHO 208, PHO 220, SS 104, and four credits each of computer and media courses.

PHO 290 - Directed Independent Study  
3(0-8)  
Prerequisite: Department approval. Advanced study in areas not formerly taught within the curriculum. Students must submit written application detailing their projects for departmental approval.

PHO 296 - Photo Internship  
Credits Variable  
Prerequisite: Department approval. Work up to 30 hours per week as technical assistants on photo assignments, becoming familiar with the daily operation of a production company from contact with clients in both technical and creative aspects.

PHO 297 - The Portfolio  
4(4-0)  
Prerequisite: PHO 190/201/202/220. Preparation and presentation of final portfolio. Successful completion required for all Associate Degree candidates.

PHO 298 - Directed Independent Study  
4(0-10)  
Prerequisite: Department approval. Pursue advanced study in areas not formerly taught within the curriculum. Students must submit written application detailing their projects for departmental approval.

PHO 299 - Media Studies: Photography Vi  
12(10-4)  
Prerequisite: PHO 289. Together with PHO 279 and PHO 299, this course forms the second year of the Institute program in photography. At the completion of the year, students will establish credits in the following: PHO 108, PHO 201, PHO 202, PHO 204, PHO 208, PHO 220, SS 104, and four credits each of computer and media courses.

PERFORMING ARTS

Director: John Dale Smith  
201 Turner House  
The purposes of Performing Arts are to educate students in the disciplines of Music, Dance, and Theatre so they may achieve an Associate Degree in Arts, train toward a professional career, or enhance personal skills.

The objectives of Performing Arts are to direct students in development of their skills in creative expression and to provide the necessary background essential for advanced training. Course offerings are designed to meet the goals of both beginning and advanced students and to enable them to explore their potential for artistic development and achievement.

By closely coordinating the academic and production activities of Dance, Music, and Theatre, the Performing Arts provides students with the opportunity to explore the essential interrelationship of the arts while at the same time increasing their skills and expanding their career potential. The public performances are produced and promoted to enrich the college community as well.

The career training opportunities in Dance have modern dance and ballet emphasis. In Music, career training is offered in vocal and instrumental skills. In Theatre, training is given in performance, design, and technical theatre skills.

Dance (DNC)  
Performing Arts  
Division of TeleCommunication and the Arts  
DNC 101 - Modern Dance Beginning I  
3(2-1)  
Course includes Modern technique for development of strength, flexibility, balance, and coordination. Technique development, dance vocabulary, and spatial relationships are emphasized. Should be repeated for credit until proper skills are achieved.

DNC 102 - Modern Dance Beginning II  
3(2-1)  
Progression of skills developed in DNC 101. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 103 - Modern Dance Intermediate I  
3(2-1)  
Progression of skills developed in DNC 103. Emphasis will be placed on technique development, spatial relationships and the dynamics of modern dance. Preparation for performance. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 104 - Dance History I  
2(1-2)  
A history of dance from the prehistoric period through the development of modern dance, the beginning of jazz dance to the present; interrelationships and repetitions of major phases of dance throughout.

DNC 107 - Beginning Ballet I  
3(2-1)  
Includes ballet technique for development of strength, flexibility, balance and coordination. Technique development, dance vocabulary and spatial relationships are emphasized. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 108 - Beginning Ballet II  
3(2-1)  
Progression of skills developed in DNC 107. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 109 - Intermediate Ballet I  
3(2-1)  
Progression of skills developed in DNC 129. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 110 - Dance Choreography—Beginning  
3(2-1)  
Creation of dance for performance. Students organize, conduct auditions, rehearse, and present a three minute composition using three or more dancers. May be repeated three times for credit.

DNC 124 - Dance Performance Workshop  
3(3-1)  
Prerequisite: Audition and interview; two letters of reference from high school or non-LCC instructors. The high school dance workshop is a summer program for gifted high school students. Students will have ballet and modern technique class three days each week as well as three choreography rehearsal periods. Students will perform in a final public performance.

DNC 126 - Orientation to Dance Performance  
1(1-0)  
Prerequisite: Audition and approval in either music or theatre major. A survey of various performance styles of dance including jazz, tap, musical comedy, and character/ethnic dance.

DNC 129 - Beginning Ballet III  
3(2-1)  
Progression of skills developed in DNC 108. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 133 - Beginning Tap I  
3(2-1)  
Includes tap technique for development of balance, coordination, and rhythm. Technique development, dance vocabulary, and spatial relationships are emphasized. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 134 - Beginning Tap II  
3(2-1)  
Progression of skills developed in DNC 133. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 136 - Character Dance  
2(1-2)  
Prerequisite: Instructor approval. Designed to provide students with the basics of character dancing as applied to classical dance. Should be repeated for credit until proper skills are achieved.
DNC 139 Modern Dance Beginning III 3(2-1) 
Progression of skills developed in DNC 102. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 140 Jazz Dance Beginning I 3(2-1) 
Includes jazz technique for development of style, strength, flexibility, balance, and coordination. Technique development, dance vocabulary, and spatial relationships are emphasized. Should be repeated for credit until proper skills are achieved.

DNC 141 Spanish Dance 2(1-2) 
Introduction of Flamenco dance as performed in southern Spain; music, hand clapping, and musical origin. May enroll singly or in couples. May be repeated for credit.

DNC 142 Mexican Folk Dance 2(1-2) 
Introduction to Mexican dance, music, steps, and techniques; costumes and customs; cultural evolution. May be repeated for credit.

DNC 143 Jazz Dance Beginning II 3(2-1) 
Progression of skills developed in DNC 142. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 144 Jazz Dance Beginning III 3(2-1) 
Progression of skills developed in DNC 143. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 150 Intermediate Tap I 3(2-1) 
Progression of skills developed in DNC 134. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 154 Independent Study I 1(0-2) 
Prerequisite: Department approval. For dance majors who wish to devote time to research projects, choreography, assigned student teaching projects, and other related dance interests. Student will meet with approved instructor 2.75 hours during the term. May be repeated for credit.

DNC 155 Independent Study II 2(1-2) 
Prerequisite: Department approval. For dance majors who wish to devote time to research projects, choreography, assigned student teaching projects, and other related dance interests. Student will meet with approved instructor 5.5 hours during the term. May be repeated for credit.

DNC 156 Independent Study III 3(1-4) 
Prerequisite: Department approval. For dance majors who wish to devote time to research projects, choreography, assigned student teaching projects, and other related dance interests. Student will meet with approved instructor 8.25 hours during the term. May be repeated for credit.

DNC 160 Private Dance I 1(1-0) 
Prerequisite: Department approval. Intensive technical training for intermediate/advanced dance majors with special problems or areas of special skill.

DNC 161 Tai Chi 3(2-1) 
Introduction to Zen meditation and basic principles of Tai Chi; first 17 movements in Yang School of Tai Chi Ch’uan. May be repeated for credit. Pr/Ze course.

DNC 169 Dance Exercise 1(0-2) 
Dance exercises and techniques. Recommended for all levels of dance, and dance majors planning to teach at the elementary, high school, and community service levels. May be repeated three times for credit.

DNC 170 Jazz Dance Intermediate 3(2-1) 
Progression of skills developed in DNC 144. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 171 Jazz Dance Advanced 3(2-1) 
Progression of skills developed in DNC 170. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 192 Improvisation 2(1-1) 
Prerequisite: Instructor approval. Explores the process and techniques of improvisation; personal resources, talent, and solution of improvisational problems. May be repeated for credit.

DNC 195 Adagio 3(2-1) 
Prerequisite: Instructor approval. The course emphasizes duets, solos, lifts, and precision timing between dancers to improve ability to relate physically to each other. May be repeated for credit.

DNC 200 Intermediate Adagio/Partnering 3(2-1) 
Progression of skills developed in DNC 195. Includes intermediate dance techniques for continued development of partnering and dance vocabulary. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 201 Modern Dance Intermediate II 3(2-1) 
Progression of skills developed in DNC 103. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 202 Modern Dance Advanced I 3(2-1) 
Progression of skills developed in DNC 201. Includes modern technique for development of strength, flexibility, balance, coordination, and individual style in preparation for performance. Modern repertoire will be taught along with technique development, dance vocabulary, and spatial relationships. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 203 Modern Dance Advanced II 3(2-1) 
Progression of skills developed in DNC 202. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 206 Ballet for Men 3(2-1) 
Prerequisite: DNC 108 and instructor approval. This course is designed specifically for the male ballet dancer. Includes ballet technique for the development of strength, flexibility, balance, coordination and endurance. Spatial relationships, technique development, and dance vocabulary are emphasized. Should be repeated for credit until proper skills are achieved.

DNC 207 Intermediate Ballet II 3(2-1) 
Progression of skills developed in DNC 109. May be repeated for credit until skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 208 Advanced Ballet I 3(2-1) 
Variations from the repertoire of classical ballet are added to advanced center combinations. Complicated turns and aerial combinations are introduced as well as extensive patterns of adagio and allegro techniques. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 209 Advanced Ballet II 3(2-1) 
Progression of skills developed in DNC 208. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 210 Pointe Technique Beginning 2(1-1) 
This course is for the intermediate level ballet student. Pointe technique is a continuation in development of strength, flexibility, balance, and coordination geared toward pointe work. Basic pointe technique is stressed at the barre and center floor. Should be repeated for credit until proper skills are achieved. Consult Dance advisor for initial placement based on previous experience.

DNC 214 Anatomy/Dance 3(2-1) 
An introduction to basic anatomy as it applies to dance. Emphasis will be on major muscles, muscle groups and skeletal structure. Terminology, practical application, theory of movement, nutrition, and injury prevention and care will be incorporated.

