#### *Online collaboration as career preparation:*

- Reflects common workplace practice (even in traditional F2F offices).
- Must be adapted to discipline-specific needs (e.g., coding vs. music).
- Avoid splitting class cohesion with uncoordinated platform use.

#### *Organic student solutions:*

- Students self-organize on platforms like Snapchat.

#### *Instructor strategies:*

- Use Kaltura intro videos (avatars optional) to build familiarity.
- Welcome student suggestions for preferred communication tools.

#### *Student tech feedback:*

- Mixed reactions to WebEx.
- "Death of D2L Discussion Board": low engagement without strong faculty guidance.

#### *Social/emotional insights:*

- Many students feel isolated; desire connection.
- Faculty must foster connection carefully.
- Concern around reliance on external platforms.
  - Encouraging required phone calls or structured discussions can help.

#### *eLearning and tech coordination:*

- Communication gaps between faculty expectations and student experience.
  - Interface differences may confuse students.
  - Students often don't report issues.
  - Can reduce trust in faculty competence.
- **Possible Solution:** Faculty proactively acknowledge tech limitations and encourage student outreach.
- eLearning can support individual faculty needs, but no one-size-fits-all solution.

#### *CASL can explore supporting tools:*

- Assess tool availability, ITS approval, accessibility, and integration feasibility.
- Create recommendation list for faculty.

#### **Collaboration Tools Discussed**

- **Webex** – Student access available; supports recorded team meetings.
