'The Casserole Play' opens 2026-2027 Theatre Season

The 2026-2027 Theatre season opened with the world premiere of "Layers, Or the Casserole Play." Audiences enjoyed the fast-paced, quirky comedy that featured only three actors performing 50+ roles. The play, which told the true story of Canadian immigrant Elmire Jolecour, focused on the legend that Jolecour invented the modern-day casserole in 1866. The cast received a standing ovation on the final Friday evening performance.

Music Faculty and Students Perform at Rotary

New Music Faculty Dr. LaVonté L. Heard and Iskander Zakirov performed for the Rotary Club of Lansing on Oct. 9. Two weeks later, students Lyndsey Camp and Ethan Curry, with accompanist John Dillingham, performed for the same group. Camp and Curry sang a duet they are working on in MUSC 237: Musical Theatre Performance, taught by Kelly Stuible-Clark.

LCC Team Leads Workshop at Imagining America National Gathering

Employees Anne Heutsche, Annescia Dillard, Barb Clauer and Melissa Kaplan led a well-attended and well-received workshop on Oct. 23 at the University of California-Davis, showcasing **LCC's Take A Stand! Sit In!** social justice forum at the annual Imagining America National Gathering. The team presented the history, purpose, process and application of Take A Stand. The forum brings together guest artists, faculty and staff to lead sessions that "take a stand" on topics they're teaching, researching or creating, and attendees "sit in" to learn and develop their own practices.

Take A Stand was founded in 2020 by Heutsche (History) and two other faculty, Brad Hicks (Interdisciplinary Humanities) and Pam Smith (Sociology), along with Dillard (CTE) and Kaplan (Arts & Sciences Division). Since 2020, the team has created nine forums with dozens of sessions, plus a successful community partnership with the Capital City Film Festival.

Imagining America attendees learned about the 2026 theme of "Joy as Resistance," and experienced that joy in creating community poetry led by Clauer (English) who founded the **LCC Community-Generated Poetry Project**.

Since 2017, LCC has been a member of **Imagining America**, a civic-engagement consortium of more than 100 academic institutions and cultural organizations dedicated to strengthening the arts, humanities and design in higher education with approaches that foster community partnerships, public scholarship and social equity.

Career and Employment Services Prepares Students for Careers

Career and Employment Services has offered a variety of employment-related events and activities for students so far this semester.

In September, they:

- Hosted the Non-Profit and Government Agency Fair
- Hosted a table at the Campus Resource Fair
- Gave a presentation to the Honors Class
- Hosted Trilogy Health Services for on-campus recruitment
- Organized and participated in two days of the Student Affairs Campus Resource Crawl
- Held two sessions (virtual and in-person) on Understanding Business Career Pathways
- Ran a pop-up event in TLC
- Joined Science and Math for their "Snacktivities" table

In October, they hosted two résumé workshops and a workshop on utilizing artificial intelligence to search for jobs and internships.

All of these events engage students outside of the classroom and support efforts to prepare students for career readiness.

Japanese Club Hosts Calligraphy Workshop and Cultural Exchange

The Japanese Club provides students with opportunities to deepen their knowledge of Japanese language and culture through educational activities, cultural experiences and community engagement.

On Saturday, Oct. 17, the Japanese Club welcomed Yuka Yoshida, LCC Japan Outreach Initiative Coordinator, to lead a Japanese calligraphy workshop in the Learning Commons. Club members were joined by three exchange students from Housei University in Tokyo, creating a meaningful cultural exchange experience.

Yoshida began the event with a presentation on the history and significance of Japanese calligraphy before leading a hands-on workshop. Participants learned how to write the kanji character for autumn (秋) and had the opportunity to practice writing additional characters of their choice.

The event also included green tea and a variety of traditional Japanese snacks, provided by the Japanese Club and its members. Eight LCC students and three Housei University students participated in the workshop.

The Japanese Club was pleased to offer this engaging cultural experience, which allowed students to explore an important aspect of Japanese tradition while connecting with visitors from Japan.

Nearly 100 Students Join Academic Advising for Group Registration Sessions

The Academic Advising team piloted Group Registration sessions during the August and October registration periods to increase access to advising and course planning for returning students. During the October sessions, advisors assisted 93 students over two days.

These sessions complemented regular appointments, preparation for new student Registration Sessions, and other advising responsibilities. Students signed up for the event in advance, allowing advisors to review their information and prepare their MAPs ahead of time.

Overall feedback was positive, with students finding the sessions helpful and the timing particularly beneficial as spring registration opened.

College Launches 'Success Tips' Digital Weekly Reminders

LCC employees from many different areas of the college were tasked with developing a fall semester project that would support student success as part of the Math Readiness Grant in the Science and Math Department. One group's project involved developing weekly reminders and encouragements for the college's digital signs and social media.

The goal was to provide timely reminders to students in support of their success. For example, reminders near exam time nudged students to make an appointment with a tutor or get assistance from their instructor. Reminders near Thanksgiving suggested they take stock of who and what is helping them this semester.

The following LCC areas were involved in the development of this project: the Learning Commons' tutors, Academic Success Coaches, Academic Advising, Arts & Sciences teaching faculty and administrators, and the Center for Student Access. The "Success Tips" project will continue as a regular addition to the internal digital signs in future semesters.