DNC 221 Aerobics Maintenance 2(0-3) 
Prerequisite: DNC 220. Advanced aerobics to increase muscle tone, improve endurance, and cardiovascular efficiency. May be repeated three times for credit. Pr/Ze course.
DNC 230 Elementary Laboratory 3(3-0)
An introductory course designed for people who are interested in the analysis and recording of movement. Labanotation is a scientific method which provides a means of recording movement for future reference, an equivalent to music notation, and a tool for movement education; to train in movement observation and research. Both theory and practical application will be examined.

DNC 240 Introduction to Dance Video 4(4-0)
Prerequisite: Department approval. This course is designed to provide practical training in choreography and dance for the video medium. The course will include study of established video artists and application of their style to practical work.

DNC 265 Makeup Dance/Theatre 3(2-2)
Applying makeup properly for stage; effectively using supplies and techniques; evaluating assortment of makeup on the market.

DNC 267 Introduction to Modeling 3(2-1)
Projection, visual image, and impressions; turns and movements, differences between American and European modeling; requirements, opportunities, and various facets of a modeling career.

DNC 273 Runway Technique 3(2-1)
Prerequisite: DNC 267. Runway modeling routines, model’s turns, stage entrances and exits. May be repeated three times for credit.

DNC 275 Model’s Internship I 6(3-6)
Prerequisite: DNC 267 and DNC 276 and Audition and Department approval. An advanced level training of all modeling techniques, practical experience, and individual professional development.

DNC 276 Skin Care and Makeup I 3(2-1)
Instruction in all aspects of individual personal grooming; coordination of hair style, makeup, and wardrobe will be stressed.

DNC 277 Hair Care and Makeup II 3(2-1)
Prerequisite: DNC 276. Second level of instruction in individual hair care and makeup techniques.

DNC 278 Photo and Video Makeup Design III 3(2-1)
Prerequisite: DNC 277. Still photo and video related application will be studied and developed. Students will be required to demonstrate professional makeup artistry at all levels.

DNC 280 Ballroom Bronze I 3(2-1)
Prerequisite: Couples only. An introduction to the five basic levels of ballroom dances: fox trot, rumba, swing, cha-cha, and waltz. May be repeated three times for credit.

DNC 281 Ballroom Bronze II 3(2-1)
Prerequisite: DNC 280 & couples only. Introduction through advanced level of five basic ballroom dances: fox trot, rumba, swing, cha-cha, and waltz. May be repeated three times for credit.

DNC 291 Swing/Ballroom 1(0-2)
Prerequisite: Couples only. Study in techniques, patterns, music and style of swing dances. Evaluation of the differences in movement, rhythms, and techniques of contributing styles in development of swing dances. May be repeated three times for credit.

DNC 292 Swing Ballroom II 1(0-2)
Prerequisite: DNC 280 or DNC 291 & couples only. This course is designed to build on the dance training and technique introduced in Swing Ballroom. Students will be able to learn new steps and improve their technique in Swing.

DNC 299 Western Swing Ballroom 1(0-2)
Techniques, patterns, music and style of western style swing. Evaluation of the differences in movement, rhythms, and techniques of contributing styles in adaptation of western dances to ballroom techniques. May be repeated three times for credit.

Dance Workshops and Seminars (DNR)
Performing Arts
Division of Telecommunication and the Arts

DNR 101 Modern Repertory 2(1-2)
Prerequisite: Audition and Department approval. Modern repertory classes focus on the preparation of dance for performance. The student concentrates on memorization, projection, character training and polishing for performance. May be repeated for credit.

DNR 104 Ballet Repertory 2(1-2)
Prerequisite: Audition and Department approval. Ballet repertory classes focus on the preparation of dance for performance. The student concentrates on memorization, projection, character training and polishing for performance. May be repeated for credit.

DNR 107 Tap Repertory 2(1-2)
Prerequisite: Audition and Department approval. Tap repertory classes focus on the preparation of dance for performance. The student concentrates on memorization, projection, character training, polishing and performing.

DNR 110 Jazz Repertory 2(1-2)
Prerequisite: Audition and Department approval. Jazz repertory classes focus on the preparation of dance for performance. The student concentrates on memorization, projection, character training and polishing for performance. May be repeated for credit.

DNR 121 Summer Musical Repertory 2(1-3)
Prerequisite: Audition and Department approval. A repertory class which will focus on the preparation of dances for the annual summer musical. The students concentrate on memorization, projection, character training and polishing for performance. May be repeated for credit.

DNR 153 Master Class Ballet—Begin/Low Intermediate 5(5-0)
Prerequisite: DNC 101 or DNC 107. A master ballet class for the beginning to low intermediate level student. Conducted by professional dancer/instructor in residence or performing/teaching in the service area. Classes scheduled in concentrated sessions. May be repeated for credit. P/Z course.

DNR 154 Master Class Ballet—High/Intermediate Advanced 5(5-0)
Prerequisite: DNC 103 or DNC 109. A master ballet class for the high to intermediate advanced level student. Conducted by professional dancer/instructor in residence or performing/teaching in the service area. Classes scheduled in concentrated sessions. May be repeated for credit. P/Z course.

DNR 155 Master Class Tap and Jazz 5(5-0)
A master tap and jazz class. Conducted by professional dancer/instructor in residence or performing/teaching in the service area. Classes scheduled in concentrated sessions. May be repeated for credit. P/Z course.

DNR 159 Master Class Modern—Begin/Low Intermediate 5(5-0)
Prerequisite: DNC 101 or DNC 107. A master modern class for the beginning to low intermediate level student. Conducted by professional dancer/instructor in residence or performing/teaching in the service area. Classes scheduled in concentrated sessions. May be repeated for credit. P/Z course.

DNR 160 Master Class Modern—Intermediate/Advanced 5(5-0)
Prerequisite: DNC 103 or DNC 109. A master modern class for the intermediate to advanced level student. Conducted by professional dancer/instructor in residence or performing/teaching in the service area. Classes scheduled in concentrated sessions. May be repeated for credit. P/Z course.

DNR 201 Musical Theatre Repertory 2(1-2)
Prerequisite: DNC 102 and DNC 108 and DNC 140. An introduction to choreographic styles of the American Musical Theatre for the intermediate dance student. Selected passages of original choreography from current and past Broadway musicals will be introduced.

DNR 210 Polka Workshop 1(1-1)
A course in International Waltz and Polka dance techniques. This is a course suitable for the beginner or those wishing to acquire intensive training in the waltz and polka dance forms. Discussion of national origin and historic significance to dance will be included.

DNR 216 Ballroom Bronze I Workshop 1(1-1)
Traditional ballroom techniques in cha-cha, samba, tango, and rumba. Enrollment with partner recommended but not required. May be repeated three times for credit.
DNR 221 Cha-Cha/Mambo Workshop 1(0-1)
An introductory study of the ballroom dances cha-cha and mambo. Both dances have a Latin heritage. The steps are compact and require Latin hip movement. This course will cover basic components of partnership dancing and basic patterns, footwork, timing, technique and style of the cha-cha and mambo.

DNR 222 Tango/Samba Workshop 1(3-0)
This four-week course is an introductory study of the ballroom dances Tango and Samba. Covers basic components of partnership dancing, including basic patterns, footwork, timing, technique and style of the Tango and Samba.

DNR 223 Ballroom Bronze II Workshop 1(1-1)
Prerequisite: DNR 216. An advanced course in traditional ballroom techniques. Emphasis will be placed on dance styles such as the Cha-Cha, Waltz, Rumba, Foxtrot and Swing, as well as introduction to the Tango. Enrollment with a partner is recommended but not required.

DNR 224 Ballroom Hustle Workshop 1(1-0)
Designed to introduce students to Hustle Dance steps and styling. Hustle is an upbeat dance which is performed to popular music.

DNR 232 Skin Care for Women Over 30 .5(5-0)
Proper skin care and how to recognize the changing needs based on maturity, hormones, sun exposure, and climate, for women. A maintenance program will be designed for each individual.

DNR 233 Makeup for Women Over 30 .5(5-0)
Makeup techniques revised for skin over age 30, on an individual basis.

DNR 234 Wardrobe Coordination Workshop 1(1-0)
Will develop and assimilate individual clothing style and fashion type. How to plan a wardrobe, personal color selections, and how to accessorize will be introduced.

DNR 235 Hair Care for Women Over 30 .5(5-0)
Designed to familiarize students with the continual changes, problems and solutions, which are more likely to affect the woman over age 30. Students will receive up-to-date usage information relative to all the latest hair care products, appliances, and techniques.

Music (MUS)
Performing Arts
Division of TeleCommunication and the Arts

MUS 101 LanSwingers 2(0-5)
Prerequisite: Instructor approval. Selected vocal ensemble that participates almost exclusively in jazz, swing, and pop choral performance, with choreography.

MUS 102 Lansing Women’s Glee Club 1(0-2)
An ensemble of women vocalists composed of students and community members to develop general musicianship and provide training in choral singing.

MUS 107 Opera Workshop 2(1-2)
Prerequisite: Instructor approval. An introductory course to the elements of opera as musical theatre.

MUS 108 Concert Choir 1(0-4)
Prerequisite: Instructor approval. A college choral organization whose members learn and perform the master works which have been composed for large chorus and orchestra.

MUS 113 Summer Musical Chorus 2(1-3)
Prerequisite: Audition. LCC’s annual summer musical chorus. Members are selected for their acting as well as singing ability and past performance experience.

MUS 119 Lansing Concert Band 1(0-3)
Prerequisite: Instructor approval. A community band serving also as the VFW and American Legion Band. The group holds at least 25 concerts throughout the year, playing all types of music, but concentrating mainly on traditional concert band literature.

MUS 123 Jazz Ensemble 2(1-2)
Prerequisite: Audition. An ensemble approach to the playing and studying of jazz.

MUS 124 Music Performance Workshop 3(3-1)
Prerequisite: Must audition and interview and have two references from high school or non-LCC instructors. The high school workshop is a summer program for gifted high school students. Students work on basic music skills: concentrate on music theory, develop keyboard skills; strengthen vocal skills; and perform in a final recital. Acceptance by audition and interview only.

