

State Professional Licensure and Certification Boards

Federal regulations require Lansing Community College (LCC) to publicly disclose, for each educational program designed to meet the educational requirements for a specific professional license or certification required for employment in an occupation (or advertised as meeting those requirements), information about whether the successful completion of each program would meet those requirements in a given US state or territory. These public disclosure requirements apply to all programs, regardless of their modality (e.g., face to face, online, and hybrid programs). LCC discloses the required information related to the educational requirements for professional licensure and certification in the table below.

All current and prospective students are encouraged to contact the applicable professional licensure/certification boards in their respective states for additional information regarding professional licensure/certification requirements, including, without limitation, information regarding any non-educational requirements (such as work experience, background clearance, or examination by outside entities, such as bar examinations). State licensure and certification requirements are subject to change at any time. It is the responsibility of the student to stay informed about the requirements applicable to their chosen profession.

Each state has a designated SARA State Portal Entity (SPE) to oversee SARA-participating institutions. Contact information for [state portal entity](#).