Students Volunteer at Potter Park Zoo

Students from the Outdoor Connections club volunteered for Potter Park's Boo at the Zoo on Sunday, Oct. 18. This was an excellent opportunity for students to give back to and interact with the community. Club members dressed for the occasion as a couple of cow-pokes, a cow, and even a dinosaur. They ran carnival games, manned a giant slide, and offered kid-friendly "ax" throwing. It was a spooktacular time on a beautiful fall day!

Biology Faculty Presents DNA Sequencing Workshop at Statewide Conference

On Oct. 9-10, five Biology faculty – Lu Anne Cuthbert, Robert Halgren, Adam Jaros, Melinda Wilson and Tammy Wilkinson – traveled to the Michigan Community College Biologists (MCCB) fall conference hosted by Saint Clair County Community College in Port Huron.

While attending the conference, they participated in a two-day Nanopore DNA Sequencing Workshop, organized by LCC's Melinda Wilson in collaboration with Cold Spring Harbor Laboratory. The workshop provided participants with hands-on experience at every stage of the DNA sequencing pipeline. Using leaf samples brought from home, participants extracted DNA, applied DNA barcoding techniques, and sequenced samples using a Nanopore DNA sequencer. The workshop concluded with an introduction to bioinformatics using DNA Subway 2.0, where participants analyzed their sequencing data and identified their leaf samples.

The workshop demonstrated how accessible DNA sequencing technology has become for community college classrooms. Consider:

+ Nanopore sequencers are portable, approximately the size of a candy bar, and relatively inexpensive.
+ DNA barcoding allows for multiplexing samples, which reduces sequencing runs and reagent costs.
+ The entire process can be completed within a two-day instructional period, making it a practical tool for laboratory courses.

Outside the workshop, conference attendees participated in a simulation at the Challenger Learning Center, a facility dedicated to the crew of the Space Shuttle Challenger. Participants were assigned to roles either on the flight crew or mission control team and worked together to complete their mission objectives. In addition, Lu Anne Cuthbert presented a session titled "Science Outreach: Meet the students wherever they are," which highlighted the many innovative and engaging ways LCC SAM faculty connect with students and the community.

People-Friendly Classroom Event Brings Students and Employees Together

Science and Math Department Meet and Greet Series continued on Oct. 13 with a thought-provoking event, People-Friendly Classroom, intended to bring together those who are passionate about improving the learning environment at LCC. Prior to the event, students had the opportunity to write on posters to share their ideas about the following questions:

+ What advice would you give to create a better learning environment?
+ Can you share a moment when you felt especially included – or excluded – in a classroom?
+ What barriers to learning do you see that others might not always notice?
+ As a student, what helps you feel safe speaking up or asking questions?
+ Do you feel your voice is heard at LCC?

Students came ready with questions, and the conversations sparked valuable discussions, helpful advice and plenty of ideas. We also highlighted resources and opportunities available to students. We are very excited to have opened the communication between students, faculty and administrators.

Students Take Field Trip to Eaton County Park

Collaboration, learning and adventure highlighted the day as faculty and students from Biology, Geology and Geospatial Sciences joined an Oct. 21 field trip to Lincoln Brick Park. Eaton County Parks Naturalist Ben Savoie led a hike through native prairie habitat, dense forest and the depths of an abandoned quarry.

Along the way, students explored topics such as multi-ecosystem management, invasive species, unique geological features, fossils and the history of the park, including the ruins of the old brick factory. Students also gained hands-on experience flying drones, discovering new ways to collect data, searching for fossils, and seeing how drone technology can be used in natural resource management.

MCS Conversations Focuses on Creativity and Student Mindset in Math Classes

The 8th session of MCS Conversations was held Friday, Oct. 23, with MCS faculty, division and program deans, and invited guests in attendance. MCS Conversations began in fall 2024 to improve faculty collaboration and encourage the sharing of teaching and learning ideas. October's two presenters followed in that tradition by sharing their ideas on mathematics pedagogy and assessment.

The first paper, "Creativity in Calculus," was presented by Professor Richards Abraham Edwards from Michigan State University's Lyman Briggs College. The following questions were examined:

+ What does it mean to be creative in a calculus classroom?

+ How can we create more opportunities for students to experience mathematics as a uniquely human activity?

The presenter shared recent works on mathematical creativity through the lenses of mathematical discourse and "transgression": small acts of questioning, risk-taking, boundary-crossing and trying something unexpected that can move mathematical thinking in new directions. These ideas were then connected with themes from Francis Su's "Mathematics for Human Flourishing," particularly his invitation to think beyond mathematics as a collection of skills and toward the human desires and virtues that mathematical activity can cultivate.

The second paper, presented by LCC's Melanie Hausinger, was titled "Right Answers, Wrong Answers and Good Answers." The focus was on the mindset of students when working on a math problem; students often focus on just getting the right answer. Instructors, however, often care less about the answer itself than about a student's thought process and ability to explain or interpret their solution. How can instructors use grading and feedback to encourage students to think more deeply about the quality of an answer, beyond simply saying whether it is right or wrong? Participants were put into groups and provided examples of students' work for deliberation on best grading practices.

At the conclusion of the program, participants were treated to lunch and enjoyed further discussions on teaching methodologies and effective pedagogical strategies with peers and the resource persons.