MUS 127 Orientation to Music Performance 1(1-0)
Prerequisite: Audition and approval in either dance or theatre major. A survey of the basic skills used in music including elements of theory, use of keyboard, and use of voice.

MUS 130 Classical Guitar Ensemble 1(0-2)
Prerequisite: Instructor approval. A classical guitar ensemble that participates almost exclusively in classical literature performance.

MUS 133 Jazz Theory I 3(3-0)
Prerequisite: Instructor approval. The first in a series of three designed to acquaint the student with basic jazz theoretical principles. Covers harmony, scales and modes, chord-scale relationships, chord substitution, and harmonization techniques.

MUS 134 Jazz Theory II 3(3-0)
Prerequisite: MUS 133. A continuation of MUS 133. The student will learn and apply intermediate jazz theoretical principles with regard to arranging for a limited number of instruments.

MUS 135 Jazz Theory III 3(3-0)
Prerequisite: MUS 134. A continuation of MUS 134, this course is designed to prepare the student for jazz arranging. Techniques in rhythmic and melodic development will be covered as well as writing for the rhythm section, notation, and preparing a score.

MUS 136 Class Organ-Commercial Music 2(1-1)
Class organ instruction in popular music. Students will progress at their own rate.

MUS 137 Blue Grass Banjo 2(1-1)
Introduction to Blue Grass style on banjo.

MUS 138 Class Piano/Major 3(2-1)
Prerequisite: Department approval. The first in a sequence of three limited to transfer music majors to gain keyboard facility, skill in sight reading, and ability to transpose. The electronic piano lab is utilized in both individual and group playing.

MUS 139 Class Piano/Major 3(2-1)
Prerequisite: MUS 138. The second in a sequence of three limited to transfer music majors to gain keyboard facility, skill in sight reading, and ability to transpose. This course builds on the cumulative material covered in MUS 138. The electronic piano lab is utilized in both individual and group playing.

MUS 140 Class Piano/Major 3(2-1)
Prerequisite: MUS 139. The third in a sequence of three limited to transfer music majors to gain keyboard facility, skill in sight reading, and ability to transpose. This course builds on the cumulative material covered in MUS 139. The electronic piano lab is utilized in both individual and group playing.

MUS 144 Keyboard Beginner I 2(1-1)
Prerequisite: None. The first in a sequence of two classes taught in an electronic piano lab. Students progress at own speed. For non-majors.

MUS 145 Keyboard Beginner II 2(1-1)
Prerequisite: MUS 144. The second in a sequence of two classes taught in an electronic piano lab. This course builds on the cumulative material covered in MUS 144. Students progress at own speed. For non-majors.

MUS 168 Introduction to Musicanship I 3(2-1)
The first in a sequence of three courses covering notation of pitch and rhythm, musical terminology, and the principles of rhythmic and melodic reading. Also, basic introduction to musical scales, key signatures, intervals and chords.

MUS 169 Introduction to Musicanship II 3(2-1)
Prerequisite: MUS 168. The second in a sequence of three courses covering notation of pitch and rhythm, musical terminology, and the principles of rhythmic and melodic reading. Also, basic introduction to musical scales, key signatures, intervals and chords. This course builds on the cumulative material covered in MUS 168.
MUS 170 Introduction to Musicianship III 3(2-1)
Prerequisite: MUS 169. The third in a sequence of three courses covering notation of pitch and rhythm, musical terminology, and the principles of rhythm and melodic reading. Also, basic introduction to musical scales, key signatures, intervals and chords. This course builds on the cumulative material covered in MUS 169.

MUS 171 Theory Review 2(1-1)
Prerequisite: MUS 175. A general review of first year Music Theory. Analysis, group and individual singing and ear training material will be emphasized.

MUS 173 Basic Musicianship 5(3-3)
Prerequisite: Department approval. The first in a sequence of three courses in music theory as a freshman year requirement for a Bachelor of Music or similar four-year college degree, including a full series of ear training, sight-singing and dictation. This course builds on the cumulative material covered in MUS 173.

MUS 174 Basic Musicianship 5(3-3)
Prerequisite: MUS 173. The second in a sequence of three courses in music theory as a freshman year requirement for a Bachelor of Music or similar four-year college degree, including a full series of ear training, sight-singing and dictation. This course builds on the cumulative material covered in MUS 173.

MUS 175 Basic Musicianship 5(3-3)
Prerequisite: MUS 174. The third in a sequence of three courses in music theory as a freshman year requirement for a Bachelor of Music or similar four-year college degree, including a full series of ear training, sight-singing and dictation. This course builds on the cumulative material covered in MUS 174.

MUS 176 Advanced Musicianship 5(3-3)
Prerequisite: MUS 175. The first in a sequence of three courses in music theory as a sophomore year requirement for a Bachelor of Music or similar four-year college degree, including a full series of ear training, sight-singing and dictation.

MUS 177 Advanced Musicianship 5(3-3)
Prerequisite: MUS 176. The second in a sequence of three courses in music theory as a sophomore year requirement for a Bachelor of Music or similar four-year college degree, including a full series of ear training, sight-singing and dictation. This course builds on the cumulative material covered in MUS 176.

MUS 178 Advanced Musicianship 5(3-3)
Prerequisite: MUS 177. The third in a sequence of three courses in music theory as a sophomore year requirement for a Bachelor of Music or similar four-year college degree, including a full series of ear training, sight-singing and dictation. This course builds on the cumulative material covered in MUS 177.

MUS 179 Class Voice/Majors 2(1-1)
Prerequisite: Department approval. The fundamentals of posture and breath control, instruction in the phonetic approach to the pronunciation of English and Italian. The performance of the language utilizes the vocal literature of major composers from the United States, Great Britain, and Italy.

MUS 180 Class Voice/Majors 2(1-1)
Prerequisite: MUS 179. Instruction in the phonetic approach to the pronunciation of German designed for singers. The performance of the language utilizes the song literature of major composers of German lieder.

MUS 181 Class Voice/Majors 2(1-1)
Prerequisite: MUS 180. Instruction in the phonetic approach to the pronunciation of French designed for singers. The performance of the language utilizes the song literature of major composers of the French chanson.

MUS 182 Class Voice 2(1-1)
The first in a sequence of classes for group and individual work on classical literature and study of vocal techniques such as breathing, tone production, diction, phrasing, and style. Some pop music included.

MUS 183 Class Voice 2(1-1)
Prerequisite: MUS 182. The second in a sequence of classes for group and individual work on classical literature and study of vocal techniques such as breathing, tone production, diction, phrasing, and style. Some pop music included. This course builds on the cumulative material covered in MUS 182.

MUS 185 Music Reading I 3(2-1)
The first in a sequence of two courses for students with no previous experience in ear training. Covers造成法, musical thinking, including note and mnemonic procedures, and introduction to the principle of sight-reading and the fundamentals of melodic, harmonic and rhythmic dictation.

MUS 186 Music Reading II 3(2-1)
Prerequisite: MUS 185. The second in a sequence of two courses for students with no previous experience in ear training. Covers造成法, musical thinking, including note and mnemonic procedures, and introduction to the principle of sight-reading and the fundamentals of melodic, harmonic and rhythmic dictation. This course builds on the cumulative material covered in MUS 185.

MUS 188 Guitar I 2(1-1)
The first in a sequence of two courses for beginners. Note reading and music theory, learn to play single-note melody lead and chord accompaniment. Folk, blues and classical traditions of the instrument. "Finger-style" and "Flat-pick" techniques are introduced. Provide your own instrument.

MUS 189 Guitar II 2(1-1)
Prerequisite: MUS 188. The second in a sequence of two courses for beginners. Note reading and music theory, learn to play single-note melody lead and chord accompaniment. Folk, blues and classical traditions of the instrument. "Finger-style" and "Flat-pick" techniques are introduced. Provide your own instrument.

MUS 192 Performance Repertoire 2(1-1)
Prerequisite: Private lessons as a major. A specific study and application of performance practices for second year music majors.

MUS 199 Music Appreciation 2(2-0)
Gives a general knowledge of musical structure, composers, compositions, terms, and the relationships of music to other arts. For non-music majors.

MUS 200 Basic Music/Elementary Teachers 4(4-0)
Provides elementary teacher majors with the basic skills to teach music in the classroom. Meets State Department of Education certification requirements for elementary classroom teachers.

MUS 201 Elementary Music Methods 4(4-0)
Prerequisite: MUS 200. As a sequel to a basic music fundamentals course, this course will provide elementary teachers with a wide range of successful methods for teaching the elements of music, guided listening, and extra-musical concepts to music instruction.

MUS 205 Private Voice/Majors 3(0-5)
Prerequisite: Audition. Private lesson, 1 hour per week, for music students. Enrollment by audition only. Auditions held the first Friday of fall and winter terms, or as requested during fall and spring term juries. Students who are not admitted as music majors are recommended to take private lessons for non-majors and reaudition to meet audition criteria.

MUS 206 Private Voice/Majors 2(0-3)
Prerequisite: Audition. Private lesson, 40 minutes per week, for music students. Enrollment by audition only. Auditions held the first Friday of fall and winter terms, or as requested during fall and spring term juries. Students who are not admitted as music majors are recommended to take private lessons for non-majors and reaudition to meet audition criteria.

MUS 207 Private Instrument/Majors 3(0-5)
Prerequisite: Audition. Private lesson, 1 hour per week, for music students. Enrollment by audition only. Auditions held the first Friday of fall and winter terms, or as requested during fall and spring term juries. Students who are not admitted as music majors are recommended to take private lessons for non-majors and reaudition to meet audition criteria.

MUS 208 Private Instrument/Majors 2(0-3)
Prerequisite: Audition. Private lesson, 40 minutes per week, for music students. Enrollment by audition only. Auditions held the first Friday of fall and winter terms, or as requested during fall and spring term juries. Students who are not admitted as music majors are recommended to take private lessons for non-majors and reaudition to meet audition criteria.

MUS 209 Private Keyboard/Majors 3(0-5)
Prerequisite: Audition. Private lesson, 1 hour per week, for music students. Enrollment by audition only. Auditions held the first Friday of fall and winter terms, or as requested during fall and spring term juries. Students who are not admitted as music majors are recommended to take private lessons for non-majors and reaudition to meet audition criteria.
MUS 210 Private Keyboard/Majors 2(0-3)
Prerequisite: Audition. Private lesson, 40 minutes per week, for music students. Enrollment by audition only. Auditions held the first Friday of fall and winter terms, or as requested during fall and spring term. Students who are not admitted as music majors are recommended to take private lessons for non-majors and reaudition to meet audition criteria.

MUS 211 Private Guitar/Majors 3(0-5)
Prerequisite: Audition. Private lesson, 1 hour per week, for music students. Enrollment by audition only. Auditions held the first Friday of fall and winter terms, or as requested during fall and spring term. Students who are not admitted as music majors are recommended to take private lessons for non-majors and reaudition to meet audition criteria.

MUS 212 Private Guitar/Majors 2(0-3)
Prerequisite: Audition. Private lesson, 40 minutes per week, for music students. Enrollment by audition only. Auditions held the first Friday of fall and winter terms, or as requested during fall and spring term. Students who are not admitted as music majors are recommended to take private lessons for non-majors and reaudition to meet audition criteria.

MUS 213 Private Voice/Non-Majors 3(0-5)
Private lesson, 1 hour per week, for non-major voice students.

MUS 214 Private Voice/Non-Majors 2(0-2)
Private lesson, 40 minutes per week, for non-major voice students.

MUS 215 Private Voice/Non-Majors 1(0-1)
Private lesson, 30 minutes per week, for non-major voice students.

MUS 216 Private Instrument/Non-Majors 3(0-5)
Private lesson, 1 hour per week, for non-major instrumental students.

MUS 217 Private Instrument/Non-Majors 2(0-3)
Private lesson, 40 minutes per week, for non-major instrumental students.

MUS 218 Private Instrument/Non-Majors 1(0-1)
Private lesson, 30 minutes per week, for non-major instrumental students.

MUS 219 Private Keyboard/Non-Majors 3(0-5)
Private lesson, 1 hour per week, for non-major piano or organ students.

MUS 220 Private Keyboard/Non-Majors 2(0-3)
Private lesson, 40 minutes per week, for non-major piano or organ students.

MUS 221 Private Keyboard/Non-Majors 1(0-1)
Private lesson, 30 minutes per week, for non-major piano or organ students.

MUS 222 Private Guitar/Non-Majors 3(0-5)
Private lesson, 1 hour per week, for non-major guitar students.

MUS 223 Private Guitar/Non-Majors 2(0-3)
Private lesson, 40 minutes per week, for non-major guitar students.

MUS 224 Private Guitar/Non-Majors 1(0-1)
Private lesson, 30 minutes per week, for non-major guitar students.

MUS 227 Independent Study 1(1-1)
Prerequisite: Department approval. Under instructor supervision, the student will work on specific projects approved by the program director. Student will meet with approved instructor 2.75 hours during the term.

MUS 228 Independent Study 2(1-2)
Prerequisite: Department approval. Under instructor supervision, the student will work on specific projects approved by the program director. Student will meet with approved instructor 5.5 hours during the term.

MUS 229 Independent Study 3(1-3)
Prerequisite: Department approval. Under instructor supervision, the student will work on specific projects approved by the program director. Student will meet with approved instructor 8.25 hours during the term.

MUS 230 Music Seminar 1(1-0)
Prerequisite: Department approval. Designed to meet special needs of students and offered on demand. Students are approved in advance by faculty and department.

MUS 233 Music Seminar 2(1-1)
Prerequisite: Department approval. Designed to meet special needs of students and offered on demand. Students are approved in advance by faculty and department.

MUS 234 Music Seminar 3(2-1)
Prerequisite: Department approval. Designed to meet special needs of students and offered on demand. Students are approved in advance by faculty and department.

MUS 235 Harmonica I 2(1-1)
Introductory course demonstrating the sound techniques employed in the mastery of the harmonica.

MUS 236 Harmonica II 2(1-1)
Prerequisite: MUS 235. Introduces blues changes. The student will perform five blues songs and gain the ability to improvise over standard blues changes.

MUS 239 Jazz History 2(2-0)
General introduction to recorded jazz. Each week the class will focus on a different period, style, or group of performers. Covers instrumentation, arrangement, ensemble qualities, unison, counterpoint, call and response, differences between collective improvisation and group backing for a soloist, the differing forms of big bands and the small jazz group, the individuality of soloists within a style, the changes in style from one period to the next, the role of innovators within the music, how they influence others.

MUS 240 Music History I 3(3-0)
Prerequisite: Department approval. Ancient Greece through Romanesque and Gothic periods, concluding with the Renaissance, Greek theory and "ethos"—age of plainsong, development of polyphony.

MUS 241 Music History II 3(3-0)
Prerequisite: MUS 240. Baroque and classical periods with special attention to fugue, opera, oratorio, sonata, and symphony. Characteristic works analyzed.

MUS 242 Music History III 3(3-0)
Prerequisite: MUS 241. Romantic, impressionistic, and contemporary periods. A comprehensive final examination is administered covering MUS 240-242.

MUS 244 Studio Production—Commercial 2(2-1)
Prerequisite: Department approval. This course is an introduction to modern multi-channel recording techniques. The term is divided into two parts. The first part is conducted off-campus and the second part is observation of recording sessions in an off-campus recording studio. Covers equipment functions, separation techniques, basic tracks and overdubs. Additional studies include: the roles of musicians, producers, and engineers in the commercial music recording field.

MUS 245 Fundamental Methods of Commercial Music 3(3-0)
Introduction to the patterns behind chords, scales and harmonic movement, and understanding to read music.

MUS 252 History of Rock I 3(3-0)
Introduction to the varied styles and origins of the music called Rock 'n' Roll, as well as some of the major figures behind it.

MUS 253 Business of Music 4(4-0)
An introduction to the business aspects of the music industry. Areas covered include copyrights, contracts, trademarks, publishing, recording and record company operations, personal managers, booking agents, concert promotion, and unions.

MUS 254 Band Management 2(2-0)
Prerequisite: MUS 253 or experience. Designed to assist the professional musician or manager in the creation or improvement of a performing band. All major aspects of band management are covered, including intra-band agreements, contracts, negotiations, choice of format and material, equipment, finances, promotion and sales, road management, and basic organizational information.

MUS 255 Class Voice—Commercial Music 3(2-1)
The beginning class in a series of three classes. Class and individual work on pop music and study of important vocal techniques in pop, jazz, and rock. Music recommended as a prerequisite to private voice lessons.

*Private voice lessons for non-majors, particularly relating to commercial music. Work on specific music projects, to be assigned by instructor. Weekly lessons of 40 minutes.*
Division of TeleCommunication and the Arts

THR 155 Pantomime
Covers presentation and theatrical aspects of pantomime, emphasizing physical communication through flexibility and body coordination. Includes exercises designed to create illusions and characters to be performed for the class and invited guests.

THR 175 Theatre History
An examination of the history of drama from primitive times to the present, introducing the overall pattern of historical development with emphasis on European and American development.

THR 189 Audition Workshop
Prerequisite: Department approval. An intense workshop in which participants prepare and polish audition materials suited for a professional audition or audition for advanced training.

THR 205 Reading For The Theatre
This course is designed to stimulate reading interest for the theatre student. It will provide students with the opportunity to read a variety of literature: prose, poetry, novel, short story and plays. Students will share their perspectives and insights with one another in a relaxed seminar class atmosphere.

THR 211 Production Practicum I
Prerequisite: Department approval. An introduction to techniques of stage craft for the performing arts. The basic fundamentals involved in tool usage and safety, stage lighting, lighting plot composition, and understanding of the organization of backstage production. Involves two hours of lab time per week.

THR 212 Production Practicum I
Prerequisite: Department approval. Course involves four hours of lab time per week, giving the student greater opportunity to refine the basic fundamentals involved in tool usage and safety, stage lighting, lighting plot composition, and understanding of the organization of backstage production.

THR 213 Production Practicum I
Prerequisite: Department approval. Course involves six hours of lab time per week, giving the student greater opportunity to refine the basic fundamentals involved in tool usage and safety, stage lighting, lighting plot composition, and understanding of the organization of backstage production.

THR 215 Design Practicum I
An introduction to the elements of design and how they relate to performance. Introduction to color theory as it relates to paint, light, and fabric. Techniques of rendering, translation and creation of a picture to 3-dimensionality, special relationships and development of a design concept also covered.

THR 216 Design Practicum II
Prerequisite: THR 215 or Department approval. A continuation of study begun in Design Practicum I. In addition, the student will learn model building as the final element in the design process.

THR 217 Design Practicum III
Prerequisite: THR 216 or Department approval. Advanced study in the design process. A continuation of training begun in Design Practicum I and II.

THR 218 Scene Painting
Designed to teach the basics of scene painting, including instruction in color theory, various brands and types of paint available, and use of tools and techniques of scene painting.

THR 219 Advanced Scene Painting
Prerequisite: THR 218. Advanced course designed to study in depth techniques for scene painting.

THR 223 Production Practicum I
Prerequisite: THR 212 or 213. Involves six hours of lab time per week giving the student experience in order to refine intermediate and learn more advanced techniques of stage craft for the performing arts. Student continues training in tool usage and safety, stage lighting, lighting plot composition, and gains a more detailed understanding of backstage production. Based on student's choice to emphasize their studies toward lighting design or technical direction, student will study floorplan, working drawing interpretation, and fundamentals of color.