STEAMfest 2026 Brings Science, Math and Art to Life for K-6 Students

On Saturday, Oct. 24, LCC welcomed area children and families to STEAMfest 2026, a free, interactive event designed to spark curiosity, inspire creativity and encourage a love of learning among students in kindergarten through sixth grade. With a tradition spanning more than 30 years, STEAMfest has become a favorite community event at LCC.

This year's event transformed classrooms throughout the Arts & Sciences Building into 40 hands-on experiences in science, technology, engineering, art and math (STEAM). LCC faculty from disciplines including science, math, art and anthropology joined forces with community partners such as the Capital Area District Library, Preuss Pets and MSU Science Theatre to bring these engaging activities to life. LCC students also played an important role, volunteering their time to assist with activities, guide participants and help ensure a successful event.

Armed with a map and a sense of adventure, families explored the building at their own pace, choosing from a wide variety of activities designed to make learning fun. Young scientists investigated what owls had eaten for dinner by dissecting owl pellets, while budding engineers put their creativity to work in Cardboard Construction and explored the basics of computer programming in Programming with Alice in Wonderland. Other participants traveled through the universe during Planetarium Shows, practiced statistics using colorful candies in M&M Math, and witnessed exciting chemical reactions in Chem Demos.

With something to capture nearly every interest, STEAMfest offered children the opportunity to discover new passions, ask questions, experiment and experience the excitement of learning beyond the traditional classroom.

The event would not be possible without the dedication and enthusiasm of LCC faculty and staff, student volunteers, and community partners who generously shared their time and expertise to make this special day a success.

Science and Math Engage Students in 'Snacktivities'

SAM the Duck made two more splashy appearances on the Gannon Highway in October for Snacktivities. On Oct. 12, students stopped by to spin the prize wheel and answer questions, then – of course! – grab a snack. On Oct. 26, students built "edible soil" out of vanilla wafers, graham crackers, gummy worms and more. Nobody left empty-handed; every student walked away with a prize and a treat!

Behind the games was a great team effort. Science and Math program advisors teamed up with tutors from the Learning Commons and staff from Career and Employment Services to create a warm greeting for students to stop, play and chat. Together, we connected with about 60 students through casual conversations. Several of those conversations turned into opportunities to connect students with campus services and resources. A little friendly competition, a few snacks and SAM the Duck helped open the door to meaningful student connections!

LCC Hosts Registered Student Organization Recruitment and Fundraising Fair

On Oct. 28, Student Life hosted a Halloween-themed LCC registered student organization Recruitment and Fundraising Fair, providing a successful opportunity to connect students with campus organizations. This fair promoted student engagement by increasing awareness, encouraging connections and helping student clubs recruit new members.

The event is held each semester to reinforce the importance of student organizations in fostering a sense of belonging and enhancing the student college experience. Thank you to everyone who participated or supported the event.

Pop-Up Food Pantry

LCC's Pop-Up Food Pantry was established in February 2023 to address the immediate needs of food-insecure students as part of LCC's commitment to student success. The pantry aims to provide students with free, shelf-stable, nutritious food to ensure that hunger does not become a barrier to their education while on campus. To preserve dignity, students are not asked to prove hardship and are not asked to provide their names. Food is available at all campus locations.

Dates of service - Oct. 20-31
Students served 342

Mobile Health Clinic

In conjunction with UM Health-Sparrow Mobile Health Clinic, LCC is addressing the healthcare needs of students and employees through quality, compassionate, free healthcare.

The UM-Health-Sparrow Mobile Health Clinic is staffed with medical providers and clinical support positions who offer a variety of services to visitors, including:

+ Wellness exams
+ Blood pressure checks
+ Sports physicals
+ Influenza vaccinations, subject to availability
+ Patient Education
+ Medical and financial resources

Date of Service - Oct. 2026
Patients served: 14

Constitution Day

To commemorate Constitution Day, more than one hundred LCC students, faculty and community members attended a talk on September 15 by noted journalist and author Tim Alberta, a staff writer for The Atlantic and the bestselling author of "The Kingdom, the Power, and the Glory: American Evangelicals in an Age of Extremism." Alberta discussed the book as well as the contemporary situation of evangelicalism amid today's polarized political climate.

After the talk and a lively Q&A, students and community members lined up to speak with Alberta.

In addition, on September 17, Political Science faculty member Randy Watkins held a trailing conversation on Alberta's talk, plus an educational discussion of the First Amendment's religion clauses with his students. Religious Studies provided invaluable support and encouragement for this event, and the LCC Library also hosted a Constitution Day book display. Free Pocket Constitutions were available to attendees at all events throughout the week as well. Thanks to all who made this event possible and to those who attended.

Operating Engineers Local 324 Apprenticeship Signing

On Tuesday, October 13, Apprenticeship Specialist Kelsey Lorichon attended the Operating Engineers Local 324 and Labor and Economic Opportunity (LEO) apprenticeship signing event in support of the Michigan College Credit for Apprenticeship Program. This initiative offers eligible journeymen who have completed their apprenticeships the opportunity to earn 42–45 college credits toward an associate degree, recognizing the value of their prior training and experience.