THR 224 Production Practicum II
Prerequisite: THR 223 or Department approval. Involves six hours of lab time per week. Student will receive practical production experience based on student's choice to emphasize their studies on lighting design or technical direction.

THR 225 Stage Management
An introduction to the basic techniques of stage management, emphasizing the stage manager's responsibilities, the relationship of stage manager to the production, director, designer, crew, cast, techniques to work up production and rehearsal schedules, contact sheets, scene breakdowns, blocking notations, and cues of a show.

THR 226 Advanced Stage Management
Prerequisite: THR 225. Practical experience in stage work; the student is assigned to act as stage manager or assist the stage manager in a production.

THR 235 Theatre Special Projects
Prerequisite: Instructor approval. Limited to individuals who have been selected as cast members in a scheduled LCC performance. Four credit hours awarded for scope of work under supervision of instructor.

THR 237 Theatre Special Projects
Prerequisite: Instructor approval. Limited to individuals who have been selected as cast members in a scheduled LCC performance. Four credit hours awarded for scope of work under supervision of instructor.

THR 246 Introduction to TV/Film Acting
Designed to introduce the beginning acting student to the basic skills needed for working in front of the camera including scene study, basic terminology, use of energy in front of the camera, and an individual evaluation.

THR 247 Acting for TV Commercials
Designed to provide the student with an introduction to the concept of commercials, the audition, the cold reading, and the taping session.

THR 248 Advanced TV/Film Acting
Prerequisite: THR 246. Advanced work on basic skills in front of the camera.

THR 249 Improvisation
Prerequisite: THR 250. Through the use of masks and developmental exercises, this class will train the student in long-term, in-depth character development through improvisational techniques.

THR 250 Introduction to Acting
Discusses various acting techniques and introduces the beginning student to the skills necessary to maintain a sustained dramatic performance. Theatre games and improvisation exercises to overcome stage fright and to develop concentration and listening skills are emphasized.

THR 251 Acting I
Prerequisite: THR 250. An introduction to the vocal and physical skills necessary to sustain public performance. The fundamentals of acting, including improvisational techniques, the rehearsal process, character analysis, scene study, and production are covered.

THR 252 Acting II
Prerequisite: THR 251. A continuation of the fundamental skills of acting. Students review techniques presented and add more complicated skills as abilities increase.

THR 253 Acting III
Prerequisite: THR 252. Continued training in the fundamentals of acting. Students review and practice skills demonstrated, and apply them to acting styles from various historical periods. Course may be repeated up to three times for credit.

THR 254 Acting III—Shakespeare
Prerequisite: THR 252. Course instruction includes reading and discussing the plays of William Shakespeare, focusing on the attitude and style of the Elizabethan Theatre. Students will participate by presenting short scenes using dialects with developed characters.
| THR 255 | Stage Makeup | 3(2-2) | A study in the application of stage makeup to develop a character and to assist the actor in sustaining the character in performance. Emphasizes skills in the use of different kinds of makeup, hairstyling, and appearance changes utilizing various chemical compounds. |
|THR 258 | Advanced Improvisation | 1(0-2) | Prerequisite: THR 249. Advanced Improvisation is an extension of Beginning Improvisation. Students will develop performance materials and present it by the end of the term. |
|THR 261 | Movement for the Actor I | 2(1-2) | Course providing a basic understanding of the use of movement in performance. Students learn relaxation techniques and begin to explore skills for allowing an audience to share the actor's emotional and intellectual responses as expressed through movement. |
|THR 262 | Movement for the Actor II | 2(1-2) | Prerequisite: THR 261. An advanced course emphasizing the body as a medium of expression, encouraging students to devise their own techniques in order to share their unique personal interpretations. |
|THR 270 | Studio Movement I | 1(1-5) | Prerequisite: Department approval. A course which helps the student develop his/her movement skills including strength, flexibility and endurance. Theatre majors are required to take this course as part of their studio performance classes. Student progress will be analyzed as part of the final evaluation of the studio production. Studio Movement I will focus on the basics of movement dynamics. |
|THR 275 | Studio Voice I | 1(1-5) | Prerequisite: Department approval. A course which helps the student develop his/her vocal skills including projection, vocal flexibility and endurance. Theatre majors are required to take this course as part of their studio performance classes. Student progress will be analyzed as part of the final evaluation of the studio production. Studio Voice I will focus on the basics of voice dynamics. |
|THR 281 | Directed Independent Study | 6(3-6) | Prerequisite: Instructor approval. Course provided for advanced students working on special projects outside the scope of standard classroom instruction. Student will meet with approved instructor 16.5 hours during the term. |
|THR 282 | Directed Independent Study | 4(2-4) | Prerequisite: Instructor approval. Course provided for advanced students working on special projects outside the scope of standard classroom instruction. Student will meet with approved instructor 11 hours during the term. |
|THR 283 | Directed Independent Study | 2(1-2) | Prerequisite: Instructor approval. Course provided for advanced students working on special projects outside the scope of standard classroom instruction. Student will meet with approved instructor 5.5 hours during the term. |
|THR 284 | Directed Independent Study | 3(2-1) | Prerequisite: Instructor approval. Course provided for advanced students working on special projects outside the scope of standard classroom instruction. Student will meet with approved instructor 8.25 hours during the term. |
|THR 285 | Introduction to Clowning | 3(2-2) | Introductory course in the art of clowning. Basic clown types, makeup, juggling, ballonology, and beginning magic. |
|THR 286 | Advanced Clowning | 3(2-2) | Prerequisite: THR 285. An advanced course in the art of clowning for the performance career student. Unique clown types, advanced clown makeup, juggling, balloonology, and sleight of hand tricks are examined. Emphasis on creating an original clown character including costume, makeup, and appropriate skits, projection and performance. |
|THR 290 | Circus Skills | 3(2-1) | Complete training on the Still Trapeze (trapeze bar is 7' off the floor), exercise on the rolla board, still walking (2' & 4'), unicycle (regular, 20" & 18" wheel, 5' high), body and hand balancing items, and juggling (clubs & balls). |
|THR 295 | Alexander Technique | 1(0-3) | Introduces a system of mind-body dynamics beneficial to actors, dancers, and musicians, focusing on realignment of body usage to develop full capability of energy, control, and relaxation. |
|THR 320 | Advanced Acting I | 3(2-2) | Prerequisite: Department approval. A course that is part of a three term sequence in the advanced acting curriculum. Students will intensify their work in realistic style through use of sense memory, emotional memory, a more complex scoring system, and the performance of two scenes from realistic scripts. |
|THR 340 | Dramatic Form and Function I | 3(3-0) | Prerequisite: Department approval. A course that is part of a three term sequence in the advanced acting curriculum. It is a survey of history of theatrical forms: an examination of the forms of tragedy, comedy, and tragi-comedy, and an examination of writing of a playwright of the students' own choosing. |
|THR 360 | Creating Theatre I | 4(2-5) | Prerequisite: Department approval. A course that is part of a three term sequence in the advanced acting curriculum. The class will research local history and develop a theatre piece based on information discovered through letters, documents, and oral history. The production will tour to local schools, clubs, and service organizations. |

| Theatre Seminars and Workshops (THW) Performing Arts Division of TeleCommunication and the Arts |
|THW 105 | Acting Workshop | 2(2-0) | Full or variable length course designed to take advantage of special talents of current or visiting performance faculty. |
FACULTY AND STAFF DIRECTORY

ABDO, Said E.
Public Safety Supervisor, Lt., Public Safety
A.G. Lansing Community College; B.A., Northwood Institute

ADRIAN, Joanne K.
Associate Professor, Health Careers
B.S.N., University of Michigan

ALFARO, Rogelio R.
Assistant Professor-Counselor, Center for Student Support
B.A., Michigan State University; M.A., Michigan State University

ALLEN, Richard L.
Senior Systems Analyst, Information Systems & Computer Services
A.B., Lansing Community College; B.A., Cleary College

ANDERSON, Joseph L.
Professor, Humanities
A.B. Augustana College; B.D., Augustana Theological Seminary; M.A., Union Theological Seminary; Ph.D., Boston University

ANSELMO, Fe Gaddi
Associate Professor, Social Science
B.A., University of Santo Tomas; M.A., Michigan State University; Ph.D., Michigan State University

ANTONIDES, Chris
Associate Professor, Humanities
B.A. New York University; M.A., New York University; Ph.D., Michigan State University

AZIMA, Alex M.
Assistant Professor, Science
B.S. Massachusetts Institute of Technology; M.S., Michigan State University

BALDWIN, Robert L.
Instructor, Criminal Justice and Law Systems
B.A., Michigan State University

BARCELOW, Doreen D.
Assistant Professor, Office Systems
B.S., Michigan State University; M.A., Michigan State University

BARKS, Kay E.
Professor, Mathematics & Computer Science
B.S., Michigan State University; M.S., Michigan State University

BARNETT, Dorothy P.
Assistant Professor, Photo Technology
B.A., Nazareth College; M.A., University of Notre Dame

BAZYLEWICZ, Joseph
Professor, Manufacturing Technology
B.S., Michigan State University; M.E., Michigan State University

BEAVERS, Claude R.
Associate Professor-Counselor, Student Development Services
B.S., University of Wisconsin; M.A., University of New Mexico

BECK, Norman A.
Professor, Humanities
B.A., University of Rhode Island; M.A., University of Rhode Island; Graduate Study, Michigan State University

BECK, Stephen
Instructor, Photo Technology
B.A. University of New Hampshire

BELKIN (LINDSAY), Andrea H.
Coordinator, Displaced Homemaker Services
B.A., Michigan State University; Graduate Study, Michigan State University