The event offered opportunities to experience heavy equipment operation firsthand while networking with representatives from community colleges, the U.S. Department of Labor (USDOL), LEO, MASCI, and MiWorks! The gathering highlighted the value of collaboration among education, industry and workforce partners in expanding educational pathways for skilled trades professionals.

CAMC All Member October Meeting

On Thursday, October 15, Apprenticeship Specialists Kelsey Lorichon and Scott Nigoff

attended the Capital Area Manufacturing Council's (CAMC) All Member Meeting. Presentations highlighted Pratt and Whitney's planned expansion in Lansing, Niowave's progress toward developing a curative cancer treatment, and Dart Bank's financial services and support for local manufacturing companies.

During the meeting, Kelsey and Scott connected with Dominica Palacio, President of Ionetix. They also connected with MiWorks!'s new Career and Education Director, who invited them

to attend the T3 Council meeting on Tuesday, October 20. This upcoming meeting will provide an opportunity to learn more about MiWorks!'s initiatives and explore additional ways to collaborate in support of workforce development and career education.

HBA Connection with Waggoner Financial

On Tuesday, October 13, Apprenticeship Specialist Kelsey Lorichon met with Tobin Zeluff of Waggoner Financial to discuss collaboration opportunities and ways to support students' financial needs. The conversation focused on potential partnership opportunities to connect students with valuable financial resources. Tobin and his team were also invited to tour Lansing Community College and explore opportunities to further strengthen the partnership.

LCC West Campus Apprenticeship Team Builds Industry Connections

The LCC West Campus Apprenticeship Team attended the Home Builders Association meeting at Your Home Solution Experts and connected with industry professionals across the construction field. The team learned more about employers' workforce needs, networked with industry partners and built new relationships to strengthen LCC's connections in the construction industry. These conversations help identify potential apprenticeship opportunities and create pathways to employment for LCC students.

Lineworker Family Day

On Wednesday, October 7, graduating Lineworker students were joined by their families, friends and instructors for Lineworker Family Day. Guests enjoyed a light lunch before watching demonstrations that gave students a chance to showcase the skills they developed throughout the program.

Students demonstrated several hands-on skills, including a hurt-man rescue operation, wire-pulling demonstration and digger derrick work involving a utility pole. The event gave students a chance to share what they learned with the people who supported them throughout the program.

Police Academy Learns Emergency Vehicle Operations

The Mid-Michigan Police Academy spent the week of Oct. 5 learning to safely operate police vehicles in emergency situations. This includes inspecting the vehicle before the shift starts, operating in icy conditions, keeping the car from hydroplaning and handling on dirt roads. Students also learn how to safely handle the vehicle at night. Students also had the opportunity to go to the Michigan State Police track to use some of the techniques learned in a controlled environment.

Fire Academy Completes Live Fire

The week of Oct. 12, the Fire Academy completed the live fire portion of the semester. Recruits are put through scenarios where they have to put out live fires in and around the shipping containers in LCC's Regional Training Center Compound. This is a vital part of the academy because it gives recruits exposure to what they will experience once they are out serving their communities.

ERESA Parents Day

On Oct. 14, students in the Criminal Justice ERESA program put on a mock trial for Parents Day, giving families a firsthand look at what they've learned so far this school year. Students walked through the stages of a trial and showed how the criminal justice courts work. Parents of students in the program attended and watched their learners put classroom knowledge into practice.

LCC Attends CAMC Artificial Intelligence Summit

Members of Lansing Community College's Technical Careers Apprenticeship Team and the Advanced Manufacturing program director attended the Capital Area Manufacturing Council's (CAMC) Artificial Intelligence Summit on Oct. 21 at AgroLiquid's IQ Hub. The summit featured industry experts, technology providers and manufacturing leaders who discussed AI readiness, enterprise resource planning integration, fraud prevention, digital twins and responsible AI implementation.

Representatives from manufacturing companies, including Roberts Sinto, Neogen, Moebius Precision, TiAl and Copper Industrial, shared their experiences implementing AI in their businesses. Hands-on learning sessions explored practical applications of AI in office environments and on the

manufacturing shop floor. Attendees also had opportunities to connect with regional industry partners, including Fraunhofer, the Michigan Manufacturing Technology Center and Apple Manufacturing Academy.

Geospatial Science Program Hosts Guest Speaker - Sanjay Khunger

As part of an ongoing guest speaker series, on October 6, the Geospatial Science Program hosted guest speaker Sanjay Khunger, Chief of Information and Technology for Huron-Clinton MetroParks at West Campus, to discuss the different types of work MetroParks does across a variety of mapping and environmental projects. The talk was aimed at students specifically within the GSCI department, as well as the Drone, Conservation and Sustainability, Geography, Geology, and greater CIT programs, discussing the intersection of using remote sensing and advanced technological information systems alongside conservation and geobiological efforts within the sprawling Park region situated within Livingston County.

Left photo: Hosts Guest Speaker Sanjay Khunger

LCC Technical Careers Connects With Students at Jackson High School College and Career Fair

On Oct. 22, Lansing Community College Technical Careers participated in the College and Career Fair at Jackson High School, connecting with more than 440 juniors and seniors from Jackson High School and Jackson Pathways, an alternative education program. The event gave students the opportunity to learn about educational and career pathways available after high school, including programs that prepare them for careers in technical fields and the skilled trades.