BENEDICT, Frank A.
Vice President, Emeritus

BENNETT, Catherine
Associate Professor, Health Careers
B.S., University of Wisconsin; M.S., University of Wisconsin

BENTLEY, Robert H.
Associate Professor, Communication
B.A., Pacific University; M.A., Pacific University; Graduate Study, University of Nevada

BERGERON, Jack
Instructor, Commercial Art & Design
B.F.A., Michigan State University; M.A., Central Michigan University

BERGMANN, Edwin C.
Divisional Development Officer, Technology & Applied Sciences
B.S., Bowling Green University; M.S., Stout State College

BETTINSON, Charles H.
Executive Director, Business and Industry Institute
B.S., Central Michigan University; M.A., Central Michigan University; Ph.D., Michigan State University

BHUGRA, Satnam Singh
Professor, Social Science
B.T., Panjab University; M.Ed., Panjab University; M.A., Panjab University; Ed.D., Utah State University

BICKERT, Harry J.
Assistant Director of Personnel
B.A., Michigan State University

BLANCHARD, William G.
Associate Professor, Photo Technology
B.A., Michigan State University; M.A., University of Southern California

BOLLMAN, James A.
Director, Business Services
B.A., St. Louis University; 11-A Insurance Certificate, Michigan State University

BOWUM, Robert J.
Assistant Professor, Management Systems
A.A., Lansing Community College; B.A., Michigan State University; M.A., Michigan State University

BRAMER, George R.
Chairperson, Communication
A.B., Drury College; M.A., University of Notre Dame; Ph.D., University of Notre Dame

BRAMER, Jennifer
Program Director, Michigan Occupational Training Program
B.A., Central Michigan University; M.A., Central Michigan University

BROUSE, David V.
Professor, Science
B.S., Brockport State; M.A.T., Michigan State University; Graduate Study, Michigan State University

BROWN, Mary H.
Associate Professor, Science
B.S., Central Michigan University; M.S., Central Michigan University

BRUSSOW, Laurie
Coordinator, Academic Enrichment Services
B.S., State University of New York; M.S., University of Utah

BUCKLIN, William T.
Associate Professor, Social Science
B.S., Montana State University; M.S., Michigan State University; Ph.D., Michigan State University

BUNTON, Rita
Director, Community Relations, College & Community Relations
B.A., Michigan State University

BURGESS, Allan W.
Associate Professor, Communication
B.A., Central Michigan University; M.A., Central Michigan University; Graduate Study, Michigan State University

BURRE, Ilse H.
Director, Professional Development/Affirmative Action Officer
B.A., Kalamazoo College; M.A., Michigan State University; Ph.D., Michigan State University

BURRE, Theodore
Associate Professor, Automotive & Industrial Trades
A.A., Alpena Community College; B.A., Michigan State University

BURLT, Thomas W.
Associate Professor, Architecture, Engineering & Construction
B.A., Michigan State University; M.S., Ball State University

BUTTERMAN, Geraldine
Professor, Science
A.B., Calvin College; M.A., University of Michigan

BYRNE, Deborah D.
Program Director, Music Program, Performing Arts
B.M., Michigan State University; M.M., Michigan State University

CANDY, Hortense G.
Assistant to the Director, Student Financial Services
B.A., Fisk University; M.A., Michigan State University
CANSFIELD, John H.  
Chairperson, Student Development Services  
B.A., Michigan State University; M.A., Michigan State University;  
Ed.D., Western Michigan University

CARADINE, Bruce W.  
Manager-Operations/Energy, (Evening College), Physical Plant  
B.S. Central Michigan University; M.A. Central Michigan University

CARLSTEIN, Harold R.  
Transportation Training Specialist, Truck Driver Training Program

CARLSON, Stephen C.  
Associate Professor, Science  
B.A., Western Michigan University; Ph.D., Purdue University

CAROL, Mary M.  
Instructor, Dance Program, Performing Arts  
B.F.A., University of Montana

CARPENTER, Dorothy L.  
Professor, Health Careers  
R.N., E. W. Sparrow Hospital School of Nursing;  
B.S., Central Michigan University

CARTWRIGHT, Brenda  
Program Director, Sign Language/Interpreter Training  
B.S., Ball State University; M.S., Indiana University

CHIARAVALLI, Trudy K.  
Professor, Accounting and Computer Academic Programs  
B.A., University of Michigan; M.B.A., Michigan State University

CHIWOCHA, Tapara A.  
Assistant Professor, Humanities  
B.A., College University; M.A., Michigan State University;  
Ph.D., Michigan State University

CHURCH, Marvin P.  
Professor, Architecture, Engineering & Construction  
B.S.C.E., TriState College; M.S.E., (Civil) University of Michigan; Graduate  
Student, University of Michigan, Ohio State University, Wayne State University  
and Michigan State University

CLARK, LuAnne  
Instructor, Science Department  
B.S., Aquinas College; M.S., Michigan State University

COLLINS, Donald M.  
Assistant Professor/Counselor, Student Development Services  
B.A./B.S., University of Illinois; M.A., Michigan State University

CRANSON, K. Rodney  
Professor, Science  
B.A., Michigan State University; M.A.T., Michigan State University;  
Graduate Study, Michigan State University

CSONDOR, Dennis  
Lab Technician, Aviation  
B.S., Michigan State University

CUNNINGHAM, Paula D.  
Instructor, Management Systems  
B.A., Michigan State University

CURRY, Georgia E.  
Administrative Assistant, President's Office  
A.A., Washtenaw Community College; Certified Professional Secretary;  
B.A., Northwood Institute

CARR, William R.  
Dean, Division of Technology & Applied Sciences  
B.S., Michigan State University; M.A., Michigan State University

DAVIDSON, David J.  
Assistant Director of Personnel  
B.S., University of Dayton, M.A., Michigan State University

DECK, Sally Ann  
Program Director, Dental Auxiliary, Health Careers  
B.S., University of Michigan; M.S., University of Michigan

DECKINGA, Glenn A.  
Systems Analyst II, Information Systems & Computer Services  
A.B., Lansing Community College

DENARDO, William F.  
Director, Manufacturing Technology  
B.S., University of Minnesota; M.A., Western Michigan University

DIAZ, Manuel G.  
Chairperson, Social Science  
M.A., University of Michigan; Ph.D., University of Michigan

DINGMAN, Virginia  
Instructor, Architecture, Engineering & Construction  
B.A., Michigan State University; M.A., Michigan State University

DONOHUE, Pamela  
Professor, Dental Auxiliary, Health Careers  
A.A., Ferris State College; B.S., Ferris State College M.A., Aquinas College

DOUGLAS, Philip J.  
Professor, Mathematics & Computer Science  
B.S., Michigan State University; M.A.T, Michigan State University;

B.A., Michigan State University; M.A., Michigan State University

DUCAT, John C.  
Professor, Social Science  
B.A., Michigan State University; M.A., Michigan State University;  
Ph.D., Michigan State University

DUNHAM, Dale A.  
Chairperson, Media Department  
B.S., Ferris State College; M.A., Michigan State University; Graduate Study, Temple University and Michigan State University

EBERT, Irving L.  
Assistant Professor, Automotive & Industrial Trades  
A.S., Lansing Community College

EDMUNDS, Peter A.  
Professor, Humanities  
B.A., University of Richmond; M.A., University of Richmond; Diploma for  
Advanced Graduate Study, Michigan State University

EGGLESTON, William  
Professor, Manufacturing Engineering  
A.A.S., Ferris State College; B.S., Ferris State College;  
M.A., Michigan State University

ELSE, William R.  
Manager, Data Base & Application Programming Group,  
Information Systems & Computer Services  
Certificate, Lansing Community College; Certificate, Data Processing,  
Michigan State University

ENGEL, Elfrieda A.  
Professor, Humanities  
B.A., Michigan State University; M.A., University of Chicago;  
Ph.D., Michigan State University

ENGSTROM, Paul W.  
Assistant to Director, Physical Plant  
B.A., Michigan State University; M.B.A., Michigan State University

EVERY, Robert A.  
Program Director, Intramural Athletics, Physical Education & Athletics  
A.A., Lansing Community College; B.S., Northwood Institute;  
M.A., Michigan State University

FARLEY, Kimberly  
Lab Technician, Library Information Services  
A.A., Lansing Community College; B.A., Michigan State University

FARRIS, John  
Assistant Professor, Hospitality Systems  
A.A., Lansing Community College; B.S., Michigan State University

FERRERINO, Robert C.  
Coordinator/Instructor, Management Systems  
B.S., Northern Illinois University; M.B.A., Northern Illinois University;  
J.D., Cooley Law School

FINN, Rexina A.  
Program Director-Emergency Medical Services, Health Careers  
B.S., Michigan State University

FITZGERALD, Martha A.  
Coordinator, Mental Health & Aging Education Consortium,  
Center for Aging Education/Division of Student Personnel Services  
B.A., M.A., Specialist in Aging Certificate, University of Michigan

FOLLICK, Duane  
Teaching Technician, Automotive & Industrial Trades

FRANK, Arthur V.  
Associate Professor, Physical Education & Athletics  
B.S., Central Michigan University; Graduate Work, Michigan State University
Franke, Thomas L.
Chairperson, Academic Enrichment Services
A.B., Columbia University; M.A., Wayne State University; M.Ed., Frostburg
State College; Ph.D., University of Maryland

Furniss, Daniel
Program Director, Corrections, Criminal Justice Systems
B.S., Michigan State University

Gannon, Philip J.
President
B.A., Albion College; M.A., Michigan State University;
Ph.D., Michigan State University

Gargett, Richard K.
Professor, Architecture, Engineering & Construction
A.S., Lansing Community College; B.S., Michigan State University;
M.A., Michigan State University; Graduate Study, Michigan State University

Garrison, Mary Lou
Associate Professor-Counselor, Student Development Services
B.S., Western Michigan University; M.A., Western Michigan University;
Ed.S., Western Michigan University