Adult Enrichment

Adult Enrichment has had a busy and successful October. The next section of Creative Welding recently began with 17 students enrolled, demonstrating continued strong interest in the program. Three new gardening classes debuted this month, and the students who participated shared very positive feedback about their experiences. Passport to Retirement continues to experience strong enrollment as well.

Beyond the classroom, Adult Enrichment continues to find ways to connect with the community. This fall, staff will be joining the Youth Program at Boo at the Zoo and Trick or Treat on the Square. These events are a great opportunity to represent LCC in the community and introduce more families to the programs and opportunities available through the college.

Youth Program

The LCC Youth Program has kicked off another exciting session with the Greer Community Center through the new Rolling into Coding class! Greer supports low-income and at-risk youth by providing educational opportunities that build lifelong skills. Hands-on STEAM (Science, Technology, Engineering, Arts, and Math) programs help students explore new interests, develop skills, and build a foundation for the future.

Business and Community Institute

The BCI Trains Dean Transportation in First Aid, CPR, AED, and School Bus Health Care I, II, and III – Various Locations, MI

The BCI provided CPR and School Bus Health Care training to several hundred Dean Transportation School Bus Drivers throughout Michigan. Training included Heartsaver® First Aid, CPR and AED. Dean employees also received customized School Bus Health Care training to prepare them with as many necessary skills as possible to prevent and/or respond to situations they may encounter with their riders.

DEAN TRANSPORTATION

The BCI Provides Leadership Training to the Michigan Department of Technology, Management and Budget

This workshop trained participants to shift from task-completion thinking to a proactive ownership mindset, building the communication, problem-solving and follow-through skills needed to strengthen accountability and collaboration. Through a six-stage experiential journey—using self-reflection, discussion, case studies and team exercises—participants gained practical tools to take personal responsibility, improve working relationships and positively influence team and organizational culture.

MICHIGAN DEPARTMENT OF TECHNOLOGY, MANAGEMENT AND BUDGET

The BCI Provides Medication Aide Certifications Training to Resthaven – Holland, MI

The BCI delivered this comprehensive training program so healthcare professionals can test and become Medication Aides in Michigan. This course combines mandated didactic training with supervised clinical hours, as per requirements of the State of Michigan, to train healthcare professionals to deliver and administer medication to patients in a clinical setting.

Resthaven
faithfully caring.

The BCI Provides Customized Leadership Training to Dewpoint

Utilizing Going Pro Talent Funds, Gestamp selected the BCI to provide custom leadership training at its Lansing location. This training was tailored to the specific leadership needs of Dewpoint and delivered in a seminar style format, this customized leadership training emphasizes conflict and performance management as well as meaningful customer interactions, including dealing with difficult customers and productive hiring interviews. Topics included: Coaching: Bring Out the Best, Conflict Management, Difficult Customers, Interview Techniques: The Fact-Finding Mission, and Performance Management.

The BCI Provides Trainings to Lansing Community College

The BCI delivered Intentional Leadership training over eight sessions for Lansing Community College Organizational Development's Lead Forward 2026 program. This leadership program focused on developing and expanding upon three key leadership attributes: leading self, leading others and shaping our group culture.

The BCI also delivered training to LCC's Technical Careers Division. This course introduced Trust Builders, actions leaders can take to build and sustain trusting relationships, as well as common Trust Breakers that can erode or quickly break trust. Applying these skills to build trusting relationships enables people to take risks, identify and solve problems, and collaborate to achieve business results.

Communication, Media and the Arts and Athletics Partner to Enhance LCC Sports Broadcasting

LCC's Communication, Media and the Arts (CMA) and Athletics Department jointly purchased a new scoreboard data-driven graphics system to enhance live athletic broadcasts and support the Digital Media, Audio and Cinema (DMAC) program.

Following several successful off-air test runs, the system was used during a live LCC volleyball broadcast in October. The new on-screen scoreboard graphic displays team names, scores, set information, and timeouts, giving viewers clearer, real-time information and a more polished broadcast experience.

The collaboration brings industry-relevant production technology into the DMAC environment while supporting Athletics' efforts to showcase LCC teams. Looking ahead to basketball season, the production team plans to expand the graphics operator's capabilities to create more varied on-screen graphics and further improve the quality of LCC sports streams.

This joint investment illustrates how collaboration across college departments can strengthen both instructional resources and the visibility of LCC Athletics.

Tailgating Event

The Office of Student Compliance hosted a tailgating event for the college community to raise awareness of the dangers of impaired driving and to encourage responsible decision-making. Several years ago, we incorporated impairment-simulation goggles and pedal carts into the program, and they have since become a favorite among students. These interactive activities offer participants a safe, hands-on way to experience the effects of impairment and better understand the risks of drinking and driving.

This year, the event welcomed 62 participants, making it another successful opportunity to engage students and employees in meaningful conversations about safety and prevention. We were also joined by Dr. Robinson, whose participation was an unexpected and much-appreciated highlight of the event. Thank you, Dr. Robinson, for being such a great sport and for helping make the program both memorable and impactful!

Dating and Domestic Violence Awareness Event

The Office of Student Compliance's Title IX Team has developed a strong partnership with the MSU Center for Survivors. Together, both organizations collaborate as members of the MSU Sexual Assault Response Team (SART), a multidisciplinary, survivor-centered, trauma-informed, and offender-focused team dedicated to enhancing access to support services, strengthening collaboration among responding agencies, and promoting community safety.

Over the years, this partnership has expanded beyond coordinated response efforts to include educational outreach and awareness programming for our college community. Together, we host events that highlight the resources and support available through the MSU Center for Survivors for both students and employees.

One of our favorite events is Warm Cups and Safe Communities, where participants can enjoy warm cider and donuts while learning about available support services and the importance of fostering safe, supportive communities. This event serves as a meaningful opportunity to connect with students and employees in an approachable and welcoming environment.

This year's event was our most successful to date, with 106 students and employees stopping by to participate. The turnout exceeded our expectations, and we even ran out of cider! Thank you to everyone who joined us and helped make the event such a success.

Marketing Department

Fall 2026 Recruitment

For this fall 2026 recruitment season, the marketing department created new materials based on conversations and

feedback from the admissions team to better meet the needs of the prospective students. One of the focuses was creating three recruitment booklets covering the following areas: Health and Human Services Careers, Technical Careers, and Liberal Arts and Transfer Programs. These booklets share general content about LCC, but each lists the specific degrees and certificates offered in that area, with corresponding photos.

Celebrate Día De Los Muertos

The Hispanic Heritage Awareness Committee hosted Día De Los Muertos (Day of the Dead), a joyful tradition honoring loved ones who have passed, in the Office of Empowerment on Oct. 28. It was advertised via internal channels, on social media, via a flyer and on the LCC website.

New Program and Academic Advisor scheduling system

The LCC Web team launched a new program and academic advisor **scheduling system**, making it easier for students to schedule an appointment with academic advisors.

Academic Terminology updates to "Majors"

The web team has worked alongside other departments to update the terminology used for the college's majors and areas of study.

Biannual lcc.edu Accessibility Audit

The web team has completed the Biannual lcc.edu accessibility audit with remediation recommendations. The remediation has impacted third-party embeds, PDFs, navigation and tables. These fixes have gotten our LCC site to a 97.3% accessibility rating.

Accessibility Audit Summary-10-16-2026.docx

Transfer Center Campus visit scheduling

The web team has worked on the **Transfer Center** campus visits scheduling and signage feed. They fixed up the website calendar, the scheduling system (Calendly), and the digital signage at the Center, which are now all synced. The server updates are also complete, with the server migrating to the latest version following extensive code modernization.

2,719 Reach ·. 244 Engagements

Instagram
4,816 Reach ·. 110 Engagements

Social Media Analytics Key

Total Posts

How many times a video, image, tweet, article, etc., was sent out on a given social media platform that month.

Follower +/-

How many users that decided to follow or unfollow a social media page in a given month for each platform.

Reach

A metric that refers to the number of users who have encountered a particular content on a social media platform.

Total Monthly Reach

This metric is estimated by each platform. It is a give-or-take of how many users in total viewed any content from a social media page that month. It shows roughly how big of a net is being cast.

Average Reach per Post

This is not an estimate like the "Total Monthly Reach" stat. This is calculated by taking the reach for each post that month and then dividing it by the total number of posts that month. It gives an idea of how many users, on average, came across a post from a given platform that month.

Engagements

Engagements are generally defined as when someone interacts with a post. What constitutes an engagement varies by platform. Examples of engagements include liking a post, commenting, sharing, saving, clicking on a link, clicking on an image, or re-sharing a post.

Total Engagements

The total sum of engagements for each post from each platform in a given month.

Average Engagements

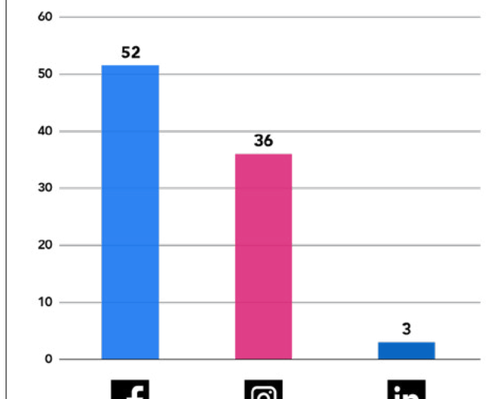

'Total Engagements' divided by 'Total Posts' for each platform. Gives an idea of how many interactions from users/followers one could expect for an average post during the month for the specified platform.

Engagement Rate

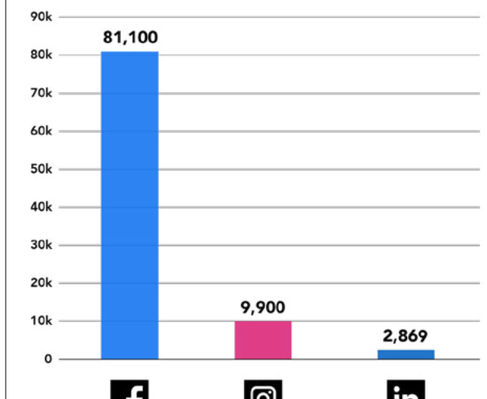

Also referred to as Engagement Rate by Reach (ERR). This divides the 'Average Engagements' metric by the 'Average Reach per Post' metric. Essentially, this measures the percentage of users who chose to interact with a post after seeing it on the specified platform.

The following is a breakdown of how LCC performed on our social media channels in September.