Gartthe, Ronald
Director, Architecture, Engineering & Construction
B.S., Central Michigan University; M.A., Central Michigan University

Gearhart, Anne A.
Professor, Office Systems
B.S., Ferris State College; M.A., Michigan State University

Geer, Carol
Associate Professor, Management Systems
B.S., University of Dayton, M.A., Michigan State University;
Ph.D., Michigan State University

Gibbs, Darwin K.
Aviation Maintenance Training Coordinator, Aviation
Aviation Airframe & Powerplant Mechanic, Cai-Aero Technical School

Gorton, Ralph J.
Professor, Science
A.S., Northwestern Michigan College; B.S., Michigan State University;
M.S., Michigan State University

Gould, John H.
Transportation Training Specialist, Truck Driver Training
A.S., Blue Mountain Community College

Greiner, David G.
Lab Technician, Accounting & Computer Academic Programs
A.B., Lansing Community College; B.S., Southern Illinois University

Green, Evelyn L.
Assistant Professor, Science
B.A., University of Illinois, M.A., University of Missouri

Greene, James C.
Program Director, Telecommunication
B.A., Providence College; M.Ed., Boston College; M.A., Michigan State
University; Ph.D., Michigan State University

Greening, Nancy
Assistant Professor, Media Department
B.S., Michigan State University; M.S., Central Michigan University

Greer, Daniel R.
Lab Technician, Manufacturing Technology
A.S., Lansing Community College

Griffith, H. Ronald
Program Director/Radiologic Technology, Health Careers
A.A., Washtenaw Community College; B.S., University of Michigan;
M.S., University of Michigan

Gurchiek, Karen
Professor, Office Systems
B.S., Wayne State University; M.A., Michigan State University

Gwynn, VanThuy N.
Coordinator, Special Projects & Research, President's Office
B.S., M.S. University of Saigon; M.S., Ph.D., Michigan State University

Haase, Carolyn L.
Math Lab Coordinator, Mathematics & Computer Science
B.S., Bethany College

Halsead, Jacqueline
Publications Manager, Community Relations

Hamilton, Kenneth C.
Associate Professor, Social Science
B.A., Western Michigan University; M.A., Western Michigan University

Hammock, Nancy
Instructor, Industrial Engineering
B.S., Michigan State University; M.A., Michigan State University

Hayen, Deanna K.
Chairperson, Humanities
B.A., University of Kansas; M.A., San Francisco State University;
Ph.D., University of Michigan

Haney, John
Associate Professor, Accounting and Computer Academic Programs
B.A., Michigan State University; M.B.A., Michigan State University

Haneski, Deanna D.
Professor, Industrial Engineering
B.S., State College at Bridgewater; M.S., Purdue University

Hanley, John
Associate Professor, Architecture, Engineering & Construction
B.A., Michigan State University; M.B.A., Michigan State University

Hardy, Mary Jo
Instructor, Physical Education, Women's Volleyball Coach
A.D., Delta College; B.S., Michigan State University;
M.A., Michigan State University

Harris, Denise E.
Financial Aid Assistant, Student Financial Services/Veterans Affairs
B.A., Michigan State University

Hartwig, Joan E.
Professor-Counselor, Admissions
B.S. Michigan State University; M.A., Michigan State University

Hayner, David A.
Transportation Training Specialist, Truck Driver Training

Hays, Patricia
Professor, Continuing Education, Health Careers
B.S.N., Michigan State University; M.S.N., Wayne State University

Haward, Walter
Director, Automotive & Industrial Trades

Heard, John W.
Assistant to the Registrar, Veterans Services
B.S., Alcorn State University; M.A., Michigan State University

Heather, William H.
Professor, Social Science
B.A., Denison University; M.Div., Union Theological Seminary;
Ph.D., Michigan State University

Heisler, Gary
Associate Professor, Accounting & Computer Academic Programs
A.B., Lansing Community College; B.S., Manchester College;
M.A.T., Michigan State University

Hilton, Dale M.
Vice President for Administration, President's Office
A.A., Muskegon Community College; B.A., Michigan State University;
M.A., Michigan State University; Ph.D., Michigan State University

Hill, Gilbert M.
Assistant to the Director, Admissions
A.A., Lansing Community College; B.S., Michigan State University;
M.A., Michigan State University

Hoke, Helen R.
Associate Professor, Mathematics & Computer Science
B.S., Capital University; M.A., University of Michigan

Holda, William P.
Director, Management Systems
B.A., Olivet Nazarene College; M.B.A., Michigan State University

Holt, Karen
Coordinator of Handicapped Student Services
B.A., Michigan State University; M.A., Michigan State University

Hopkins, Howard S.
Associate Professor, Academic Enrichment Services
B.A., Michigan State University; M.A., Michigan State University;
Graduate Study, Michigan State University

Horton, William M.
Associate Professor, Science
B.S., University of Maryland; M.S., Michigan State University

Howey, Kathleen
Instructor, Health Careers
A.A., Lansing Community College

Howell, Richard N.
Assistant Professor, Accounting & Computer Academic Programs
B.S., Manchester College
MADISON, Sally K.
Associate Professor, Academic Enrichment Services
A.A., Muskegon Community College; B.A., Wheaton College; M.A., Michigan State University; Specialist’s Certificate, Michigan State University

MAGAR, Sheila
Instructor, Industrial Engineering
B.A., Walsh College

MANION, John W.
Associate Professor, Communication
B.A., Washington State University; M.A., Washington State University; Doctoral Candidate Michigan State University

MANTY, Francis P.
Instructor, Industrial Engineering
B.S., Northern Michigan University

MARTINEZ, Tony
Lab Technician, Architecture, Engineering & Construction

MARTINI, Audrey Z.
Instructor, Criminal Justice and Law Systems
B.S., Michigan State University; M.S., Wayne State University

MASTERSON, Madeline M.
Assistant Professor, Mathematics and Computer Science
B.A., College of Mt. St. Vincent; M.A.T., Purdue University; B.A. College of Mt. St. Vincent

MATTSON, Morton E.
Director of Resource Development, Business Office
B.S., Central Michigan University; M.A.T., Michigan State University; Graduate Study, Cornell University

MAurer, Gordon R.
Associate Professor, Automotive & Industrial Trades

MCALLEN, John T.
Associate Professor, Academic Enrichment Services
B.A., Michigan State University; M.A., Michigan State University

McCARTHY, Sarah A.
Assistant Professor, Health Careers
B.S.N., Michigan State University; M.M., Aquinas College

McCREA, Bruce
Associate Professor, Management Systems
A.B., Miami University of Ohio; M.PhiL, Yale University

MCENARY, Stephen A.
Program Director, Employment Placement Services
A.A., Lansing Community College; B.A., Michigan State University; M.A., Michigan State University

McKee, Richard G.
Instructor, Industrial Engineering
B.S., University of Michigan

McKINSTRY, Douglas
Director, Physical Plant
B.S., University of Illinois, M.A., Michigan State University

MEADOWS, Lee E.
Assistant Professor, Management Systems
B.A., Michigan State University; M.A., Michigan State University; Ph.D., Michigan State University

MEEKER, Connie J.
Instructor, Health Careers
B.S.N., University of Delaware; M.S., University of Arizona

MEIER, Dennis E.
Associate Professor, Social Science
B.A., Michigan State University; M.A., Michigan State University

MELOCHE, Ronald A.
Instructor, Architecture, Engineering & Construction
B.A., Michigan State University; M.A., Michigan State University

MIAK, Timothy A.
Professor, Academic Enrichment Services
B.A., Grand Valley State College; M.A., Michigan State University

MILLBAUER, William, Jr.
Associate Professor, Automotive & Industrial Trades

MILLS, Maria C.
Professor, Dance Program, Performing Arts
School of Voice and Dance of Spain

MILTON, Kirby M.
Professor, Photo Technology
B.F.A., Michigan State University; M.A., Michigan State University

MIRKIL, Dorothy J.
Associate Professor, Health Careers
R.N., Hackley Hospital School of Nursing; B.S., Michigan State University; M.S.N., Wayne State University

MOORE, Josselyn
Instructor, Social Science Department
A.B., Washington University; M.A., Hunter College; Doctoral Program, University of Michigan

MORCIGLIO, Jean F.
Instructional Resource Coordinator, Instructional Resources Center for Student Support
A.A., Mott Community College; B.A., Michigan University; Graduate Study, Ferris State College; Masters Candidate, Ferris State College

MORROW, Addie J.
Associate Professor-Counselor, Center for Student Support
B.S., Eastern Michigan University; M.A., Western Michigan University

MORSE, Dennis H.
Program Director, Law Enforcement, Criminal Justice and Law Systems
B.S., Michigan State University; M.A., Michigan State University

MOTZ, William
Associate Professor, Management Systems
B.A., Michigan State University; M.B.A., Michigan State University

MULL, Richard D.
Program Director, Physical Education
B.A., Michigan State University; Graduate Study, Michigan State University

NELSON, Richard B.
Instructor, Management Systems
B.S., Central Michigan; M.A., Michigan State University

NEVAI, Janos W.
Professor, Physical Education
M.A., Magyar Teteveseti Foiskola; Graduate Study, Michigan State University

NEWMAN, Bruce G.
Vice President for Business & Finance
Business Office Graduate, Lansing Business University; B.A., Detroit Business College

NILSSON, Carl J.
Chief of Aircraft Maintenance, Aviation

NOBIS, Elizabeth L.
Instructor, Criminal Justice and Law Systems
B.S., Western Michigan University; J.D., Thomas M. Cooley Law School

NOLDON, Donna
Associate Professor, Communication
B.A., M.A., University of Michigan

NOVAK, David L.
Assistant Professor, Social Science
B.A., Jackson College; M.A., Western Michigan University