Biology Faculty Appointed to Statewide Role

Biology Faculty Sunil Nityanand has been appointed to serve as Community College Liaison for the Michigan Physiological Society, a state chapter of the American Physiological Society.

The position offers an opportunity to build stronger connections between community colleges and four-year institutions while creating pathways for students to explore further education and careers in physiology and related fields. It also provides a means to strengthen the voice, visibility and participation of community colleges within the physiological sciences across Michigan. Equally important, the role creates opportunities for faculty collaboration across institutions, including the exchange of ideas and expertise in pedagogy, instructional technology, curriculum design and emerging educational practices. These connections can help build a stronger statewide community of physiology educators while supporting innovation in teaching and student learning.

Faculty Member Attends Conference about Environmental Outdoor Education

From Oct. 2-4, Faculty Lu Anne Cuthbert attended the Michigan Alliance of Environmental Outdoor Education (MAEOE) conference in Flint, Michigan. Her participation was supported by a generous grant from the LCC Foundation.

As a first-time attendee, Cuthbert found the experience both rewarding and worthwhile. Her primary goal for attending was to discover activities and teaching strategies that could be incorporated into courses offered at LCC, including BIOL 120 (environmental science), BIOL 128 (organismal biology), GEOL 230 (environmental geology), and ISCI 131 (Integrated Physical Science). She was not disappointed, returning with numerous ideas and valuable new contacts.

Conference activities included an urban heat island scavenger hunt and an exercise that used a map of St. Louis, Missouri, to demonstrate temperature differences across urban, rural and riverside environments. Another activity involved creating an animal tracking station near the Flint River using peanut butter in an area of sand, allowing participants to observe and identify animal tracks. One particularly engaging presentation showcased a game designed by Calvin College that teaches about trophic levels and ecosystem changes through time. The game compares ecological conditions before settlement (1700s), where abundant habitat was available, with more recent times in which habitats have become increasingly limited.

Friday's keynote speaker, from the Michigan Department of Natural Resources, talked about the successes of the state's sturgeon project. The conference concluded on Sunday with a trip to the Genesee For-Mar Nature Preserve that included breakfast, a hike and additional educational activities that can be utilized in and outside of the classroom.

LCC celebrated National Financial Aid Day on October 21 with CFO Don Wilske and the Financial Aid team, recognizing the vital work these professionals do every day to make higher education possible for our students.

Let's Talk – Voices Unveiled

The Office of Empowerment (OE) hosted a "Let's Talk – Voices Unveiled" event titled "Between Cultures." Moderated by Tanya McClain, the panel featured KyLee Carter and Esperanza Meisch and created space for open dialogue and reflection on navigating multiple identities and experiences. The discussion explored themes such as the pressure to choose among parts of one's identity, the influence of culture and family traditions, and how schools and workplaces can better support multicultural identities.

Women Inspiring Scholarship through Empowerment (WISE),

The OE hosted an introductory event for WISE. Dawn Hardin opened the event by discussing vision boards as dynamic tools for visualizing future aspirations. Students created vision boards, vision bags for artifact collection, and affirmation boards as a reminder to empower themselves.

Shaking the Table: Centering the Voices of Identity Center Practitioners

On October 7th, the OE training team participated in a virtual professional development workshop hosted by the University of Michigan, titled "Shaking the Table: Centering the Voices of Identity Center Practitioners." The workshop examined the essential role identity center professionals play in fostering belonging, advocacy, and support for students with marginalized identities. Panelists shared personal stories and strategies on leadership, resilience, and healing, and discussed both the visible and invisible labor this work requires. The session also addressed the challenges of sustaining this work within institutions, the importance of boundaries, and the need to build supportive communities that enable continued commitment, healing, and growth.

Movies that Matter: Rumble: The Indians Who Rocked the World

The OE hosted a "Movies that Matter" screening of Rumble: The Indians Who Rocked the World. The documentary explores the significant influence of Native American musicians on rock and popular music, highlighting artists such as Link Wray, Jimi Hendrix, Buffy Sainte-Marie, Robbie Robertson, and Jesse Ed Davis. The film sheds light on an often-overlooked part of music history while encouraging reflection on cultural representation, identity, and the importance of recognizing Indigenous voices and contributions.

Indigenous Peoples' Day Celebration

On Monday, October 12th, Tanya McClain attended the Indigenous Peoples'

Day Celebration hosted by the City of Lansing, representing the OE at Lansing City Hall. The event ran from 4:30 to 7 PM. and featured traditional Indigenous drumming, singing, and dancing in the City Hall lobby. The celebration honored Indigenous culture, history, and resilience and brought the community together to recognize the importance and contributions of Indigenous peoples from across the nation.

People Friendly Classroom

On Tuesday, October 13th, James Garner attended the People Friendly Classroom meeting, where he also facilitated a group discussion. The session focused on students' perspectives on classroom setup and teaching practices, featuring thoughtful conversations about creating better learning environments, inclusion and exclusion, hidden barriers, and the factors that empower students to speak up and feel heard at LCC. The event encouraged open dialogue and collective reflection among students and staff.

OE Inspiring Confidence

On Wednesday, October 14th, Tanya McClain sat in the audience as an anxious LCC student delivered a PowerPoint presentation with the Office of Empowerment. The student argued that the elephant, not the lion, is the true king of the jungle. By showing up for students during moments like these, the OE helps build confidence and reminds students that they have support as they work to overcome barriers and achieve their goals for future success.

RISE

The OE training team delivered the second session of their Empowered to Rise learning series, titled Empowered to Rise Through Culture in Action. The training invited participants to explore the importance of cultural open-mindedness and how it shapes inclusion and belonging at LCC. Attendees engaged in meaningful discussions about what culture is, why it matters personally and collectively, and how institutional culture connects the community to LCC's values. The session encouraged students to share parts of their backgrounds, practice open-mindedness, and develop critical interpersonal skills, tools that will help them succeed both during their time at LCC and in the wider world. Registration was encouraged, and all were invited to join this enriching and interactive experience.

LUCERO

The OE hosted a Latinos Unidos con Energía, Respeto y Orgullo (LUCERO) event to celebrate Hispanic identity, pride, and cultural affirmation. Guest speaker Florensio Hernandez from Michigan State University's Office of Institutional Diversity and Inclusion (IDI) discussed getting involved in organizations and events at MSU and encouraged everyone to keep asking questions and staying curious. Lorenzo Lopez spoke from the heart about the power of voting and building coalitions, especially in communities where Latinos are a minority, and reminded us of the importance of using our voices and embracing bilingualism. Florensio also invited students to explore leadership opportunities with Culturas De Las Razas Unidas (CRU), MSU's organization for Hispanic and Latinx students. Alongside conversations about community, democracy, and cultural traditions such as the December pilgrimage for Nuestra Señora de Guadalupe, there was space for students to share their backgrounds and beliefs. One student offered her perspective on paganism and shared that both Kemetism (Egyptian mythology-based) and Sanatana Dharma (Hindu mythology-based) faiths are part of her journey, which resonated with the event's welcoming spirit. Lunch was provided, and by the end of the day, it was clear that the sense of belonging, openness, and pride at LUCERO made everyone feel like an important part of the community, regardless of ethnicity.

Hispanic Leaders Conversation and Reception

The OE hosted the Hispanic Leaders Conversation and Reception from 5:30 to 7 p.m. The event was a listening session facilitated by Tanya McClain, featuring updates from President Steve Robinson on LCC's ongoing commitment to Hispanic students and community members, as well as remarks from Trustee Garcia. The reception fostered meaningful dialogue on current issues, needs, and resources available in the community and at LCC. Many attendees stayed until 9 p.m., continuing to connect, share ideas, and strengthen relationships well into the evening.

Men About Progress (MAP)

The OE hosted a MAP event, a mentorship program focused on helping students build connections and grow personally and academically. Guest speaker Akeem Green, a social worker, therapist, and poet, opened with one of his original poems reflecting on changes he has seen over time, from family dinners to airport goodbyes and old Blockbuster nights.

The discussion sparked nostalgia, with Dawn Hardin reflecting on the creativity kids find even in simple cardboard boxes and Tanya McClain reminiscing about close-knit neighborhoods where everyone knew each other. Akeem encouraged everyone to share the changes they've noticed since childhood. Students also opened up about the value of OE in helping them find and maintain meaningful friendships during challenging times, making the event a powerful reminder of how important community, connection, and creativity are in our lives.

John Green Day

The OE's One Book, One LCC program celebrated John Green, focusing on his book The Anthropocene Reviewed. The event was filled with creativity, storytelling, and reflection as participants explored their connection to the world through interactive activities. Highlights included a Bookmark Bar for designing personalized bookmarks, a "Rate Your World" station where everyday experiences were rated on a five-star scale inspired by the book, and the "Add-A-Line Story" activity, which encouraged collaborative storytelling in John Green's imaginative style. The day also featured a "Movies That Matter" screening of Turtles All the Way Down (2024) and a film discussion. The celebration invited the LCC community to connect, share perspectives, and enjoy the power of literature and imagination together.

International Pronouns Day

On Wednesday, October 21st, the OE celebrated International Pronouns Day by offering pronoun pins to anyone interested, demonstrating support for a more inclusive campus community. By encouraging the use and respect of personal pronouns, OE continues to create spaces where everyone feels seen, valued, and respected.

Empowered Voices Karaoke

The OE hosted an "Empowered Voices Karaoke" event from 4 to 6 PM. The event opened with Norma Contreras performing a traditional Hispanic Heritage song, with Estefan Villarreal accompanying on a few songs. Attendees were invited to sing, cheer on friends, and enjoy refreshments in a fun, welcoming atmosphere. Although many were nervous at first, participants bravely took the stage, with some even returning multiple times, making the night a celebration of confidence, community, and shared joy.

Walk a Mile in Their Shoes

On Tuesday, October 27th, Esperanza Meisch and Estefania Reyes-Reynoso of the Office of Empowerment took part in the West Campus Empowerment Committee's Walk a Mile in Their Shoes, a breast cancer awareness event. Participants were encouraged to walk together in support and solidarity, take part in a scavenger hunt and trivia contest, and wear pink and unique shoes to earn tokens. The top three participants with the most tokens were awarded prizes. The event offered an opportunity for connection, awareness, and reflection, whether participants were walking in honor, memory, or support.

A Star is Hired!

Check out this monthly section highlighting our newest employees, who were hired in October.