OGILVY, Robert E.
Associate Professor, Architecture, Engineering & Construction
A.S., Macomb Community College; B.S., University of Michigan

OMLINDSON, Bruce K.
Associate Professor, Humanities
B.A., Luther College; M.A., Washington University; Graduate Study, Michigan State University; University of Minnesota, Colorado State University

ONOFRYTON, Jerry K.
Associate Professor, Science
B.S., Michigan State University; M.S., Michigan State University

OSBORNE, James C.
Director, Career Exploration and Assessment Center
B.A., Western Michigan University; M.A., Western Michigan University; Doctoral Candidate, Michigan State University

OWEN, Penny L.
Instructor, Theatre, Performing Arts
B.S., Michigan State University; Drama Studio, London, England

PACE, Rita K.
Coordinator/Instructor, Accounting and Computer Academic Programs
B.A., Michigan State University; M.B.A., Michigan State University

PARKER, Charles F.
Director, Accounting & Computer Academic Programs
B.S., Michigan State University

PECKHAM, Linda
Associate Professor, Communication
B.A., Michigan State University; M.A., University of Michigan; Graduate Study, Cambridge University, England
SEPULEDA-VAZQUEZ, Gloria  
Associate Professor, Reference Librarian  
Library Information Services  
B.A., University of Puerto Rico; M.A., Michigan State University;  
M.A.L.S., University of Michigan  

SHAFFER, Marian  
Assistant Professor, Office Systems  
B.A., University of Northern Iowa; M.A., Michigan State University;  
Ph.D., Michigan State University  

SHAH, Vikram  
Professor, Accounting and Computer Academic Programs  
S.E., Gujarat University; B.S., University of Michigan;  
M.B.A., Michigan State University  

SHEETS, Donald  
Instructor, Architecture, Engineering & Construction  
A.S., Lansing Community College  

SHRINER, Neil G.  
Director, Student Financial Services  
B.A., Anderson College; M.A.Ed., Ball State University;  
Ed.D., Michigan State University  

SHULMAN, Bennotti D.  
Associate Professor, Criminal Justice and Law Systems  
B.S., Syracuse University; J.D., Temple University  

SJOQUIST, Douglas P.  
Instructor, Humanities  
B.A., Northern Michigan University; M.A., University of Hawaii;  
Doctoral Candidate, Michigan State University  

SMITH, Deleksy  
Coordinator, Small Business Development Center  
A.B., Lansing Community College  

SMITH, John Dale  
Program Director, Performing Arts  
B.M., Bowling Green State University; M.M., Michigan State University  

SMITH, Nan L.  
Director, Accounting & Payroll  

SMYRNA, Stanley  
Instructor, Manufacturing Technology  
B.S., Michigan State University  

SMYTH, Marc  
Coordinator of Telelearning, Media Department  
A.B., Lansing Community College  

SPAGLER, Jerry L.  
Associate Professor, Aviation Technology  
B.S., Sierra Heights College  

SPEES, Esther H.  
Associate Professor, Office Systems  
B.S., Ball State University  

SPICCHIO, Vicki  
Assistant Professor, Dental Auxiliary, Health Careers  
A.A.S., Ferris State College  

STAMFORD, Ralph C.  
Senior Systems Analyst, Information Systems & Computer Services  
B.S., Slippery Rock University  

STANDRIDGE, Larry A.  
Director, Continuing Education  
B.A., Baylor University; M.R.E., Southwestern Seminary;  
Ph.D., Ohio State University  

STAVROS, Jacqueline Baran  
Small Business Consultant/Counselor, Small Business Development Center  
B.A., Wayne State University  

STEERNS, Barry G.  
Associate Professor-Counselor, Student Development Services  
B.A.E., University of Florida; M.Ed., University of Florida  

STECK, Douglas E.  
Professor, Humanities  
B.A., Denison University; M.A., Michigan State University;  
Ph.D., Michigan State University  

STEFFENS, David B.  
Systems Analyst I, Information Systems and Computer Services  
A.B., Lansing Community College  

STEWART, M. James  
Professor, Mathematics & Computer Science  
B.A., Michigan State University; M.S., Michigan State University;  
Ph.D., Michigan State University  

STOPPEL, Sarah L.  
Lab Technician, Library Information Services  
A.B., Lansing Community College; B.A., Western Michigan University  

STRAEYER, Norman G.  
Associate Professor, Manufacturing Technology  
A.S., B.S., Ferris State College  

SULLIVAN, Ellen  
Program Director, Center for Aging Education  
B.A., Seton Hill College; M.S.W., University of Michigan;  
Specialist in Aging Certificate, University of Michigan;  
Doctoral Candidate, University of Texas Austin  

TAYLOR, Jacqueline D.  
Vice President for College & Community Relations, President's Office  
A.B., Lansing Community College; B.S., Aquinas College;  
M.A., Michigan State University, Ph.D., Michigan State University  

TAYLOR, Ronald M.  
Professor, Science  
B.S., Michigan State University; M.S., Michigan State University;  
Ph.D., Michigan State University  

TEITELBAUM, Barry R.  
Associate Professor, Science  
B.S., Michigan State University; M.A., Michigan State University;  
Graduate Study, Michigan State University  

TENNIS, Gayland I.  
Director, Aviation  
B.A., Michigan State University; M.A., Central Michigan University  

THEROUX, John  
Program Director, Truck Driver Training  
B.S., Murray State College  

THOMAS, Morris G.  
Professor, Social Science  
B.S., Northwestern Michigan College; M.A., Michigan State University  

THOMAS-GILKEY, Bettye  
Account Coordinator, Business & Industry Institute  
A.A., Kellogg Community College; B.A., Summer Arbor College  

THOMMEN, John  
Associate Professor, Health Careers  
A.A.S., Ferris State College; B.S., Ferris State College  

TOOMEE, Robert L.  
Instructor, Aviation  
A.A., Lansing Community College;  
B.A.A., A & P License, Alabama Institute of Technology  

TRAN, Lai N.  
Bilingual Coordinator/Counselor, Student Development Services  
B.S., M.S. University of Saigon;  
D.Sc., Université de Marseille (France)  

TROSTY, Francia  
Instructor, Commercial Art & Design  
B.A., Hunter College, CUNY; M.F.A., Michigan State University  

TURCOTTE, Patrick C.  
Associate Professor, Architecture, Engineering & Construction  
A.S., Lansing Community College  

TURNER, F. Ray  
Program Director, Dance/Theater, Performing Arts  
B.A., Michigan State University  

TYLER, June L.  
Director, Purchasing  
A.B., Lansing Community College  

VANKEMPEN, Gary  
Associate Professor, Science  
B.A., Hope College; Ph.D., Michigan State University  

VEETE, William  
Associate Professor, Aviation  
A.S., Kirland Community College; B.A., Detroit Institute of Technology  

VOSSLER, Stephen L.  
Instructor, Industrial Engineering  
B.S., Michigan State University
WALCZAK, Patricia J.
Assistant Professor, Accounting and Computer Academic Programs
B.A., Lansing Community College; B.A., Michigan State University

WALKER, Rozalia
Program Director, Health Education/Rehabilitation, Health Careers
R.N., St. Lawrence Hospital School of Nursing

WALLACE, Francis T.
Professor, Hospitality Systems
A.A., St. Petersburg Junior College; B.A., University of South Florida;
M.A., University of South Florida; Ph.D., Michigan State University

WALSH, Marion H.
Assistant Professor, Management Systems
B.A., University of Michigan; M.A., University of Michigan;
Graduate Study. University of Michigan and Michigan State University

WARD, Teri L.
Coordinator/Instruction, Accounting and Computer Academic Programs
B.S., Western Michigan University

WARREN, Joseph A., III
Associate Professor, Humanities
B.A., Michigan State University; M.A., Michigan State University;
Ph.D., Michigan State University; J.D., Thomas M. Cooley Law School

WATSON, Claude M.
Professor, Mathematics & Computer Science
B.S., Michigan State University; M.S., Michigan State University

WAWRO, Raymond W.
Acting Director, Information Systems & Computer Services
B.S., Michigan State University

WEBB, Helen
Director, Industrial Engineering
B.A., M.I.T., Michigan State University

WEIRICH, Jean L.
Instructor, Office Systems
B.A., Michigan State University; M.A., Michigan State University

WELCH, Robert
Instructor, Architecture, Engineering & Construction
B.S., Michigan State University

WHITE, Jane Benton
Director, Criminal Justice and Law Systems
B.A., Michigan State University; M.A., Michigan State University

WHITEHEAD, Harry
Instructor, Aviation
A.A., Western Michigan University;
A. & P. License, Western Michigan University

WILLCUTT, Donald F., II
Transportation Training Specialist, Truck Driver Training

WILLIAMS, Mildred L.
Director, Office Systems
B.A., Michigan State University; M.A., Michigan State University;
Ed D., Michigan State University

WOMBSLOD, David H.
Manager, Computer Operations Systems
Information Systems and Computer Services Certificate,
State Data Systems Institute

WOOD, Sharon
Instructor, Commercial Art & Design
B.S., University of Connecticut; B.A., University of Minnesota;
M.F.A., Southern Illinois University

ZIBBEL, Marjorie A.
Program Director, Management Development Center
B.A., Capital University; M.A., Michigan State University

ZIEGENHAGEN, Steven P.
Teaching Technician, Aviation
B.S., Western Michigan University

ZIMMERMAN, Dan H.
Assistant to the Director, Student Financial Services
B.A., Michigan State University; M.A., Michigan State University

ZUHL, William A.
Director, Student Activities
B.A., Kalamazoo College; M.A., Western Michigan University; Graduate
Study, Michigan State University and North Texas State University

ZUSSMAN, Mark R.
Assistant Professor, Reference Librarian/Library Information Services
B.A., Wayne State University; M.A., University of Michigan;
M.A.L.S., University of Michigan
